Mr. G. SENIOR insisted that there was a serious distinction between a landlord's and an ordinary debt; and he mentioned a case in which, seven days before rent was due, a tenant sold his furniture by auction and absconded.—Mr. F. WILSON would obviate the liability of the landlord to fraud by having rents paid in advance, as he had.—The PRESIDENT traced distraint to feudal origin.—Mr. TEBBUTT remarked that the number of landowners in the country was unquestionably decreasing. The special disability of a landlord was of his own creating. That a landlord chose to let upon credit was no reason why the law should be called upon to protect him.

'On Inventors and Inventions,' by Mr. G. B. GALLOWAY.—After various introductory remarks, Mr. Galloway said: "Here in this ancient town of Nottingham, converging centre of much commercial manufacture, birthplace of as great an inventor as ever lived, I would say in this our age,—I mean the late Samuel Hall, the father of steam-surface condensation, and many other valuable inventions,—would I seek to promote a better state of things, so that inventors may at least live by their talents, and see in their lifetime that their inventions are appreciated. James Watt, the father of steam-engines, struggled for nearly nine years mending and making surgical instruments in a small shop in Glasgow before he was appreciated, or as a practical man known. The late George Stephenson, my good old master, whom I worked for when a boy at *canny* Newcastle, took out several patents, struggled on for many years, had his house burnt down, lost his all; and as he said to his wife Fanny, 'I say, lass, I cannot afford to pay the coach to Darlington, so I mun just take shankie naggie (that was a stick in his hand), and I'll get there somehow.' Well, he got there, and met with George Pease, and we see the result; and who, I ask, can fully estimate it? Take others—as many as you please. Get Smiles's works, and read them with attention; his industrial biographies,—his 'Lives of the Engineers,' study the mottoes in the books, and you will find in every age the 'most valuable men' have been neglected. But let me come nearer still. Take the practical life of Mr. Henry Bessemer, whose invention has now reduced 'steel' in price from 50l. to 13l. per ton, and so saved—and will save—millions of pounds sterling, whose genius has enriched many a family, given work to thousands of men. He himself may tell you how, just like George Stephenson, until he at last found friends, he did not succeed. I suggest that the balance of the money which honestly belongs to the inventive class, amounting now to 100,000l., above the expenses of the patent offices and machinery connected therewith, should be applied

as the foundation of a fund to develop practical inventions, and let the results of such experiments from approved inventions be published as they are completed, and let inventions be proportionably paid or rewarded in accordance with the value of their plans. I would further suggest that the Government of England should equitably reward or pay inventors for the plans which have been by them supplied and adopted by the Admiralty, and that the Government should provide for the descendants of such men as Samuel Hall, who spend their lives and property in the promotion of plans which confer such commercial advantages."

Mr. STUBBINS disputed the right of the inventor to insist upon society finding a dry nurse for him, and asserted that the man whose business capacity applied a patent, was entitled to proportionate remuneration. He should be glad to see patents done away with.—Mr. GALLOWAY, in reply, would solve all difficulty by placing the surplus Patent Fee Fund at the disposal of the British Association, with whose verdict everybody would be satisfied. Inventors could no more stop inventing than hens from laying eggs. The fruits of Samuel Hall's invention were reaped by a brother, who left a quarter of a million, whilst the inventor died destitute.

'On the Occupation and Ownership of Waste Lands,' by Mr. F. WILSON.—The colonies having large tracts of land which they bring into cultivation, the question arose on what terms they should be transferred to the public. According to the laws of England and her colonies, the country belonged to a few, and the rest lived on sufferance. We had no right to bind posterity beyond the limits of necessity. All land belonged to the community, the Government of which had no power to sell, but simply to let it for the benefit of the community and the occupiers who were anxious to cultivate it. Therefore, all lands should be let at an annual rental of 10l. per cent., or the produce of the farm with a permanent right of possession, so long as the land might not be required by the community for more important purposes, when the full value should be paid to the occupier for all the improvements he might have effected in the property. No person shall have power to hold another person as tenant, provided such person is willing to pay on the land he may farm for such improvements as have already been expended, thus becoming the proprietor. The result of such a system would be, that no occupier of land would sublet it to a tenant, but farm it himself. Should he have more than he could farm, he would surrender it for sale, and therefore the farms would be large and productive, and the inhabitants of villages and towns claiming through the corporation such lands as they may require for building purposes, paying of course to the occupier the full value of his improvements, would not, as in England, be crammed into narrow streets (for example, this very town of Nottingham) and miserable cottages, but would have creditable homesteads, which they had been enabled to purchase at a reasonable price, still paying the increased ground-rent to the State on the increased value of the soil.

Prof. LEONE LEVY said there was a large quantity of waste land in Scotland, the holding of which was an abuse by territorial despots, who prohibited building, and removed population by wholesale evictions.—The PRESIDENT called the Professor to order.—Mr. H. BROWN said that the enclosure and occupation of waste lands was going on rapidly around Nottingham, so that its increasing population was being gradually hemmed in. It seemed as if private rights were trespassing more and more upon public ones. Every man who was a pedestrian was interested in this matter. Year by year enclosures were being made by Act of Parliament; and it was a practical question by what means private landowners could be prevented encroaching on public rights.—The PRESIDENT stated that Berkshire afforded a striking illustration of the fact that the number of the landowners was diminished and diminishing. There were now in that county fewer voters than there were freeholders before the passing of the Reform Bill.

'On the Practicability of employing a Common Notation for Electric Telegraphy,' by Mr. J. G. JOYCE.—The author proposed a very elaborate

scheme for the establishment of a system of international electric telegraphy. He suggested that numbers should be used instead of words, the suggestion being derived from the fact that signals between ships of different nations were made by means of numbers.

SECTION G.—MECHANICAL SCIENCE. SATURDAY.

Mr. FLEMING JENKIN gave a description of a New Arrangement for picking up Submarine Cables.—This machinery was intended to limit and regulate the strain which could possibly be brought on a submarine cable or rope attached to it while being hauled on board by the ordinary drum driven by a steam-engine. During this operation it had been hitherto necessary to watch the cable carefully, regulating the speed of the engine so as to keep the strain, as shown by the dynamometer, below that which was considered safe. It was further necessary to be ready, at an instant's warning, to stop the engine in case the cable fouled any part of the ship; and the author had seen a cable broken owing to the impossibility of stopping the engine soon enough. Moreover, even when the above precautions were taken, it was impossible to avoid a considerable variation of strain, due to the pitching of the ship, which alternately slackened and lengthened the cable as it hung vertically; and in most cases in the author's experience cables, while being picked up in great depths, had broken from this cause. All these dangers were avoided by the machinery invented by the author, of which two models were shown. These two forms were identical in principle. A spur-wheel, fast on a main shaft, driven by the engine, geared into another spur-wheel centred in the periphery of a brake-drum, loose on the main shaft, and restrained from turning by an Appold's brake; the second spur-wheel in one form geared directly into an internal-toothed wheel bolted on to the picking-up drum, which was also loose on the main shaft above mentioned. When the brake-drum was stationary, the engine simply drove the brake-drum through the spur-wheels in the ordinary manner; but when the strain on the cable reached the amount corresponding to that given by the weight restraining the brake-drum, the picking-up drum ceased to revolve, because the brake-drum turned instead, carrying round the second or intermediate spur-wheel, which rolled inside the internal-toothed wheel, instead of driving it; the centre on which this intermediate spur-wheel worked might be looked on as a fulcrum, and the wheel itself as a lever, by which the engine pushed round the picking-up drum: if the fulcrum yielded, the weight could not be lifted. The second form of model was exactly similar in principle. A second intermediate wheel, of different diameter, fast on the same shaft as the first, geared into an external-toothed spur-wheel connected with the picking-up drum. The action was identical with that already described. If the strain increased beyond that required to stop the picking-up drum, it would turn in the other direction, and the cable would be paid out instead of picked up, although the engine would continue to run in the same direction as before, and exerted the same power. In practice, as was shown by the models, the engine might be driven at any speed; the cable would only be subject to the strain chosen, which might be increased or diminished at will; it would come up quicker or slower as the ship fell or rose; it would stop wholly if the cable fouled; it would be paid out if, from inattention, the ship drifted out of position, or from any other cause the strain increased on the cable. More than this, the cable might actually be paid out as the ship rose, and picked up as it fell, and the whole would take place with perfect smoothness and constancy of strain. The Appold brake gave a constant restraining power to the brake-drum, whatever the coefficient of friction might be. The gear exhibited formed at once a paying-out and picking-up machine. It might be termed an accurate slip-coupling, and could be applied to many purposes—as, for instance, to the measurement of steam power let out. With one of these couplings on the transmitting shaft, it would be impossible to over-

load the shaft. Similarly, the coupling would serve to prevent a break-down in cases where the machinery was liable to sudden starts or stoppages. It would prevent undue strains on the ropes of collieries and lifts, and other applications would readily occur to mechanical men.

A paper written by Mr. R. MUSHET, 'On the Treatment of Melted Cast Iron, and its Conversion into Iron and Steel by the Pneumatic Process,' was read.—The author claimed as his invention the use of manganese and Spiegel Eisen in perfecting the Bessemer process; and asserted his moral claim, if he had no legal one, on Mr. Bessemer for having rendered the process a success.

Mr. BESSEMER did not admit this claim, pointing out that the use of such materials was well known previously; and, at the request of the President, gave an interesting account of the progress made in the Bessemer process up to the present time.

MONDAY.

Mr. S. J. MACKIE read an interesting and important paper, 'On Zinc Sheathing for Ships.'—Iron ships are subjected to a great amount of corrosion, and are also so liable to foul, that sailing ships of iron cannot be sent on long voyages. Copper sheathing, or Muntz's metal, cannot be applied to iron ships as it is to wooden ones, because the iron being positive to copper, electrical action would be set up, by which the iron would be destroyed at a greatly increased rate. If, then, a metal were found which should be positive to iron, when the two metals were in contact in sea-water, the conditions of the voltaic battery formed by the iron ship and its sheathing would be reversed, and the sheathing would be destroyed while the iron would be preserved. A further condition was required to be satisfied, namely, that the metal forming the sheathing should not be destroyed too quickly, but only sufficiently to prevent the growth of animal and vegetable parasites by the slow but constant scaling of the surface. Such a metal was zinc, the cost of which was about two-thirds that of copper, and the electro-chemical action upon it was not only so slow as not to exceed the action of salt water upon the copper sheathing on a wooden vessel, but this action it was possible to control within certain limits. These results had been confirmed by careful experiments made under the direction of the Admiralty at Portsmouth, where zinc-sheathed iron plates had been submerged for eighteen months, and had been taken up bright and clear of any kind of fouling whatever. The method had been invented and patented by Mr. T. B. Daft, C.E., who had also devised a plan for the construction of iron ships, by which, instead of close fitting butt-joints, the plates were lap-jointed on to a back strap, with an intervening space of about an inch wide, which was filled with a caulking of compressed teak, into which the nails were driven for fastening the zinc sheathing to the hull of the ship. By this plan of construction a flush surface was obtained, while the strength of the ship would be increased, and as fouling would be entirely prevented by the zinc sheathing, iron ships could hereafter be sent on the longest voyages. One of the commercial results of this application of that sheathing would therefore be the doubling of the iron-ship-building trade through the demand for iron instead of wooden sailing vessels.

In the discussion Prof. RANKINE, Mr. FAIRBAIRN, Admiral BELCHER, Mr. F. A. ABEL, and other competent authorities spoke very favourably of the plan.

Mr. C. VIGNOLES read a paper, 'On Barytic Powder for Heavy Ordnance,' communicated by Capt. Wynants, of the Royal Belgian Artillery.—This particular kind of powder has been much experimented upon, both in Belgium and in France, with a view to counteract the injurious effect which is produced when large charges of powder are used in heavy ordnance. The principle on which this barytic powder is compounded is simply that of substituting nitrate of barytes in the composition of the gunpowder, instead of saltpetre, in certain proportions, the consequence being that the powder, when ignited, consumes more slowly, and the gases are developed less rapidly,

than in ordinary gunpowder, while the same effect is produced upon the projectile as regards its ultimate velocity. This lessens the injurious effect upon the sides, vent and chamber of the piece of artillery. Capt. Wynants entered into the details of a very large number of experiments made with this powder. The general result to be deduced from these experiments is, that we have to choose between imparting a higher degree of velocity to the projectile, at the risk of damaging the piece more rapidly and more considerably, confining our attention to the American plan of projecting heavier shot at a lower velocity. The preponderating feeling in the minds of English engineers and artillerymen, and particularly of sailors, is for a higher degree of velocity with smaller weight of shot. The question is an extremely interesting one, and has excited considerable attention both in Belgium and in France, as it is done in Prussia and America. If these experiments could be continued, we should obtain some very useful information on the subject. Capt. Wynants considered that the principal difficulty in dealing with the present enormous artillery arose from the too rapid consumption of the powder, by which the generation of gas was so rapid that the interior of the gun was destructively affected before the projectile was moved. Capt. Wynants found this by substituting nitrate of barytes for saltpetre in the composition of gunpowder the rapidity of the combustion was reduced without the propelling force of the powder being diminished—in fact, the propelling force was rendered more uniform in action.

Mr. F. A. ABEL would prefer to regulate the rate of the combustion of the powder by mechanical means, such as by increasing the size of the grain, and by subjecting the powder during its manufacture to high pressure. Thus, the power of the powder would be preserved, while its destructive effect on the inside of the gun would be in a great measure done away with. When Capt. Wynants first brought forward his invention, he distinctly stated that the powder to which the nitrate of barytes was added fouled so much that it could only be used for blasting purposes. This would be a great objection to its use in rifle ordnance. He did not think that the direction taken by Capt. Wynants was one likely to be pursued by practical artillerymen, whose object should be, not to alter the chemical composition of gunpowder, but to effect such mechanical improvements in its manufacture as would render its combustion less rapid.—Mr. H. BROWN remarked that if the nitrate of barytes left a larger residuum it would certainly be unfit to be used in rifles. Could not the powder be exploded, as in the needle-gun, in front?—Mr. ABEL said that Capt. Wynants did not intend that his powder should be used for small arms, but only for heavy ordnance. He did not believe that any advantage was gained by igniting the powder from the front.—Capt. NORRIS said he went to Belgium for the purpose of seeing the experiments which had been referred to by Capt. Wynants in his paper. The Belgian officers with whom he had conversed on the subject agreed that there was a good deal in what Capt. Wynants had done; but they said they should prefer for large ordnance a new powder, something like that made in this country, but of a very large grain. Having had much experience on the subject, he could say most distinctly that the gunpowder manufactured in this country—not only by Government, but by our private firms—was of a far superior quality to that made abroad. He had made numerous experiments in order to find out the best method of applying the ignition, and he had ascertained that it could not be applied more disadvantageously than in the front. The best place to apply it was at four-tenths of the length of the charge from the rear.

'On the Application of the Expansive Power of Moistened Vegetable Matter to the Raising of Weights,' by Admiral Sir E. BELCHER.

'On Steam-Boiler Explosions, with Suggestions for their Investigation,' by Mr. H. DIRCKS.

'Description of a Newly-invented System of Ordnance,' by Mr. W. D. GAINSFORD.—The projectile thrown by the proposed gun is a sharp-

edged disk, formed by the junction, at the basis of the frusta, of two equal and similar cones. Each frustum is half the height of the original cone, and each cone is one-third its base diameter in height. Consequently, the major is three times the minor axis. The disk is fixed in an upright direction, and the rotation is upon the minor axis. To propel this projectile a gun is used, which internally consists of two parts, a chamber for the powder and the barrel or receptacle for the shot. The barrel is very short, so that when loaded the front of the disk is level with the mouth of the gun. Direction is given by the close fitting of the sides of the barrel to the disk, rotation by a pin passed through the barrel in a horizontal direction, in its lower part, so as to take hold of a notch cut in the edge of the disk. It is thus evident that the disk, on leaving the gun, will acquire a rotation equal in speed at the mouth to the speed of the disk itself where it last touches the catch. By putting the catch nearly under the centre of the disk, a speed of rotation of the periphery nearly equal to the initial velocity of the projectile would be obtained. As, however, much less than this will suffice to keep the axis of the disk at right angles to its line of motion, the catch is placed further back, and offers but little resistance to the exit of the projectile. Thus an efficient rotation is obtained without friction; and from the absence of friction great initial velocity is obtained; and the recoil being small, from the same reason, large charges of powder may be used. A long maintenance of the velocity is ensured by the shape and rotation of the disk, which is more adapted for retaining its velocity than a conical or bolt-shaped shot. The recoil is small from the absence of friction, which in rifled guns amounts to from one-third to one-half the power employed. In the proposed gun the only recoil is that due to the simple propulsion of the shot. An experimental gun has been made on this principle, throwing a shot of 4 lb. 2 oz. The charge used was one-eleventh, or 6 oz. of powder. The first shot was fired from H.M.S. Cambridge, the gunnery ship at Devonport, at the target in the creek, a distance of 1,000 yards. The rotation was perfect, and the direction excellent. The gun was again fired from Bovissand, Devonport, and gave a range of 2,000 yards first graze with the same charge. Had the construction of the gun allowed a heavier charge of powder, no doubt a much greater range would have been obtained. Further experiments were prevented by the cracking of the gun at the muzzle.

'Description of an Invention for Locomotive Adhesion,' by Mr. W. D. GAINSFORD.

TUESDAY.

Mr. J. DAGLISH read a paper 'On the Counterbalancing of Winding Engines.'—It will be readily apparent, on a consideration of the subject, that the working strain on any winding engines not fitted up with some counterbalancing apparatus must vary greatly at different stages of the winding; and this is especially the case in deep pits, where the weight of the rope itself frequently exceeds that of the load to be drawn. This seems so self-evident that attention need hardly be drawn to it; and yet, although in the northern coal district the system of regulating the load on the engine by counterbalancing apparatus is widely adopted, in other parts of England it is the exception instead of the rule. The author gave a description of the counterbalances now in use, and reviewed the action of the different systems, more especially that of the most usual method of counterbalancing weights descending on a staple.

'Description of the Means employed for Removing and Replacing in a New Position the Iron Columns of a Fire-proof Cotton Mill,' by Dr. W. FAIRBAIRN.

'On Rotary Engines, with Special Reference to one invented by Mr. W. Hall,' by Mr. G. D. HUGHES.

Mr. HOOPER read a paper 'On the Electrical and Mechanical Properties of Hooper's India-rubber Insulated Wire for Submarine Cables.'—The author described the method by which he secures the durability of his rubber. Its high degree of insulation was pointed out, and its durability under very trying conditions, over long periods of time, confirmed by experiments con-

ducted by Sir Charles Bright, Capt. Mallock, and others. It was stated that Mr. Latimer Clark had found it unnecessary to ship Mr. Hooper's cables in water-tanks; and the Ceylon cable, now on its way out, is coiled dry. The inductive capacity of Mr. Hooper's wire remains practically the same at all temperatures, while that of gutta-percha increases considerably at 100° Fahr. Diagrams, representing the effects of pressure and immersion, were shown, from which it was seen that pressure improves the insulation of his wire in the same way as is observed with gutta-percha. The result of carefully-conducted experiments, extending over three years, proves that the absorption of water is so small that the most refined electrical tests failed to discover it.

'Improvement in Pontoon Trains,' by Mr. G. FAWCOT.

'On the Action and Effect of Flame in Marine Boilers,' by Mr. N. P. BURGH.

MEETING FOR THE ENSUING WEEK.

TUESDAY. Horticultural, 3.—General Meeting, and Lecture.

FINE ARTS

The Anatomy of Foliage. Photographs of Forest Trees. Parts V.—VIII. (Brighton, Hatton.)

Mr. Thomas Hatton, Ship Street, Brighton, has published the fifth, sixth, seventh and eighth parts of his 'Anatomy of Foliage,' comprising the Spanish chestnut in summer and in winter, and likewise the "beech," "ash," and "lime." Mr. Hatton continues to select worthy specimens of arboreal forms, not the most gigantic or the most quaint; to do otherwise would be contrary to the purpose of the book, which is to illustrate the general characters of the trees in question, not their monstrous forms. Doubtless he might have found a better, that is, a younger, specimen of the Spanish chestnut than that he, in the first instance, copied from Buxted Park, Sussex. This seems to have been felt, as we have received a second illustration of the same kind of tree, taken from a finer example than the former. The new specimen is beautiful to the highest degree, and eminently characteristic. The "ash" was selected from Hainaker Park, Goodwood,—the "lime" from a superb example in Boxgrove churchyard. The series of photographs from the principal forest trees of Britain is thus ended—we cannot say completed—as proposed by the publisher. The photographs are admirable. The sole defect of the work is, that it is not more comprehensive.

A few weeks since, when reviewing a series of these photographs from trees, we quoted the word-wealthy catalogue of Spenser's 'Faerie Queene,' Book I., canto 1, stanzas viii. and ix. We do not know if the obvious extent of the Elizabethan poet's debt in this matter to Chaucer has been noticed. It is worth while, so characteristic are the changes that have been made by the less ancient bard, to put together the thoughts and words of both. Thus, Spenser:—

The trees so straight and bay;
The sayling pine; the cedar proud and tall;
The vine-proppe elme; the poplar never dry;
The bulder oake, sole king of forest all;
The aspine good for staves; the cyprusse funeral;
The laurell, meed of mightie conquerours
And poets sage; the firre that weepeth still;
The willow, worne of forlorne paramours
The eugh, obedient to the bender's will;
The birch for shaftes; the sallow for the mill;
The mirrhe sweete-bleeding in the bitter wound;
The warlike beech; the ash for nothing ill;
The fruitful olive; and the platane round;
The carver holme; the maple seldom inward sound.

—Now Chaucer, 'Assembly of Fowles,' stanzas xxiv., xxv., xxvi. and xxvii. Scipio Africanus meets the poet in a dream, and leads him into "the blissful place," which is thus described,—"a curious picture of a garden in the "Dark Ages":—

And with that my hand in his he toke anon,
Of which I comfort caught, and went in faste.
But Lord! so I was glad and wel begon!
For over alle, where I mine eyen cast,
Were trees clad with leaves that ale shal last,
Eche in his kind, with colour fresh and grene
As emeraude, that joy it was to sene.

The bilde oke; and eke the hardy ashe;
The pillar elme, the cofre unto caraine;
The boxe pipe tree; holme to whippes lashe;

The sayling firre; the cipres dethe to plaine;
The shooter ewe; the aspe for shaftes plaine;
The olive of peace; and eke the dronken vine;
The victor palme; the laurie too, devine.

A garden saw I ful of bloomed bowls,
Upon a river, in a grene mede,
There as sweetnesse evermore inough is,
With floures white, blewes, yelows, and rede,
And colde welles streames, nothing dede,
That swommen fulle of smale fleshes light,
With finnes rede, and scalles silver bright.

On every bough the birdes heard I singe,
With voice of angel in hir armonie.

The elm is still the staple for coffins; the box for musical pipes; the holm oak (*Quercus ilex*) is still used for whips and for inlays. Whether the epithet "sailing" is applied to the pine or fir on account of the peculiar motion of its branches when the wind blows strongly through them, or because the tree is used for ship-masts, the reader will decide. As to the "warlike" beech, the tree being sacred to Jupiter, not to Mars, we guess the poet was reminded of polished steel by its round, white, smooth, and shining bark; hence a tree so clad, and gleaming with dusk of many boughs, put him in mind of a man in armour. It is needless to carry the search for originality in this matter further back than to Chaucer; no great trouble would indicate an earlier poet in the French tongue.

FINE-ART GOSSIP.

Mr. Pennethorne has prepared two designs—one Classic, the other Mediæval North Italian—for the proposed buildings to be erected at Burlington Gardens for the University of London. Those works were submitted to Lord John Manners, who has decided in favour of the latter. The edifice will be 220 feet long, to front the Gardens, with a centre of 110 feet, and wings respectively of 52 feet; a campanile, with a pyramidal roof, flanks each end of the central portion,—the former being about 50 feet high, and the latter having double that altitude. The central façade consists of five openings in an arcade, 20 feet in height, segmental; five large pointed windows supply light to the first floor; the roof shows dormers. In each wing is a lecture theatre, lighted by large triplet windows; beneath these, externally, the wall is panelled with coloured marbles. Excavations will be at once commenced for the foundations. The much-be- praised brick screen to the courtyard is to be, we are glad to hear, removed. The architects who will display their powers on this spot are Messrs. Banks & Barry, Pennethorne, and Sydney Smirke.

Mr. Weekes's bust of Mulready,—a memorial to the artist, mostly subscribed for by artists,—has been placed in the entrance-hall to the National Gallery.

At last, after a delay almost as long as that which has attended the expected placing of the "Nelson Lions" in Trafalgar Square, one of the bas-reliefs for the pedestal of the figure of Richard Cœur-de-Lion, in Palace Yard, Westminster, has been inserted in the long-vacant structure. It represents the well-known alleged incident of Bertrand de Gourdon's pardon. Like the figure which occupies the summit of the pedestal, the bas-relief is the work of Baron Marochetti. It is to be followed, very soon, by the second and final bas-relief. As to the present work, it is executed with so little care or knowledge,—one of these shortcomings on the part of the sculptor is needful to account for the rudeness of the modelling,—that effects of perspective are aimed at in bas-relief, which are absolutely unattainable; and the design is puerile in its triviality. We have seen better modelling, more logically-constructed composition, and ineffably better expression, in works of much lower pretensions. Mr. J. Gilbert, who is certainly one of our ablest artists in designing, produces every year at least ten score of incomparably more valuable works of Art than this lamentable failure of Baron Marochetti's, whose power to be effective only—the lowest merit in sculpture—has utterly deserted him here.

The carved work on the new building in Cannon Street, designed by Mr. F. Jameson for the Registered Land Company, and recently noticed by us, was executed by Mr. J. Seale, of East Street, Walworth, from the drawings and models of the architect.

The Architectural Photographic Association, after a brief state of abeyance, is revived, and intends to publish a series of illustrations, to be made by Messrs. Cundall & Fleming, from Jumèges, Boscherville, Listieux, Thann, Langrunne, Norrey, Le Mans, Chartres, Tours, Corméry, Loches, Beaulieu, and Poitiers.

Mr. Foley's full-length marble statue of Sir Henry Marsh, M.D., executed for the King and Queen's College, Dublin, reached that city a few days since, and will at once be placed in the hall of that institution.—The same artist is now engaged on a similar work of Sir Dominic Corrigan, M.D., for the above-named College.

Mr. B. L. Guinness is restoring the ancient Abbey of Cong, which stands on his own estate, and is memorable for the pastoral cross which once belonged to it.

It is said that the ex-King of Naples has sold the Palazzo Farnese, Rome, to the Emperor of the French. This structure was the work of A. da San Gallo, Michael Angelo, Vignola, and J. della Porta, and principally constructed with fragments of the Colosseum. It came by succession and marriage into the hands of the late Neapolitan regal family, on the extinction, in 1781, of that of the founders, Pope Paul the Third and Cardinal Alessandro Farnese.

MUSIC AND THE DRAMA

THE ROYAL ACADEMY OF MUSIC.

AN advertisement in the *Times* of Saturday last apprised the public that Dr. Bennett has been appointed President of the Royal Academy of Music, and Herr Otto Goldschmidt Vice-President. It remains to be seen how far the first-mentioned appointment will be other than a nominal one; how far the performance of duties of no common difficulty, requiring time and patience, if any good is really to be done, is compatible with the incessant professional labours in which our excellent composer is known to be engaged, and which have again and again been justifiably adduced as some reason for his chary appearance in his best and most important character—that of a writer. Of the Vice-President's talents for administration and firm enforcement of discipline, no opportunity has been till now given for any one to form an opinion. In any event, the task accepted by the new functionaries is one demanding discretion, unflinching integrity, and arduous effort,—a task which involves the entire revision of the existing code of instruction, (what is more necessary still) the list of those allowed to figure as instructors, and a rigorous and vigorous resolution to see good rules better carried out.

SURREY.—Of the three transpontine theatres that have of late years invited spectators or audiences in the county of Surrey, the "Surrey Theatre" has always been at the head. For fifty years in the summer seasons of former centuries,—that is, from 1594 to 1644,—there was no more fashionable house than the then Surrey Theatre, called the "Globe." Shakespeare and "his fellows" played there during the earlier years of that period; and so fond was King James of the house, that after it was burnt down, in 1613, three years before Shakespeare's death, he ordered that second house to be built which was ultimately taken down in 1644. Globe Lane indicates the locality. There used to be a sort of sneer cast at "transpontine" dramas; but some of those that were stock pieces in Surrey, as well as in Middlesex, have contrived to live, and will, doubtless, live for ever. 'Richard the Second,' 'Romeo and Juliet,' 'King Lear,' 'Troilus and Cressida,' 'Pericles,' and 'Othello,' are among the plays that were "publicly acted by the King's Majestie's Servantes, at the Globe, at Bancke Side." The Surrey pieces of the olden days were framed and fashioned of enduring stuff. And there were others besides those produced at the Globe. There was a second Surrey Theatre on the Bankside, called the *Hope*. Here was first produced Ben Jonson's 'Bartholomew Fair.' With Shakespeare and Jonson as the original writers of

Surrey pieces, transpontine dramatists may look up, and stand on their dignity. They may not be Shakespeares and Jonsons, but they are "dramatic authors," and *il y a des dégrés en tout*. The drama rose again with the monarchy with which it had fallen, in London, but not so in Surrey. Where Jonson's learned sock had once been on, horses, in Charles the Second's time, were baited to death, for the amusement of foreign ambassadors. Things had improved, however, when, about a hundred years later, in George the Third's reign, the light horseman, Philip Astley, opened his modest Amphitheatre, on the spot where the fourth "Astley's" now stands, its three predecessors having been destroyed by fire. It was owing to the success of the first Amphitheatre, that the first "Surrey Theatre," or "Royal Circus and Surrey Theatre," as it was called, was opened, now eighty-four years ago. That theatre and its successor fell a prey to the flames. The splendid edifice now under the management of Messrs. Shepherd and Creswick is the third which has occupied the same site. The "Surrey" has always taken high ground. It was never a patent theatre; but many an actor from the patent houses have found worthy brotherhood there. The first of these was plausible Jack Palmer, the original Joseph Surface, Sneer, Count Almaviva, and Dick Dowlass. Palmer, who was so plausible that he once persuaded a bailiff, who held him in durance, to lend him a guinea, was living in the "Rules of the Bench" when he played at the Surrey. It is said that the patentees of Drury Lane and Covent Garden felt aggrieved at Palmer either playing at the Surrey, or giving an "Entertainment" at the Surrey taverns, and that it was at their instance that theatres, taverns, and all places of amusement were declared to be out of the "Rules." Dibdin, Elliston, Davidge, Watkins Burroughs, and one or two less celebrated managers of bygone times conducted the business with skill and liberality; but only Davidge made a fortune in the old Surrey. Undoubtedly the most successful and profitable pieces of the past periods were 'The Lady of the Lake,' with Huntley, and 'Black-Eyed Susan,' with T. P. Cooke. This latter piece brought such wealth to Elliston that he summoned the author, young Douglas Jerrold, to him, and declared that the writer of such a play deserved some valuable acknowledgment. Jerrold's eyes twinkled as Elliston rattled the sovereigns in his pocket, "Can't you get your friends, Mr. Jerrold, to present you with a piece of plate?" Elliston subscribed the suggestion, and the author went home none the richer for it. Perhaps the boldest thing ever done at the Old Surrey was the production of Horace Walpole's 'Mysterious Mother,' with Huntley and Miss Taylor in the principal characters. This piece the author would not produce in his own time, because Mrs. Pritchard had just died, and there was no other actress whom he thought equal to the exigencies of the character. Again, the adaptation of Scott's novels to the Surrey stage was one of its features. 'The Heart of Midlothian,' with Miss Copeland as Madge Wildfire,—'The Pirate,' with Mrs. Glover as Norma of the Fifth Head,—and 'Kenilworth,' in which there was not a single bad actor,—were the costly triumphs of their respective seasons. Then there were burlesques, free from puns and vulgarity, excellently acted and charmingly sung. 'Don Giovanni' or, a Spectre on Horseback' was the most famous. Its airs were warbled or whistled by all the London lads of the day; and they are not forgotten by some whose lad-season has long passed away. The Surrey was a little out of the way of royal patronage; but if King James went to the Globe, the Surrey could also boast of once having been visited by Queen Caroline. That plump and luckless lady went to see 'The Heart of Midlothian' (1821), and the audience made rapturous application of all the inapplicable passages to Her Majesty's situation.

We have referred to the Old Surrey because this year the New Surrey connects itself with one of the most attractive actors of the former period by bringing forward a piece which gained the prize which was left for competition by the late T. P. Cooke. For the representation of this drama a very efficient company has been selected. In the

persons of two of its members, old playgoers will recognize actors who, a generation ago, were learning their art and gaining their bread in the provinces. In 1836 there was a so-called theatre in Magdalen Street, Oxford, open when there were none but town-folk to go to it. There Mr. H. Marston and Mr. Creswick were playing Macbeth and Banquo; and those who wished to see the performance from the boxes were directed to go through "the door adjoining Mr. R. Stevens, Fruiterer, No. 9, Magdalen Street." These two actors meet again in the prize drama, and, with Mr. Shepherd, unite in securing a triumphant career for the new nautical play, which illustrates a remote nautical period.

The theatre then re-opened on Saturday, under the joint management of Messrs. Shepherd and Creswick, with the late T. P. Cooke's prize drama, by Mr. A. R. Slous, entitled 'True to the Core.' The subject is an episode belonging to the story of the Spanish Armada. We are not quite sure that Cooke would have recognized the work as representative of the kind of life which he loved to depict; but it fulfils one condition of his will at least, in its subject being national. The author has placed before us an heroic action, simply stated, without comic accessories, as the leading-point in a drama which, in simplicity of structure, has few examples out of classic literature, and depends almost entirely on the spectacular arrangement of the scenes in which it is supposed to take place. The pictorial merits of the representation are superior to the dramatic; nor is there much opportunity for the display of histrionic power or skill. But the tableaux are superb, and they and the scenery are noble specimens of the talent of Messrs. Gates and Gowrie. The opening scene is derived immediately from history, and seeks to realize the historical fact that "on the afternoon of the 15th July A.D. 1588, a group of English captains was collected at the Bowling Green, on the Hoe of Plymouth, whose equals have never, before or since, been brought together, even at that favourite mustering-place of the heroes of the British navy." The author has given specific titles to the various acts, and this he has called "The Beacon," naming the scene the "Summit of Plymouth Hoe." We have in this an old English morris-dance, skillfully arranged by Mr. J. Cormack, introduced as a ballet relief to the general weight of the action. The same expedient is resorted to in the next act, on board the Spanish ship, where a party of Gitanos is made to get up a dance on the main deck of La Santa Fé. The story of these two acts may be briefly told. The admiral of the Castilian division of the Armada, being in want of a pilot to direct his vessel safe into Plymouth, contrives, through his agents on shore, to capture one Martin Truogold (Mr. Creswick), a Devonshire pilot, and, having dragged him, to bring him and his wife on board La Santa Fé, in order that he may be compelled into guiding them aright into port. The stout-hearted man refuses to betray his country, and is next sought to be intimidated through his wife, whom they threaten with a horrible death, should he not comply with their commands. Truogold then feigns assent, and gives instructions to the helmsman, who steers the ship on a reef of the Eddystone rock, where it is wrecked. The third act presents the scene of the reef, with the survivors of the wreck, including the pilot and his wife (Miss Kate Saville), Wallett, a pedler (Mr. Shepherd), Geoffrey Dangergold, a Jesuit assuming the name of *Murgrave* (Mr. Henry Marston), the Spanish Admiral, Don Diego de Valdez (Mr. E. F. Edgar), and others. The Spanish party, of course, plot even on the dangerous reef against Truogold, whose evidence against themselves they fear, in case of their being delivered by some English craft. Truogold, however, finds a staunch friend in the pedler, who protects him; and, at length, he swears, on condition of being permitted to live, never to reveal their crime. The heroic man is true to his word, and when, in the fourth and last act, his life is placed in jeopardy on the evidence of the men whom he had saved from the wreck, stubbornly maintains silence, until Elizabeth herself appears on the scene, and his case being re-investigated by her, the pedler comes forward with proof

of his innocence, and the guilt of his accusers. The Spanish Admiral and the Jesuit, accordingly, get their deserts, and Truegold is knighted by Her Majesty. The story is satisfactorily told, the dialogue is neat rather than brilliant, and the action more interesting than exciting. The scenery, as we have hinted, is superb. The main-deck of the Spanish vessel and the view of the Rock of Eddystone by sunset are set scenes of surpassing beauty—the latter *Turneresque* in its sublimity. The scenes, too, in the fourth act are remarkably good; namely, the Ramparts of Old Plymouth Castle, and the Courtyard of the Citadel. The groupings and the acting were carefully arranged and suitably executed throughout. The production of such a drama is well calculated to improve and elevate the taste of a Surrey audience. It worthily inaugurates the new management in the new theatre.

NEW ROYALTY.—When Miss Kelly opened her little theatre in Dean Street, Soho, the street had been more distinguished for painters than for players. "Jack's Coffee-House," indeed, had its name from John Roberts, one of Garrick's obscure singing actors, but gentility changed the title to Walker's Hotel. Within call of it, Hayman lived and Harlowe died. There was a time when the street and the neighbourhood were "fashionable." It was the "thing" for dukes, prelates, and merchant-princes to have town-houses in Soho Square. The Pantheon then was not so far away from the "world" as it seems now. Dean Street itself was inhabited, during the London season, by persons of wealth, if not of "rank," and Mrs. Thrale received company in it; while lines of carriages vouched (as the "gig" did for the criminal) for the "respectability" of the owners. Dean Street is now as shabby a locality as lovers of the drama can be invited to; but thither Miss M. Oliver summons the public, and, as princes go as far east as Tottenham Street, she may hope to catch them, or at least a few peers, in Soho.

Mr. R. Reece has given to this stage a new burlesque, on the subject of Sir Walter Scott's great poem, entitled 'The Lady of the Lake Plaid in a New Tartan.' Miss M. Oliver sustained the part of *Ellen*, that of *James* was pleasantly impersonated by Miss Rosina Rancee. Nearly all the parts are performed by ladies. The exceptions are the *Douglas* of Mr. J. Russell, and the *Blanche* of Mr. E. Danvers. The former gentleman looked like a giant among pigmies, and the latter, as the eccentric maiden, was outrageously funny. He caricatured Ophelia and Medea, and sang a spell-binding song, with great *delat*. The fun throughout is "fast and furious"; but the decided success of the production is referable to the exquisite scenery by Mr. Cuthbert, and the brilliant costumes. We must not close our brief notice without commending Miss Ada Taylor as *Roderick Dhu*, and Mr. W. H. Stephens as *McHewler*, the bard, who is more ready to sing than his audience, especially the fair *Ellen*, is to hear. The house has been re-decorated, newly painted, and improved in many respects.

MUSICAL AND DRAMATIC GOSSIP.

THE Eisteddfod held last week at Chester has been more generally musical, yet not less individually Cambrian, than former celebrations of the kind. It displayed advance in more ways than one. The quantity of speechifying and mutual admiration had been wisely retrenched; an attempt had been made to widen the sphere of the subjects embraced in the papers read. The number of prizes had been extended; and we are assured, by those who should know, that the merit of those who competed has been above the average. The prize for the best poem on King Arthur's Round Table was awarded to a gentleman who sang bass in the concert. In music the progress was marked. The best choral singing was that from Marthyr Tydvil—a choir made up almost, if not altogether, from the mining population,—but one which in sweetness of tone it would not be easy to surpass. The daughter of its conductor, in right of extraordinary beauty of voice, gained a scholarship—otherwise, funds to complete her vocal education. This is to be dwelt on with all the

more pleasure, as having happened at a North Welsh national festival, because the South Welsh amateurs have, we are informed, taken umbrage at the facts of the meeting being held in a town beyond the pale of the Principality, and the more liberal introduction than usual of the English tongue. Conceiving these to be, in some sort, apostate proceedings, marking degeneracy, they have organized a more clannish and exclusive meeting of their own. Regarding the silliness of such jealousy there can be only one opinion. It was new on the part of the managers of an Eisteddfod to include a performance of 'The Messiah' on such an occasion, and with an orchestra—not the normal band of harps. Then, the principal work, which had been commissioned from a national composer, was in some respects peculiar. Of this, the *Cantata* by Mr. John Thomas, 'The Bride of the Neath Valley,' no judgment can be offered here. It may be stated, however, that to the musician is due the idea of turning away from the remote bardic sublimities of Welsh legend to an incident of daily life. The rhymester commissioned for the occasion had nothing to do in contrivance: since the going round of the Lord of the Manor to bid guests to the wedding, the altercation at the door of the bride's house, the gallop to church, the *Penillion* singing, had merely to be fitted with words. Three Welsh melodies were effectively interwoven into the composition. That of the dialogue at the door of the girl's house is to this day actually in request for the situation,—a melody which has the least value of the three. It is largely identical with the tune of 'The Looking-Glass,' to which Burns wrote his stinging song,—

The Deil cam' fiddlin' thro' the town,
And danced awa' wi' the excelsman,—

the difference of a note in the fourth bar being, possibly, one of those quaintnesses, arising from imperfect transcription, which have to be allowed for by every student of national music. The "Penillion" tune is 'New Year's Eve'; the closing couplets are set to 'The Queen's Dream'—an air as regular in its beauty as if Haydn had contrived it. The *Cantata* was received with every appearance of cordiality; and the composer was warmly greeted at its close. Throughout the week, the singing of Miss E. Wynne and her sister, and of Mr. Cummings was very good. With some flexibility added to her resources, Miss E. Wynne might be our leading English *soprano*. There is no one of the sisterhood equal to her in articulation, in expression, and in charm. The pianoforte was represented by that staunch Cambrian, Mr. Brinley Richards, and Miss Roberts; the harp by Mr. John Thomas and Mrs. Davis; and the violin by Mr. John Thomas, who leads the Philharmonic Concerts at Liverpool, whence the orchestra was derived. The choral prizes were adjudicated by Mr. H. Lealie.

The *Orchestra* confirms the report of English Opera to be given during the autumn at Her Majesty's Theatre, and states that the new work by Mr. Balfe, laid out to be a principal feature, is based on Scott's 'Talisman.'

To the same journal we are indebted for news from Cornwall—the notice of a performance of the Penzance Choral Society, at which Romberg's 'Lay of the Bell' was given.

Mdlle. Adelina Patti will appear on the first night of the season (October 2nd), in Paris, as *Amina* in 'La Sonnambula.'

Il Trovatore (a journal somewhat incorrect and apocryphal in its rumours, as may be seen by its speaking of 'Zilda' as M. Gounod's new opera) gives currency to a report that Signor Rossini, for whom all manner of occupation is now unceremoniously cut out, is about to write a *Cantata* for the inauguration of the French Exhibition next year.—The same journal praises, as promising, Signora Lazari, who is singing at Milan; announces that the dead silence so sternly of late maintained in Venice, during the Austrian occupation, is about to be broken by the re-opening of the splendid *Teatro Fenice*, for which, it is added, Donizetti's 'Maria Padilla' has been selected; and gives, as a rumour, the approaching knighthood of Mr. Costa. Other journals state that there is a chance of his 'Naaman' being produced at Paris during the coming season.

It is said that the censorship of St. Petersburg will not allow Donizetti's 'Don Sebastian' to be represented, because of the Funeral March which the opera contains.

It is said that an opera is to be written for Mdlle. Carlotta Patti, on the story of Mdlle. de La Valliere. We hope that the tale is not true. What need is there for one in such favour as the lady enjoys to make market of a physical infirmity?

Madame Parepa, with her play-fellows, has left the old country for another American tour.—Mr. and Mrs. Howard Paul are going to "the States."

'Antigone,' with Mendelssohn's music, has been revived at Dresden.

After all, our playhouses are not yet hopelessly given up to what the psalm-writer called "the awful mirth" of burlesques. The Prince's Theatre at Manchester was to open on the 10th, not with "Polyphemus the folly," not with "Ariadne on an oyster-bed," not with Cleopatra as illustrated in Cornhill, but with Shakespeare's 'Antony and Cleopatra.'

A mistake made last week must be corrected. The entertainment then announced (in obedience to invitation) by Mr. Boxley Heath and Mr. Suchet Champion, is, for the moment, under a *velo*; the proprietors of the Hanover Square Rooms conceiving that their licence does not permit of its presentation. The gentlemen, then, will have to seek for quarters elsewhere.

A new theatre is to be built at Bordeaux.

MISCELLANEA

Editions of Bunyan.—I possess a copy of the nineteenth edition of Bunyan, illustrated. The frontispiece represents the great dreamer as very stout and fast asleep, the subjects of his vision arranged in impossible perspective; but rough as the engraving is, his face bears a traceable resemblance to the portrait exhibited this year in the National Portrait Exhibition at Kensington. The volume is imperfect and worn; the first part has eight "plates" more unique than artistic; the second part only one; and the *third* part, which the title-page declares to be "an impostor," is bound up with these and a memoir of Bunyan. The title-page to second part records that it was "printed by A. W. for W. Johnston, at the Golden Ball, in St. Paul's Churchyard, 1751." I am not a book-collector; and should such a one wish to possess this volume, he may do so by sending its value to me, which I shall present to Mrs. Gladstone's "Orphanage." E. M.

Shakespeare Readings.—I am glad to see so happy a restoration of the passage in 'The Tempest' in this week's *Athenæum*. It is made on the right principle, viz., retaining as nearly as possible the *sound* of the passage, because I think it very probable that the text was *read* to the printer, and he would print from hearing, and not from seeing. In the fourth line of the passage quoted, the word *it*, at the end, is generally taken to mean the "truth" whereas it means the "lie" in the sixth line. It is the old saying that "a man may tell a lie till he believes it." I would, therefore, to make this clear, and to render the sound still closer, slightly vary your Yorkshire correspondent's restoration, and read

Who having—sin to truth—by telling of it
Made such a sinner of his memory
To credit his own lie, &c.

Still Warburton may be right, and the meaning would be, "One who has made his memory such a sinner to the truth that, by constantly telling a lie, he at length believes it to be true." This avoids the tautology, and the "into" becomes an ordinary misprint. H. D.

—To conclude, we may notice that various correspondents state that the passage (noticed in our last number) quoted as Milton's in the edition of Johnson (1724) is correctly given, in the edition of 1806, to Shakespeare, 'Troilus and Cressida,' act i. sc. 3, being part of Nestor's speech. It is worth while stating that one Correspondent, F. W., says, "The lines are not Milton's, for (*sic*) I have carefully examined Baskerville's edition by Todd's Concordance. The lines are certainly *no credit* to any one, much less so great a poet."

As-tu vu Lambert!—A Correspondent suggests that he has discovered the origin of this bit of French slang. "I was looking over an old annotated copy of the *Satires* of Boileau, and in the third, where a dinner-bore invites an unwilling friend to dine with him, he holds out, amongst other inducements,

Molière avec Tartuffe y doit jouer son rôle,
Et Lambert, qui plus est, m'a donné sa parole.

The friend laughingly replies,
Quoi! Lambert?

and the other rejoins,

Oui, Lambert! à demain. C'est assés.

So that this joke about 'Lambert' is as old as the time of Boileau. In the foot-note in my edition it is said, 'Lambert, le fameux musicien, était un fort bon homme qui promettait à tout le monde de venir, mais qui ne venait jamais.' A sort of French equivalent to our 'Bosco is coming.'

"O'DELL TRAVERS HILL."

Old Sales.—Collectors of autographs and MSS. may read the following list of prices obtained for treasures of this kind forty years ago (March, 1827). The sale was by Messrs. Southgate, of Fleet Street, and comprised many valuable items. The original grant from Edward the Fourth, with the great seal attached, of all the lands and possessions of the Rutland family, granted after the battle of Towton to Lord Hastings, Chamberlain of England, dated August the 3rd, 1467, brought 7l. 10s.—A copy of Voltaire's tragedy of 'Tancrède,' with the author's MS. notes and additions, evidently corrected for a new edition, went off for 1l. 5s.—A letter from Charles the First to the Prince of Orange, dated May the 24th, 1630, was sold for 4 guineas.—A letter from Oliver Goldsmith to Mr. Nourse the bookseller, offering the copyright of his 'History of the Revolutions of Denmark,' was sold for 5 guineas.—Charles Mathews purchased a note from Lady Denbigh to Garrick, respecting his performance, and the original draft of his answer, written from the Adelphi, for 2l. 7s. 6d.; and four other theatrical letters from Garrick, Foote, Barry and Mrs. Yates, for 6 guineas and a half.—A note from Pope to Dr. Oliver, at Bath, was bought at 1l. 7s.; and Addison's signature to an official letter, at a guinea.—Queen Elizabeth's Sign Manual, dated Richmond, 26th of July, 1564, brought 2½ guineas.—A letter, entirely in the handwriting of Charles the First, addressed to the Queen of Bohemia, and dated the 3rd of September, 1647, from Hampton Court, where he was then confined, brought 5l. 2s. 6d. This was in the most perfect condition, and written throughout in a fine Italian or court hand, the letters almost perpendicular. Autographs of the following persons were sold: Falconer, Shenstone, Warton, Shelley, Moore, Scott, and Crabbe, one lot, 1l. 16s.—Guy, the founder of the Hospital, 12s.—The great Duke of Marlborough (1702), John, Duke of Argyll (1711), the Duke of Wellington (1814), in one lot, 1l. 6s.—Sir Cloudeley Shovel (1698), Lord Hood (1764), and Nelson and Bronte, dated on board the Medusa, August 7, 1801, one lot, 18s.—Lord North, Marquis of Rockingham, Mr. Pitt, and Mr. Jenkinson (now Lord Liverpool), one lot, 12s.—C. J. Fox, Edmund Burke, and J. Curwen, one lot, a guinea.—The signs manual of Charles the Second (1663), William the Third (1690), Queen Mary (1692), George the Second (1727), and George the Third (1793), one lot, 2l. 14s.—James the Second, under his signature "York," dated St. James's, September 8, 1666, another signature, as King, in 1688, and the signature of William the Third when Prince of Orange, January 7, 1688-9, one lot, 3l. 5s.—A Letter of Louis the Fourteenth to the Queen of James the Second, on the birth of his grandson, dated Versailles, September 19, 1682, with two fine impressions of the Royal seal upon the blue silk with which it was tied, 3l. 15s.—Louis the Fourteenth and Louis the Fifteenth, 1l. 2s.—Wentworth, Earl of Stratford, 15s.—Prince Rupert, 1 guinea.—George Villiers, Duke of Buckingham, 1l. 8s.

TO CORRESPONDENTS.—G. F. P.—H. M. D. F.—J. B.—J. D., Jun.—received.

Erratum.—'Architecture of the Alhambra.'—P. 213, col. 8, line 2, for 'Briggs' read 'Bridges'.

NEW NOVELS NOW READY.

The JOURNAL of a WAITING GENTLEWOMAN. Edited by BEATRICE A. JOURDAN. Post 8vo. price 8s. [This day.]

"We have never read a more tender tale of woman's love, told by a woman, than the autobiographical record before us. The characters are all true to the life, and all well drawn without exaggeration or affectation." *London Review.*

TOILERS of the SEA. By Victor HUGO. Third Edition, 3 vols. post 8vo. price 24s.

"A fisherman encounters all the fury, and caprice, and treachery of outer nature in order to win a woman whom on his return he finds to have unconsciously but irrevocably lost her heart to another. But this plainest of stories is worked into genuine tragedy by an exercise of poetic power which, at least in some portions of its display, has very rarely been surpassed in literature."—*Saturday Review.*

The STORY of KENNETT. By Bayard TAYLOR. 2 vols. 16s.

A CASUAL ACQUAINTANCE. By Mrs. DUFFUS HARDY. 2 vols. 16s.

MATTINS and MUTTON'S. By CUTHBERT BEDE. 2 vols. 16s.

The WHITE FAVOUR. By Henry HOLL. 3 vols. 24s.

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

MR. LEWINS'S NEW WORK ON SAVINGS' BANKS.

A HISTORY of SAVINGS' BANKS; with an Account of the Origin and Progress of the Government Financial Measures for Post-office Banks, Annuities, and Life Insurance. By WILLIAM LEWINS, Author of 'Her Majesty's Mail.' 8vo. 16s.

"A more deeply interesting volume has seldom been offered to serious thinkers and practical reformers." *Illustrated London News.*

"All large employers of labour who take any interest in the social elevation of their work-people will find it particularly interesting. Such books should be diligently read and thoroughly digested."—*Daily News.*

"The general contents of the book may be thus shortly summed up: The origin of savings banks, the early legislation respecting them from the year 1817 till 1844, and the progress made during that period; the legislation on the subject since 1844 to the present time; a chapter on the frauds committed on savings banks; the deficiencies of the existing system, and the necessity for the establishment of supplementary banks; and the development of the Post Office savings bank scheme. To these contents is added an appendix, giving the acts, or clear abstracts of the acts, at present in force for all the different descriptions of banks for savings, together with some of the latest statistical information, which may be thought of value. The subject is very ably handled, and the work will be found of immense advantage to all who are supporters and well-wishers of the social advancement of the industrial population of the nation."—*Observer.*

"Those who desire to know all that can be known of the career of a valuable class of provident institutions, should read Mr. Lewins's 'History of Savings' Banks.' The merits of the institutions, their failings, the advantages they confer, and the drawbacks upon their usefulness, are all clearly pointed out. Those who know nothing, or very little, of this subject should read the book. In every respect it will amply repay perusal."—*Morning Star.*

"Altogether, the future historian will find this one of the most precious volumes he can consult as to the social condition of the country during the present century, and the beginning of institutions which may attain to positions of even greater magnitude and prominence in the future. The work is very well done, and should be on the shelves of every library."—*Globe.*

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

New Works for September.

The RACE for WEALTH. By Mrs. J. H. RIDDELL, Author of 'George Geith.' 3 vols. Reprinted from *Once a Week*. [This day.]

The CO-HEIRESS. By the Author of 'Charley Nugent,' 'St. Aubyns of St. Aubyn.' 3 vols. [Ready this day.]

The REGENCY of ANNE of AUSTRIA. Queen of France, Mother of Louis XIV. Published and Unpublished Sources. With Portraits. Miss FREER. 3 vols. [Ready this day.]

Also, just published, by the same Author, **The MARRIED LIFE of ANNE of AUSTRIA.** 3 vols. with Portrait.

The THREE LOUISAS: a Novel. By SUTHERLAND EDWARDS. In 3 vols. [Ready this day.]

The EASTERN HUNTERS. With numerous Illustrations. By CAPTAIN JAMES SEYMOUR. 1 vol. 8vo. [Ready this day.]

BIOGRAPHIES and PORTRAITS of SOME CELEBRATED PEOPLE. By ALPHONSE LAMARTINE. 3 vols. [Ready this day.]

LIZZIE LORTON, of GREYRIDGE. By Mrs. LYNN LINTON, Author of 'Grass Year,' 'The Lake Country,' &c. 3 vols. [Ready this day.]

By THE AUTHOR OF 'EAST LYNNE': **ELSTER'S FOLLY.** By Mrs. Henry WOOD, Author of 'St. Martin's Eve.' In 3 vols. [Ready this day.]

The SECOND Mrs. TILLOTSON. By PERCY FITZGERALD, is ready this day at every Library in the Kingdom, in 3 vols. [This day.] Reprinted from *All the Year Round*.

FROM CALCUTTA to the SNOWY RANGE. With numerous Coloured Illustrations. By an OLD INDIAN. [Ready this day.]

KISSING the ROD: a Novel. By EDMUND YATES, Author of 'Broken to Pieces.' 3 vols. [Ready this day.]

The MAN of MARK: a Novel. In 3 vols. By the Author of 'Richard Langdon.' [Ready this day.]

NEW WORK SUITABLE FOR STUDENTS AND SCHOOLS.

A COURSE of ENGLISH LITERATURE. By JAMES HANNAY. In 1 vol. [Ready this day.]

Also, just published, uniform with the above, **MODERN CHARACTERISTICS: a Series of Essays from the Saturday Review.**

SUNNYSIDE PAPERS. By Andrew Halliday, Author of 'Everyday Papers.'

Cheap Editions of Popular Works.

SANS MERCI. By the Author of 'Guy Livingstone.' 6s. [Cheap Edition ready this day.]

Also, just published, uniform with the above—

HALF-A-MILLION of MONEY. By the Author of 'Buckton's History.' 6s. 6d.

MAXWELL DREWITT. By the Author of 'George Geith.' 6s.

MISS FORRESTER. Author of 'The Morals of May-day.' 6s.

RUNNING the GAUNTLET. Author of 'Kissing the Rod.' 6s.

MILDRED ARKELL. By the Author of 'East Lynne.' 6s.

EVERY-DAY PAPERS. By ANDREW HALLIDAY. 6s.

GEORGE GEITH. By the Author of 'Maxwell Drewitt.' 6s.

TOO MUCH ALONE. By the Author of 'City and Suburb.' 6s.

THE WORLD in the CHURCH. Author of 'George Geith.' 6s.

TREVILYN HOLD. By the Author of 'East Lynne.' 6s.

DENIS DONNE. By the Author of 'Theo Leigh.' 6s.

MAURICE DERING. By the Author of 'Guy Livingstone.' 6s.

BORDEE and BASTILLE. Author of 'Maurice Dering.' 6s.

SWOED and GOWN. By the Author of 'Guy Livingstone.' 6s.

ST. MARTIN'S EVE. By Mrs. H. Wood. [This day.]

London: TINSLEY BROTHERS, 18, Catherine-street, Strand.

NEW VOLUMES OF MR. FROUDE'S HISTORY OF ENGLAND.

THE REIGN OF ELIZABETH,

Vols. III. and IV.,

including VOLUMES IX. and X. of Mr. FROUDE'S HISTORY OF ENGLAND from the FALL of WOLSEY to the DEATH of ELIZABETH,

Will be published on Thursday, September 27th.

Already Published,

Vols. I. to IV., the REIGN of HENRY VIII. Third Edition, 54s.

Vols. V. and VI., the REIGNS of EDWARD VI. and MARY. Second Edit. 28s.

Vols. VII. and VIII., the REIGN of ELIZABETH, Vols. I. and II. Fourth Edition, 28s.

London: LONGMANS, GREEN, and Co. Paternoster-row.

FRITH'S LARGE-SIZED PHOTOGRAPHS

OF

GREAT BRITAIN, SWITZERLAND, ITALY, NORMANDY, &c.

Size, 8½ by 6½ inches, on Mounts 14½ by 11½ inches.

The scale of prices is very low; whilst in artistic beauty, and as specimens of the Art, the series is certainly unequalled.

About 500 sample Subjects may be seen at 31, Cornhill—BECK & BECK; and 180, Strand—W. ROUGH & Co.; or, address the Publisher,

F. FRITH, Brightlands, Reigate, Surrey.

On 15th September, price 2s.

FREDERICK WARNE & CO.

PUBLISHERS.

Completion of the Copyright Edition of Disraeli's 'Curiosities of Literature.'

Revised and Edited, with Notes, Life, &c. by the Right Hon. the CHANCELLOR OF THE EXCHEQUER.

Now ready, in 3 vols. post 8vo. price 10s. 6d. cloth.

The CURIOSITIES of LITERATURE.

The advantages that this Edition possesses are—

1st. Its Completeness, hundreds of Text Emendations and Notes being Copyright for many years.

2nd. Its Editorship, by the Son of the Original Author.

3rd. Its readable Type and handsome Steel Plates.

4th. Its ranging with the other Works of the same Author, viz. 'The Amusements of Literature,' 'The Calamities and Quarrels of Authors,' 'The Literary Character of Men of Genius,' now in course of Publication in similar size Volumes.

After September 30th this Edition will be raised to 12s., and the sale of the Fortnightly Parts discontinued. All are therefore requested to complete at once any oddment stock.

The CURIOSITIES of LITERATURE, in Shilling Fortnightly Parts. Now ready, Parts IX. and X. (Completing the Edition.)

Early in October will be published in Volumes (only),

The AMENITIES of LITERATURE.

1 vol. 5s.

The CALAMITIES and QUARRELS of AUTHORS. 1 vol. 4s.

The LITERARY CHARACTER of MEN of GENIUS. 1 vol. 4s.

Completing, in Six uniform Volumes, the Elder Disraeli's Works.

In 3 vols. demy 8vo. each 650 pp. price 10s. cloth, new style, gilt, with gilt edges, 12s., or half calf extra, 16s.

HALF-HOURS with the BEST AUTHORS. A New Popular Edition. In which the Serial Nature of the Original Work is entirely done away with, and the Pagination of both Volumes completed.

A full Index has been added, the Biographical Sketches brought down to 1856, the Steel Illustrations engraved and the Work printed in a style suitable to the tastes of the present day.

Uniform, in 1 vol. price 5s. cloth, or half calf, 8s., 650 pp.

HALF-HOURS from ENGLISH HISTORY. From the Roman Period to the Death of Elizabeth. Selected and Illustrated by CHARLES KNIGHT.

This New Edition, a pendant volume to the 'Half-Hours with the Best Authors,' contains the choicest Historical Extracts from upwards of fifty Standard Authors, including Burke, Falgrave, Guizot, Sheridan Knowles, Thackeray, H. Taylor, Rev. James White, Charles Knight, G. L. Craik, Landor, Hume, Keats, Hallam, Southey, Shakespeare, Froissart, Sir Walter Scott, Hall, Barante, Lord Bacon, Cavendish, Bishop Burnet, Rev. H. H. Milman, Wordsworth, Lord Macaulay, &c. &c.

A Complete Compendium of English Literature.

In crown 8vo. price 2s. 6d. each, 550 pages, handsomely printed, and in a new style of Inlaid Cloth Binding, bevelled boards,

POPULAR READINGS in PROSE and VERSE. Edited by J. E. CARPENTER.

Three distinct Volumes, sold separately, each Complete and Paged throughout, with Index.

A Juvenile Music Book, with appropriate Songs, &c.

In oblong demy, price One Shilling, stiff wrapper.

The CHILDREN'S HOUR: Twelve Songs for the Little Ones. With a Morning and Evening Hymn, set to Music, by Mrs. G. HERBERT CURTEIS.

These Songs are intended for those "little ones" who may be induced by their love of music, contentedly to spend a short time beside the piano, while mamma or an elder sister plays the accompaniments for them as they sing. It is hoped that thus a pleasant and tranquil termination may occasionally be given to the glorious games and romps which form the usual occupation of that most delightful part of the day—"the Children's Hour."

A New Book of Fairy Legends.

In square crown 8vo. price 5s. cloth gilt, with gilt edges,

The BOY and the CONSTELLATIONS.

By JULIA GODDARD, Author of 'Karl and the Six Little Dwarfs,' 'More Stories,' &c. With Original large page Illustrations by A. W. Cooper.

NOTICE.—The PENNY READINGS in PROSE and VERSE, edited by J. E. CARPENTER, the Publication of which terminated with the conclusion of the last season, will be resumed October 1, 1866, and continued Monthly.

London: Bedford-street, Covent-garden.

street, London; and Dewsbury, Yorkshire.**

THE CULTIVATION OF TEA in the East
Indies is an important feature, and the EAST INDIA TEA
COMPANY have, on account of its great strength and exquisite
flavour, promoted its sale by every means. The Company are now
exporting Assam, Cachar, Darjeeling, &c., at the reduced duty, viz.,
from 3s. 8d. to 2s. 8d. per lb., and China Tea as usual at 1s. 4d.
per lb. and upwards.—Warehouses, No. 9, GREAT ST. HELEN'S
CHURCHYARD, Bishopsgate.

BREAKFAST.—EPPS'S COCOA
(more commonly called Epps's Homoeopathic Cocoa, as being
prepared and introduced by James Epps, the Homoeopathic Chem-
ist first established in England). The very agreeable character
of this preparation has rendered it a general favourite. For
breakfast no other beverage is equally invigorating and sustain-
ing. This Cocoa is used by thousands who never used Cocoa
before. "Cocoa stands far higher than tea or coffee," Dr. Hensall
says.—Sold in 1 lb., 4 lb., and 1 lb. packets.

THE SMOKER'S BONBON immediately and
effectually removes the Taste and Smell of Tobacco from the
Mouth and Breath, and renders Smoking agreeable and safe. It
is very pleasant and wholesome. Prepared by a patent process
from the recipe of an Eminent Physician, by ROOHLING & Co.,
Wholesale and Export Confectioners, Bethnal-green, London.—
One Shilling per Box; post free, 14 stamps.—Sold by Chemists,
Tobacconists, &c.

The POPE'S HEALTH RESTORED by DU BARRY'S FOOD.
—Cure No. 68,413.—"Rome, July 21st, 1866.—The health of
the Holy Father is excellent, especially since abandoning all
other remedies he has confined himself entirely to Du Barry's
Rejuvenating Food, which has produced a surprisingly
beneficial effect on his health, and his Holiness cannot praise
this excellent food too highly."—From the *Gazette du Midi*,
July 25th.

**DU BARRY'S delicious, health-restoring REVA-
LENTA ARABICA FOOD** restores good appetite, perfect
digestion, strong nerves, sound lungs and liver, refreshing sleep,
functional regularity and energy to the most enfeebled or disorder-
ed, without medicine, inconvenience, or expense, as it saves fifty
times its cost in other remedies, curing dyspepsia (indigestion),
constipation, flatulency, phlegm, debility, consumption, nervous,
bilious, liver and stomach complaints, low spirits, as proved by
90,000 cases which had been considered hopeless.—In tins, at
1s. 1d. 1lb. 2s. 6d.; 4lb. 10s. 6d.; 12lb. 25s.—DU BARRY & CO. 77,
REGENT-STREET, London; and all Grocers and Chemists.

{ 63, New Earl-street, } London, E.C.
{ 34, Broad-street, }

5, George-square, GLASGOW; 2, Goree Piazza, LIVERPOOL.

MR. HOWARD, SURGEON-DENTIST, 52,
FLEET-STREET, has introduced an ENTIRELY NEW
DESCRIPTION OF ARTIFICIAL TEETH, fixed without
springs, wires, or ligatures. They so perfectly resemble the natu-
ral teeth, as not to be distinguished from the originals by the
closest observer; they will never change colour or decay, and will
be found superior to any teeth ever before used. This method does
not require the extraction of roots, or any painful operation, and
will support and preserve teeth that are loose, and is guaranteed
to restore articulation and mastication. Decayed teeth stopped
and rendered sound and useful in mastication.—52, Fleet-street.

LIEBIG'S EXTRACT OF MEAT for the im-
mediate production of Beef Tea, Soups and Gravies, manu-
factured on the Establishments of Robert Tooth, Esq., of Sydney,
Australia, may now be obtained of the Consignees, ALLEN &
HANBURY, Fenchurch-street, Lombard-street, London.—This
Extract contains the soluble constituents of thirty times its
weight of fresh meat. It is nutritious, convenient, economical,
unaltered by time or climate. 2-oz. pots, 2s. 6d.; 4-lb. jars, 5s. 6d.;
1-lb. jars, 18s.

METCALFE, BINGLEY & CO.'S New Pat-
tern TOOTH BRUSHES, and Penetrating unbleached Hair
Brushes, Improved Fish and Cloth Brushes, and genuine Sanitary
Sponges, and every description of Brush, Comb and Perfumery.
The Tooth Brushes search between the divisions of the Teeth—the
hairs never come loose. Metcalfe's celebrated Alkaline Tooth
Powder, 2s. per box.—Address 130a and 131, OXFORD-STREET.

DELICATE and CLEAR COMPLEXIONS,
with a delightful and lasting fragrance, by using
THE CELEBRATED UNITED SERVICE SOAP TABLET.

4d. and 6d. each.

Manufactured by J. C. & J. FIELD, UPPER MARSH,
LAMBETH.

Order of your Chemist, Grocer, or Chandler.

BILE and INDIGESTION, Sick Headache,
Flatulency, Heartburn, and all Bilious and Liver Affections
are speedily removed by the use of

COCKLE'S ANTIBILIOUS PILLS,

which have been held in the highest estimation by all classes
of society for upwards of sixty-five years. May be had throughout
the United Kingdom, in Boxes at 1s. 1d., 2s. 6d., 4s. 6d. and 11s.

ENGLISH MEDICINES are everywhere
acceptable; and foremost among these is that favourite
remedy of the British household, FARR'S LIFE PILLS,—
within the reach of all who suffer from Indigestion, Diseased
Liver and Kidneys, Pains in the Back, Gout, Rheumatism,
Dropsy, Nervousness, Melancholia, and all the Debility from
any cause, especially tainted blood through long-standing disease.
—May be had of any Chemist.

PIANOFORTES AND HARMONIUMS.

PRIZE MEDALS were awarded to CHAPPELL & CO. for Pianofortes and Harmoniums at the International Exhibitions of 1882 (London) and 1885 (Dublin), and to ALEXANDRE & CO. for their Harmoniums at all the Exhibitions for the last Twenty Years. The Medal in 1883 was given to ALEXANDRE & CO., with the following Commendation, which ranks them above all others: "Novelty of construction of Harmoniums, cheapness, combined with excellence of manufacture, and fine quality of tone."—Award of the Jury.

Testimonials to their superiority over all others have also been given by Professors Sir Frederick Gore Ouseley and Sterndale Bennett, Dr. Rimbault, Herr Engel, Messrs. Cox, Mr. Wallace, Macfarren, Lindsay Sloper, &c.

An immense Stock of every possible Description of Pianofortes and Harmoniums may be seen at 50, New Bond-street, either for Sale or Hire, and arrangements can be made for the Hire or Purchase of any Instrument by Instalments in advance, if desired, or a liberal allowance be made on Purchases for Cash.

CHAPPELL'S TWENTY-GUINEA PIANOFORTE,

IN PLAIN WALNUT OR SOLID MAHOGANY, THE BEST ENGLISH MANUFACTURE,

With perfect Check Action, the Full Compass, and all the Latest Improvements.

A Prize Medal was awarded to Messrs. CHAPPELL & CO., in the Dublin Exhibition, for this Instrument—"for the 20-Guinea Pianoforte (quality not sacrificed to cheapness) and for excellence of Cottage Pianofortes."

ALEXANDRE'S BOUDOIR HARMONIUM

(THE QUEEN'S MODEL).

As Manufactured expressly for Her Majesty's use.

In Rosewood Case, with Ten Stops and Percussion Action—viz. Percussion or Flute Chorus, Forte, Tremolo, Percussion or Cor Anglais, Bourdon, Forte, Sourdine, Grand Jeu, and Expresso price Thirty-five Guineas.

Also, with Fourteen Stops and Percussion Action—viz. Percussion or Flute Chorus, Forte, Tremolo, Percussion or Cor Anglais, Bourdon, Clarion, Basson, Forte, Sourdine, Grand Jeu, and Expresso. Size, 3 ft. 6 in. by 1 ft. 8 in.; height, 3 ft. Price Fifty-five Guineas.

These Instruments are eminently adapted for Boudoirs and Drawing-rooms; the tone is more pure and sweet than that of the ordinary kinds, and greater care is taken in the workmanship.

NEW DANCE MUSIC.

ADELE WALTZ, By DAN GODFREY. Played at Her Majesty's State Ball. Solo or Duet, 4s.

BARBE-BLEUE QUADRILLE. By DAN GODFREY. On Airs from Offenbach's Opera. Played at the Alhambra, and nightly encored. Solo or Duet, 4s.

LES DEUX ARLEQUINS QUADRILLE. By STRAUSS. 3s.

SICILY QUADRILLE. A new and charming Quadrille. By CHARLES D'ALBERT. Played at Mellon's Concerts. A companion Quadrille to his celebrated 'Conco' and 'Palermo.' Most beautifully illustrated, and played with unprecedented success at Arditi's Concerts. Solo or Duet, 4s.

HILDA WALTZ. By D. GODFREY (Composer of the Guards' and Mabel Waltzes). Played every evening at Arditi's Concerts, and with immense success by the Band of the Grenadier Guards during the visit of the Prince and Princess of Wales to Knowlesley, and dedicated, by permission, to the Baroness Ferdinand de Rothschild. Solo or Duet, 4s.

*The new waltzes, 'Mabel' and 'Hilda,' by Mr. Godfrey, are certainly most fascinating compositions, and we are not surprised to learn that the Prince of Wales especially complimented the composer upon the merits of 'Hilda' at Knowlesley.—*Liverpool Mail*.

*Twilight Dreams. New Waltz, and one of the prettiest ever written, by that celebrated composer Charles D'Albert. Solo or Duet, 4s.

Home, Sweet Home. New Waltz, by Charles D'Albert, on the favourite melody of 'Home, Sweet Home.' Solo or Duet, 4s.

*Mabel Waltz. By D. Godfrey. 4s.

*Guards' Waltz. By D. Godfrey. 4s.

*Africaine Waltz. By D. Godfrey. 4s.

*Mill Grove Waltz. By G. Stanley. 4s.

*Way Waltz. By Alfred Mellon. 4s.

*Royal Alfred Quadrille. By D. Godfrey. 4s.

*D'Alb's Quadrille. By D. Godfrey. 4s.

*Orpheus Quadrille. By D. Godfrey. 4s.

*Orpheus Galop. By D. Godfrey. 4s.

*Merry Tunes Lancers. By D. Godfrey. 4s.

*Guards' Quadrille. By D. Godfrey. 4s.

*Africaine Quadrille. By C. Cooté. 4s.

*Trooper's Galop. By Waterson. 3s.

*Jockey Galop. By A. F. Godfrey. 3s.

*Faust Waltz. By C. Cooté. 4s.

*Faust Quadrille. By C. Cooté. 4s.

*Faust Polka. By F. Wallerstein. 3s.

*Faust Galop. By C. Cooté. 3s.

*The Hunt Quadrille. By A. F. Godfrey. 4s.

*Bolero Waltz. By F. Wallerstein. 4s.

Persian.—Teacher, Mr. Goolam Hyder.
Urdu.—Teacher, Mr. Rustomjee Cowasjee.
Hindi Law.—Professor E. P. Wood, B.A.
English Language and Literature.—Professor H. Morley.
French Language and Literature.—Professor Cassal, LL.D.
Italian Language and Literature.—Professor G. Volpe.
German Language and Literature.—Professor Heimann, Ph.D.
Comparative Grammar.—Professor Key, M.A. F.R.S.
Mathematics.—Professor De Morgan.
Mathematical Physics.—Professor Hirst, Ph.D. F.R.S.
Experimental Physics.—Professor Foster, B.A.
Physiology.—Professor Sharpey, LL.D. M.D. F.R.S.
Chemistry and Practical Chemistry.—Prof. Williamson, F.R.S.
Civil Engineering.—Professor Pole, F.R.S. M.I.C.E.
Architecture.—Professor Hayter Lewis, F.S.A. F.I.R.A.
Geology (Goldstickler)—Professor Morris, F.G.S.
Mineralogy.—Professor Morris, F.G.S.
Drawing.—Teacher, Mr. Moore.
Botany.—Professor Oliver, F.R.S.
Zoology (Recent and Fossil).—Professor Grant, M.D. F.R.S.
Philosophy of Mind and Logic.—Professor vacant.
Ancient and Modern History.—Professor Seely, M.A.
Political Economy.—Professor J. E. Cairnes, M.A.
Law.—Professor J. A. Russell, LL.B.
Jurisprudence.—Professor H. J. Roby, M.A.

RESIDENCE OF STUDENTS.—Some of the Professors receive students to reside with them; and in the Office of the College here is kept a Register of Persons who receive Boarders into their families. The Register will afford information as to terms and their particulars.

Information concerning Andrews' Entrance Examinations, Classics and Mathematics, three of 304, tenable for three years; Andrews' Prizes, Andrews' Scholarships, Jews' Commemorative Scholarship, David Ricardo and Joseph Hume Scholarships in Political Economy, and Joseph Hume Scholarship in Jurisprudence, and other Prizes, will be found in the Prospectus of the College. These may be had on application at the Office of the College.

The Session of the Faculty of Medicine will commence on Monday, October 1st.

The School will open on Tuesday, September 25th.

CHAS. BARRELL, LL.D., Dean.

OHAS. G. ATKINSON, Secretary to the Council.

August 21st, 1866.

UNIVERSITY COLLEGE, LONDON.

ARCHITECTURE AND CONSTRUCTION.

Professor T. HAYTER LEWIS, F.S.A. F.I.R.A.

These subjects will be divided into four separate Courses, under two heads—Architecture as a Fine Art, A.; Architecture as a science, B. Each Course will consist of Thirty Lectures in the year, and will be divided into two terms of Fifteen Lectures each, one of which will be delivered every week, viz.—
A. Every Tuesday, 7.30 to 8.30 p.m.
B. Every Tuesday, 7.30 to 8.30 p.m.

Fee for one term in either A. or B., 3l. 12s. 6d.; for both, 6l. 6s. For both terms in either A. or B., 12l. 6s.; or for two terms in both, 24l. 12s. No Matriculation nor College Fee is payable on attendance at the College. For Students who in former years have paid the College Matriculation Fee, the Fee will be pounds, not guineas.

The First Term in each Course will commence at the opening of the College, and last until the end of January; the Second Term will commence in the beginning of February, and last until the end of the Session.

Thus a Student wishing to go through the whole of the terms in one year would commence with the history of the earliest art of Art or Construction, and follow it down, in regular gradation, to the latest period.

In order to avoid the loss of time occupied by the Students in taking detailed notes of the lectures, a list of the chief points to be referred to, such as the names and dates of buildings, the names and other details, will be given to each Student before each lecture, so that he will have to take only occasional notes as he lectures proceeds.

For Prospectuses containing further particulars, apply to C. C. LUTWORTH, Esq., University College; or at the Professor's Office, 1, John-street, Adelphi.

ST. GEORGE'S HOSPITAL MEDICAL SCHOOL.—WINTER SESSION.

THE INTRODUCTORY LECTURE will be given by Dr. J. W. GLEBE, on MONDAY, the 1st October, at 3 P.M. Perpetual Pupil's Fee, 100l.; Compounder's, 50l.; Dental Pupil's, 45l.

ST. MARY'S HOSPITAL MEDICAL SCHOOL.—THE SESSION WILL COMMENCE ON MONDAY, October 1st, at 8 o'clock P.M., with an Introductory Address by Mr. James Watson.

At this Hospital the Medical Appointments, including five House-Surgeons, the annual value of which exceeds 4000 guineas, are open to the Pupils without fee. It has Obstetric and Ophthalmic Departments, and a Children's Ward (in the wing). The Clinical and Pathological Instruction is carefully organised.

For Prospectuses, Entry, and full Information as to Prizes, &c., apply to any of the Medical Officers and Lecturers, or to ERNEST HART, Dean of the School.

MEDICAL EDUCATION.—The ADDRESSES on MEDICAL EDUCATION delivered at St. MARTY'S HOSPITAL MEDICAL SCHOOL, Finsbury, by the ARCHBISHOP OF YORK (1864), Professor OWEN (1865), and Professor HUXLEY (1866), MAY BE OBTAINED, together with the Prospectus for the ensuing Winter Session, on application to ERNEST HART, Dean of the School.

KING'S COLLEGE, LONDON.—The THEOLOGICAL DEPARTMENT will RE-OPEN on THURSDAY, October 4.

New Students must present themselves on the preceding Tuesday, and may enter for the whole or for any part of the Course.

The following are the Subjects embraced in this Course:—
The Articles of Religion, by the Rev. R. W. Jeff, D.D., Principal.
Hebrew and the Exegesis of the Old Testament, by the Rev. S. Leathes, M.A., Professor, and the Rev. I. A. M'Caul, Lecturer.
Exegesis of the New Testament, by the Rev. E. H. Plumptre, Prof.
Ecclesiastical History, by the Rev. Canon Robertson, M.A., Prof.
Pastoral Theology, by the Rev. H. Chesham, M.A., Professor.
Vocal Music, by John Hullah, Esq., Professor.
Public Reading, by the Rev. A. J. D. O'Shea, B.D., Lecturer.
The Class of Candidates for admission to this Department, conducted by the Rev. Henry Jona, A.K.C., will re-open on the same day.

For information, apply personally, or by letter marked outside "Prospectus," to J. W. CUNNINGHAM, Esq., Secretary.

KING'S COLLEGE, LONDON.—DEPART-

MENT OF GENERAL LITERATURE AND SCIENCE.—

New Students must present themselves for Examination on the preceding Tuesday.

Divinity.—The Rev. the Principal; the Rev. E. H. Plumptre, M.A.

Classical Literature.—Professor, Rev. James G. Lonsdale, M.A.

Lecturers, Rev. J. J. Heywood, and C. S. Townshend, Esq. M.A.

Mathematics.—Professor, Rev. T. G. Hall, M.A.; Lecturers, Rev. T. A. Cook, M.A., and Rev. W. Howse, M.A.

English Literature, Language and Modern History.—Professor, the Rev. J. S. Brewer, M.A.; Lecturers, Rev. J. J. Heywood, M.A., and C. S. Townshend, Esq. M.A.

French.—Professor, A. Mariette; and M. Stievenard, Lecturer.

German.—Professor, Dr. Buchheim.

For information, apply personally, or by letter marked outside "Prospectus," to J. W. CUNNINGHAM, Esq., Secretary.

KING'S COLLEGE, LONDON.—DEPART-

MENT OF APPLIED SCIENCES.—LECTURES COM-

MENCE THURSDAY, October 4.

New Students must present themselves on the preceding Tuesday.

Divinity.—The Rev. the Chaplain.

Mathematics.—Professor, the Rev. T. G. Hall, M.A.; Lecturers, Rev. T. A. Cook, M.A., and Rev. W. Howse, M.A.

Natural Philosophy.—Professor, W. G. Adams, M.A.

Art of Construction.—Professor Kerr.

Manufacturing Art and Machinery.—Professor Shelley.

Land Surveying and Levelling.—Professor H. J. Castle, Lecturer, and W. Marshall, Esq.

Drawing.—Professor Bradley and Professor Glenny.

Chemistry.—Professor Miller, M.D. and Prof. Bloxam.

Geology and Mineralogy.—Professor Tennant, F.G.S.

Workshop.—G. A. Timms, Esq.

Photography.—George Dawson, Esq. M.A.

For information, apply personally, or by letter marked outside "Prospectus," to J. W. CUNNINGHAM, Esq., Secretary.

KING'S COLLEGE, LONDON.—The

SCHOOL.

Acting Head-Master.—Rev. G. F. MACLEAR, M.A.

Vice-Master.—Rev. JOHN TWENTYMAN, M.A.

This Department will RE-OPEN on TUESDAY, September 18.

Pupils can be admitted to—

1. The Division of Classics, Mathematics, and General Literature, the studies in which are directed to prepare Pupils for the Universities, for the Theological, General Literature, and Medical Departments of King's College, and for the Learned Professions.

2. The Division of Modern Instruction, including Pupils intended for Mercantile Pursuits, for the classes of Architecture and Engineering in King's College, for the Military Academies, for the Civil Service, for the Royal Navy, and for the Commercial Marine.

Scholarships.—On entrance to the School, every Boy under 15 years of age is entitled to compete for a Scholarship. One is given in each division of 18l. per annum for three years. The subjects will be found in the Calendar.

For information, apply personally, or by letter marked outside "Prospectus," to J. W. CUNNINGHAM, Esq., Secretary.

KING'S COLLEGE, LONDON.—The PHO-

TODUOGRAPHIC DEPARTMENT will be Opened, for Private

Instruction in the Theory and Practice of the Art, on and after

October 4th.—Apply personally, or by letter, to GEORGE DAWSON, M.A., Lecturer.

LECTURES ON MINERALOGY and

GEOLOGY at KING'S COLLEGE, London, are given on

WEDNESDAY and FRIDAY MORNINGS from Nine to Ten, by

Professor TENNANT, F.G.S. Those on Mineralogy begin Friday,

Oct. 5, and terminate at Christmas. Fee, 12s. Those on Geology

commence on January and terminate in June. A shorter course of

Lectures on Mineralogy and Geology is delivered on Wednesday

Evenings from Eight till Nine. These begin on Oct. 10 and

terminate at Easter. Fee, 12l. 12s. 6d. Mr. Tennant also accompanies

his Students to the Public Museums, and to places of Geological

interest in the country. R. W. JELF, D.D., Principal.

ROYAL SCHOOL OF MINES, Jermyn-street.

London.—The Sixteenth Session will commence on MON-

DAY, the 1st OCTOBER. Prospectuses of the course of study

may be had on application to the Registrar.

TRENHAM REEKS, Registrar.

OWENS COLLEGE.

Commencement of the Session 1866-7.

On TUESDAY, the 2nd of October, at Three o'clock P.M., a

LECTURE introductory to the Session will be delivered by A. W.

WARD, M.A., Fellow of St. Peter's College, Cambridge, Professor

of English Language and Literature and Ancient and Modern

History, at the TOWN HALL, King-street, Manchester.

The Lecture will be on

"National Self-knowledge in its bearing upon National Life."

Visitors will be admitted on presenting their Cards.

J. G. GREENWOOD, B.A., Principal.

J. P. ASTON, Secretary to the Trustees.

September, 1866.

ROYAL SCHOOL OF NAVAL ARCHI-

TECTURE and MARINE ENGINEERING, SOUTH

KENSINGTON.—This School will RE-OPEN on the 1st of

November next.

Application for information as to Admission, &c., should be

made to the Secretary, Science and Art Department, South Ken-

sington Museum, W. By order of

The Lords of the Committee of Council.

SECRETARYSHIP.—An EVENING EMPLOY-

MENT WANTED by an Italian Gentleman, residing

many years in England. Besides his own language, he knows

French and English; could correspond in these three languages,

and if required, even in German.—Address A. B., Post-Office,

Eccleston-street South, S.W.

PARTNER WANTED, to work a valuable

PATENT (not yet before the Public) for facilitating taking

money of flat surfaces at Railways, Public-houses, Shops, &c.,

and of almost universal applicability. Only a small outlay

required, in combination with energy and perseverance.—Apply,

by letter, to PATENTEE, Messrs. Webber, 6, Westbourne-place, W.

THE PRESS.—WANTED, by an experienced

EDITOR, who has successfully conducted a Provincial

Daily Paper for many years, a SITUATION in a similar capacity.

The Editorship of a respectable and well-established Bi-Weekly

or Weekly would be accepted. Unexceptionable references as to

character and competency supplied.—Address M. N., Mr. White's,

33, Fleet-street, London.

SUB-EDITOR.—The Advertiser desires an

ENGAGEMENT as above. Is a good Paragraphist and

practised Descriptive Writer and Special Reporter. If on a

Weekly, would undertake Musical, Dramatic, and Art Criticism,

for which he is thoroughly qualified.—Stoma, 6, St. Augustine-

road, N.W.

THE PRESS.—WANTED, by a Young Man,

aged 25, fully qualified, a SITUATION as PUBLISHER,

Assistant-Publisher, or to fill any appointment of trust. First-

class references, and security, if desired.—BTRA, Messrs. Adams &

Francis, 50, Fleet-street, E.C.

A FURNISHED HOUSE, with handsome

private Glass Studio, &c. attached to Drawing-room, TO BE

LET for 8 Months; or the Valuable Lease would be sold.—

Address B. B., Mr. Coway's, Chemist, Notting-hill-terrace, W.

TO MUSEUMS.—FOR SALE, at less than

their cost, a number of well-finished GLASS CASES, with

BRITISH ASSOCIATION.

ALLEN'S HANDBOOK to NOTTINGHAM; to which is added, a Valuable Series of Essays on Subjects of Local Interest. 360 pages, 3s. cloth; gilt edges, 3s.

"The visitors to Nottingham also, and above all the excursionists, enjoyed a great advantage in the publication, just at the critical moment, by Mr. Allen, of what nominally is but a handbook, but in reality a condensed and admirably-written county history. By common consent it was pronounced a useful work." *Times*, Sept. 1st.

London: W. Kent & Co. Paternoster-row.
Nottingham: R. Allen & Son.

EGYPT: from the Conquest of Alexander the Great to Napoleon Bonaparte. An Historical Sketch. By Rev. G. TREVOR, M.A., Canon of York. Author of 'Ancient Egypt; its Antiquities, Religion, and History.' With a Map. Fcap. 8vo. 5s. cloth boards. [Just out.]

OUR AUSTRALIAN COLONIES; their Discovery, History, Resources, and Prospects. By SAMUEL MOSSMAN, Author of the Articles "Australia" and "Australasia" in the 'Encyclopædia Britannica,' &c. With Maps. Fcap. 8vo. 3s. 6d. cloth boards. [September 1st.]
Religious Tract Society, 56, Paternoster-row, and 164, Piccadilly.

THE AWAKENING of ITALY and the CRISIS of ROME: being a Four Months' Tour of Observation in the Summer of 1864. By the Rev. J. A. WYLLIE, LL.D., Author of 'The Papacy,' &c. Crown 8vo. 5s. 6d. cloth boards. [Recent.]
Religious Tract Society, 56, Paternoster-row, and 164, Piccadilly.

AUTOBIOGRAPHY of a PROTESTANT, condemned to the Gallies for the Sake of his Religion. Translated from the French. [Nearly ready.]

"We do not hesitate to say that a more valuable contribution to the records of genuine martyrdom could hardly be found. The style of the narrative in its graphic simplicity reminds us of Defoe; but the well-authenticated facts which it relates are more interesting than fiction, and the incidents not less strange." *Quarterly Review*.
Religious Tract Society, 56, Paternoster-row, and 164, Piccadilly.

Newspaper for the Gardening and Farming Interest.

REGISTERED FOR TRANSMISSION ABROAD.

Published every SATURDAY, price 5d., or 6d. stamped, each Volume complete in itself.

(Enlarged to 32, frequently 36, folio pages)

THE GARDENERS' CHRONICLE

AND

AGRICULTURAL GAZETTE.

A Weekly Record of Rural Economy and General News.

As regards the GARDENING PART, the principle is to make it a weekly record of everything that bears upon Horticulture, Floriculture, Arboriculture, or Garden Botany, and such Natural History as has a relation to Gardening, with Notices and Criticisms of all Works on such subjects. Connected with this Part are

WEEKLY CALENDARS OF GARDENING OPERATIONS,

Given in detail, and adapted to the objects of persons in every station of life; so that the Cottager, with a few rods of ground before his door, the Amateur who has only a Greenhouse, and the Manager of Extensive Gardens, are alike informed of the routine of operations which the varying seasons render necessary. It moreover, contains Reports of Horticultural Exhibitions and Proceedings—Notices of Novelties and Improvements—in fact, everything that can tend to advance the Profession, benefit the condition of the Workman, or conduce to the pleasure of his Employer.

Woodcuts are given whenever the matter treated of requires that mode of illustration.

The FARMING PART (under the Editorship of a Practical Farmer) treats of—

THE PRACTICE of AGRICULTURE

AGRICULTURAL SCIENCE

ANIMAL and VEGETABLE PHYSIOLOGY

IMPROVEMENTS in IMPLEMENTS, described by Woodcuts whenever requisite

IMPROVED MODES of HUSBANDRY

RESULTS of EXPERIMENTAL FARMING

GROWTH and ROTATION of CROPS

MANAGEMENT of STOCK

VETERINARY SCIENCE

DRAINAGE

IRRIGATION

FORESTING

ROAD-MAKING

FARM-BUILDINGS

LABOURERS

TREATMENT of POULTRY

AGRICULTURAL PUBLICATIONS.

In short, whatever affects the beneficial employment of capital in hand.

Reports are regularly given of the English, Scotch, and Irish Agricultural Societies and Farmers' Clubs, London Markets, Prices of Corn, Hay, Cattle, Hops, Potatoes, Butter, Wool, Coal, Timber, Bark, &c., and the Weekly Averages.

REPLIES to QUESTIONS connected with the object of the Paper are also furnished weekly.

Lastly, that description of DOMESTIC and POLITICAL NEWS is introduced which is usually found in a Weekly Newspaper.

OFFICE FOR ADVERTISEMENTS:

41, WELLINGTON-STREET, COVENT-GARDEN,
LONDON, W.C.

MR. DIXON'S NEW WORK.

"A REMARKABLE AND VERY ORIGINAL BOOK."—*Saturday Review*.

"BRILLIANT, LIFE-LIKE PICTURES."—*British Quarterly Review*.

Now ready, a SECOND EDITION of

THE HOLY LAND.

By WILLIAM HEPWORTH DIXON.

With Illustrations from Original Drawings and Photographs on Steel and Wood.

2 vols. demy 8vo. 24s.

"Mr. Dixon has written a singularly able book. His genius is essentially conservative. He contrives while sipping his coffee or smoking his cigarette to throw off sketches, with the careless boldness of a hand sure of its own accuracy, which challenge the closest criticism, and whilst professing only to give rough-and-ready pictures of places and scenes of which he was in the day when Christ stood amidst them, the centre figure of the whole, he is really bringing the most subtle analysis to bear on the thought which after four thousand years of various development was found in a concrete form, stripped of its vitality and crystallized into the creeds of Pharisee and Sadducee. The sharp points of contact and antagonism, the manners, habits, and scenes of the strange race among whom Christ walked, are all graphically described in the work before us, and we think few would rise from a careful perusal of its pages without a deeper insight into the sacred story, possibly a wider understanding of the words of One who taught as having authority, and not as the scribes."—*Spectator*.

CHAPMAN & HALL, 193, Piccadilly.

NEW BOOKS TO BE PUBLISHED THIS AUTUMN BY MESSRS. LONGMANS AND CO.

RICHARD BENTLEY, New Burlington-street.

NEW BOOKS,

AT ALL LIBRARIES AND BOOKSELLERS'.

New Story by Florence Marryat.

FOR EVER and EVER: a Novel.
By FLORENCE MARRYAT, Author of 'Love's Conflict' and 'Too Good for Him.' 3 vols. post 8vo.

SECOND EDITION of UP THE COUNTRY. By the Hon. EMILY EDEN, Author of 'The Semi-Detached House' and 'The Semi-Attached Couple.' 2 vols. crown 8vo. 21s.

From the *Times*.—"In cabinet pictures of domestic life in India Miss Eden's book is scarcely equalled. To those who have never seen the country they will be as full of interest and amusement as to the old Indian, for of all the letters here reprinted there is not one which is not full of life and humour. They contain by far the most picturesque and vivid descriptions of life in India which have been laid before the public for many years, and are as fresh and vivacious as if they had only come by the last overland mail."
"There is a delightful charm about these letters. Nothing can be more graphic than the manner in which Miss Eden describes life in India. The freshness, the humour, the feminine vivacity with which she narrates what she did, saw, and endured will attract readers of all classes. We do not read about India; we see it. There is not a dull letter in the volumes, nor one from which it would be difficult to take a delightful passage."
Fortnightly Review.

AFTER the STORM; or, Brother Jonathan and his Neighbours in 1865-66. By J. E. HILARY SKINNER, Barrister-at-Law. Author of 'The Tale of Danish Heroism.' In 2 vols. post 8vo. 21s.

"As readable and thoroughly entertaining a book about American life and politics as any we have read for some time past. Mr. Skinner deserves emphatic praise for his sagacity in reading character, and the lightness and skill with which he tells a good story."—*Athenæum*.

THRICE HIS: a Novel. In 2 vols. post 8vo.

WHICH SHALL IT BE? a Novel. In 3 vols. post 8vo.

"A novel of far more than ordinary merit. The plot is well conceived, and is worked out with much spirit and care. The interest it creates is much enhanced by the admirable character-drawing in the book."—*Morning Star*.

THE NATURALIST in VANCOUVER ISLAND and BRITISH COLUMBIA. By JOHN KEAST LORD, F.Z.S., late Naturalist to the British North American Boundary Commission. 2 vols. crown 8vo. with many beautiful illustrations. 24s.

"One of the very pleasantest works on natural history that it has been our fortune to meet with. The author has a free and happy pencil, and in his descriptions bird, beast, fish and insect live before us, until we seem to know them."—*Globe*.

Also, early Next Month,

THE FOURTH VOLUME OF Dr. MOMMSEN'S HISTORY of ROME. Completing the History to the Fall of the Republic. Translated, with the Author's sanction, and Additions, by the Rev. WILLIAM P. DICKSON, D.D. In crown 8vo.

RICHARD BENTLEY, New Burlington-street, W.,
Publishers to Her Majesty.

13, Great Marlborough-street.

HURST & BLACKETT'S NEW WORKS.

COMPLETION OF THE LIFE OF WEDGWOOD.
Vol. II. of the LIFE of WEDGWOOD.

From his Private Correspondence and Family Papers. By ELIZA METEYARD. Dedicated, by permission, to the Right Hon. W. E. GLADSTONE. 8vo. 21s. bound.
"This volume (completing the work) is embellished with nearly 200 beautiful illustrations."

TRAVELS in FRANCE and GERMANY in 1865 and 1866; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia,' &c. 2 vols. 21s.

"The clearness, good temper, and sound sense with which Capt. Spencer describes every subject that comes under his notice, the picturesque variety of his descriptions, and the minuteness as well as comprehensiveness of his observations, can be appreciated only by reading his volumes."—*Daily News*.

FIELD-MARSHAL VISCOUNT COMBERMERÉ'S MEMOIRS and CORRESPONDENCE. From his Family Papers. By the RIGHT HON. MARY, VISCONTRESS COMBERMERÉ, and Capt. W. W. KNOLLYS. 2 vols. 8vo. with Portraits, &c. 30s. bound.

"A welcome and gracefully-written memorial of one of the greatest of England's soldiers and worthiest of her sons."—*Post*.

THE SPORTSMAN and NATURALIST in CANADA; or, Notes on the Natural History of the Game, Game-Birds, and Fish of that Country. By MAJOR W. ROSS KING, F.R.G.S. F.S.A.S. Royal 8vo. illustrated with beautiful Coloured Plates and Woodcuts, 20s. bound.
"We predict for Major King's volume a lasting reputation."—*Pall Mall Gazette*.

PRISON CHARACTERS DRAWN from LIFE. By a PRISON MATRON, Author of 'Female Life in Prison.' 2 vols. 21s.

THE BEAUTIFUL in NATURE and ART. By Mrs. ELLIS, Author of 'The Women of England,' &c. 1 vol. with Portrait, 10s. 6d. bound.

THE NEW NOVELS.

RACHEL'S SECRET. By the Author of 'THE MASTER OF MARTON.' 3 vols.
"Rachel's Secret" is a novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Star*.

NORA'S TRIAL. 3 vols.
Ah! let not aught amiss within dispose
A noble mind to practise on herself."—*Wordsworth*.

LORDS and LADIES. By the Author of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.
"Lords and Ladies" is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

THE WILD FLOWER of RAVENSWORTH. By the AUTHOR of 'JOHN and I,' 'DR. JACOB,' &c. 3 vols.

"A beautiful tale, written with deep feeling. It charms by its elegance, and moves by its pathos."—*Illustrated News*.

"A novel of unusual excellence. It is a story of deep interest. The characters are superbly drawn."—*Star*.

"A charming story, of great originality, full of pathos and grand nobility of thought and action."—*Observer*.

THE MOTHER'S FAVOURITE. By S. RUSSELL WHITNEY. 3 vols.

"A work of no small ability. The plot is not only well conceived, but admirably executed."—*John Bull*.

BOOKS FOR THE COUNTRY.

Each Work complete in 1 vol. price 5s. (any of which can be had separately), elegantly printed and bound, and illustrated by MILLAIS, HOLMAN HUNT, LEECH, BIRKET FOSTER, JOHN GILBERT, TENNIEL, &c.

LATIN GRAMMARS

IN USE AT THE PUBLIC SCHOOLS.

Now ready, Eighteenth Edition, revised, 12mo. 3s. 6d.

KING EDWARD VIth LATIN

GRAMMAR: Latinæ Grammaticæ Rudimenta; or, an Introduction to the Latin Tongue, for the Use of Schools.

One peculiar characteristic of this Grammar is to be seen in the labour that has been bestowed on the selection of examples for the illustration of the Rules. These examples have been chosen with a careful attention to their intrinsic value, moral, intellectual, and historical; so that the student who learns this Grammar will find that he has committed to memory a large stock of the best sayings of the best Latin Authors, both in prose and verse.

It contains also a valuable Appendix, from various sources, some of them original, on Roman History, Chronology, Literature, and Language.

Also, Fifth Edition, revised, 12mo. 2s. 6d.

KING EDWARD VIth FIRST

LATIN BOOK: The Latin Accidence; including a Short Syntax and Prosody, with an English Translation, for Junior Classes.

JOHN MURRAY, Albemarle-street.

FOR SCHOOLS and YOUNG PERSONS.

Now ready, with 6 Maps, 30 Illustrations, and numerous Woodcuts, 622 pp. crown 8vo. 7s. 6d.

A SMALLER BIBLE DICTIONARY.

for the Use of Schools and Young Persons; containing its Antiquities, Biography, Geography, and Natural History. By WM. SMITH, LL.D., Classical Examiner in the University of London.

"The Larger Dictionary of the Bible" is mainly intended for Divines and Scholars, and 'The Concise Dictionary' for Families and Students; but a smaller and more elementary work is needed for the use of Schools, Sunday-School Teachers, and Young Persons. This work has been drawn up with this object, and contains such an account of Biblical antiquities, biography, geography, and natural history as a young person is likely to require in the study of the Bible. In short, it seeks to render the same service to the study of the Bible as the Smaller Classical Dictionaries have done for the study of the Greek and Roman Classics in schools."—*Editor's Preface*.

Lately published.

Dr. WM. SMITH'S CONCISE BIBLE DICTIONARY, for the Use of Families and Students. With Illustrations. 1,060 pp. medium 8vo. 21s.

III.

Dr. WM. SMITH'S LARGER BIBLE DICTIONARY, for Divines and Scholars. With numerous Illustrations. 3 vols. medium 8vo. 51. 5s.

JOHN MURRAY, Albemarle street.

WORKS by

ARTHUR PENRHYN-STANLEY, D.D.,

Dean of Westminster.

The following are Now Ready:—

LECTURES on the HISTORY of the JEWISH CHURCH. First and Second Series. Abraham to the Captivity. With Maps. 8vo. 16s. each.

LECTURES on the HISTORY of the EASTERN CHURCH. 8vo. 12s.

ST. PAUL'S EPISTLES to the CORINTHIANS, with Critical Notes and Dissertations. 8vo. 12s.

SINAI and PALESTINE, in Connection with their History. Plans. 8vo. 14s.

The BIBLE in the HOLY LAND; being Extracts from the above Work, for Village Schools, &c. Fcap. 8vo. 2s. 6d.

SERMONS in the EAST, preached during the Tour of H.R.H. the Prince of Wales. 8vo. 6s.

SERMONS PREACHED in CANTERBURY CATHEDRAL. Post 8vo. 7s. 6d.

HISTORICAL MEMORIALS of CANTERBURY. Post 8vo. 7s. 6d.

The ADDRESSES and CHARGES of the late BISHOP STANLEY, with a Memoir. 8vo. 10s. 6d.

Nearly ready.

LITERATURE

Twenty-seventh Annual Report of the Registrar-General of Births, Deaths and Marriages in England. (Presented to both Houses of Parliament by command of Her Majesty.)

As the Reports of Major Graham, the Registrar-General, are issued two years after the compilation of the tables on which they are founded, the Report now published relates to the year 1864. This delay occasions no practical inconvenience, and seems to be necessary to ensure that completeness and accuracy without which these volumes would be useless. In one respect the Report printed in 1866 differs from those printed in preceding years. It gives greater prominence to the subject of marriage than to either of the other subjects with which the Registrar-General is concerned. No doubt a system of vital statistics is almost solely dependent on the facts relating to births and deaths; yet those relating to marriage are not without scientific value, and certainly they are far from being destitute of interest to the general public.

Marriage in England, as the Registrar-General tells us, is a public ceremony. It can only be performed in churches, in registered chapels, in Quakers' meeting-houses, in synagogues, — that is, in some recognized place of public worship, — and in the office of the Superintendent Registrar. To render the contract which is made in the Registrar's office valid, six persons must be present: the Superintendent Registrar, the Marriage Registrar, two credible witnesses, the bridegroom and the bride. The Superintendent Registrar receives the declarations; the Registrar records the particulars of the transaction; and all the six persons sign the register. In registered chapels the minister or the priest takes the place of the Superintendent Registrar; the presence of the Marriage Registrar is indispensable. This appears to be an excellent arrangement, as it relieves the minister of a secular duty. The Registrar is not present at marriages in churches of the Establishment; and this is in some respects to be regretted, "as the clergy," to use the somewhat sarcastic language of Major Graham, "who are very naturally wrapt in the sacred functions of their office, sometimes do not write the names distinctly, and sometimes omit to mention whether the marriage is by licence or by banns." Only five persons are necessarily present at marriages in churches, and they must sign the register.

To obviate as far as possible any necessity for that repentance at leisure which is supposed to follow a marriage in haste, and to protect the rights of parents and guardians, some legal delays are interposed between the expressed intention to marry and the act of matrimony. To this there is the exception, that in the Established Church a man who has resided fifteen days in a parish can obtain a surrogate's licence without notice, and be married in an hour; and the special licence of the Archbishop of Canterbury allows marriage to be solemnized "at any convenient time and place." Commonly, marriage is after a proclamation of banns upon three Sundays in the parish church, and thus a delay of at least fifteen days is secured.

The licence of the Superintendent Registrar can be obtained on due notice entered in the "Marriage Notice Book," kept open for inspection during one whole day; so the marriage of which notice is given at the registrar's office on

a Monday may be performed on the Wednesday following at that office, or at a registered place of worship, as stated in the notice. The certificate of the Superintendent Registrar is issued after a notice of 21 days, during which it is suspended in his office, while the particulars are recorded in the "Marriage Notice Book," always accessible to the public, and affording an opportunity for "forbidding" the marriage or for entering a " caveat." Upon the grant of the certificate the marriage may take place either in the registrar's office or in a registered place of worship, with the consent of the officiating minister. Thus the marriages of the Roman Catholics and of the members of all religious bodies, including Quakers and Jews, take place without hindrance, and without any other necessary delay than that required by law for the grant either of the licence or the certificate of the Superintendent Registrar.

During the year 14,611 marriages were performed in the Superintendent Registrars' offices without any religious ceremony, and some of the parties were neither connected with the Church nor with any form of religious dissent. But probably, as marriage is a civil contract by common law, many of the 14,611 men and 14,611 women were members of religious bodies. This class of marriages is very unequally distributed over the country. There are few such marriages in London; and of these a large proportion is performed in St. Pancras and Islington. That sailors have wives in every port, and therefore avail themselves of the most secret and expeditious ceremony, may be an ill-matured way of accounting for the fact that the greater part of the civil marriages in the South-Eastern Counties take place at Portsmouth (Portsea Island), Brighton, the Isle of Wight and Southampton. They are also numerous in the South-Western Counties, at Plymouth and the contiguous districts, at Exeter, Truro and Bath; in the Eastern Counties, at Ipswich and Norwich; in the South Midland Counties, at Northampton, Wycombe, Oxford, Bedford, Chesham and Cambridge; in the North Midland Counties, at Birstal, Birmingham, Leicester and Derby. The civil marriages were proportionally few in Cheshire and Lancashire, except in Bolton, Oldham, Rochdale, Haslingden, Burnley and Blackburn; and they were not numerous in Yorkshire, except in Halifax, Huddersfield, Leeds and York. The excessive number of marriages in the register offices of Durham and Northumberland is, perhaps, partly due to the presence of a large colliery population, and partly to the prevalence of a feeling against the publicity of marriages.

In Carlisle the marriages in the register office are more than double the number of the marriages in the Established Church, and more than six times as numerous as the marriages in Nonconformist and Roman Catholic chapels. Upon looking back through the registers it is seen that there was a sudden increase of these marriages in the year 1857, and that increase has since been sustained.

This sudden increase was owing to Lord Brougham's famous Act for preventing Gretna Green marriages. The Act came into operation on the 1st of January, 1857, and provides that no irregular marriage in Scotland shall be valid unless one of the parties had lived beyond the Border for twenty-one days immediately preceding the marriage. This stopped the common practice in Carlisle of crossing over the Border to get married at the famous turnpike, without ceremony, in the easy, irregular fashion of Scotland. The marriages in Carlisle before the year 1857 were much below the ordinary average of England; but since that date the marriages

have been about the average. So it is evident that the class of people who formerly married in Scotland now marry in the register office at Carlisle. They avoid marriage in places of religious worship, and entertain strong objections to the proclamation of banns; for there are more marriages at Carlisle in the Established Church after licence than after banns, while the proportion generally is as one by church licence to six by banns. As marriage after banns is less common in Cumberland than in other counties, it is the more singular, and excites unusual attention, to which the couples about to marry are naturally sensitive. They are in some cases willing to buy a licence to evade the ordeal, and in others, to avoid some of its severity, seek the quiet of the Superintendent's office.

Formerly several persons at Gretna and Springfield represented the Blacksmith, who, in common story, was wont to forge hymeneal fetters for runaway heiresses from England. Mr. John Linton, who established himself in 1825 at Gretna Hall, and converted it into an inn for the ease of lovers, performed the ceremony in an imposing costume, with a certain solemnity, and down to the year 1851 kept a register, which his widow informed the Registrar-General contains over 1,100 entries. In the year 1843 Mr. Murray, who kept the turnpike-gate on the English side of the Border, effected a revolution by representing to English visitors, always in hot haste, that the further journey of two miles to Gretna Green was superfluous, as the wedding in his presence on the Scotch side of the Border was equally valid. The argument was held to be conclusive; and Mr. Murray continued his operations uninterruptedly until 1858. In the year 1854 he registered no less than 746 marriages, 42 on one day; in the year 1856 the numbers rose to 757. Then passed Lord Brougham's Act, and the entries fell to about 30 in 1857, and 41 in 1858. Mr. Murray's pleasant occupation was soon at an end; and he died in the year 1861.

The following letter from Mr. Robert Forster, himself a blacksmith, on the English side, who took an active part in pointing out the evils of Border marriages, is not without interest:—

"Longtown, Thursday, March 8th, 1866.

"Sir,—I have been to Sark Bridge and also at Gretna to-day. Mr. Murray's widow is still living at the house with part of the family. I saw her son James, and he consented to let me look at the register of the last year before Lord Brougham's Act came into operation; that was in 1850. There are 757 entries of marriages in that year; 20 of them took place on May 10th—that would be one of the days in the term week Whitsuntide; and on November 8th there are 39 entries of marriages—that would be one of the days in the term week at Martinmas. He told me there were far more entries than 39 in one day in some of the term week days if the books were searched. He told me it was a serious thing for them, as his father built the house for the very purpose of marriages. In 1857 there are only 30 entries of marriages altogether. In 1858 there are 41 entries altogether. When at Gretna I found Mr. Linton's widow was living at Annan, with the marriage books of her husband in her possession. Several others used to keep books about Springfield; one of the main hands I named Douglas, a weaver by trade. If all the books that were kept were carefully looked into, it would reveal a fearful state of things, for any man that had a mind to keep a marriage book, and a few forms to fill up, was at liberty to start the system."

It thus appears that there is a record of 71 void and illegal marriages. That the keeper of the turnpike-gate who so violated the law should have escaped with impunity is remarkable, and points to a defect in the Gretna Green Act of Parliament.

In Cardiff, Neath, &c.

Merthyr Tydfil

in South Wales, and Bangor and Conway in the North, many marriages are contracted in register offices. Seamen and miners avail themselves most freely of the register offices; and it is stated that some of the people, who rarely go to a place of worship, would not marry at all if it were not possible to marry as easily as it is under the Registration Act. Such marriages, therefore, are not withdrawn from the churches of the Establishment, or from the chapels of the Nonconformists, but from the ranks of immorality.

Eight marriages in ten are performed according to the rites of the Established Church; and of the eight, six are after proclamation of banns, which has the advantage in country places of publishing the contemplated act to all the parishioners, and giving parties interested and justified an opportunity of "forbidding the banns." It seems to be admitted in these cases that the delay and the public proclamation of an act binding for life, affecting children unborn, and property to a variable extent, are useful, if not indispensable; but it happens that in large cities common names rapidly enunciated from the reading-desk convey no information, and in cases where property or minors are concerned a licence can be purchased, which overrides every other security. The licence, descended from the age of indulgences, is a fiscal advantage to officers of the English Church, and is so popular among large classes that it can never be superseded, unless it is proved to be disadvantageous by decisive instances. The fee for a licence is a kind of fine on the parties for performing an act, without the usually recognized provisions against its evil consequences.

By an Act of Henry the Eighth, the Archbishop of Canterbury is empowered to grant faculties, dispensations and licences in this particular as the Pope had previously done. Such licences from banns were originally intended exclusively for persons of noble and illustrious quality; but long usage has extended them to the convenience of other classes. A Select Committee of the House of Lords reporting on this subject about forty years ago, said, "The privilege of a special licence permitting marriage at any time in any convenient place is still restricted to persons of condition, but does not bar the Archbishop from granting such favours beyond these limits in certain circumstances for a fee of about thirty guineas."

In Scotland marriages by licence are unknown; and regular marriages can only be solemnized after the payment of fees ranging from 5s. to 1l. 10s., for the publication of banns in the Established churches of the parishes in which the parties have resided for six weeks. The banns are usually published on three consecutive Sundays; but in some parishes they may for a double fee be published on two Sundays, and for a triple fee on one Sunday. Thus the facility for an immediate marriage is sold in Scotland, as it is in England, to those who are willing to pay for it. The marriage is celebrated at the house of the minister, or the house of one of the parties.

In France the Registrar (*Officier de l'Etat Civil*), in all cases, proclaims the notice of marriage twice, at a week's interval, and suspends it in front of the town hall, or house in which the communal officers meet. Three days after the last publication the marriage may be celebrated.

Practically the marriages of the higher classes in England, after complicated settlements, are entered on with more deliberation than marriages of labourers and a marriage by licence

being more costly than marriage by banns, except in the North, it distinguishes classes, and is fashionable, so that nearly all people of the middle class and some artisans marry by licence, while all the labouring population marry by banns, or its equivalent certificate.

Marriages as far as the fees are concerned, may be thrown into two classes: (1) cheap marriages, and (2) dear marriages. The fees for marriage by licence vary in the several parishes, so do those by banns; but for the present purpose the fees for cheap marriages may be set down roughly at 12s., and those for dear marriages at 3l. 4s. Thus the man who marries by licence pays about 2l. 12s. for the privilege. The number of cheap marriages in the year 1864 was 153,808, which at 12s. each cost 92,285l.; while the number of dear marriages was 26,579, which at 3l. 4s. cost 85,053l. There is another class of "dear marriages," which is beyond the scope of the Registrar-General. The public must look for any record of such marriages in "reports" very different from those of Major Graham. When the justly liberal fees of the wealthy in churches and chapels, as well as the subscriptions of the Roman Catholics, are taken into account, after allowing for poor places, the annual marriage fees in England are probably not less than 200,000l., of which the people who marry by licence—one-seventh of the total number—may pay about the half.

Marriages are solemnized in more than eleven cases out of twelve by religious rites. While eight married in register offices, ninety-two men per cent. married in churches, chapels, synagogues and meeting-houses in the face of their respective communities; the law now oppressing no conscience, but allowing the utmost freedom of choice, as far as religious ceremonial is concerned. Under this equal system 78 in 100 marriages are celebrated according to the rites of the Church of England; and fourteen according to the rites of the various religious bodies. Exclusive of Roman Catholics, Jews and Quakers, who all marry rigorously according to their own rites, and exclusive of the marriages in register offices, 156,710 marriages were celebrated; 15,627 in Nonconformist chapels, and 141,083 in churches. The marriages in the churches were in number to those in chapels as nine to one. Up to the year 1837 marriage, except in the case of Quakers and Jews, could only be solemnized in England according to the rites of the English Church; and much must be allowed for habit, and for what may, as in the case of the licence, be called fashion; much also for the appropriate, generous, and natural sentiments which the English marriage service embodies: but this high proportion of nine marriages at church to one at chapel is evidence of the willing acceptance by many Dissenters of a church rite.

In former reports the Registrar-General endeavoured to show that a general relation exists between the price of wheat and the number of marriages in England. In this volume he has an elaborate examination of the question whether the price of wheat and the causes with which it is associated have the same influence on the upper and the lower classes of society.

The general result appears to be that the numbers marrying in the two classes vary in inverse proportions; that is, among the classes marrying by banns and certificate high prices reduce the number of marriages, whilst high prices increase the number of marriages of the class marrying by licence. It would be an interesting subject of further inquiry, but, we fear, one beyond the reach of the Registrar-General's department, to ascertain why fashion-

able marriages should increase with high prices. Is it that luxurious bachelors become aroused to the necessity of more careful housekeeping?

Unlike birth and death, marriage is a voluntary act, and if men and women so will, all the marriages of a country may be celebrated in any single month of the year. But human will is influenced by motives, and these appear to operate through all the seasons of the year with variable force. In London, the close of the season among the higher classes is a matrimonial epoch. This seems to justify the story one sometimes hears about Lady So-and-So saying to her daughter, "Wait for awhile; you can have the Captain if no better *parti* offers before the end of the season." Among the working classes, the festivals of Whitsuntide and Christmas, and the season of Lent, exert some influence; also the terms of service, which vary in different counties. The geniality of spring is perceptible; but Lincolnshire is the only county in which the spring weddings exceed the autumn weddings in number. The accumulations of autumn supply a store of food, and the harvest wages of the young swains in agricultural districts are often wisely invested in the furniture of a cottage.

After the first decisive question has been answered in the affirmative, the next question is, "What day?" It seems that one day in the week is always avoided—Friday. In pagan times, this *Dies Veneris* was the favourite day for such celebrations; but, for obvious reasons, the early Church made Friday no longer a day of pleasure, but one of carnal mortification. Hence, it has come to be regarded as an unlucky day; sailors will not proceed to sea, and women will not wed, on Friday. Half the weddings are on Sunday and Monday; Saturday is the next favourite.

While 147,914 bachelors wedded spinsters, and 7,511 bachelors wedded widows, 16,117 widowers wedded spinsters, and 8,845 widowers wedded widows. Thus 155,425 bachelors and 24,962 widowers wedded 164,031 spinsters and 16,356 widows. Of 100 men married, 86.16 were bachelors, 13.84 were widowers; the proportions were nearly six bachelors to one widower. Of 100 women married, 90.93 were spinsters, 9.07 were widows; of 11, 10 were spinsters, one was a widow. The proportion of re-marriages to first marriages is higher than it was 20 years ago; this is a curious fact, and would puzzle Mr. Weller, for it seems to prove that widows are growing more and more popular every day. The highest proportion of widows re-married is in Hampshire. Precocious marriages are numerous: 11,934 boys and 36,235 girls married under age; so in 100 of each sex, 6.62 males, and 20.09 females, married before attaining the full age of 21. The bridegroom and the bride invariably sign the marriage register. In the year 1864, of 180,387 couples married, it is found that the bridegroom and the bride wrote their names in 106,569 instances; the bridegroom or the bride made a mark instead of writing the name in 47,236 instances; the bridegroom and the bride both signed with marks in 26,582 instances; 41,998 bridegrooms and 58,402 brides made their marks instead of writing their names. What are we to infer from these facts? Not, say some clergymen, that all the women who make marks are unable to write their names, for they are sometimes so "nervous" that they decline to write, and make crosses. This may be true; but against any women deducted from the ranks of ignorance on this ground, must be set a large number of women who write their names so badly as to prove that they have no command over writing for any useful purpose.

The Registrar-General certainly does good

service by calling attention, year after year, to this proof of a lamentable want of education. These figures really indicate greater ignorance than has been generally supposed. It should be recollected that the marriageable women of a country are a selected class, and include very few of the infirm, deformed, idiotic, or others incapable of learning. They can nearly all learn to write if they have the opportunity. According to the Report of Dr. Stark, addressed to the Registrar-General of Scotland, it appears that all the women of the county of Kinross who married wrote their names in the registers; the proportions per cent. were also 98 in Peebles, 98 in Kincardine, 96 in Roxburgh, 96 in Kirkcudbright; 94 in Perth; 92 in Fife; 91 in Edinburgh; and 93 in the far-off Orkneys. Under these circumstances, therefore, he must be an extreme optimist who can contend that the state of education of the women of England is the best possible, when it is found that by the same test in 100 of the marrying women of the county of Bedford, only 55 write their names, in Cornwall only 60, in Staffordshire 52, in Lancashire 53, in the West Riding only 57, in Durham only 62, in Monmouthshire only 48, in North Wales only 51, and in South Wales only 44.

On the delicate question as to the consequences of marriage, the Registrar-General mentions some interesting facts, and indulges in one or two curious speculations. The marriages in a calendar year give rise to births which are registered year after year for twenty years. The births to the 167,723 marriages in the year 1859 could only be determined by following all the families and counting all the children unto the end. The division of the sum of the children by the marriages would accurately express the fecundity, as it has been called, of marriages. If the annual marriages do not increase or decrease in number through a series of years, the division of the annual births by the annual marriages of the same years expresses the fecundity pretty accurately; but the marriages in England are increasing rapidly; consequently, the 740,275 births registered in the year 1864 must be divided by the marriages of some earlier year to get an approximation to the fecundity. As the age of the mothers is unfortunately not recorded, the interval in England is unknown which intervenes between the mean age of marriage and the mean age of the mothers when their children are born; otherwise that interval would indicate the calendar years with which the births of the year 1864 should be compared. But the interval in Sweden between the mean age of mothers at marriage (25·8 years) and their mean age at the births of their children (31·7) is six years; and the interval in England cannot differ much from six years. Hence, if the legitimate births of given years are divided by the marriages of six years' earlier date, the quotient will be the proportion of children to a marriage within close limits. In England the births thus determined to a marriage were 4·255, 4·301, 4·304, in the years 1862, 1863, and 1864. In Scotland the births in 1862 to the average marriages of six years earlier date (1855, 1856, and 1857) were 4·694. The number of children to a marriage thus appears to be greater in Scotland than in England; and this is held to be a proof that married women are more prolific in Scotland than in England.

Proceeding upon another basis, the annual number of legitimate children registered in England was 626,506 in the five years 1856-60; when the average number of wives of the age 15-55, determined directly from the census returns of 1851 and 1861, was 2,843,374; con-

sequently, 100 wives bore 22·0 children annually. In like manner, it is found that 100 unmarried women bore on an average 1·7 illegitimate children; that is, 17 children to 1,000 women. 100 women, including the married and the unmarried, bear 12·3 children annually on an average. In Scotland during the same years the following proportions were found to exist: 100 wives bore 24·8 children annually; 100 spinsters or widows bore 1·9 illegitimate children; and 100 women bore 12·0 children, legitimate or illegitimate. The wives of Scotland as well as the spinsters are apparently more prolific than the corresponding classes in England; and yet taken collectively the women of England are more prolific than the women of Scotland. 1,000 English women (age 15-55) bear 123 registered children annually, while 1,000 Scotch women bear 120 children. The difference is slight, but it is in favour of the English women. This appears, at first sight, to be contradictory and paradoxical. It is explained by the circumstance that the proportion of recognized wives in the population is much lower in proportion in Scotland than it is in England; and as the fecundity of wives is to that of spinsters as 13 to 1, a slight difference in the proportions alters the birth-rates of the two populations. The difference in this respect between England and Scotland is great: in England, 52 in 100 women of the age 15-55 are wives, 48 only are spinsters and widows; in Scotland, the proportions are, reversedly, 44 recognized wives to 56 spinsters and widows.

It has been said that the late Prof. Boole, in his 'Laws of Thought,' pushed the use of algebraic symbols too far. The Registrar-General, however, furnishes us with abstruse formulæ on this delicate subject, one heretofore regarded as far beyond the reach of mathematics. We must conclude by leaving the following "equations of condition" to be worked out by such of our readers as can comprehend them:—

"Let the fecundity of wives age 15-55 in England be thus expressed by

$$\frac{\text{legitimate children in a year}}{\text{wives living in a year}} = f;$$
and that of unmarried women by

$$\frac{\text{illegitimate children}}{\text{spinsters and widows}} = \phi.$$

And for Scotland put l = legitimate births in corresponding year, borne by w wives of age 15-55; also i = illegitimate births by s spinsters and widows of same age. Then to obtain the proportion (y) of spinsters to be transferred to wives, and of illegitimate births (x) to be transferred to the legitimate, in order to make the fecundity of the corresponding classes equal to those of England, we have these equations of condition:—

$$(1) \quad \frac{l + xi}{w + ys} = f = \cdot 22034$$

$$(2) \quad \text{and } \frac{i - xi}{s - ys} = \phi = \cdot 01676$$

$$\therefore x = \frac{\phi f(s + w) - (\phi l + f i)}{i(\phi - f)} = \frac{f w + \phi s - (l + i)}{s(\phi - f)},$$

The Amusing Songster.—The Social Songster.—Everybody's Song Book.—The Family Song Book. Edited by J. E. Carpenter. (Routledge & Sons.)

HAVING taken up this series of little sixpenny volumes under an impression that we should find them a classified collection of our more popular songs and ballads, a survey of their contents has occasioned us that measure of disappointment which is experienced by persons who, after bargaining for that which they know cannot be of any great value, find themselves in possession of something that is scarcely at all better than nothing. As a collector Mr. Car-

penter neither observes nor professes to observe any principle, save the simple rule of taking what happens to lie nearest to his hand; and the incongruous pieces which he has thus gathered together are placed before the reader without any attempt at even such an arrangement as is suggested by the above titles. In the absence of a more exact classification from the collector's pen, we should venture to divide them into two groups—songs written by the editor, and songs not written by the editor. For this latter and somewhat larger section of the compilation we are by no means inclined to speak with unqualified disrespect, as it comprises some of Dibdin's most familiar songs, several of Moore's sweetest melodies, and many choice specimens of the lyrical power from the writings of some of our great national poets. But our satisfaction with the entertainment does not extend to the too profuse offerings of the editorial muse, the number and quality of which warrant a suspicion that their author is more solicitous for his own fame than for the honour of the stronger minstrels whom he condescends to notice. Regarded as a device for drawing attention to his own poems, which by themselves would certainly command no wide circle of readers, Mr. Carpenter's compilation is, perhaps, entitled to the praise which easy moralists bestow on clever tricks and new forms of sharp practice; but even from this point of view the venture is not to be commended for prudence any more than for good taste. Indeed, the comparisons which the editor provokes by the unnatural juxtaposition of his sorry doggerel with the fine harmonies and stirring verse of classic poetry are just those severest judgments that inflict the most acute anguish on vain and feeble rhymesters. Felicitously insensible to ridicule or blind to the deficiency of his labour must the poetaster be who could place side by side with Moore's "Take back the virgin page" such pointless jingle as the following song, by J. E. Carpenter:—

Mayst thou be happy each coming day,
Some gleam of sunshine still round thee play,
True hearts to greet thee and meet thy caress,
Friends to adore and one loved one to bless;
Though I have proffered my friendship in vain,
Striven, but vainly, thy young heart to gain;
Why should I not wish thee well in my heart?—
Mayst thou be happy, although we must part.

Mayst thou be happy—it was not to be
Thy future lot should be centred in me,
Tho' I was true as the earth to the sun,
Love, to be perfect, is two hearts in one;
All that I ask is, remember me still
As one who'd have bow'd to thy wish or thy will,—
Who sought not thy wealth, but thy hand and thy heart;—
Mayst thou be happy, although we must part.

When we have said that the above lines are a favourable sample of Mr. Carpenter's lyrical faculty, readers may be left to decide whether he should be most highly rated as an Amusing, or Social, or Family, or Universal songster. In justice to the gentleman and his companions, it should, however, be added that the volumes furnish proof that, in the vast host of minor minstrels, there are songsters who have no right to look down upon Mr. Carpenter with disdain. Mr. G. H. French's 'Soldier's Dream of Home'—a song deemed worthy of preservation in Mr. Carpenter's casket of Amusing songs—begins thus—

In battle's field, 'mid cannons' roar,
A brave young soldier's there,
Defending nobly with his sword,
His country's colours dear!
"Still, still fight on!" the warriors cry,
Till night o'ershades the day;
Then, in redoubt, on knapsack rough,
The tired soldier lay.

Fatigued, careworn, sweet welcome sleep
His fancy leads to roam,
Near to his loving wife and child,
And happy native home.
He hears the mother's angel-voice
Lull their first-born to rest;
He feels affection's fond embrace,
And thinks again he's bless'd.

Another of the "amusing songsters" warbles about a silent river—

River! that in silence windest
Thro' the meadows bright and free,
Till at length thy rest thou findest
In the bosom of the sea!
Oft in sadness and in illness,
I have watched thy current glide,
Till the beauty of its stillness
Overflow'd me like a tide.

It is strange that the poet should have been so powerfully affected by the stillness of the water, which was gliding past him with a perceptible current! In contrast to such insincere jingle, which one would think could scarcely serve the low ends of a musical publisher, Mr. Carpenter gives us this ditty:—

THE FARMER'S SON.

[ANONYMOUS, 1800.]

Good people, give attention, while I do sing in praise
Of the happy situation we were in in former days;
When my father kept a farm, and my mother milk'd her
cow,
How happily we lived then to what we do now!
When my mother she was knitting, my sister she would
spin,
And by their good industry they kept us neat and clean;
I rose up in the morning, with my father went to
plough,—
How happily we lived then to what we do now!
My brother gave assistance in tending of the sheep;
When tired with our labour, how contented we could
sleep!
Then early in the morning we again set out to plough,—
How happily we lived then to what we do now!
Then to the market with the fleece, when the little herd
were shorn,
And our neighbours we supplied with a quantity of corn;
For half a crown a bushel we would sell it then, I vow,—
How happily we lived then to what we do now!
I never knew at that time, go search the country round,
That butter ever sold for more than fourpence per pound,
And a quart of new milk for a penny from the cow,—
How happily we lived then to what we do now!
How merry would the farmers then sing along the road,
When wheat was sold at market for five pounds a load!
They'd drop into an alehouse, and drink "God speed the
plough,"—
How happily we lived then to what we do now!
A blessing to the squire, for he gave us great content,
And well he entertain'd us when my father paid his rent;
With flagons of good ale he'd drink, "Farmer, speed the
plough,"—
How happily we lived then to what we do now!
At length the squire died, sir—oh, bless his ancient
pate!
Another fill'd with pride came as heir to the estate;
He took my father's farm away, and others too, I vow,
Which brought us to the wretched state that we are in
now.
May Providence befriend us, and raise some honest heart
The poor for to disburden, who long have felt the smart;
To take the larger farms and divide them into ten,
That we may live as happy now as we did then.

Had Mr. Carpenter given us fewer of his own "words for music," and more songs as genuine and characteristic as this wail of agricultural distress, his collection of lyrical poems would have been more valuable and less ridiculous.

The History of Henry the Fifth, King of England, Lord of Ireland, and Heir of France.
By George Makepeace Towle. (New York, Appleton & Co.)

The heroic king who, like most heroes, was a costly luxury to his country, on which he left many a burthen too oppressive for the shoulders of either his son or people to bear, has been a favourite subject for literary artists to paint in words, and for literary philosophers to study, judge, praise, blame, acquit, or condemn.

Eight-and-twenty years ago Mr. Tyler published a life of the hero of Agincourt, which had the merit of being partly founded on original documents not previously used. The author cleared away many old errors connected with Henry, who was shown to be neither a madcap Prince, nor a man to insult a Chief Justice, nor a disobedient son eager to wear the crown which his sick father could hardly support. With this work, carefully written and compiled, Mr. Towle does not

appear to be quite satisfied. His own attempt, he says, is "to present a truthful narrative of Henry's character and career. There is no reliable history of him extant." We looked, therefore, with interest to the new sources of information which the author had, doubtless, opened; but we were somewhat disappointed in finding none that are not generally accessible. The list of authorities opens with Froissart, contains the names of "various historians of more or less authority," and ends with Miss Strickland's 'Queens of England'!

The name of Froissart will rightly lead our readers to suppose that there is an introduction to the book of some length; it, in fact, embraces the period from the Crusades to the death of Richard the Second. When Mr. Towle comes to the fall of that unhappy, unclean, and detestable monarch, and to the attendant triumph of Bolingbroke, he manifests some contempt for the people and popular judgments. "Ever thus," he says, when describing the entry of the dejected Richard and the exulting Henry into London, the people welcoming only the victor,—“Ever thus, from the beginning of the world, have those been insulted who have fallen from a high estate. The multitude follows successful usurpation, but never offers a shield to fallen dignity.” But the people whom Mr. Towle thus censures, not justly, were acting a most important political part between Richard and Bolingbroke. They helped, at least, the latter to depose the former, and could not be expected to weep at his fall. Mr. Towle himself becomes aware of this fact; his account of the coronation of Henry the Fourth ends with the words—“Thus closed the memorable day on which was confirmed, in royal state, the first English king of the people's choice.”

This, however, is not exactly accurate. Henry had no hereditary right, and, accordingly, he appealed formally to the people; but other kings had done the like before him. Heirship was not strictly regarded; and the people, in a certain sense, chose their monarchs as they chose Bolingbroke. Rufus dated the commencement of his reign only from the day of his coronation. This was a sort of compliment to the people, who on that day hailed him king. Henry the First was "chosen by the people," till when Henry hardly accounted himself king. He was English born, and the people the more readily elected him, or ratified his assumption of royalty by their voices. Stephen possessed no hereditary right, but he was proclaimed king by the assent of the clergy and people. Henry the Second's agreement with Stephen touching the succession was ratified by the Peers and popular consent; and even John's "shallow pretence" was confirmed by the assent of his subjects. The crowning seems to have been considered the seal of the popular consent. The theory, at least, and it was something more than a mere fiction, was, that the people chose their own governors. The democracy may have been sometimes deceived, but they, at least, fancied they had voices in the matter; and that flattered their pride and satisfied their minds.

It is, again, inaccurate to say that the multitude are traitorous to their fallen favourites. Richard the Third, for his own sake and the sake of the gallant father whom he loved, was the popular king throughout the north of England. The triumph of Richmond never shook Richard from northern hearts. Bacon bears well-known testimony to how those hearts were stirred by affectionate feeling at the very mention of Richard's name,—long after Henry the Seventh was seated on the throne.

We must, further, take exception to the estimate of another great man, very forcibly sketched in the Introduction to this volume.

Mr. Towle insists that Richard the Second's uncle, Thomas Duke of Gloucester, was restless, daring, heartless, scheming, conscienceless, cunning, ambitious, and treacherous. Undoubtedly, Thomas Plantagenet had small respect for a nephew who was mean, extravagant, and in his vices unable or careless to affect even an appearance of decency. Mr. Towle names Walsingham among his authorities. Let us remind him of what Walsingham says of Richard the Second and Robert de Vere, Earl of Oxford, whom he created Duke of Ireland. Even with a "prout fertur" the details are damaging to the King as well as to his effeminate favourite.

Except that the people were taught to love Thomas of Gloucester far more than his nephew, their king, there was no cause of offence given by the former. Mr. Towle, who dislikes him, says—"To what height the Duke carried his projects in his own fancy, it is not possible to say; certain it is, that he sought to degrade Richard from the throne." Thus, the author is certain of what it is not possible to decide; and he adds, that the Duke of Gloucester, "discovered in his conspiracies by the true friends of the King, was arrested, and transported to the confinement of a prison at Calais, and there he was probably assassinated. A report of his death by apoplexy was circulated through England." Plantagenet was murdered. After the deed, the King raised five peers, who were about the person of Thomas at the time of his murder, higher in the peerage. In 1397 Richard made his half-brother (by Joan, widow of the Black Prince), John Holland, Earl of Huntingdon, Duke of Exeter; Thomas Holland, Earl of Kent, became Duke of Surrey; Thomas, Lord Despencer, was named Earl of Gloucester, though the murdered Duke's young son, Humphrey, was still alive; Edward Plantagenet, Earl of Rutland, was raised to the dukedom of Albemarle; and John Beaufort, Earl of Somerset, eldest natural son of John of Gaunt, was elevated to the marquessate of Dorset. It was asserted by Mr. Carlyle, in his late address, at Edinburgh, that before the time of Charles the First men won their peerages, or were raised to higher dignities, only because of their heroic merits and deeds; whereas since that period the peerage had been growing worthless, on account of the questionable merits of the men on whom that rank had been conferred. All our history dissents from this view; and no part of our history so strongly shows it to be incorrect as the reign of Richard the Second. The peers whom we have named above, and who were simultaneously raised in the peerage soon after Gloucester lay dead at Calais, were all arraigned on the charge of being his murderers on Henry the Fourth coming to the throne; for the Duke was Henry's uncle as well as Richard's. "The issue was," says Mr. Towle, "that the mildest punishment which royal generosity could exercise was visited upon the arraigned nobles. They were merely deprived of the higher titles with which they had been adorned by Richard."

It was, however, only for a brief season. Rightly or wrongly, John and Thomas Holland, degraded in 1399, were beheaded in 1400. Despencer seemed likely to escape with degradation only; but the multitude, loyal to the memory of Duke Thomas, put a sort of Lynch law in force, and cut off Despencer's head in a rougher way than by the ordinary executioner. John Beaufort and Edward Plantagenet did indeed come off with simple loss of the higher peerages given by Richard; but, in the case of the last, it is to be remembered that the fat Plantagenet, a conspirator against both kings, was also a betrayer of his associates. He lived, however, to render service to his country by

falling at Agincourt. These conspirators suffered for that alleged attempt on the life of Henry which brought about the murder of Richard, who "had become so thoroughly contemptible that none regretted his death, excepting those who lost the excuse which his name gave for insurrection."

The blood of the Plantagenet murdered at Calais "sank into the ground." It finally disappeared a few years ago in the person of Stephen Penny, sexton at the burying-ground of St. George's, Hanover Square.

Throughout the personal history of Henry the Fifth, Mr. Towle, like many biographers, is a little too much in love with his hero. Our old, bad school-books affirmed that the young prince was riotously gay, extravagant in his debauchery, and outrageously addicted to intoxication. Modern research has proved this to be untrue; but we are not quite prepared to accept Henry of Monmouth for the nearly faultless hero that he is made to appear by Mr. Tyler and Mr. Towle. He was indeed heroic, but with all the blemishes to be found in heroes. Mr. Towle claims for him the distinction of being the greatest of the Plantagenets,—but that lofty appellation more truly belongs to the first Edward. The assumption of the title of "Heir of France" was made in spite of Henry's own knowledge that he had no shadow of right to put such a title forth. The claim of Edward the Third was hardly more sustainable. Edward, however, claimed through his mother; but as that mother was barred from succession to the French crown by the Salic law, she could not transmit to her son rights which she herself did not possess. Henry revived old claims simply because France was in a state of anarchy, and he deemed that France's difficulty was England's opportunity. Of course, his intentions were all of the purest, and his actions did not belie them. What he heroically won his feeble son unheroically lost. All went from the Lion of England, except Calais. Even that proud distinction *de* before certain English names dropped out of use in Henry the Sixth's time, as if to prove the total surrender of all claims upon either French forms or French territory. But, nominally, something more than the claims existed down to a period within the remembrance of living persons. Calais, indeed, passed from us, by a bold stroke suddenly dealt by valiant Frenchmen, under Guise, in the reign of Mary. Guise proved himself to be the man who was almost despaired of in the national proverb which said of any one whose sayings were bolder than his doings, "*Il n'est pas l'homme qui pourra chasser les Anglais hors de France.*" Elizabeth would have made many a sacrifice to buy back Calais—the last jewel lost out of all the glorious conquests made by Englishmen, by force of arms, not of right. The re-conquest of France was the dream of Anne of Denmark, with her son Henry for a hero; statesmen and warriors encouraged similar visions, and Ben Jonson added all the stimulant that ardent poetry could give to induce the prince to follow, in purpose and deeds, as in name, that other Henry, who was of Monmouth only by birth, but of Agincourt by his immortal deeds. An absurd and insulting custom,—wicked for the lie it contained, and the misery that any day might come of it,—made of each English sovereign, "*by the grace of God, King of Great Britain, France, and Ireland.*" There was blasphemy as well as mendacity in this assumption. Curiously enough, it was not abandoned till there was no king in France. When Louis the Eighteenth took refuge in this country, the absurdity of an English king calling himself by a title which he recognized in the fugitive monarch to whom he gave hospi-

ality, was too apparent. There could no more be two Kings of France in England than two Kings of Brentford in Middlesex. So, George the Third tacitly yielded to Louis the title which Henry the Fifth had revived, and which his son substantially lost; and thus ended the long usurpation of a claim, to establish which so much good blood was shed, and even some poor honour earned by that king whose history is gracefully, earnestly, but a little too partially told, in a book which we now commit to other judgment.

NEW NOVELS.

The Race for Wealth: a Novel. By Mrs. J. H. Riddell. 3 vols. (Tinsley Brothers.)

THE author of 'George Geith' has given her name at last. She gives it after a series of clever and successful novels, and she may be allowed to feel a modest pride in her "mark." But 'The Race for Wealth' is not equal to some of its predecessors. The author has even exaggerated her old fault of prophesying evil and forecasting shadows when she ought to be occupied in telling her story. The incidents of 'The Race for Wealth' lack briskness and clearness; they never appear except through an overhanging mist. The author loiters over the action, and the story is, as a natural result, dull. It is not a pleasant story, though it abounds in clever bits of description of out-of-the-way parts of London and its outskirts, which are but little known to the generality of readers. The pictures of quaint, old-world nooks, of old manor-houses of dark red brick in the midst of old-fashioned gardens, with glimpses of green meadows which still linger in the midst of the encroachments of warehouses, works and wharfs, are very charming and very clever, only the pleasure of the reader is marred by the constant sighing which the author utters over their daily disappearance. It has the effect of a continued funeral wail: indeed, the whole book has a depressing influence on the spirits of the reader by reason of the dismal forecastings and melancholy reminiscences with which it abounds. It is like being obliged to walk amid deserted gardens, overgrown with weeds and mildewed from neglect. Everybody knows from experience that life is full of hard work, and too often of hard measure, and that there is much bitter disappointment; but, in spite of this, life itself is interpenetrated with a feeling of pleasure; and when people find themselves unhappy or disappointed, they are rather surprised than not, and protest against it. But in 'The Race for Wealth' there is a permanent and all-pervading sense of depression, arising from the author's view of life in general, which affects the spirits of the reader. The author never once allows anybody in her story to be happy, even for five minutes at a time. If the characters, poor things! venture to indulge in hopes or prospects, the author is always at hand to shake her head over them, and to tell the reader how little they know about the matter, and how miserably disappointed and wretched they are going to be; and she remorselessly fulfils her own predictions. The author has one great want in her composition; she has not the slightest perception of fun or humour. Miss Ada Perkins and her mother are intended to be types of vulgar Londoners; but they are so intensely low and vulgar, so unredeemed by any human geniality, that the reader is only anxious to get out of their road. The story might have been made a good one. Lawrence Barbour, the young man of good old family, resolving to win, not only his own livelihood but wealth to restore the fortunes of his family,—his journey to London,

and his introduction to the mysterious business in Distaff Yard, is touched with pleasant originality. The indication of the business of chemical adulteration is a new and whimsical touch in the modes of earning an "honest living." The character of Mr. Sondes, the partner in Distaff Yard, the sole proprietor of the sugar-refinery in Stepney, his quaint old house and garden, his niece, the strange child-woman Olivine, are all well drawn, and have in them the makings of a very good story, if the author could have been more genial, and less given to painting black shadows, and dwelling under them. The great fault of the tale lies in this that the author gives arbitrary results, instead of allowing the qualities of the different characters to work out their natural consequences. Shortly after coming to London, Lawrence Barbour rescues a young lady from a runaway horse, and in so doing is nearly killed himself. He, however, recovers. The young lady is the daughter of Mr. Alwyn, a rich commercial man, who has bought the family estate of the Barbours. Miss Etta Alwyn is described as a sort of siren. She is fair, fascinating, and false, with a profusion of coarse, black, snake-like tresses, which have a deadly charm for all the men who come near her. All her charms, however, come to the reader by hearsay; for she neither says nor does anything in the book to keep up her reputation for fascination. She is simply an ill-bred unprincipled, disagreeable young woman. Such as she is, however, Lawrence Barbour falls in love with her, proposes, and is refused by her—the fact being that she has allowed herself to be bartered by her father in a transaction to keep up his commercial credit. Lawrence gives himself up to hard work, and after two years during which he has not seen the fatal fair one he marries Olivine, the sweet little niece of Mr. Sondes. He is taken into partnership, and ought to have been a happy as well as fortunate young man. The character of Olivine Sondes is exquisite; she is the redeeming personage of the book. There is another young man, Percy Forbes, who has also been in love with Miss Alwyn, but escaped from her snares. He is in love with Olivine, and would have made her a better husband than Lawrence, if she could have thought so. The complication stands thus: Lawrence loves Etta; Olivine loves Lawrence and Percy loves Olivine. After the two ladies are respectively married, the author intends to show how differently the two men behave under a similar temptation. Lawrence, almost as soon as he is married, finds out his mistake, but heartily tries to do his duty to his poor little wife, for whom he has a real tenderness, that would have made very good conjugal love if the author would have given him a chance but she has evidently doomed him to fall, and she causes much misery to everybody by this "fixed fate." Percy is also thrown into temptation by being driven into partnership with Lawrence, and we are told how much and how hard he struggles with his passion; but Olivine is a dear little soul, and has no thoughts except for her husband and her uncle. Etta, on the contrary, now Mrs. Gainswoode, hates her husband, hates the county society in which her lot has been cast, loves Lawrence as much as she can love any one, and does her best to tempt him. This comes to his wife's ears, who behaves well, but being only mortal, shows a spark of jealousy; and though Lawrence pacifies her, and strives manfully against his own infatuation, yet one day Etta flings her arms round his neck and kisses him, and poor Olivine comes into the room, and can only see with her eyes, without knowing all that has gone before. So there is misery in abundance, but not much knowledge of character or of human nature.

Men who work as hard as Lawrence Barbour have no time for illicit attachments; and though Etta might be the original queen of his soul when he thought about her, the comfort he found beside his wife was too genuine and substantial to leave room for any engrossing passion; men are both lazy and limited in their power of emotion. However, as we said, he is a man doomed by the author. Mr. Sondes dies and leaves a will, by which Lawrence cannot touch any of his money, which is all bequeathed to Olivine, and Percy Forbes is her trustee; the money being very straitly tied up, lest she should give it to her husband. Lawrence is of course disgusted, and of course Etta is at hand to take advantage of the occasion. Her husband had died, and she is a well-jointed widow. A misunderstanding about money with Olivine, which she has no power to give him, brings on the catastrophe. Lawrence Barbour, being a middle-aged man, with a wife, family, and a good reputation on 'Change, makes an entirely needless scandal by eloping to France with Mrs. Gainswoode, and, on their return, living with her openly in his house at the West End, leaving his wife and children to live in her uncle's old house at Stepney. This culmination is not worked out with any care or delicacy. Olivine is advised by Percy to offer her husband a divorce; and he takes the opportunity to declare his own passion, which we are told does not displease her, though she banishes him on the spot. There is one scene very well done—the scene between Olivine and her husband, when she proposes a divorce; it is touched with feeling, and is true to nature. The remainder of the story is very unsatisfactory. Lawrence loses all his money, quarrels with Etta, and is struck down with mortal illness. Olivine goes to him, nurses him till he dies, loving him faithfully to the end. Whilst he lies dead in the house, Etta comes, asking to see him, pleading her great love for him. Olivine consents, and takes her to the room where he lies. Etta kisses his lips, and "then she signs that she was ready, and turns to leave the room—"Do you forgive me?" she whispered on the threshold. "I do," Olivine answered. "Will you let me kiss you?" and, receiving no repulse, she wound her arm round Olivine's neck, and pressed her lips to hers."

Whoever has striven from the heart to forgive a mortal injury will know the bitter struggle and difficulty with which alone a just resentment can be quelled. The above piece of superhuman amiability is revolting; it is false to human nature; it is false morality, and altogether lacks the beauty and reality of truth. Eventually, Olivine marries Percy Forbes; but even then he is tormented by reading in his wife's face "that her thoughts have travelled to the lonely graveyard by the river, where Lawrence Barbour sleeps quietly, unconscious of the din of the great city where other men traverse the streets he once paced." The author must guard against this tendency to sentimentality. It is unhealthy, enervating, and makes a book very dull to read. Poetical justice is tardily executed on Mrs. Gainswoode; she is left a haggard, discontented woman who has lost her beauty.

Cradock Nowell: a Tale of the New Forest.

By Richard Doddridge Blackmore. 3 vols. (Chapman & Hall.)

'Cradock Nowell' is a clever novel, decidedly original in style and mode of treatment; it is amusing too, and the reader who once fairly enters upon it will hardly fail to read it through. The author has improved in his craft since the date of his former novel, 'Clara Vaughan.' But 'Cradock Nowell' is not yet by any means the best thing he can do.

The style is overlaid with mannerisms and affectation; the author is in love with inverted forms of phraseology, which are not English idioms; and he delights in far-fetched words and pedantic epithets, which resemble the sparks which are spit by a grindstone when it is sharpening iron. The illustrations often render the idea unintelligible; as, for instance, a young man who has surprised, without appearing to see, a very pretty young lady admiring herself in a pool of still water, is thus described:—"Beyond all doubt (she thought) Cradock Nowell was deep in the richest mental metallurgy, tracing the vein of Greek iambics. Young Cradock Nowell was not such a muff as to be lost in Greek senarii, no trimeter acatalectics of truest balance and purest force could be half so fair to scan; not Harmony, of the finest golden hair, and her nine Pierid daughters round the crystal spring, were worth a glance of the mental eye when fortune granted bodily vision of our unconscious Amy." The author talks of a father feeling "auctorial pride" in his son's width of shoulder, and of words of "migrant petulance" between the father and son. We could multiply examples, for there is scarcely a page not disfigured by some far-fetched conceit. There is, however, a vitality in the story which will hold fast the reader's interest in spite of the extravagance of the phraseology. The characters are spirited, though they, like the style, are exaggerated; but they are types, and the reader can form a clear idea of them every one; and his kindly regard is insisted upon in so peremptory a manner that he cannot refuse to give it. The story itself is too much overlaid by characteristics, and it is not so clearly told as it ought to be to render it intelligible. The main outline of it refers to twin brothers, whose Irish nurse has forgotten which is the elder, the rosette by which she had distinguished them having fallen to the ground. She settles it to her own satisfaction, and the boys grow up under the care of their father, Sir Cradock Nowell, and their father's friend, John Rosedew, the rector. The brothers grow up, loving each other well; but the father has a partiality for the younger of the twins; he grows unjust and disagreeable, and departs from his original character. The elder brother, Cradock, is a better young man than his brother, who is by no means a pattern character. The reader is allowed to believe that they both love Amy Rosedew, the rector's daughter; but this important point is left obscure for the sake of making a slight mystery. Cradock Nowell, the elder, loves Amy Rosedew; Clayton loves Pearl Garnet, the daughter of his father's steward, a very remarkable person, but whose history is given in so vague a manner, for the sake of an after-surprise, that the whole force of his position is lost. Bull Garnet, the father of Pearl, is the illegitimate half-brother of the baronet. His mother had been deceived by a false marriage, and left to starve. The present baronet, by way of making some amends, had made him steward and bailiff. Bull Garnet, though described with absurd exaggeration, has much force and truth. On the eve of the day when the brothers are to attain their majority, an unwelcome guest comes in the person of a regimental surgeon, who had attended at the birth of the twins, and he discovers the mistake of the Irish nurse. The brothers take this change of position affectionately. They go out, not together, but shortly after each other, each taking his gun; the elder, the one who had just stepped into his brother's place, is discovered shot dead in a lonely coppice, while Cradock, with both barrels of his gun discharged, is standing close beside him. The father believes his son guilty,

and drives him from his presence. The rest of the tale is chiefly taken up by the account of what becomes of Cradock Nowell, and how at length he is restored to his home and to his father. There are many other personages introduced; among the rest, a remarkable young lady, a half-caste niece of Sir Cradock, who has had a wonderful education,—her chief accomplishment being a skill in thieving which would place her at the head of her profession. She is amusing, but as entirely extravagant and out of nature as if she had been introduced as a centaur or a fiery dragon. The picture of Bull Garnet's remorse is well and strongly drawn. We must leave the reader to make out the rest of the plot for himself. There are some excellent descriptions of forest scenery, and a storm at sea with the wreck of a ship, which are very powerfully given.

Arne: a Sketch of Norwegian Country Life.

By Bjørnstjerne Bjørnson. Translated from the Norwegian by Augusta Plesner and S. Rugeley-Powers. (Strahan.)

WE closed our notice of the review of 'Arne' in its original Norwegian (*Athen.* No. 1800, April 21, 1862) by expressing the pleasure with which we should "see an English translation of this little volume"; and now two enthusiastic ladies send us the story in an English form. The translation is prettily done,—the difficult bits of verse being especially well rendered: and the only blemish of the book is the Preface, which is eulogistic without being appreciative, and, in the portions termed biographical, simpers on the verge of silliness. "Introductions," however, are generally awkward, in literature as well as in society. The reader may congratulate himself, after all is said, on being able to peruse in idiomatic English a story which is popular at every Norwegian hearth, and which has been as widely read in the German version as in the Norwegian original.

Such fresh little bits of nature come to us rarely; they are green spots in the arid waste of fiction. The merits of 'Arne' are patent on the face of it. In the first place, there is no "plot"; next, there are only two or three characters; and last, the tale is deliciously short—a crystalline little prose poem, without a bit of padding. Herr Bjørnson possesses the splendid poetic virtue of concentration, and paints with sharp, decided touches on a tiny canvas. His are merits which, in these days of showy writing, when manner habitually predominates over matter, are in some danger of being undervalued. An artist, not a photographer, he draws souls more than faces, and although his manner is as expressive as can be, he gives you a good deal of thinking to do on your own account. Our readers will remember the exquisitely suggestive piece of real life and death, which formed the subject of our extract, in the review to which we have referred. We need not again tell the story. Enough to say, that the little work, from beginning to end, is perfect in its way. We cannot conceive a nicer gift for a young girl,—but she must be a thoughtful young girl.

It would be idle to pretend that Bjørnson possesses the highest order of creative power; but he has genius—"a box where sweets compacted lie"—and his art, so far as it goes, is very complete. He has some humour, too, and the strangest kind of all, sad humour,—with gleams not dissimilar to those struck out by Baggesen in his autobiographical sketches. He never ventures to write on subjects which he has not thoroughly apprehended. He cannot, like Oehlen-schlager, sit down new to half-a-dozen subjects,

and produce half-a-dozen works in different moods and measures; but he is never faulty nor foolish like Oehlenschläger. He has struck out a line of his own, and that line is prose-poem writing,—in which he is infinitely more successful than in writing plays.

His plays contain, as may be anticipated, much excellent character-painting and a good deal of real poetry. They are stray and sketchy, however, and lack what Hazlitt terms the highest dramatic quality, that of fortitude. We can hardly conceive Björnson as the author of the namby-pamby rhymes between Hakon and Inga in 'King Sverre.' The best of his dramatic works is 'Sigurd Slembe,'—though the dramatic sketch entitled 'Mellem Slagene' is, as a sketch, first-rate. 'Sigurd Slembe' is well worth the trouble of translating. The second part, commencing with the arrival of the wild rover in Caithness, and ending with the death of Harald by the poisoned shirt, is almost tragic in its power, and renders us doubtful what the writer may yet do in that direction. Will not the Misses Plesner and Powers, who have quite mastered Björnson's idiom, and can so skilfully render it into its English equivalent, oblige the public a little further? Whoever reads 'Arne' will gape, like Oliver Twist, for more,—though Herr Björnson be no dispenser of mere gruel. In these times of blatant novelists, it is no ordinary treat to get a story which affects one almost as finely as a poem, and shows by its popularity that the literature of the North is as yet uncontaminated by the circulating library.

Year Books of the Reign of King Edward the First, Years XX. and XXI. Edited and Translated by Alfred J. Horwood. Published by the authority of the Lords Commissioners of Her Majesty's Treasury, under the direction of the Master of the Rolls. (Longmans & Co.)

THE present volume of the series of hitherto-unpublished Year Books, though not less ably and carefully edited than its two predecessors from the same hand, falls considerably below the first, and to some extent below the second, in interest to the general reader, owing to the peculiar nature of its contents, which are almost wholly devoted to the dry details of the law of real property in this country during the thirteenth century; a system of legal attack and defence, which, based upon the remote usages and requirements of feudalism, was in its full vigour in the age of Judge Lytton, culminated as a system in the times of Fitz-Herbert and Coke, and, after finding its most laborious, if not most able, expositor in the anonymous pages of that wondrous mass of legal lore, Sheppard's 'Touchstone,' finally received little short of its deathblow through the agency of the sweeping enactments of Statute 3 & 4 William IV. c. 27, section 36.

These Year Books will, however, be of interest, and indeed of considerable value, on the other hand, both to the student of our black-letter law and to the critical inquirer into our earlier social history, as modified by the rules and rights of property and possession; while again, on a sifting examination, there will be found some few items here and there calculated to afford a relish to the man of purely antiquarian pursuits, and receiving an additional zest from the fact that mention of them is probably nowhere else to be found.

Procedure in various Courts of the Iters, Eyres, or Circuits, of the Justiciars of King Edward the First is the staple subject of the volume: the Iters being those of Hereford, 20 Edward I.; of Salop, 20 Edward I.; and Stafford, 21 Edward I.; with the Pleas in Common Bank of 20 Edward I. The source from which

the learned editor has derived his text is a large folio in the University Library at Cambridge (Press-mark, Dd. 7, 14), in various hand-writings of the time of Edward the First; and which, formerly belonging to Bishop Moore (whose library was bought and presented to the University by George the First), had previously been owned by, or passed through the hands of, Francis Tate, a legal antiquary of some celebrity in the days of Elizabeth and James the First, and a few of whose miscellaneous tracts the pages of Hearne's 'Collection of Curious Discourses' have preserved to us. As to the still earlier history of this manuscript, Mr. Horwood suggests that it may have been compiled for, or at some period come into the possession of, some person or community in Shropshire, Gloucestershire, or Herefordshire,—a conclusion seemingly warranted by certain internal evidence supplied by the contents of the folio, which, in addition to the Iters, contains a large mass of matter of a legal and miscellaneous description.

Mr. Horwood's volume, as already stated, is almost wholly devoted to legal details in reference to the then existing laws of real property, and to procedure under the now forgotten writs of Novel disseisin, Mort d'ancestor, Formedon in the descender, Darrein presentment, and dozens perhaps of other ancient and now exploded methods of legal remedy,—the minutiae of which may be found by any enterprising reader in the "New Natura Brevium of the most Reverend Judge, Mr. Anthony Fitz-Herbert," their memory being more scantily retained in the columns of our Law Dictionaries in general.

In these reports of cases in which the interests of noble and ignoble were dealt with, whose bones have now been mouldering in the dust for more than half a thousand years, and many of whose names survive in these pages only, we note very much splitting of straws by the legal luminaries of that day, judges and counsel alike, much hard hitting in the way of confident assertion, and some slight spice withal of forcible language, in the form of round oaths and outspoken appeals to the Deity, at moments when, as it seems to us, they were singularly little needed. We turn, however, from these and its purely technical features to the amenities and curiosities of the volume,—few in number, and perhaps not very striking; but such as they are, we will give our readers a sample.

As to tenancy by the Curtesy of England (translated from the Anglo-Norman of the original):—

"Note, in order that the husband may hold the inheritance of his wife by the Curtesy of England, by reason of issue between them, it is necessary that it be heard to cry, or squall, within the four walls. And note, that in this case the inquest (for inquiry as to the fact) shall be taken partly or wholly from the hundred where the child was born, and not from the hundred where the thing demanded is, or lies; but (it may be taken) partly from the one and partly from the other."

As to proof of debt by tally:—

"One Adam demanded a debt by tally, and offered suit (i.e., proof by his witnesses).—*Tiltone* (Counsel for Defendant). Sir, we do not think that answer ought to be made to a bit of wood there, without writing.—*Kave* (Judge). Make answer.—*Tiltone* waived his first objection, and said to his client, 'If we abide judgment, and he adjudge that the plaintiff is to be answered without there being any writing, you will be as though undefended.' And then he prayed that the suit might be examined; and there was no suit.....Note, that by Law Merchant one cannot wage his law against (i.e., produce his witnesses in denial of) a tally; but if he deny the tally, the plaintiff must prove the tally (by a suit of his own)."

It was the burning of the national Exchequer tallies, which had accumulated for centuries, many of our readers will probably recollect, that caused the destruction, by fire, of the old Houses of Parliament.

A family arrangement, and writ of Novel disseisin consequent thereon:—

"One Adam brought the Novel Disseisin against his elder brother. His brother said that he was never so seised that, &c., and prayed the Assize (a jury). The Assize came, and said that at a certain time there was one William, who was tenant of that land for which Adam brought that Assize, and had two sons, one, John the elder, and Walter the younger; he took a determination in his dying illness, to advance his younger son, so that the honest man of his own good will had himself led by the hand out of the house where he lay, as far as the gate; and there he had himself placed in a cart, and rode to C., and there assumed the order of the Black Monks (Benedictines), and died three days afterwards. The (younger) son took his seisin there, and remained in possession therein until his father was dead; and his attorney remained in possession a fortnight after his father's death, until John, the elder son, came from L., and turned out the attorney, and kept his brother out.—*Louthere* (Counsel for the Defendant). Sir, all the father's goods remained therein, and his wife also, until his death; therefore he died seised. The Assize said that his goods were all ousted, and that his wife was not abiding therein, but in another house adjoining. Judgment given that the younger son had been disseised (unlawfully deprived of his seisin)."

Where a person had committed a crime in the bailiwick of any liberty, it was the usage for the bailiffs of the said liberty to approach him with white wands, and summon him to surrender, "to the peace of our lord the King" (page 127). This agrees, Mr. Horwood informs us, with a passage in Britton, where a white wand is made to negative any intention to commit or provoke a breach of the peace.

In page 220, we learn from Spigornel, an able and energetic countor, or pleader, of that day, that, according to the custom of the town of Shrewsbury, a person was deemed to be of age when he knew how to count up to twelve pence.

As to constructive livery of seisin:—

"Alice de Buildwas brought writ of Novel Disseisin against N., her father, and Isabel, her sister, who came and said that Alice never was so seised, &c. The Assize came, and said that N., the father of Alice, made a good deed to Alice, and came to the Lord's Court, and delivered that deed before good folks, and said thus,—'Alice, go to that land, and take seisin thereof.' Alice immediately afterwards borrowed of her neighbour a plough; the which neighbour, in the name of Alice, went and ploughed upon that land, and ever after that time down to the present Alice has neither ploughed nor sowed, nor taken any other profits, but immediately afterwards went out of the country; and then Alice's father entered, and enfeoffed Isabel, his daughter, who now is tenant.—*Cave* (Judge). 'Was N., the feoffor, in that vill where the land lay, so near the land that he could see the land, or point it out with his finger? And if he did so or not, tell us: or if the land was so near the Court, that he could see the land, or point it out with his finger, when he so said in Court,—'Alice, go to that land, and take seisin.'—'The Assize: 'Sir, not at all; on the contrary, he was a league distant from thence.' The judgment is pending."

It would go against Alice, we are inclined to think.

Hugh and Howel, the Bishops "of Tassa," as Mr. Horwood has somewhat inefficiently rendered the words "*Eveske de Tassa*," without further explanation, were, no doubt, the bishops "of St. Asaph" (consecrated A.D. 1235, 1240) so named. There seems to have been a tendency among us in the Middle Ages to curtail the names and titles of Saints, where the name

begins with a vowel: "Taudrey" and "Tantony" (for "Saint Audrey" and "Saint Anthony") are comparatively familiar examples.

In his translation, "Beges de Cnovile, tenant, prayed aid of her parcener" (*Salop Iter*, 20 Edward I., p. 288), we are inclined to differ from Mr. Horwood, and should prefer rendering it "his parcener." There can be little doubt that "Beges de Cnovile," here named, is identical with the personage more generally mentioned as "Bogo de Cnovile," who was sheriff of Staffordshire and Salop, in the fifth of Edward the First, and at a later period. It is true that, in the first degree, parceners by common law must be females; but males descending from any or either of such females may be parceners with the surviving females; and in such relation, in this instance, with Alice of Essex, we take Bogo de Cnovile to have stood. "Beges" was probably an Anglicized form of a Norman Christian name. "Drogo," English "Drew," a Christian name current for several generations in the Earentin family, was another name of similar euphony and coinage.

From "Pleas in Common Bank" (p. 307), we learn that it was a custom of the town of Gloucester, that no one, unless he were a freeman of the town, might cut cloth within the precincts thereof, but was allowed to sell it only by the piece.

In page 375 (21 Edward I.), a recent conflagration at Lichfield is alluded to, apparently of very considerable extent.

In the *Stafford Iter* (21 Edward I.), certain land is in dispute, in reference to which it is stated that King Henry the Elder bestowed eight acres thereof upon the ancestor of the claimant, on being entertained by him, while hunting, at dinner, on that spot. This statement, we learn from Mr. Horwood (Preface, page xx), is confirmed by the *Iter Roll*, whence it appears that the land given was at King's Bromley, in the Forest of Cannock.

We note a slight omission ("one fortnight") in Mr. Horwood's translation, at page 82, line 10; and we would prefer "on one side" in page 156, lines 28, 32, as in page 192, line 27. These, however, are but trifling exceptions to the carefulness and general accuracy which characterize his volume throughout.

In concluding, we cannot but add our strong belief that if the criminal records of this country (which, there is no room to doubt, still survive in large abundance) were similarly dealt with, in the way of publication, between, say, the reigns of Henry the Third and Henry the Eighth, a mine of information would be disclosed, in reference to the habits, employments, pursuits, and social history of the middle and lower classes, including the trades and secular clergy, of those days, which at present lies almost undreamt of, and utterly unrevealed; and which would enlighten us probably on those points more than all the other sources of information thereon, which have been hitherto made available, put together.

NEW POETRY.

Helenore; or, the Fortunate Shepherdess: a Poem in the Broad Scotch Dialect. By Alexander Ross, A.M. A New Edition, containing a Sketch of Glenesk, a Life of the Author, and an Account of his Inedited Works. By John Longmuir, LL.D. (Edinburgh, Nimmo.)

Alexander Ross was a Scottish schoolmaster, who, fired with the study of Allan Ramsay and his compeers, published, in 1768, a long pastoral story in rhyme, which has the merit of preserving for us, in a very musical form, the expressive beauties of the Morayshire dialect. But it takes the form of 'Helenore' to

discover that Ross possessed very slender poetical gifts. His merits may be said to consist in a thorough mastery over his idiom, a certain insight into character, and occasional gleams of sly humour—very noticeable in his queer song of 'The Rock and the Wee Pickle Tow,' beginning—

There was an auld wife and a wee pickle tow,
And she wad gae try the spinning o't;
She louted her down, and her rock took a low,
And that was a bad beginning o't.
She sat and she grut, and she flet and she flang,
And she threw and she blew, and she wriggled and wrang,
And she choked and boaked, and cry'd like to mang,
Alas for the dreary spinning o't.

Dr. Longmuir, however, who edits the present edition, determined to make the most out of his subject, gives us a long sketch of Glenesk, where Ross resided many years,—a long and irrelevant "author's life,"—and a sketch of the author's inedited works. After all is said and done, it must be admitted that the Doctor's gossip is very interesting, and full of a quaint innocence that does one good. As a fair specimen of Ross in his best vein, we subjoin poor Nory's dream of the fairies:—

Kneifer and trigger never trade the dew;
In many a reel they scamper'd here and there,
Whiles in the yerd, and whiles up in the air.
The pipers play'd like ony touting horn,
Sic sight she never saw since she was born.
As she's beholding all this mirthful glee,
Or e'er she wist, they're dancing in the tree
Aboon her head, as nimble as the bees.
That swarm in search of honey round the trees.
Fear's like to fell her, reed that they should fa'
And smore her dead, afore she wan awa;
Syn'e in a clap, as thick's the mottie sin,
They hamphis'd her with unco like and din,
Some cry'd, Tak ye the head, Ise tak a foot,
We'll lear her upon this tree-head to sit,
And spy about her. Others said, Out fy,
Let be, she'll keep the King of Elfin's ky.
Another said, Oh, gin she had but milk,
Then should she gae frae head to foot in silk,
With castings rare, and a guesd nourice-fee,
To nurse the King of Elfin's heir, Fizzee.
Syn'e ere she wist, like house aboon her head,
Great candles burning, and braw tables spread;
Braw dishes reeking, and just at her hand,
Trig green coats sairing, 's' upon command.
To cut they fa', and she among the lave;
The sight was bonny, and her mou'd did crave:
The mair she ate, the mair her hunger grew,
Eat what she like, and she could ne'er be fu';
The knible Elves aboot her ate ding-dang,
Syn'e to the play they up, and danc'd and flang;
Drink in braw cups was caw'd about gelore;
Some fell asleep, and loud began to snore.
Syn'e in a clap, the Fairies a' sat down,
And fell to crack about the table round.
Ane at another speed, Fat tricks play'd ye,
Whan in a riddle ye sail'd o'er the sea?
Quoth it, I steald the King of Sweden's knife,
Just at his dinner, sitting by his wife,
Whan frae his hand he newins laid it down;
He blam'd the steward, said he had been the lown;
The snakeless man deny'd, syn'e yeed to look,
And lifting of the tablecloth the nook,
I gae't a tit, and tumbld o'er the bree;
Tam got the wyte, and I gae the telree!
I think I never saw a better sport,
But dool fell'd Tam, for sadly he paid for't.
But, quoth anither, I play'd a better prank;
I gard a witch fa' headlins in a stank,
As she was riding on a windle strae,
The carling gloff'd, and cried out, Will awae!
Another said, I coup'd Mungo's ale,
Clean heels o'er head, fan it was ripe and stale,
Just whan the tapster the first chapin drew;
Then bad her lick the pale, and aff I flew.
Had ye but seen how blate the lassie looked,
Whan she was blam'd, how she the drink miscooked.
Says a gnib elf, As an auld carle was sitting
Among his baws, and loosing lika knitting,
To air his rusty coin, I loot a claught,
And took a hundred dollars at a fraught.
Whan with the sight the carle had pleas'd himself,
Then he began the glancing heap to tell:
As soon's he miss'd it, he rampag'd red-wood,
And lap and danc'd, and was in unco mood;
Ran out and in, and up and down; at last
His reeling eyn upon a raip he cast,
Knit till a bawk, that had hung up a cow:
He taks the hint, and there hangs he, I trow.

As she's beholding lika thing that past,
With a loud crack the house fell down at last;
The reemish put a knell unto her heart,
And frae her dream she waken'd wi' a start:
She thought she could na scape o' being smord,
And at the fancy loudly cry'd and roar'd.

Let the reader note the ease and vigour with which Ross manipulates the heroic couplet, always very difficult to manage. The vigour of

his idiom can only be appreciated by persons acquainted with the dialect in which he writes. A copy of 'Helenore' ought to be transmitted to Prince Lucien Bonaparte; indeed, all philological students will find the book a treasure.

River Reels. (Masters.)

This little volume of poems, by a lady, is named after the first, but not the best, of the series. The author has a pretty knack of versification; her lines are polished, her language is well chosen, and she has some power of thought; so that we cannot doubt her capabilities of producing some work of greater pretension than the present. The collection before us consists of short poems, chiefly of a religious or contemplative character. Those entitled 'A Vision of Philosophy' and 'A Round of Days' are perhaps (each in its way) among the most promising. It is refreshing to be able to notice for once a new book of poems without having to enter our usual protest against bad rhyme, slipshod metre, and ungrammatical English.

OUR LIBRARY TABLE.

Official Illustrated Guides to the Midland Great Western, Dublin and Drogheda, and Great Southern and Western Railways of Ireland. By George S. Measom. (Griffin.)

THE intending tourist who grudges the price of a Murray will find Mr. Measom's Guides cheap and portable. This is about all that can be said of them critically, for what should be their literary part is generally made up of quotations from other handbooks. Mr. Measom draws largely on the "talented compiler" of Murray, and even more largely on the 'Ireland' of Mr. and Mrs. S. C. Hall. But there is one portion of his guide-books which belongs to himself alone, and which is certainly their distinctive feature. We allude to the "commercial aspect" of the chief towns, which, he tells us in his Preface, "is obtained by *personal visits*," and with regard to which he reminds "the public, especially the recipients of the presentation volumes, that the houses indicated are in all cases those of the leading tradesmen in the several towns specified." The italics are Mr. Measom's own, but the interpretation of them is the reader's. All readers of any penetration will see that Mr. Measom wants to puff the tradesmen in question; and a glance into the department called the "commercial aspect" will confirm this view. We know what to make of a writer who praises a wine-merchant, and then tells us, "in respect to the prices, the highest rather than the lowest should be paid. This is, indeed, an infallible rule in purchasing wine of a merchant of integrity..... While in the cautionary vein, we would also strongly advise the purchaser to select the *best quality* of wines at the *cheapest* in the end." We fully recognize the soundness of Mr. Measom's advice; but when our wine-merchant tells us no sherry is fit to drink under 60s., why do we suspect his sincerity? And if this principle is right as regards wines, it must be right as regards guide-books. On Mr. Measom's own showing it must be cheapest in the end to pay the highest price for Murray than the lowest price for Measom. Murray, at least, does not talk of the "many exclusive establishments engaged in the furniture trade," or quote directions for Swiss travel which tell us to cross the *Gemini*!

"*Vivit post Funera Virtus.*"—*Allen's Illustrated Handbook and Guide to all the Places of Interest in Nottingham and its Environs; to which is added, a valuable Series of Essays on Matters of Interest connected with the County.* (Nottingham, Allen & Son; London, Kent & Co.)

THIS is a very excellent handbook, compiled by the publisher for the use of strangers who were expected to be in Nottingham during the meeting of the British Association, its lecturings and feasting. We presume its further uses are alluded to in the Latin epigraph which forms part of the title, and perhaps implies that the worth of the volume survives the fun of the moment! It is really an excellent guide, a variety of writers having supplied

chapters on subjects with which they are severally best acquainted, though we observe that in one case the editor himself writes on a question touching which he knows nothing—namely, Byron and his works. Indeed, we are disposed to think that some of the editor's learned colleagues are not infallible, able men as they are. Mr. Stevenson, for instance, takes us on an archaeological ramble to Bramcote (or Broncote) Hill, and he tells us the name "is derived from the ancient British word *Bron*, a 'hill,' and *cote*, from the Saxon, a cottage or rude dwelling." If so, then is *gherkin*, after all, derived from *King Jeremiah*? *Cote* here is the British *coed* or *cued*, a word which we still possess in its scarcely changed form (when uttered), *wood*. Broncote is the wooded hill—exactly the place for the Druids who are said to have officiated there. The name is familiar enough. Cotmoor is the great wood; and who does not know *Bettes y Coed*, the chapel (*Bet-haus*) or praying-house in the wood? But these are small matters, not affecting the general merits of a work which is creditable alike to all who have contributed to it.

Napoleon the Third and the Rhine. By J. Pope Hennessy. (Hardwicke.)

THE sum of this pamphlet is, that France wants the Rhine frontier, and that it is the duty of England to help her to obtain it, by lending her a "moral support." We believe that, as between Prussia and France, England would as willingly see France in possession as Prussia. Before reaching his conclusion, Mr. Hennessy asserts that in the redistribution of the frontiers, more than half-a-century ago, Prussia would rather not have had the Rhine awarded to her, but that she was compelled to submit to the overbearing authority of England, who was desirous of humiliating France! Further, that the only power which respected the terms of the treaty of 1815 the longest was France herself! Mr. Hennessy writes like a clever man; but we regret to see a complete un-English tone in his pamphlet, to detect an alacrity in pointing to the difficulties and perils threatening her, and to discover that even a question of Napoleon and the Rhine is turned to such purpose as giving a slap to the Archbishop of Canterbury, snubbing our workhouse administration, and pronouncing our little denominational differences as so many separate religions. This last assertion is in the spirit of the Frenchman who said that we had four-and-twenty religions and one fish sauce; that we had nothing polished about us but our steel; and that our only English ripe fruit was roasted apples.

Wealth and Welfare. By Jeremiah Gotthelf. 2 vols. (Strahan.)

HAVE we here a translation? The question is put in recollection of other prosy Swiss stories, to which this tale bears a depressing resemblance. The length of the narrative is out of proportion to the interest and character contained in it. The inmates of the farm-house, in which the scene lies, are touched with a certain discrimination; we are made to know father, mother, and children, each distinct from each, though all moving within one narrow ring of small cares, and customs, and enjoyments. But, as a work of Art, the story would have gained had it been told within the compass of a quarter of the pages over which it is spread. We do not quarrel with prolixity, being among the sworn admirers of Richardson, and again (how wide is the difference!) having a corner of interest for the diffuse historical novels of M. Dumas, though they be as overgrown in their width of scale as Horace Vernet's war-pictures at Versailles. But in 'Wealth and Welfare' there is nothing to justify Herr Gotthelf's tediousness. Having been thrown back on comparison by the lumbering profusion of petty details, which retard such interest as might have been awakened, we cannot but recall Herr Auerbach's 'Barfüssle' as a model rural tale, and recommend Herr Gotthelf, should he write again, to study that story, and not to beat out his metal into too thin a leaf.

The Journal of a Waiting Gentlewoman. Edited by Beatrice A. Jourdain. (Low & Co.)

A short story, the events of which are supposed to have occurred in the reign of Charles the Second, 'The Journal of a Waiting Gentlewoman' is one

of those literary productions concerning which we are inclined, alike by justice and mercy, to say as little as possible. The narrative is harmless, the characters do not offend, the management of the story displays a certain amount of care; but whilst the book has no fault that calls for emphatic censure, it is altogether deficient in the qualities that gratify taste or elicit any kind of cordial commendation. Miss Jourdain displays a want of familiarity with the period which she has endeavoured to illustrate; and her book, in respect to plan, tone and texture, bears no resemblance to such diaries of the seventeenth century as have come down to the present generation. In fairness to the lady, however, it may be admitted that she nowhere arrogates to herself the possession of any peculiar ability to achieve the task which has given her many hours of innocent pastime. She has amused herself, but it does not follow that the result of her recreation will amuse others.

Landsborough's Exploration of Australia, from Carpentaria to Melbourne; with especial Reference to the Settlement of the Available Country. Edited by James Stuart Laurie, formerly H.M. Inspector of Schools. With a Chart, and a Systematic Arrangement of Carpentarian Plants, by F. Mueller, Ph.D. M.D. (Simpkin, Marshall & Co.)

"It is now pretty generally known," observes Mr. Landsborough in his brief Preface to this modest history of his expedition in search of Burke, "that the immediate object of my journey (of 1861-1862) was the rescue of Burke and his party, whose long absence on their northerly expedition had begun to create grave apprehensions, which, alas! proved to be only too amply justified. Four search expeditions were organized by the Royal Society of Melbourne: Howitt was despatched from Melbourne to Cooper's Creek (Burke's central depot), and McInlay from Adelaide to the same destination; Walker was sent overland from Rockhampton to Albert River, Carpentaria; while I was conveyed by ship to that destination, with the following instructions:—to strike from the Albert to Central Mount Stuart, and thenceforward to be guided by circumstances. About midway, the absence of water and the utter desolation of the country compelled a retreat; and, on my return to the Albert, I prosecuted the overland expedition, by the Flinders and the head of Cooper's Creek, to Melbourne. An account of both journeys is briefly given in the following pages." The record thus introduced to the reader puts us in possession of no new and very important facts concerning the regions explored by Mr. Landsborough, and it contains but little that is calculated to attract the general public; but by persons interested in the details of Australian exploration it will be studied carefully. As a courageous and intelligent explorer, Mr. Landsborough deserves a larger measure than he has hitherto received of the praise awarded to gallant adventurers who enlarge our knowledge of the earth's surface.

A Handbook of Sanskrit Literature, with Appendices descriptive of the Mythology, Castes, and Religious Sects of the Hindús. By George Small, M.A. (Williams & Norgate.)

THIS volume is all that it aspires to be—a handbook for candidates for the Indian Civil Service and persons intending to be missionaries. The author—or editor, as he modestly styles himself—"disclaims all originality," and merely supplies lists of the principal Sanskrit words in chronological order, with explanatory extracts from the works of the Rev. W. Ward, Prof. Max Müller, Sir W. Jones, Mr. Colebrooke, Prof. Wilson, and other well-known writers. The idea is a good one; but in our view it would have been well to have given the proper reference with each extract. As it is, the reader is like a man feasting with his eyes shut, and has no guide but the flavour of the extract as to what dish he is tasting. So that we may say of Mr. Small as was said of the illustrious Pāṇini, "he largely availed himself of the works of his predecessors, frequently adopting their very expressions, though he quotes their names but rarely." Otherwise, the book is well arranged, the illustrative passages are judiciously selected, and the Appendices regarding the mythology, sects and castes of the Hindús are

extremely valuable. As has been said, Mr. Small aims at being useful, not original; but to a Sanskrit scholar it must have been somewhat hard to have restrained himself from making remarks of his own in discoursing of the Vedas, the writings which supplement them, and, above all, of the philosophical literature of the Hindús. Brahmanical religion and Brahmanical writings are intensely interesting, because at the bottom of all that rubbish of Pantheism and Polytheism, of sun and star worship, of Soma-juice and gods and Titans innumerable, there is the spark of divine Truth, the Unity of God, and the salvation of man by faith. Among no nation did primeval tradition leave such strong vestiges as among the Hindús. Beyond the pale of Christianity, there is nothing, for instance, that can for a moment be compared with the Bhagavad-Gītā, not only for beauty and sublimity, but for truth. It is, however, a wondrous thing how the Hindú mind emerged from the rude Nature-worship of the Vedas upon that sublime stage of the Gītā. The steps by which the ascent was made are lost to view, and it is now, perhaps, impossible to recover the knowledge of them. This subject and the whole history of Krishnah are alluring; but in reviewing a writer who eschews originality, we cannot do better than follow suit, and reserve for some other opportunity the enunciation of peculiar views. We observe at the beginning of this volume a rather long table of errata. To it we should be inclined to add the Rāmāñjā-Chārya, at page 103, which at page 171 is more correctly written Rāmāñja A'chārya. At page 140, Shiva is called a polygamist; but Durgā, Kālī, and Pārvatī are merely different names of the same goddess. The derivation of Pariahs given at page 166 seems to us objectionable, and we prefer to follow that given in Wilson's Glossary, and to write the word Paraiya, from Parai, the village-drum, which it was part of the duty of these outcasts to beat. Kālī, too, should rather be termed the Hecate than the Moloch of India. These, however, are trifles, and do not impair the usefulness of the volume, which we have already attested.

LIST OF NEW BOOKS.

Alford's How to Study the New Testament, 18mo, 3 s. 6d. each.
Annales Monastiques, ed. by Luard, royal 8vo, 10 s. hf. bd.
Apostles and Martyrs, illust. with 12 photographs, small 4to, 12 s.
Armstrong's Practical Reading and Recitation, 12mo, 1 s. cl.
Aunt Annie's Tales, f. 8vo, 2 s. 6d. cl.
Bridge's France under Richelieu and Colbert, small 8vo, 8 s. 6d. cl.
Carpenter's Penny Readings, Vol. 7, 12mo, 1 s. bd.
Children's Hour Annual, f. 8vo, 5 s. cl.
Crown's History of France, Vol. 4, 8vo, 18 s. cl.
Dalgleish's Progressive English Grammar and Exercises, cr. 8vo, 2 s.
Don Quixote, History of, illust. by Gustave Doré, 4to, 30 s. cl.
Egan's Handy-Book of the Law of Sales, &c. of Horses, 12mo, 1 s.
Egan's Original Penny Readings, 12mo, 1 s. bd.
Egan's History of England, Vols. 9 and 10, 8vo, 32 s. cl.
Galliard's French Orthography, &c., cr. 8vo, 3 s. 6d. cl.
Half-Hours with Best French Authors, illust. royal 8vo, 10 s. 6d. cl.
Harley's Diabetes, its Various Forms, &c., cr. 8vo, 2 s. 6d. cl.
Holy Bible, illust. by Gustave Doré, Division 1, imp. 4to, 21 s. cl.
Horse (The), its Diseases, &c., by "A Knowing Hand," 5 s. bd.
Ingraham's The Throne of David, illust. 12mo, 5 s. cl.
Marryat's For Ever and Ever, 3 vols. post 8vo, 31 s. 6d. cl.
Milton's Paradise Lost, illust. by Gustave Doré, folio, 100 s. cl.
Profitable Pies, How to Breed, &c., 12mo, 1 s. awd.
Richard's Manuel de la Littérature Française, 12mo, 2 s. cl. swd.
Richard's Oral Exercises, 12mo, 2 s. cl.
Roberts's The River Side, Trout Fishing, &c., 12mo, 3 s. cl.
Smith's Loos-Woolen Lectures on the Altar and Cross, cr. 8vo, 5 s.
Wilkins's Scriptures Attici, cr. 8vo, 7 s. 6d. cl.

OBITUARY.

THE CAMPBELLS.

ONE of the ten Campbells who possess the hereditary rank of baronet died last week—it may be said, prematurely, for Sir Alexander Islay Campbell, of Succoth, was only in his forty-first year. He was of the Argyle branch, and was as noble a patron of Art as Campbell of Glenorchy, of the Breadalbane branch, was above a century and a half ago. The earlier Campbell was, perhaps, the first Scots chieftain who got together a gallery of pictures, at Balloch and Finlarig. The baronet who has recently died had the same taste, with, perhaps, better judgment, and certainly more liberality. His gallery at Garcube House is said to contain one of the finest private collections in all Scotland. Sir Archibald was English bred,—he belonged to Eton and Oxford; but he was true Scot, nevertheless, settling at home, effecting all the good within his compass, and planning more, when a cold, terminating fatally in congestion of the lungs, carried off the childless possessor of an ancient estate, and left the inheritance to a brother—a captain of dragoons.

There is no Campbell of the old time with whom

he who has just departed can be compared except Campbell of Glenorchy, a notable baronet of the close of the seventeenth and beginning of the eighteenth centuries. The Glenorchy Campbell, indeed, excelled the Succoth Campbell in the magnificence of his housekeeping; but, in truth, each practised hospitality according to the fashion and spirit of his time. Glenorchy received all his rents in kind, and consumed all such revenue. Among the items for one year we find enumerated 90 beeves, 200 sheep, 325 stone of cheese, 420 salmon, and 15,000 herrings. Glenorchy combined the feudal chieftain with the then modern gentleman, though there was little of the latter at the period. He built a house for convenience rather than for defence, invited foreign and native artists to decorate it, and he may be said to have discovered, welcomed, used and profited by that once celebrated Scottish Vandyke, Jameson, whose excellence was illustrated by some of his work, which was exhibited at the late Exhibition of National Portraits. Jameson painted dozens of portraits for his patron, as fast as they could be required, for twenty marks apiece, finding his own "clath an' colors." He filled with portraits at this price the hall and chamber of dais of the house at Balloch, where an artist was as welcome a guest and his work as well appreciated as similar men and similar work were by the late polished and intelligent gentleman, the owner of Garscube.

With ten Campbells—baronets—the kinsmen of Argyle and Breadalbane are not likely to die out just yet. One commandment at least they have kept, that which says "increase and multiply." There is no symptom of a falling off; and the family cry is "*More Campbells are coming!* hurrah! hurrah!"

How some of the elder branches ever succeeded in transmitting heirs to later times is a question difficult to answer. Family quarrels are now fought with words, not daggers; but the Campbells never had a little difference of opinion without much bloodshed, some life-taking. At the end of the sixteenth century, Campbell of Ardkinlas, Campbell of Lochmill, Campbell of Glenorchy, and Campbell of Cabrachan, differed with Campbell of Calder. The last-named refused to be of his cousins' way of thinking, and to put an end to his obstinacy, they hired a certain MacEllar, who earned his bread by terminating family dissensions, and who for a few pounds Scot put a bullet through the breast of Campbell of Calder, shooting at him through a window as he was quietly seated in the house of Kippoch of Lorn!

They were powerful and revengeful fellows those rough and ready Campbells; but sometimes it happened that their neighbours were too much for them. Thus, on an occasion, the Dunbars were of a contrary opinion to the Campbells of Moy, and to convince the latter of this fact, they hired a number of "broken men," men with naught to do but slay and plunder for an honest livelihood. These, with every possible sort of "weapon invasive," attacked, gutted, and burned Moy's dwelling, carried away all that was portable, drove away all that was drivable, and finding a farmer, his son, and a servant, and not being able to find a Campbell, whose throat they might cut at parting, they cut off the legs and arms of their three prisoners (indeed, it is said they "otherwise dismembered them at their pleasure"), and having cast the mutilated wretches into a quick fire, went home thankful. There was no hope of redress, for that must be sought through the sheriff; but he was a Dunbar, and would not stir a finger in the matter.

On the other hand, there were officers of justice among the Campbells who exerted themselves to suppress the "broken men" and other ruffians who held other people's lives cheap—at the end of their "hagbuses," as it were, and with a few pence for their wage. In the seventeenth century, Campbell of Lawers undertook, for 200*l.* sterling a year, to clear the Highlands at least of all blood-thirsty, cattle-lifting, and house-burning vagabonds. Sir James employed deputies to do the work for which he had contracted, and he cheated his substitutes when their work was accomplished, as far as the hanging a thief went. No wonder the "broken

men" became wild and pursued their vocation more savagely than ever.

A true gentleman with better notions of right and wrong turned up occasionally; as, for instance, Campbell of Cessnock. He was celebrated at the close of the last century for the breed of great cattle and horses, which he introduced from Ireland, on his estate. He was very "curious" too in improving the method of shot-casting, on scientific principles, for the benefit of his country and the confusion of her enemies. But a good man was not allowed to be in peace or plenty, at that period; and, accordingly, the *Tories* mounted Sir George's horses and drove away his cattle.

It is singular to find that this "harrying" and stealing is yet thought of with a tender sort of sentiment. The other day, the Mac Cullum More, head of all the Campbells, the Duke of Argyll, speaking at a public dinner of the old times and the old ways,—good old times! good old ways! when Campbells and Ogilvies, if they wanted to improve their breed of horses or horned cattle, sent their armed men, Campbells against the Ogilvies, or Ogilvies against the Campbells, as the case and need of improvement might be, to steal steeds and oxen from their owners, and burn down the houses of the latter if they were obstinate in their opposition; the Duke, we say, speaking of this violence and lifting, construed the matter very mildly, and remarked of that system of robbery that, "It received a very ugly name, but it was really a very useful and profitable business!"

Then a very ugly name might be given to another little way of the Campbells of the early part of the last century, when Sir James Campbell of Lawers was engaged to marry the daughter of Campbell of Finab, and Campbell of Edramurkle, for some or for no reason, objected to the match. He resolved to shoot Campbell of Lawers, but he did not possess a pistol nor a single mark; and therefore he cleverly, and with much forethought, borrowed the money from Campbell of Lawers, wherewith he bought the pistol, shot and powder, by proper application of which Edramurkle shot Lawers dead. The former fled, but a hue-and-cry described him as a "tall, thin man; loot-shoutered; pock-pitted; with a pearl or blindness in the right eye"; and thus was attired this gallant and economical Campbell, who made a man contribute the money to purchase the means of his own death—"dressed in a suit of grey Duroy clothes, plain mounted, a big red coat, and a thin light wig, tied up with a ribbon." The villain escaped scot free; but he saved his honour by explaining that he killed Lawers because he (Edramurkle) suspected that Lawers intended to jilt the young lady to whom he was engaged, and leave the country!

If it should be thought that wickedness occurred only in wild districts, and was committed solely by semi-savages, the idea will be corrected by the statement that, at this very time, English and Scotch bloods of the very first water caroused in Edinburgh taverns, and that three of their toasts were, "The Trinity," "D—n to ourselves!" and "Success to the Devil!"

With better times, better ways! In the late Sir Alexander the Campbells have lost as true a gentleman as ever did honour to an ancient house. It would seem, however, as if of old it was intended that the Campbells should not be without matter for a feud. Witness the late trial for succession to the Earldom of Breadalbane, between Campbell of Glenfalloch and Campbell of Boreland. When Charles the Second created the Earldom, remainder was left to any of the sons of the first Earl the latter chose to nominate; then to issue male, then to heirs male, finally to heirs whatsoever. The first Earl passed over his eldest son, and named the second as heir to the title and estates. Subsequently, these have gone through most of the "remainders," till, at the death of the last Earl, the "heirs whatsoever" presented themselves in tenth cousins; and as Campbell of Boreland could not prove that the grandmother of Campbell of Glenfalloch was no better than she should be, the latter (being a trifle nearer in blood) won the trial, earldom, and 50,000*l.* a year.

Thus the Campbells of modern times refer their disputes to the arbitration of the law; and when

they die are buried in honour, not as the Campbells of Lochmill were wont to be, with hundreds of angry men in arms, with lashings of drink, and sometimes forgetfulness of the corpse on the part of the mourners.

MR. E. TINSLEY.

We have to notice the death of the younger brother of the firm of "Tinsley Brothers," the well-known publishers. Within half an hour of his decease, Mr. E. Tinsley was energetically at work, as was his wont, at his desk. "Tinsley Brothers" represent a new firm, the founders of which commenced in a humbler way. Their ambition to rise was helped by opportunity. Miss Braddon's novel, 'Lady Audley's Secret,' had been declined, or, at least, not accepted by another house, when Mr. William Tinsley, now the only representative of the firm, hearing that the novel was in the market, recognized the prize, and suggested the purchase of the book—which became their property for the sum (we believe) of 250*l.* The result was fame and something more substantial to the author, and a little fortune to the partners. Mr. E. Tinsley now built a country residence at Putney, called it Audley Lodge, in commemoration of this venture, and, after a few years of enjoyment, has died at the early age of little more than thirty.

MR. E. SHERMAN.

A man older in years and once of considerable importance has also departed. "Mr. Edward Sherman, of the Queen's Hotel," is not in itself an announcement to arouse general sympathy. But the Queen's Hotel is the polite form given, since railroads upset the coaches, to the old Bull and Mouth, in St. Martin's-le-Grand, where the ancient inn first set up its testimony to the value of the Tudor victory in Picardy, as the "Boulogne Mouth," or harbour. Mr. Sherman was the great coach-proprietor. He has died at the age of ninety. The rail threw him off the road, on which he saw as many changes as most men. For him the world was turned upside down; but he scorned to die of grief of it, and lived on till he had reached the stage of the last ten miles towards the hundred. Mr. Sherman was born when George the Third was young, and people of condition, but small means, travelled by the waggon. The old coach-proprietor's body can be carried by rail to the Great Northern Cemetery in as many minutes as it took days (when he was young) for the coaches starting from the old Bull and Mouth to reach Edinburgh.

MR. S. TENNYSON.

In the person of Mr. Septimus Tennyson, who died at Cheltenham yesterday fortnight, the world has lost a man of another stamp. He was one of what may be called the singing brothers of the Poet-Laureate—all singers like himself, but not in the same perfect degree. Mr. Septimus Tennyson was a singer without a public, but not without troops of friends, in whom he found ample compensation for lack of a wider circle.

GENERAL MOURAVIEFF.

Perhaps the best, or the worst, known name of those whom Death has gathered to his inevitable harvest abroad, is that of General Mouravieff, of Lithuania. He is to be carefully distinguished from Mouravieff of Kars. The former seems to have been a man who was always called in to do work from which other men recoiled. Mouravieff was the crusher of sedition, which implied no mercy to man, woman or child. When he had crushed out the last rebellion in Lithuania, all those who had survived the terrific process were compelled to do him honour on the festival of St. Michael, that saint having the humiliation of bearing the name which had been conferred on Mouravieff at his baptism. They were forced to present him with images of St. Michael, bearing the inscription, "Thy name is Victory!" and they had to found a church at Wilna, in his honour,—the honour of the executioner of the foremost heroes among the Lithuanians. The unwilling builders of the church to the modern "Archangel," will not have the opportunity, though they might have the will, to take vengeance on their great oppressor, as a Spanish community once did over the grave of their lately deceased tyrant. On his monument they inscribed the words, "Here lies

one who, for us and our salvation, went down into hell!"

HERMAN GOLDSCHMIDT.

We have notice of the demise of an utterly different man, in Herman Goldschmidt, an amateur astronomer of some note, who recently died at Fontainebleau. It is curiously said of him:—"Though only an amateur in the science, he has discovered fourteen telescopic planets, and the only instrument was a common opera-glass." As we are reversing everything, even red-hot shot is giving way to chilled projectiles, perhaps opera-glasses are found superior to astronomical telescopes. But fourteen planets brought into sight by Mr. Goldschmidt by a common opera-glass!—what can one say to it but, as the Irish gentleman said who was told that St. Patrick had crossed the ocean, seated on a millstone, "I can't deny it! He's a lucky fellow."

M. LÉON GOZLAN.

To French novel and play readers the name of the late M. Léon Gozlan will be better known than that of M. Goldschmidt. Had he lived till yesterday (the 21st) he would have completed his sixtieth year. The ruin of his father, a shipowner, at Marseilles, threw young Gozlan on the world, in his mere boyhood. He neither lay where he was thrown, nor rose merely to stand still. He challenged Fortune in various quarters, but she would not reply; and he even became a bookseller's assistant, in order to get within the literary circle of which he longed to be a member. The opportunity came to him in 1828, when he was first engaged on the press; since which time, for nearly forty years, he has been one of the hard-working but successful authors of France. His romances and plays are numerous; but one of his most attractive works, to our thinking, is his 'Châteaux de France,' particularly the charming volume devoted to Rambouillet,—a locality which has undergone several changes since Léon Gozlan chronicled with wit, grace, spirit, and learning, all the changes that brilliant place had gone through down to the time of his writing.

MR. BROWNSMITH.

We would fain close this list, but shadows of other citizens for the silent city continue gliding by. From out the musical circle passes Mr. Brownsmith, the well-known organist, and next to him one skilful hand in a line of art which has itself almost ceased to exist—

MR. H. O. SHENTON.

Mr. Henry Chawner Shenton, the historical line engraver, died suddenly on Saturday evening. He was a pupil of Charles Warren, and one of the last of the celebrated series of engravers in the pure line style. That style may be said to have begun with Sir Robert Strange. Continued by William Sharp, Charles Warren, James and Charles Heath, Richard Golding, Shenton, John Henry Robinson, Lumb Stocks, George T. Doo, and other eminent men, it has created the modern English school of this art, which takes its place at least equal in rank with that of any other country. These observations apply to the engraving of figure subjects. Line engraving as a distinct art has in the present day almost ceased in England; it is being supplanted by styles more easily executed, more mechanical, but not more beautiful. Of the little band of this series of eminent line-engravers but very few remain, and as one by one passes away, the number is not recruited. The best of Mr. Shenton's larger works are probably those he did from Mulready's pictures. The most widely known are perhaps his later plates engraved for the Art-Union of London. Mr. Shenton was born in 1803, at Winchester, but his family were originally from Barwell, in Leicestershire. Later, owing to a failure of his sight, he was not able to practise his profession. He was a man of remarkable amiability, and entirely devoted to his art.

MR. TELBIN.

By a death as sudden, Art loses a hopeful son in the person of Mr. Henry Telbin, whose father has been so long and so honourably known in London. On the 5th inst. the young artist was on the summit of the Wasifluh, in Switzerland, engaged in taking a sketch of the Uri-Rothstock. The Wasifluh is a lofty rock rising perpendicularly out of

the lake opposite Grütli. The Axen road winds round it in the boldest curves. Mr. Telbin was resuming a seat (placed too near the edge of the precipice) from which he had just risen, when his foot slipping, he was precipitated over the rock headlong into the lake. All efforts to recover the body have hitherto proved fruitless.

"POOR PLAYERS."

THE Council of the Royal Dramatic College have published the result of the poll which was recently taken for the admission of two female and two male candidates into the College. The details are not without interest, nor without their touch of tenderness. There were five candidates of the first-named class. The two "ladies," as they used to be called in their palmy days,—and why not now, though the home of one was in a back street in the Borough, and of the other in Broad Court, Bow Street?—the two successful ladies, then, were Mrs. Anne Strickland and Mrs. Norman. The first was on the stage—beginning at Sevenoaks, in 1836, and ending at London—only eight years ago, since which period she has been suffering from one of the most painful diseases to which human nature is subjected. It is different with the other lady. More than half a century ago, when she was ten years of age, "in the days of the Regency," she was a bright little opera deity. Twenty-one years ago, Mrs. Norman ended her professional career at Sheffield; and now, after years of suffering from another terrible affliction, she finds a home, during the last act, down at Weybridge. "Loss of voice" is one of the grounds of candidature of Mrs. Leonore Bedford, now close upon seventy years of age; "old age and its consequences," pleads another lady, who first appeared at Peckham in 1814; and "severe injury to the spine" is pleaded by Mrs. Manders, who was playing but the other day at the Strand, and who is very favourably known.

For the two vacancies on the gentlemen's side, there were nine candidates. They were gained by Mr. Thornhill, an actor from his youth, till 1849, but disabled by defective sight, approaching to blindness; and Mr. Reynolds, an incapacitated player, of hard upon threescore years and ten. There is something saddening in reading of the condition of the unsuccessful candidates. There is Cornelius Gay, who made his *début* at the Sans Pareil (the *Sanspareil*, as the theatre which preceded the Adelphi used to be styled) in 1815, and who, at the end of half a century, finds himself disabled by the triple calamity of loss of sight, of memory, and of strength. The high top-gallant of his old joy is subdued to such sad quality as this! It is as bad or worse with the others. One is in a Union, waiting till the scene changes; and there is here a G. Rowbotham, under mental and physical decay, asking for admission, after five-and-forty years of that hard work called "playing." Mr. Rowbotham, if this be he of the old English Opera House and Coburg Theatre, was one of the most gay and gallant actors on the stage; nobody rescued a damsel from distress with lighter grace or more airy recklessness than he; and they who remember 'The Bandit of the Blind Mine' will recall to mind how Mr. Rowbotham fought that terrible Mr. Bradley, and how he escaped upwards by the rope, after the malicious bandit had cut away the basket!

It is pleasant to think that, for a few at least of the old players who have been left out in the cold, the exertions of Mr. Webster and the benevolence of the public have at last found a home. In their halcyon days the players have ever exercised abounding generosity to their fellows in the shade. This was their characteristic from the earliest times. What Steele said of them later, yet a hundred and fifty years ago, is true of them now:—"You shall find in them," says Mr. Bickerstaffe, (substantially, if not literally,) "a wonderful benevolence towards the interests and necessities of each other." That is a noble testimonial; and those who once helped one another, deserve in their need a tender helping hand from the public;—and this they now possess, thanks to that public, and the public's "good and faithful servant," Mr. Webster.

DEPOLARIZATION OF THE NORTHUMBERLAND.

15, Clarendon Gardens, Maida Hill, Sept. 17, 1866.

I beg leave to reply to the letter of Staff-Commander Evans, inserted in the last number of the *Athenæum*, with reference to the depolarization of the Northumberland. I quite agree with Commander Evans in the opinion, that "as everything connected with the correction of the deviation of the compass is not only of scientific interest, but of vital practical importance to the mercantile as well as the royal marine, it is incumbent on those whose duties enable them to speak with certainty not to allow erroneous statements on this subject to pass without correction." As Commander Evans appears to be labouring under some misapprehension, I trust you will allow me to make the following quotation from my written communications, which accompanied the tracings of the magnetic lines before and after the depolarization of the bow and the stern of the Northumberland. The experiment was confined to the *external* effects of the polarity of the hull, because "the sides of the ship are at present encumbered with chains, pulleys, ropes, barges, &c. The ship has to be completed and the compasses fixed on board, and the sides rendered free from all obstructions, before I can operate on the main stringer plates from end to end, to make the compasses on deck to act free from deviation." It will, therefore, be observed that the deviations referred to by Commander Evans cannot be corrected until the sides of the vessel are completed. It must be borne in mind that the iron with which a ship is constructed is not annealed or soft made iron, which would allow a magnetic current to pass through from end to end with the facility of a telegraphic wire. No; the iron is hard, and requires to be depolarized like a steel bar; therefore the sides of the ship, which act on the compasses, must be made free from all obstructions, so as to allow the electro-magnets to pass rapidly along them from bow to stern, to destroy the magnetic influence of the hull on the compasses on board.

Such an important subject should not be left to the consideration and the mere opinions of individuals, but be investigated and the experiments made and tested on several iron ships, by an independent committee, duly appointed for that purpose. The members of such a committee need not trouble themselves with the science of magnetism, but simply select any iron vessel having strong polarity, and place her in such a position as would indicate the maximum deviation:—a direction from east to west in vessels built north and south. Then observe the deviation of the compass, and pass the electro-magnets on both sides rapidly along the main plates from end to end, until the compass rests correctly on the meridian, and finally swing the ship round. If the operation be carefully done, the compass will act correctly, and be no longer disturbed by the magnetism of the hull. Such an experiment would give ocular demonstration of the result, and would necessarily bring the subject to a practical and unquestionable issue. In these days of iron ships, when it is universally admitted that the errors of the compasses are becoming more and more serious, a maritime nation like ours should bestow more attention upon this subject, and undertake experiments, not only for proving how our iron-clad ships can be destroyed, but also how they can be safely navigated by their compasses to ensure the preservation of life and property on the ocean in time of peace.

EVAN HOPKINS, C.E.

VICTORIA, OR THE ARMENIAN QUEEN OF ENGLAND.

Smyrna, 1866.

THE principle of nationalities is one which is regarded as quite modern in politics, but it has been long worked by the Greeks. From the time of the conquest of Constantinople they never ceased to persuade themselves that their loss of empire was temporary and must soon be recovered, nor did they ever desist from conspiracies and endeavours for its restoration. This opinion they pertinaciously impressed on Western Europe, and they worked on the Christian nations of Roumelia to join in a league for union among themselves and

the expulsion of the Osmanlee. At least a century ago, if not as early as the beginning of the last century, the scheme was well organized and almost ripe. Step by step they aroused the most inert, and communicated to every one the faith which they had believed for fully three centuries, that the sick man was dying, the Osmanlee dominion was about to fall, and each nation would have its own. Two hundred years ago this faith was propounded in England, and it has never wanted disciples here, while these have credited, as the Greeks propagated, that the restoration of the Greek empire was imminent.

Meanwhile, nationality was working itself out logically, and by the time the Greek frontiers had achieved a further portion of political power and independence, the other nationalities set to work, each on its own foundation, shelling off the Greek varnish and polishing up the native material. Hence by the time the Greeks ought to have congregated the tribes under their own domination, there had been set up Servians, Wallachians, Bulgarians and Armenians. So, too, each worked out in his own shape the creed of the sick man. While the Greeks had arrived at the result that the Greek empire was the one to be restored, the Wallachians looked for the restoration of the Rouman empire, the Servians of the Servian, the Bulgarians of theirs, the Armenians of the Armenian empire, and the Albanians of as great a dominion as those of Alexander, Pyrrhus and Scanderbeg. Each is to have his own empire, and enslave the others; and the Osmanlee, who has been so many centuries dying, breathes new hope from the weakness and disension of all these nations, mixed, interwoven and entangled with each other. He comforts himself with his present widely-extended sway, and cherishes the glory that his race has ruled from China to the Danube, and, Inshallah! if fate so ordain, it may rule again.

Among the many candidates for the empire of the East, the Armenians, who are the quietest, are none the less steadfast; they do not, like the Greeks, carry on a literary propaganda to persuade the outer world that they are the rightful heirs; they content themselves with building up their own faith. Few suspect them of such aspirations; a French author styled the Armenians the Quakers of the East. The Greeks are persuaded they will make docile subjects, and are eager to impose the yoke. The Russians are content to encourage their trading operations and stir up their religious dissensions, and the Turks never dream that the sheep they have been used to scatter, cherish hopes of driving the shepherd and his dogs. The Armenian is the Cambro-Briton of the East; his is the most ancient and glorious nation in the world, his the most ancient and most precious language; its harsh and uncouth forms are to him thorns that preserve the rose of this treasured inheritance to shed its perfume on the Haik, and to deter from it the stranger. To admire this glorious tongue, which—and not the Welsh, or the Hebrew, or any other so pretended—as the primitive one spoken when the Ark touched on Mount Ararat, is the way to the Armenian's heart.

In this language, further protected by a special alphabet, which no one but an Armenian can read without blinding himself, are preserved, as he is fully satisfied, the most ancient records in the world, written before bards had learnt to spell. When critically examined, these records are a very small residuum of what, according to possibility, might have existed, though there are sceptics who doubt if Armenians had either letters or books before the time of Moses of Kherene. In this volume, nevertheless, are preserved sufficient legends to foster the self-consequence of the Haik, and to maintain him in the remembrance of his pristine glories. These sleek-coated gentry, supposed to be absorbed in money-making and selfishness, are not unmindful of fame. The *bakkal's* shop-boy bears the name of some ancient king of Parthia or Armenia, attesting the adhesion of his parents to the national faith. When the Armenians established a masonic lodge under English auspices, they named it *Dekran*. This is the Tigranes of the classics.

Difference of religion means no difference in

this respect. Gregorian, Roman Catholic, or Protestant, the Armenians are equally national, and this bond of union enables them on occasion to sink sectarian distinctions. The Roman Catholics have, to some extent, profited by this peculiarity, and played upon it; for the Mekhitarists, their celebrated propagandist order, have—from their presses in Venice, Vienna, and Paris—poured forth many a contribution to the stock of national letters and vanity. Young Armenia eagerly reads these publications and reprints, and Old Armenia takes the contents on credit, at a high premium.

Europeans are not generally familiar with the Armenians. They have a school-bred sympathy for those they look upon as descendants of the ancient Greeks, and pay little attention to the other Christian inhabitants of Turkey. There is a spirit of independence about the Armenians which does not lead them to be over-ready in making advances to strangers. For my own part I like the Armenians. My little knowledge of their language overcomes the reserve of my acquaintance, and I have found many topics by which to acquire their sympathy. The fact of their predilection for their nationality early attracted my notice.

A few years ago I published some remarks on that passage in Gibbon where, speaking of Basil the Macedonian, he says that perhaps even now the blood of the Emperors of Constantinople flows in the veins of the Bourbons. I have often been surprised that one so practical as Gibbon so narrowed his view of an interesting episode. If the blood of Basil the Macedonian flows in the veins of the Bourbons, so must it in those of the Princes of England and the gentry of this island and of Europe. It is a pedigree which unites the living with far antiquity, which links history and mythology, spreading far beyond the limits sketched out by Gibbon. If Basil were descended from the family of Constantine, so was he from that of the Marcelli, the Cornelli, and the Julii; establishing a connexion with the historical Gracchi and the legendary gods of Rome.

It is, however, the Arsacid descent of Basil which affords most scope for the genealogist. The Arsacid Kings of Armenia being reputed descendants of Artaxerxes the Longhanded, King of Persia, we are led first to early history, and through the regions of mythology to high Olympus. Not only are we brought into neighbourhood with Cyrus, but with Ceresus, King of Lydia, with Gyges, with Candaules, with Omphale, with Hercules; and so do we ascend to great Jove himself.

I have pursued the subject far enough for the purpose, and I cannot pursue it farther for want of books. With such an idea in my mind, it may well be believed that I have sometimes talked of it with my Armenian friends, and it has fructified among them.

There has just been presented to me, by the author, a thin but handsome duodecimo, with gilt edges, printed in Smyrna, and having for its Armenian title, "*Veegdoreea*"; but as it is printed in Armenian and English, it bears also:—"Discent (*so printed*) of Her Majesty Victoria, Queen of England, from the Arsacid Kings of Armenia." The author is Mr. S. Mirza Vanantetzie, one of the dragomans of the Prussian Consulate—a gentleman of considerable attainments.

As Mr. Mirza is writing in a language foreign to him, and as the difficulties of printing in Smyrna are considerable, there are many defects in carrying out the plan; and it is from no motive of disrespect, but as preserving the quaintness of the original, that in some cases the original orthography is left unaltered.

Mr. Mirza begins by recording the sufferings of the Armenians at the hands of the Persians in the time of Leo the First, Emperor of Constantinople. He recites, "Two princes of the Arsacid house, named Ardaban and Cazric, two brothers, set off for Constantinople in 471, and were received in princely fashion and honour by the Emperor. Ardaban had married the daughter of the great Vartem Mamigonian, one of the most celebrated Armenian heroes." He traces from these Basil, whom he gently places on the throne of Constantinople, to begin a career of glory. "At this day history can say that few kings reigned over Greece

at Constantinople like Basil the First, the Armenian Arsacid."

He proceeds to say that "Basil the First was crowned by Ashod the First, Pacrodouny, king of Armenia, because the family of Pacrodounies only had the right of crowning the Arsacid kings, and as Ashod the First was a Pacrodouny and Basil the First an Arsacid, he desires to be crowned by him, sending a special ambassador with many gifts and valuable presents." Where Mr. Mirza found this fable I do not know, as he does not quote his authorities. Moses, of Kherene, states that the family Pacrodouny had this prerogative of crowning the kings of Armenia, but the present application must be of very modern invention. Mr. Mirza says nothing about the coronation of the other Armenian kings of Constantinople. He gives glowing accounts of the descendants of Basil and of their alliances with the Armenians. Mr. Mirza states boldly that Constantine Porphyrogenitus, in his history of Basil, his grandfather, "says clearly he was an Armenian, descended from the Arsacid house, and is the most exact and authentic of any." "In his sixteenth year his father-in-law (Romanus, the First Armenian) dethroned him, in 919." So he goes on down to "Constantine the Eighth, the true patriot and faithful son of Armenia, who died in 1028."

There must be a quiet chuckle at the contemplation of the "Armenian" kings reigning over the Greeks from 868 to 1028. The Greeks flatter themselves the Armenians sigh for their transfer from the yoke of the Osmanlee to that of the Greeks. The lion's version of the picture is different.

Mr. Mirza is not satisfied with this. He takes in hand another political enemy, and places him under the rule of the Armenian kings. At present the Russians hold much of Armenia in thralldom. Mr. Mirza boldly begins, "Branch of Russia,"—but this he does not carry on far. Then comes the "Branch of France," from Henry the First to Philip the Fourth.

Now for the "Branch of England," to which the marriage of Elizabeth of France to Edward the Second gives rise. From this time he embraces all the kings of England, giving a short sketch of the history of each, in which Queen Bess comes in for a good share, not forgetting "amongst others the immortal Shakspeare," whom, however, I must own I cannot find in the corresponding Armenian text, where I was curious to seek the homonym of Shakspeare. George the Fourth "caused numerous laws to be passed against the liberty of the press." "In the time (of William the Fourth) parliamentary reform made great progress." "On the death of William the Fourth, Her Majesty Queen Victoria ascended the throne, and married the virtuous and most beloved Prince Albert-Franz-August-Carl-Emanuel." "In December, 1861, Her Majesty lost her Consort, Prince Albert, and till the marriage of the Prince of Wales in March, 1863, remained in almost total seclusion. She subsequently gratified the people, who entertained for Her Majesty a most profound respect and affection, by again appearing in public. Her Majesty became accomplished in music and languages; a knowledge of the Sciences, particularly botany, was afforded her."

In the tables at the end of the work is included, "I. H. M. Victoria, Queen of England, descended from the Arsacid kings of Armenia;" and then come all the royal family.

Such is a brief sketch of this curious book, which will be seriously conned by many a member of Young Armenia, and turned to profit for the good cause. Who knows but already a design is formed for offering to Alfredaki, Duke of Edinburgh, the throne of his ancestors in the great empire of Armenia? HYDE CLARKE.

OUR WEEKLY GOSSIP.

Lady Herbert of Lee will present to the public, towards the close of the year, a work which will show her experiences of travel and the fruits of her observation in Spain. While one distinguished lady has been collecting material for a volume abroad, another has been dealing with material at home, and is about to instruct others how to deal

with it also. Lady Llanover, in short, is about to publish, for the instruction of both "high life" and "below stairs," a practical cookery book. The words, "Nourrie dans le Sérail, j'en connais les détours," do not apply to the author; but her experience is great, although she was not born to it. The above two works will come from Mr. Bentley's house.

Mr. Swinburne, it is said, is preparing a reply to those critics who have marked and reproved the faults in his 'Poems and Ballads,' for which work a new publisher has not yet been found. If Mr. Swinburne's reply be in good metrical form, void of the offences, the general censure of which elicits the alleged forthcoming answer, the public may be congratulated; and, in the result, we hope, the poet too. It may win back for him the public esteem which he so lightly forfeited, for the time. It is for him now to win or to lose the future.

A translation of the Olynthiac Oration of Demosthenes has been issued by the Rev. T. Mac Nally, a college tutor, in Trinity College, Dublin. Demosthenes is read for the Hilary Examination there by the younger students. Does not a translation, however well executed, by a college tutor, look like "facilities for crib-biters"?

A new edition of 'Roby's Traditions of Lancashire,' long out of print, is announced by Messrs. Routledge & Sons.

The English poets who are about to appear in American editions of their works, are Robert Buchanan, 'London Poems'; Owen Meredith (a new volume), and the late T. K. Hervey, of whose complete works an edition will be published in America and England by Messrs. Ticknor & Fields.

M. Gustave Doré has done what he has never done before, illustrated the works of a contemporary author. He has selected Mr. Tennyson's 'Elaine' for this purpose, and all the designs will be engraved on steel. The artist himself hopes that the work will be a monument to the poet as well as to his own powers. The illustrator's brother says, "Mon frère a fait cette fois-ci le grand succès qui fera descendre son nom à la postérité." It will probably be one of the most superb books ever published. Messrs. Moxon & Co. are what Jacob Tonson would have called the "undertakers."

The American General Lee has two works on hand. 'A History of the Campaign of the Army of Northern Virginia, from its Organization to its Dissolution,' and a new edition of a work by his father, the distinguished soldier, Henry Lee, 'Memoir of the War in the Southern Department of the United States.'—Mr. F. Moore announces 'The Women of the War.'—Turning from echoes of war to tones of the lyre, we hear of the forthcoming poem, 'The Flower de Luce,' by Longfellow, which, with his translation of Dante, will appear during the autumn.

We learn that the state of Dr. John Brown's health is much improved, and that he is about to resume his professional duties. This will be gratifying news to all his friends.

An example of how truth may be converted into inaccuracy, is afforded by the following "fact," as Miss Edgeworth loved to emphasize her stories. A. meets B. in the street, and inquires after the health and whereabouts of C. "C. is travelling in America," replies B. "He is now (I am told) at Utah."—"Strange variety in life that," rejoins A. "I should never have expected to hear that C. was a tutor!"

Mr. Murphy once gave a dignity to almanac literature by making a lucky guess. Lord Portarlington has been attempting something of the sort in Ireland. He has been forecasting the weather, and Irish farmers have suffered by trusting to the peer's predictions. One of the smarting victims thus writes to the editor of the *Dublin Evening Mail*.—

"Sir,—Can those farmers who believed in Lord Portarlington, and, relying on his arrangements for fine weather, did not get their hay into haggard, maintain an action against his lordship for 'deceit'?"

"A BELIEVING FARMER."

—The Complete Letter Writer will hardly be complete without this sample. At all events, Lord

Portarlington does not appear to have been so "weather-wise" as the present Earl of Stamford and Warrington, who, in 1859, predicted the extraordinary weather of 1860, and proved himself a truer prophet than the eminent meteorologists who were not on the turf.

The Brechin Town Council, being applied to by the Local Secretaries of the British Association at Dundee, to support the meeting of the Association at the latter place, next year, has been thrown into considerable agitation. The Provost said the Secretaries were looking for money; and a member of Council declared that the Association propagated nothing but infidelity; and another snubbed "Groves"; while a third thought the "thing" would be ultimately put down. Altogether, the call for money was answered by a cry of *look to the faith and your pockets!*

On Saturday last a meeting was held at Newport, in the Isle of Wight, for the purpose of forming an Isle of Wight institution, and founding a museum in Carisbrooke Castle. A project of this kind was started some fifteen years ago by the late Sir Charles Fellows, who with the aid of the late Prince Consort contemplated a scheme of the same kind. On this occasion Sir John Simeon took the chair, and was supported by Mr. Pritchard, President of the Astronomical Society, Thomas Webster, Esq., Q.C., of London, and Dr. Lankester, of London. Resolutions were passed proposing to obtain the patronage of Her Majesty, and also her sanction for calling the collections to be placed in Carisbrooke Castle the Albert Museum. It is proposed to confine the Museum entirely to objects connected with the natural history and antiquities of the Isle of Wight.

The Monthyon prize for virtue is a familiar matter. It was never better bestowed than on the old Porte St.-Martin actor, Moëssard, who out of his scanty salary furnished the means of living to the destitute widow of an old fellow-player. The method, if we may so speak, is about to be extended. The Imperial Commission of the Paris Exhibition, of 1867, offer ten prizes of 400*l.* each, "in favour of the persons, establishments, or localities which, by a special organization or special institutions, have developed a spirit of harmony among all those co-operating in the same work, and have provided for the material, moral and intellectual well-being of the workmen." Twenty "honourable mentions" will solace the first score who come within reach of, but do not grasp, the prize. Then, one grand prize of 100,000 francs (4,000*l.*), as much as the ten put together, is offered for competition "to the person, establishment or locality, distinguished under this head by a very exceptional superiority." Claimants must assert themselves before the 1st of November. The International jury (three jurors, as yet unnamed, are assigned to the United Kingdom) will meet and decide on the eligibility of the claimants for admission to the competition on the 1st of December, 1866.

Dr. De Briou, of Paris, has succeeded in producing an enamel paint, made from india-rubber, which, though of film-like consistency when applied to iron, renders it absolutely proof against atmospheric action. The invention is thought highly of by the Academy of Sciences.

In a communication to the Academy of Sciences M. Faye states that the physical constitution of the Sun is, in all probability, a gaseous mass, subjected to very great pressure and an enormous temperature.

Prof. Davanne has laid before the Academy of Sciences the results of his investigations into the causes of fruit becoming mouldy. Ripe fruit, properly speaking, does not become mouldy, but perishes by withering; unripe fruit, on the contrary, is attacked by two kinds of fungi—one, *Mucor mucedo*, which produces a black mouldy efflorescence; the other, *Penicillium glaucum*, which occasions green mouldiness.

Besides Monte Casino, orders have been given by the Italian Government that the following monasteries shall be preserved intact: San Marco at Florence, famous in connexion with Savonarola

and the frescoes of Fra Angelico; La Cava, or La Trinità, between Naples and Salerno; San Martina della Scala, near Palermo; Monreale and the Certosa, near Pavia. All suppressed monasteries are to be appropriated, as far as possible, to the purposes of public schools, hospitals, poor-houses, infant asylums, or other beneficent purposes.

According to accounts from Australia, the alleged discovery of the remains of Leichhardt turns out to be unfounded. Mr. McIntyre, the leader of the expedition, now on Leichhardt's route, died on the Gilliott river a few months ago, after a brief illness. He had crossed Australia, and at Burke Town, on the river Albert, he caught a fever which proved fatal. Mr. Sloman is at present in charge of the expedition, and awaits instructions from Melbourne.

Mr. Murray will do well to add to his account of the interesting church of St. Melion, near Saltash and Callington, Cornwall ('Handbook for Travellers in Devon and Cornwall,' 4th edition, revised), a more correct account of that building than the work contains. There are several curious monuments: one, a brass to the memories of Pether Coryton, and Jane his wife, the former of whom died in 1551; the space for the date of the decease of the latter has not been filled up; hence, as is not uncommon, it is evident that no one took pains enough for the purpose so desirable, and that the monument was placed in her lifetime, probably by herself, with the intention that no such hiatus should occur. The most interesting characteristic of this memorial, which is now placed against the external wall of the north aisle, near the east end, is in its retaining three shields of arms, with their original emblazonry in enamel. Beneath the principal effigies are inserted, in the ordinary manner of male and female groups, the kneeling representations of twenty children, seven daughters and thirteen sons. The gentleman is dressed in a suit of armour, which is strangely antiquated for the date of the monument; both effigies are undeniable portraits. Whatever might have been the case when the Handbook was published, there exists in this church only a helmet, banner-staff and sword, not "helmets, spurs, swords, gauntlets, and pennons," of the Corytons or others. Close to this memorial stands a high-canopied tomb, of stone and marble, of William and Elizabeth Coryton (died 1651, 1656), whose effigies kneel before a faldstool that is placed between them; and are remarkably worthy of notice on account of the costumes they display. In respect to the armour of the gentleman, he wears, instead of taces, a perfect apron of steel, not unlike that of a fashion which prevailed long before his time; the lady has a close coif on her head, descending to her shoulders. Here, again, are portraits of unexceptionable intention. It is noteworthy, not only on this tomb, but on that of another Coryton and his wife, which is near to it, and of similar character but inferior execution, that between and above the *ris-à-vis* figures is a little bracket, inclosed by the central rising arch of the architectural portion of the design, and supporting statuettes which, if not actually intended to represent the Virgin and Child, are evidently, in respect to their position on the monument and attitudes, derived from such figures, of much more ancient date than theirs, and of severer style in design than the larger accompanying portraits. These minor figures have something of the look of those semi-Pagan allegories of Charity which were not uncommon at their date, but are obviously derived from the Virgins and Children of the *rococo* period; they may be really what one may call disguised Virgins and Children on the tombs of adherents to a faith which might not be acknowledged. The third monument is to the memories of Sir William Coryton, Bart., and Dame Susanna, his wife (1711, 1695), who kneel as before stated, and are very late examples of that attitude, if not the last which are known to us. There is something comical in the insolent pride of Sir William's expression; his portliness and provincial hauteur were given by the sculptor with what was either the most perfect simplicity or the keenest satire. The baronet's costume comprises a huge, full-bottomed wig, the largest of lappelled coats, buttoned by the

biggest of buttons on one of the biggest of stomachs. He was evidently what Cowper styled an "abdominous" man. His wife is comparatively meek and small, but not without pride of bearing; both heads are outrageously huge for the bodies. Both figures retain extensive traces of colouring, obviously original, and not unbeautiful; that of the lady displays rich foliage of yellow on a blue ground.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES IS ON VIEW at the Royal Exchange Fine Arts Gallery, 24, Cornhill. This Collection contains examples of Clarkson Stanfield, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—J. Lewis, R.A.—Eger, R.A.—Frith, R.A.—Rosa Bonheur—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersgill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Ansell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Debon, A.R.A.—Cooper, A.R.A.—Gale—Marks—P. Hardy—John Faed—Frith—Bulwer—Brillouin—Liddersdale—George Smith—Duverger, &c.—Admission on presentation of address card.

ROYAL POLYTECHNIC.—George Buckland's Musical Entertainment, entitled 'The Castaway; or, the Unlucky Cruiser, commonly called Cruise.'—Pepper and Tobin's Wonderful Illusions, The Cherubs floating in the Air, and Shakespeare and his Creations, with F. Damer Cape's Recitals.—Lecture on and Exhibition of the Prussian Needle-Gun and other Breech-Loaders.—Dugwar's Indian Fete—Matthew's Magic—Lectures, &c.—Open from 12 till 5, and 7 till 10. Admission, 1s.

SCIENCE

Vivisection: Is it Necessary or Justifiable? Being two Prize Essays published by the Royal Society for the Prevention of Cruelty to Animals. (Hardwicke.)

Two years since we had occasion to notice the action of the Royal Society for the Prevention of Cruelty to Animals in regard to experiments upon living creatures; and again we are compelled to lament that the directors of an association which has rendered valuable service to the cause of humanity should have commenced an agitation which is unjust to the followers of physiology, and may prove injurious to science and those interests which it is the special aim of physiological inquiry to further. Since our last expostulation the directors of the Society seem to have modified their views on the subject under consideration; and they are at pains to set themselves right on points where they conceive their conduct to have been misinterpreted. They no longer bring baseless charges against the system of our medical schools; and, instead of directing a general accusation of inhumanity against the entire body of our medical students and professors, they expressly limit their censure to operations which all enlightened physiologists unite to condemn. "This Society," observes the secretary, adopting a tone widely different from that which provoked our censure in past time, "has, nevertheless, been careful to draw a wide distinction between the humanity of a man who, in pursuit of knowledge for the alleviation of human maladies, has unwillingly, and with much hesitation, resorted to experiments upon animals after he has exhausted every other means of inquiry,—and the man who, for the gratification of cruel passions, has submitted an animal to undeserved sufferings. It would be unjust not to make this distinction; but we are bound at the same time to say that it is impossible to discern much difference between the reckless vivisectioner and the reckless drover, or other heedless, hardened, cruel man; and the Society has, therefore, during many years laboured to bring the conduct of these scientific offenders under the reprobation of public morality." It is at first difficult to believe that this is the language of the same philanthropist who, under the erroneous impression that animals were regularly slaughtered in the lecture-rooms of our hospital demonstrators, and that our physiological students were accustomed to repent in private the barbarous acts perpetrated by their teachers before assembled classes, formerly wrote, "Is it true that almost daily English 'Majendie' is

laying bare the roots of a poor dog's vertebral nerves? Can we show that our medical students do not 'steal dogs and entice cats in their lodgings, and repeat upon them the experiments they have witnessed the day before?' But though the agitator thus withdraws from his original position, and with more prudence than success endeavours to persuade retentive memories that his "Society has never set itself to denounce physiologists or their practices without discrimination," he still encourages the public to think that under the guise of scientific investigation some of our physiologists are habitually perpetrating atrocious acts of inexcusable cruelty. Where are these reckless vivisectioners who, "for the gratification of cruel passions," inflict hideous tortures on unoffending creatures? Where are we to look on English soil for any considerable number of the "scientific offenders," whose misdeeds are represented by Mr. Fleming as a sufficient reason for urging the legislature to put restrictions on physiological inquiry, and to enact measures based upon the assumption that if our eminent surgeons and physiologists are not necessarily ruffians by nature, it is highly probable they will act like ruffians unless their movements are watched with jealousy and circumscribed by penal provisions? Knowing intimately the ways and manners of our men of science, as well as of our scientific schools, we are satisfied that, so far as London is concerned, such offenders are as imaginary as the medical students who, according to the same witness's assertions made two years since, found music in the cries of tortured birds and the screams of mutilated cats.

At a time when the officers of the Society were bent on carrying out their crusade against evils that do not exist, they offered a prize of 50*l.* for an English essay on those various experiments which—for the sake of a good cry at the expense of perfect truth—they were pleased to group together under the misleading title, 'Vivisection'; and now we are presented with the fruits of their liberal offer,—a ridiculously bad essay which obtained the highest number of favourable opinions from the critics appointed to read and pass judgment on the papers sent in by competitors for the prize; and a decidedly able paper which gained the second place in the contest, and won so large a measure of judicial approval that it was deemed advisable to publish it as an appendix to the more fortunate though less meritorious treatise. Of these essays the longer and more honoured is the production of Mr. Fleming, veterinary surgeon of the 3rd King's Own Hussars, whilst the less distinguished comes from the pen of Dr. Markham, an accomplished physician, who has filled the chair of Physiology and Anatomy at one of our principal medical schools. That a veterinary surgeon, unknown in scientific circles, should thus bear away the bell from a physician of high character and attainments may occasion surprise to readers who are not acquainted with the ordinary action of the prize system when employed as a stimulant to literary production, or who omit to ascertain the names and qualifications of the gentlemen who consented to act as the Society's adjudicators. The fact, however, is likely to cause less astonishment when it is known that the board which decided on the relative merits of the competitors consisted of twelve members, more than one of whom have but slender claims to attention when scientific questions are under discussion. In justice to the agitators it should be observed that they did their best to get a more satisfactory body of jurors. Mr. Darwin, Prof. Huxley, Dr. Lankester, Prof. Marshall, and Prof. Simonds ab-

stained from accepting the Society's invitation to connect themselves with a movement which aimed at penal legislation against scientific inquiry. On the other hand, Prof. Owen and Dr. Carpenter consented to act as adjudicators. Whether Prof. Owen took an active part in the labours of adjudication does not appear; but Dr. Carpenter seems to have exercised all his personal influence in an endeavour to lead his companions to a just conclusion. If this eminent physiologist had spoken favourably of Mr. Fleming's production, the public would at least have had some grounds for satisfaction with the award of the judges; but on examining this "prize essay" Dr. Carpenter found it so ignorant, fallacious, and altogether unworthy of acceptance, that when a majority of his less scientific assessors had agreed to give it the prize, he felt himself bound, by prudent regard for his own reputation, no less than by concern for the welfare of the public, to declare his low opinion of the paper. Hence we are favoured in an appendix with his critical objections to the distinguished essay; and the effect of these incisive criticisms is heightened by the ludicrous insufficiency and bad logic of the replies with which the blunderer strives to cover his mistakes, and to insinuate that his censor is little more than a sciolist. At the outset of his attack against experiments, which he condemns, without reserve, as altogether unnecessary and unjustifiable, the veterinary surgeon observes: "The results achieved, however, looking at them from the most favourable point of view, be they valuable or otherwise, have cost an amount of suffering to sentient beings far beyond considerations of value and necessity, and which, when compared one with the other, fixes a perfectly just verdict of 'needless and cruel' against nine-tenths of the almost endless number of experiments performed by physiologists,"—upon which statement the author's judge remarks, "I entirely dissent from this statement. If we knock out of the existing system of universally accepted physiological knowledge, all that has been learned from experiment, and what experiment alone can reveal, we should go back to a depth of ignorance which must cause a most lamentable increase in human suffering, through the maltreatment of disease and injury which would be the result." Mr. Fleming rejoins with an assurance that he is in total ignorance of the discoveries to which Dr. Carpenter alludes,—the rejoinder of course implying that the positive ignorance is on the part of his censor. To a statement in the body of the essay that "Dr. Carpenter has but little faith in the truthfulness of the deductions of the experimenters," the Doctor, with lively astonishment at such a bold misrepresentation of his opinions, replies, "I must entirely disclaim the general inference which the author bases on a limited proposition; I go as far as any one in the importance I attach to anatomical investigation, and in faith as to the value of the 'experiments prepared for us by nature.' But the author ought not to ignore the explicit testimony I have borne to experiments in my chapter on the determination of the functions of the nerves." To this courteous protest against an unfair inference from a "limited proposition," the prize-essayist replies, "If the learned Doctor contradicts himself, I submit it is not my fault." To Mr. Fleming's words, "A host of minor vivisectioners entered the lists, but the only valuable facts relating to this process were obtained from cases of accident or malformation in the human subject, as in those of Alexis St. Martin, Catherine Kutt, and that reported by Busch," Dr. Carpenter temperately replies, "One of the results now best established by experiment is, that the

secretion of gastric fluid is essentially independent of the eighth pair; but that it is temporarily suspended by its section, as by a shock to the nervous system. No observation upon such cases as that of Alexis St. Martin could have established that most important result." Thus convicted of a blunder on a question of fact, Mr. Fleming retorts, "If so, *cui bono*?" In reproof of this mode of dealing with scientific discoveries, Dr. Markham observes, in his excellent paper, "The electric telegraph was not invented by the discoverer of electricity, nor the locomotive by him who first learnt the elastic power of steam; but assuredly those discoveries were, in both cases, the germs of the wonderful modern applications of steam and electricity to the uses of man. To object to the experimental physiologist who has added a positive fact to our knowledge of the laws of life, that his labours are futile, because the immediate practical use of the fact in medicine is not apparent, is very much what they did who met the discoveries of electricity and steam with the usual objection of ignorance,—of what use are they? *cui bono*?" But enough of Mr. Fleming's efforts at self-defence, efforts which remind us of the itinerant lecturer on astronomy, who, on being convicted of ignorance by a village schoolmaster, replied, "Exactly, Sir; Herschel thinks so, but I don't,—that's just where Herschel and I differ." The utility of physiological experiments is just the point where difference arises between Dr. Carpenter and the veterinary surgeon of the 3rd King's Own Hussars.

In other respects Mr. Fleming's treatise exhibits the worst faults of prize-essay literature. Alike violent and illogical, it seeks to win a verdict on a false issue by inflammatory appeals to passion. Opening with a fierce denunciation of the barbarous usages of French vivisection, it describes with painful minuteness the manner in which the veterinary students at Alfort hack and torture worn-out horses, upon the assumption that surgical skill cannot be attained without a course of operative practice on living subjects. This picture of the ordinary proceedings at Alfort is highly coloured, though essentially truthful; but the pain which it occasions the English reader is caused to no better purpose than the anguish inflicted on the poor brutes whose maltreatment is unanimously condemned by the scientific world of England, and also by the more enlightened physicians and surgeons of Paris. For the enormities thus forced upon our notice we have no sentiment but abhorrence, and we sincerely trust that the public opinion of France will speedily put an end to the cruelties of a system which is a scandal to science and a blot on her fair name. But what argument can be drawn from these French atrocities in favour of penal legislation against English inquirers? "Courses of experimental physiology," says Dr. Markham, "are nowhere given in this country." Vivisection—in the true sense of the word—is a practice unknown as a means of instruction in the schools of London. What then are we to say of the writer who bases his demands for new legislation in this country upon evils which are peculiar to France? What can be said in behalf of an agitation which is rousing violent prejudice against a most humane and beneficent class of our own countrymen, because the horse-doctors of France are guilty of disgusting atrocities? Surely we have reason to express regret that a Society—which in past years has rendered the country much good service, and still exerts a wholesome influence on social morality—should confound French horse-doctors, who torture defenceless brutes for the sake of mere operative skill, with those enlightened inquirers amongst our

own people who, in the highest interests of humanity, make experiments on living animals for the sake of new knowledge. Noticeable also, as an illustration of the inconsistency of his main arguments, is the use which Mr. Fleming makes of previous teachers. In order that he may bring the pursuits of our humane and enlightened physiologists into odium, he quotes, as applicable to the followers of Hunter and Reid, the words in which Dr. Johnson expressed his disdain for certain "inferior professors of medical knowledge," whom he not unjustly stigmatized as "wretches whose lives are only varied by varieties of cruelty." So also, to show that the real interests of science are not furthered by reckless indifference to the sufferings of the lower animals,—a proposition, by the way, which no Englishman is inclined to dispute,—Mr. Fleming quotes a series of English physiologists who, by example as well as precept, expressed their warm disapprobation of a cruel use of the dissecting knife. He admits that the merciful instructions of these teachers fairly represent the tone of feeling prevalent amongst the chiefs of our medical schools; and yet he persists in his entreaty that our physiological investigators should be placed under the surveillance of the police. He asks that "the temporary right to experiment on living animals should be limited to a very few, and they should be men who are not only qualified by general scientific attainments for such a responsible and profound task, but by their humane and merciful characters." Having thus limited the right of scientific inquiry to a select committee of "humane and merciful characters," the law, according to Mr. Fleming's view of the case, should forbid these singularly "humane and merciful characters" to perform any experimental operation on a living animal in the absence of their associates. This scheme is recommended as merely a temporary arrangement, to be in force whilst public opinion is passing from its present state of suspended judgment to a unanimous disapproval of experiments which the writer declares to be utterly useless, and therefore altogether unjustifiable.

Differing widely from this unscientific enthusiast, Dr. Markham, in his closely-written and conclusive paper, draws the line between justifiable and unjustifiable experiments. Whilst he stigmatizes as unjustifiable "all operations on living animals performed for the avowed purpose of improving the surgical skill of the operator," and all experiments for the demonstration of ascertained facts, this able writer maintains that "experiments on living animals, performed with the object of advancing medical and surgical knowledge, and of thereby relieving human suffering or prolonging human life, are, under certain well-definable restrictions, justifiable." Besides showing the utility of the physiological inquiries, which Mr. Fleming condemns without reserve, Dr. Markham disproves the charges of cruelty which have been so recklessly preferred against our men of science, and points to the misapprehensions which are the moving powers of an unwise agitation against a class of public benefactors. The agitators assume that the number of animals yearly sacrificed to experimental inquiry is something prodigious; that the torture inflicted on these creatures is in all cases extremely acute; and that men of science are the only persons who are permitted by law to inflict needless pain on animals. "The peer or the peasant," observes Mr. Fleming, who may be regarded as a fair exponent of the views held by the sentimental declaimers, "if found guilty of exercising their savage and cowardly propensities, obtain a due and well-merited chastise-

ment; but the man of science has ever a number of pleas to urge on justice and humanity, no matter howsoever extravagantly he may indulge his whims at the expense of his suffering victims; and thus he escapes the punishment which is awarded to others. *It is only the scientific man, in fact, who is licensed to inflict pain on animals.*" The holders of such views are reminded by Dr. Markham that men of every grade of life between the two extremes of society, as well as the members of the two classes so antithetically grouped by Mr. Fleming, are in the daily habit of inflicting acute and needless pain on the lower animals; that the law permits, and even encourages, them to do so; and that of this vast amount of needless pain a large proportion is inflicted in the pursuit of pleasure or out of pure wantonness. The modes by which we kill animals for human food involve much pain that might be avoided, and the means to which the sportsman is indebted for his special pleasures are largely productive of suffering to brutes. "At all events," observes Dr. Markham, in this part of his argument, "he who follows the hounds, who preserves game, or handles a gun or a rod, or who approves of the same, must not venture to cast a stone at a physiologist. Let him be very sure that, in the preserving of game, in the trapping of vermin, and in the killing of game, infinitely more pain is inflicted on animals in any one year in this country than has been inflicted on animals by physiologists during the last century. . . . More than this, as all sportsmen know, out of every hundred head of game shot at, a certain percentage get away wounded—I might fairly call it 'vivisected'; and to get away wounded often means to die a painful and lingering death. When I consider these facts, I am satisfied I am quite within the mark if I say more pain is inflicted on animals by sportsmen on any 1st of September or 12th of August than is inflicted by physiologists during the whole year in this country." This is a point of view from which the promoters of a reprehensible movement against our men of science have omitted to look at the question in which they are so warmly interested. But now that the real state of the case has been put before them, it is to be hoped that they will desist from the course on which they entered without due inquiry. We are the more inclined to entertain this hope because circumstances have induced the Directors of the Society for the Prevention of Cruelty to Animals to publish Dr. Markham's Essay, which is a perfect answer to their erroneous assumptions.

FINE ARTS

A Handbook of the Art of Illumination, as practised during the Middle Ages. Illustrated.

By Henry Shaw. (Bell & Daldy.)

OF works in this class the number is infinite, and the differences in their value are indescribable. Only costly exceptions occur to the rule that, in general, their merits do not equal their pretensions. Some were well written, by persons whose knowledge of illuminating was singularly small, and their acquaintance with Art itself next to none, yet who, by literary skill, contrived to eke out the matter in their possession, and to secure at least a popular acceptance for the results of their shallow craftsmanship. This is exactly what one would expect from experience in other ways of Art-literature, than which none other is so choked by charlatany and pretence. Of Art it is truly said that there are far more writers than professors, and that men do not hesitate to employ technical terms in treating of it, their use of which shows their incapacity to deal with them and the subject, no less than their

audacious reliance on the ignorance of their readers. Thus, it was but the other day we had a so-styled critic employing the term "tone" in the sense which is proper to "tint," and speaking of a "yellow-coloured tone," a "dark-red tone," whereas he might as well have written "yellow-coloured music," or "dark-red singing." The term "*chiaroscuro*" is a pitfall to most of these sciolists; few of them understand its purport, even in the primary sense; not one in twenty writers who boldly venture upon it know that it may mean something which is far deeper than a simple translation of the syllables would render to the ear. In other cases of books on the art of illuminating we have had well-illustrated volumes with badly-written texts. Again, a few have combined with learned essays the taste of the critic and the technical triumphs of the artist; or, what is almost equal in merit, if not in value to those, texts that, with moderate pretensions, exceeded their claims to respect. To the superior class the book before us belongs.

Mr. Shaw is eminent for knowledge of the subject and skill in delineation. Long study has enabled him to discriminate with rare ability the characteristics and qualities of the examples he chooses, as well as to select them with judgment. Few English hands equal his in copying the illuminated drawings of the Middle Ages, either as regards colour or form. In this work he has been most fortunate in finding engravers able to reproduce his transcripts with success. Their names, as we have great pleasure in stating in conjunction with those of the author and draughtsman, are Messrs. J. D. Cooper, R. B. Utting, who has produced a magnificent initial B, from the Lindesey Psalter, which is now in possession of the Society of Antiquaries, J. O. Jewett, who has done admirably with the first page of the Tenison Psalter, now in the British Museum, date 1284, and Miss Byfield, who has produced a capital copy of an F from a Bible of the ninth century, also in the British Museum.

We will consider this publication primarily as an illustrated book. To this aspect of the subject will be turned the regard not only of the expert, who, with all respect for Mr. Shaw and his aids, will prefer the examples to the essay by which they are accompanied, but of the artist, and even the untechnically trained reader. In brief, so far as artistic skill and labour might make it such, we have never seen a work of the order more happily illustrated than this. To the choice of several of the examples, either as regards their lack of novelty or comparative deficiency in beauty, we shall have exceptions to state further on; none can be offered with regard to the artistic value of the engravings before us. It is just to say this, because the examples have what hasty readers will probably consider a remarkable shortcoming in the manner of their reproduction, one, indeed, which is not a little paradoxical in itself, disappointing to many, and, as we fear, certain to depreciate the result of Mr. Shaw's labours for some time to come,—at least, until their real value is understood, apart from the merely obvious attractiveness or non-attractiveness of the volume. The uninformed reader will probably not be surprised when we say that the compiler has been daring enough to publish a book on illuminated drawing, the leading characteristic of which is colour, without the aid of any coloring matter whatever. He has attempted to illustrate in black and white the beauty of an art which originally blazed in an infinity of the varieties of yellow, red and blue, which existed in actual gold, burnished or unburnished, and lit its pages with azure

and scarlet, with vermilion and crimson. Illuminating invariably made its triumphs scintillate in splendid dyes. In the purple-stained manuscripts of the royalties of Byzantium, the glittering and diapered mountings of the fourteenth century, and the dead-gold grounded *quasi* pictures of Flanders, Italy and France, which prevailed at a much later period, the case was the same, and in truth remained so until the art itself, as an art having apt and peculiar laws, perished in *rococo* twiddlings and inanities, or gave place to what was absolutely pictorial, and only that. The artist of Constantinople mocked on vellum the splendours of mosaics, so the Gothic illuminator approached the richness, if not the translucency, of his glass-painting fellow's windows; and the less logically severe book-painters of the Renaissance period aimed at the qualities of fresco,—the last being one of the great arts which owed to that minor one of which we now speak not a few of its distinguished professors, and not a few of its noble craftsmen, among whom Fra Angelico is pre-eminent, although Perugino and even Raphael himself have been ranked as illuminatists. It was a bold thing on the part of Mr. Shaw thus *wholly* to dispense with colour in his attempt to illustrate that particular art which probably more than any other has been considered the province of the chromo-lithographer and colour-printer; several good books have to some extent countenanced this attempt by the nature of a part at least of their illustrations. Despite the obvious disadvantages and difficulties of the attempt, we are decidedly of opinion that our author has succeeded in his aim. We find that what may be called the *chiaroscuro* of his models, that is, the actual relationship of their tints to each other,—for which we have no alternative than to use the term *chiaroscuro* in its most limited sense,—has been in most instances reproduced with singular felicity and certain advantage to the student.

From a literary point of view, this volume appears less pleasant than from that which is, nevertheless, most important. Mr. Shaw's style is confused and cumbrous whenever he departs from the simplest descriptions. When he generalizes he is almost lost, to the great suffering of his reader, and considerably to the injury of his work. Thus, how cumbrous is this, the third paragraph of the Preface: "In the early styles of this art, when flat tints only were used, and the effect of light and shade was produced by consecutive bands of colour, of increasing degrees of density, proceeding from pure white, the details of the composition being made emphatic by a surrounding of red or black lines, a close approximation to the originals may be effected by means of the printing-press; but colours so produced can never have the solidity and richness of tone of those on which the hand and the brush alone have been employed." This is in support of what has just been alleged to the same effect with regard to the superiority of handicraft in copying illuminations. Moreover, we are compelled to censure a diffuseness in style, as the chief fault of this publication. Again, our author is often a little vague in assertion; thus—"In the early ages of Christianity the schools of Art were the monasteries, and the books were almost wholly of a religious character." This is hardly true in the strict sense of the words. In the early ages of Christianity—which were also those of decay in Paganism—there were no monasteries of the kind implied; but the decoration of volumes was by no means unpractised. Of this latter fact the author is not ignorant, for he cites the authorities of

Ovid and Pliny with regard to the practice of the Romans in pictorially decorating their manuscripts, and adorning them by means of rubrication.

We observe nothing new in the historical section of this text. The oldest known examples of the caligrapher's and illuminatist's arts are cited. The Vatican Virgil of the third century; the Codex Argenteus of Ulphilas, of the middle of the fourth century; the Psalter of St.-Germain-des-Près, and the Cottonian "Titus, C. xv.," of the next age:—all appear, as before, with evidences of careful consideration of the subject. The characteristics of that remarkable school of illumination, the Irish (Hibernian), are well distinguished in the ordinary way in this Preface by Mr. Shaw, who, however, does not appear to have seen the Book of Kells, to which he refers. On so interesting a subject as this we hoped the author, who is most competent to do so, would have carefully discriminated and described the differences in manner as well as in merit, rather than in style, which are observable between the illuminations in the Book of Kells and the Durham Gospels, he has not done so effectually, or pointed out, with what seems to us sufficient distinctness, the fact that the former displays in an exalted fashion the universal Celtic style of decoration common on metal, stone and vellum; also, that this phase of Art is emphatically derived from the Byzantine decorators, although rendered marvellously minute and exquisitely beautiful in new hands. It is true, as a rule, as Mr. Shaw remarks, that the earliest examples of Hibernian illumination are the most admirable. These are so few that they might possibly have been the product of one cell, if not of one hand. We join very sincerely in the regrets of Mr. Shaw that the great work of Count Bastard, on the manuscripts produced after the eighth century, has never been completed; we may add a regret that this admirable book, even as it is, is not translated for English readers, and its plates, triumphant examples of reproduction as they are, given with an English text. This is incomparably the best book of its kind, respecting which, however, we can by no means assent to the remark that it is to be lamented the author confined himself so strictly to examples of early date, "instead of giving a due proportion of those showing a more advanced state of Art." If book decoration by means of drawings, in the modern sense of the term, is desired for current use and the instruction of readers, these, excepting so much as must be called for by mere archaeological requirements, we have already, in what are called "illustrations," and by the hands of some of the ablest artists the world has produced,—e. g., to speak of England only, Flaxman, Stothard and Mulready far surpassed all the Middle Ages did in what Mr. Shaw oddly calls the "more advanced state of the art of illumination." By means of wood, copper and steel plate engraving, and the consummate genius of such men as we have named, it is no longer needful to return to the craft of the *pictorial* illuminator, except, as we said, with reference to archaeology and the gratification of peculiar tastes.

With regard to the art of the caligrapher, by which we mean the adorning of manuscript or typographer proper, the case is wholly different. Need still exists for teaching the student in general that the best and truest decorations, *per se*, of ancient MSS. are not the pretty and quaint little pictures of comparatively late date in the Middle Ages, with their infinitely varied diaper grounds and inextricably intricate ornaments, wherein clearness was too commonly sacrificed to the cunning and pride of the ornamenter. This order of excess ultra-

inately became suicidal, so that the art itself was absolutely absorbed in that of painting proper, and ceased to have a separate existence beyond those very narrow limits which are, however, barely filled by the type-designer and type-cutter, and those few persons who still profess the art of illumination. To our minds, Count de Bastard did well to restrict himself, so far as was the case, to earlier examples of the illuminator's art. From these,—apart from archaeology, calligraphy proper, and book decoration,—apart from "illustrations," or in addition to them, also,—typography may well derive great benefits. In this sense the proper mode of ornamenting a book is to develop its peculiar characteristics, that is, the written or printed letters themselves, into examples of decorative art, retaining that clearness which is essential to the subject, and never to be parted with on any account whatever, least of all for the sake of superfluity of ornamentation.

Mr. Shaw's own book, admirable as it is for that very quality, is an example in point of the desirability of enforcing this conviction of ours. His initial letters are often beautiful in the highest degree: see the Hiberno-Saxon S, from the Cottonian MS. "Vespasian, A. 1," which is by no means an over-elaborate instance of that order of calligraphy which prevailed here in the seventh century; although more ornate, the decoration is less beautiful in Plato IV., with its foliated frame inclosing letters, taken from the well-known Gospels of Canute, where the craft of the artist has run into mere bordering,—although a fine and firmly treated initial and some clear lettering show what he could do when rightly employed. It is the same with the dragon-loaded calligraphy of the twelfth century, which combines foliage and flowers, conventionalized palmettes, or *acanthi*, scroll-work and rigid lines in a wonderful variety and with real design, as developed with perfectly logical fidelity from the thing itself that was to be decorated, i.e. the lettering of the page. Although clearness was to some extent sacrificed in the style which followed that of the last-named century, yet decorative propriety was then no less marked than the extraordinary inventive powers of the painters who wrought so well the long-tailed letters with their astounding loads of animals, dogs and birds, monsters and game, which are distinguishable as of English production of the early part of the thirteenth century whenever black and purple are prevailing among their colours. Mr. Shaw thoroughly appreciates the beauty of these examples; with conscientious care he directs the attention of his readers to their excellencies, their almost inexhaustible spirit and wealth in decoration.

With Richard the Second, or, more truly to write, in the later times and corrupted state of his grandfather's reign, the illuminator's art, like all other branches of design, lost much of its purity, logical consistency and propriety. Beyond former practice, the pages of the religious and chivalric books received pictures of comparatively large size; illustrations prevailed that were proper to the text, not peculiar to the calligraphy; borders grew prodigiously elaborate; the oft-repeated quaint, sharp-pointed ivy-leaf of gold in high relief took the place of that means of decoration which was peculiar to every volume and never repeated itself. Nevertheless, great beauty is observable in most of the initial letters: see the example produced by Mr. Shaw on Plate VIII., from a MS. in the British Museum, of the later part of the fourteenth century; also, however, compare the elaboration of this with the severity of the much older O, that commences this text, or the evidently orientally influenced A of intermediate style,

which is to be found on page 9 of this publication. Also the well-known L of "Liber," from the Egerton MSS., No. 608, British Museum, which is here engraved.

Beautiful borders, of fourteenth-century production, abound in French and—in a less quantity—in English manuscripts. These, although not essential to the calligraphy, are proper enough to it, and most worthy ornaments of splendid pages; in most instances there was an evident return to severe grace of form and style, formalized, however, by repetition of parts in a long string, showing that invention lacked that exuberance and apparently inexhaustible joy of youth which manifested itself in the preceding century, as well as that astonishing precision and delicacy of hand which in countless examples drew fine red lines in inexhaustibly intricate flourishes of wonderful tenuity along the edges of the writing they seemed to caress. Later than that which is here named, another revival of severity took place, especially noteworthy in this country, and capably illustrated by Mr. Shaw in a border on page 31 of this book, and the whole-page illustration which follows it, exhibiting a splendid R, in the conventionality of which there is, however, not a little hardness, and in the forms very little of that gracefulness which was the very soul of the more truly severe, because chaster, style which was precise without being affected, firm without rigidity, elegant without weakness, and elaborate without intricacy. This return, ineffectual as it was, was the last effort of calligraphic illumination; thenceforth the pictures became bigger, the borders repeated part after part, decoration sold itself for mere imitation of nature. Beetles, butterflies, flowers, leaves, drops of water, and other "sweetly pretty" things obtained; these were outrageously and ridiculously combined, or not combined at all, void of Art though rich in painting, and at this day the delight of the drawing-rooms and the scorn of the real designer, who knows there is no invention in them, and that they took the place of true Art. The Italians, who betrayed decorative art, in more ways than men are yet disposed to credit, no less than their pupils, the Flemings, were responsible for much of this collapse. This is our "moral." Mr. Shaw concludes his very interesting description of the varied phases of illuminating with an account of the methods and processes now employed in the art.

FINE-ART GOSSIP.

A new "Freemasons' Hall" has been completed in Great Queen Street, the work of Mr. Cotterell, the architectural style of which serves to show how completely "freemasonry" is divorced from Art, and is almost bad enough to make us doubt the alleged fact of their union at any time. At once mean and heavy, composite and irregular, there is an extraordinary lack of good design in the facade. Balustrades are placed where they ought not to be, and accompanied in absurdity by an ill-proportioned pediment, columns and pilasters, besides statues and other sculptures, the significance of which is as hard to find as their value in design. What have we to do with allegories of Wisdom, Power, if that be really meant, or such trivialities as Fidelity with a dog, Charity with nursing children? This building has promise of an unexpected sort, in the fact of its aims being undeniably architectural, and, however ill supported those claims are, is not wholly unfortunate in showing that what used to be called the "Licensed-Victualler Style" of architecture, from which it seems derived, is rising from torpor, although still blundering.

Now that the Parliament House has been secured against ordinary risks of fire, it is much to be desired that a further improvement should be effected in the arrangements which are in some way dependent on the mode of ventilation there employed. Upon

these depend the much-desired proper lighting of the Royal Gallery, where Mr. Macdonald's great pictures are. These works will never be fully seen, and of course properly appreciated, until the room is lighted from the top and the gaudy clerestory windows, which now produce startling heraldic effects, are removed. The obstacle to this mode of display exists in the passage of a certain tunnel, or horizontal shaft between the ceiling and the roof; this removed or otherwise disposed, the panelling of the ceiling might be replaced by a skylight, and, we have no doubt, a great improvement made in the appearance of the gallery, without regard to that advantage which would be secured for the paintings.

The old buttery-hatch, with sides and head of Purbeck marble, has recently been discovered in the south wall of the refectory of Westminster Abbey. Mr. C. Forster, Clerk of the Works, has prepared a plan of the Abbey, showing every known grave in it.

The well-known statue busts in front of the Sheldonian Theatre, Oxford, have been removed, as unsafe.

The church of the Venerable Bede, at Jarrow, has been restored and re-opened. The more ancient Romanesque windows of the church have been opened and the later Gothic ones displaced; the flat roof of this portion of the church has been removed and its place given to a roof pitched at the former level, as indicated by the mark on the lower. A new north aisle has been built, and an extension effected to the west of the edifice, and the vestry rebuilt so as to form a sort of transept.

The Mr. R. D. Hay, of Edinburgh, whose death was announced in our advertising columns of last week, was the author of several well-received works on decoration, the memory of which has rather faded of late, perhaps undeservedly so, notwithstanding the needless abstruseness of their manner.

Messrs. Day & Son (Limited) have published a re-issue, in octavo, of the serviceable work of Messrs. W. R. Tymms and M. D. Wyatt, on 'The Art of Illuminating as practised in Europe from the Earliest Times,' with illustrations in chromolithography. The first issue of this work we reviewed some years ago; it is only needful now, therefore, to speak of the reprint in its relationship to its original. On the whole, our verdict is that the new book is a satisfactory version of the old one, but decidedly not equal to its predecessor in the colour of the illustrations: these are less carefully printed. On the other hand, it is more portable, much cheaper, and wonderfully well worth its price. Within its pretensions, a useful book.

Copies of correspondence between the officials of the Hibernian Academy and the Art-Department have been published. These show, in the first case, that the institution is in a bad way, the annual grant of 300*l.* being insufficient, the receipts at the door of the exhibition-room in Dublin not supplying the want. The Council asks, therefore, an additional grant in aid of 250*l.* to pay debts. The Department replies that "My Lords" decline to aid the society to continue its exhibitions by means of a grant from the public funds. Also, it is alleged that the state of the Art-Schools under the Academy is reported to be most unsatisfactory; this applies to all sections of the students, who appear to be without control, improperly directed in their studies, and unproductive of worthy result. On these grounds, "My Lords" not only decline the aid sought from them, but "are of opinion that the interests of Art would not suffer if the present grant" were withdrawn from the Academy. To the charges of the Department, the Academy replies *seriatim*, and, on some points, we think, successfully,—on others not so; but, for the most part, in such a manner as to show that the aims and standards of the correspondents are distinct. It is alleged that the Academies of London and Edinburgh receive aid, if not in cash, at least in free quarters, from the Government, whereas that of Dublin obtains only 800*l.* a year; that the expenditure consequent on the annual Exhibition of the latter body is largely enhanced by the practice of paying for the carriage to and

from Dublin of pictures by artists who would not contribute to the Exhibition there without that inducement; that the Academy in question holds valuable and suitable premises, which will lapse to the heir-at-law of the testator from whom it received them, if the Exhibition is discontinued, as probably will be the case if the aid asked for is not awarded. Upon this the Department consented to continue the annual grant of 300*l.*, but declined to have anything to do with the request for further aid.

MUSIC AND THE DRAMA

LYCEUM.—Of the original Lyceum, on the banks of the Ilissus, the famous Aristotle was manager, and his career extended to a dozen successful seasons. But Aristotle did not act, he taught philosophy; and the name given to the spot where he founded the school of Peripatetics has been inherited by the theatre where Mr. Boucicault both teaches and acts, in perhaps even more attractive fashion than the Stagirite himself.

We say, with respect to the name, "inherited," not assumed. A hundred years have clean gone, and we are in the first year of the second century since James Payne opened, close upon this site (a site on which the great Lord Treasurer, Burleigh, had his town-house and gardens), an exhibition of pictures, giving to the locality the name of *Lyceum*. Wherefore he chose such name none could tell. The spot, however, had been illustrated by English philosophy. In Exeter House was born a teacher as acute as Aristotle, the great Lord Shaftesbury, he of the "Characteristics." We can trace little after-connection between the place and philosophy. Mr. Arnold, after building a new Lyceum on the spot, in 1794, did not succeed till 1809 in opening it by licence as an "English Opera House," where *English* opera was the last thing thought of. Meanwhile, it was open to any one who would hire it; and exhibitions, from that of white negresses and porcupine men, to that of pictures by artists like Mulready, and of Orrerys, with lectures first by Lloyd and then by Bartley, the player (during the Lenten seasons), illustrated the sort of philosophy that was taught in the modern Lyceum. Before the fire which destroyed the first theatre, in 1830, the building took an Egyptian, without, indeed, having ever kept to the Attic, character suggested by its name. Mr. Arnold endeavoured to tempt visitors to his boxes, in very hot weather, by promising them ices between the acts; and in this way the Aristotelian Lyceum became, for the nonce, a Temple of Isis!

The theatre erected after the fire was built from the designs of the architect who furnished them for the first, Beazley. With its fortunes and misfortunes of the last thirty years, most persons interested in the drama are conversant. It is still in the hands of Mr. Fechter; but that graceful player stands aside while his stage is occupied by those experienced and well-appreciated performers, Mr. and Mrs. Dion Boucicault.

The drama with which Mr. Boucicault commenced the season is called 'The Long Strike.' It is partly founded on the story of 'Mary Barton,' and partly on that of 'Lizzie Leigh.' Mr. Boucicault has long been celebrated for the skill with which he selects and combines the incidents and characters derived from continental dramas or popular tales. That skill, perhaps, was never more forcibly demonstrated than in the drama under consideration. The theme of itself is very simple; but the treatment is remarkable for ingenuity, and the whole structure of the piece carefully contrived with regard to the greatest producible effect and interest. The nature of the latter is indicated by the title, as associated with the disputes between Manchester manufacturers and their workmen, by which the latter are thrown out of work for considerable periods. The workmen, of course, have a delegate, here named *Noah Learoyd*, an old factory hand and vehement Chartist (Mr. S. Emery), who has a daughter *Jane* (Mrs. Boucicault), who works in the mill of *Mr. Radley* (Mr. J. H. Fitzpatrick). *Jane* is loved by one of her own class, *Jem Starkie*, a working engineer (Mr. J. C. Cowper), but her head is turned by her master's attentions, so that she discourages *Jem's* suit. She has also another

lover, an Irishman and a sailor, *Johnny Reilly*, who is personated by Mr. Boucicault himself. Out of the heart of these characters the immediate action of the drama flows; the subject of the "Strike" being merely circumstantial, and, as it were, the framework of the picture. The play opens with the manufacturers in session treating the poor delegate with contempt. This transaction brings out the character of *Radley*, who is as severe as a master as he is libertine in principle. His life is in danger from the indignation of the people, and he seeks refuge in *Noah's* dwelling, and is hidden by *Jane* in her bedroom. He is also indebted to *Jem Starkie* for protection, and is thus saved from assault. But *Jane's* conduct is fatal both to her lover *Jem* and to her father; for while concealed in her chamber *Radley* overhears *Noah* and three of his friends conspire and draw lots as to who should set fire to *Radley's* mill. *Radley*, of course, gives information before the magistrate, and procures the imprisonment of *Noah's* three friends, but for *Jane's* sake leaves *Noah* himself at large. Subsequently, *Noah* is visited by *Crunkshaw*, a policeman (Mr. D. Evans), and enlightened by him as to *Jane's* conduct. Smarting with a sense of his child's dishonour, and indignant at her having betrayed him and his cause, he possesses himself of a pistol belonging to *Jem Starkie*, lies in wait near *Radley's* house, and while the latter is engaged in a clandestine interview with his daughter, shoots him. The police are then represented as tracking the criminal. Finding that the wadding consists of a letter written by *Jane* to *Jem Starkie* (but never sent to him), they conclude that *Jem* is the guilty party. *Jem*, however, was engaged at the time with *John Reilly*, and had gone with him on his road to Liverpool; but when *Jem* is arrested, *Reilly* has joined his ship, the *Eliza* and *Mary*, which had started on its voyage. Poor *Jane* meanwhile seeks the aid of an eccentric attorney, named *Moneypenny* (Mr. H. Widdicombe), who, rough in manner, has yet a tender heart, and who takes her to the Electric Telegraph Office, for the purpose of sending a message to Liverpool. They arrive after business hours; but the telegraph operator, *Slack* (Mr. Moreland), takes an interest in the poor girl, and unexpectedly the instrument gives note that it is working, owing to which accident they are able to transmit the message. This is the scene of the piece, chiefly made so by Mrs. Boucicault's acting. It is, indeed, productive of the greatest excitement. The message reaches *Reilly*, who, in defiance of his captain's prohibition, contrives to plunge through the stern port-hole and swim to the pilot-boat, and thus is enabled to reach the court just while the jury are deliberating on their verdict, and to prove the *alibi* which establishes *Jem Starkie's* innocence. This done, the curtain at once falls without an additional word. The peculiarity of this drama, apart from its clever construction, lies in the extreme reserve which the author has used in his dialogue. The characters, for the most part, say no more than is needful to tell the tale and suggest the sentiment. Further elaboration is left to the performers, and they carry out the author's ideas with laudable precision.

The part in the new piece from which most was expected, and on which the utmost care was lavished, was one of the shortest but most important in the play. *Johnny Reilly*, the Irish sailor, is but a sketch; but, like one of *Retzsch's* "Outlines," it has all the effect of a figure highly finished. It was so natural that it seemed to have no difficulties. The ease of the actor seemed to give warrant that any amateur might have played it as easily. There was no shade of exaggeration either in the simplicity, the tenderness, or the exuberant joy; the sailor was without swagger or vulgarity, yet by no means a hyper-gentle sailor, or with gentility about him at all, save that gentleness which belongs to a kindly-hearted man with a good spice of humour in him. There was no "fancy" in the dress, gait, bearing, or voice; nothing of what is understood as being "stagey" in any of these, and therefore a picturesque reality in all of them. Moreover, there was no intercourse of eye or expression with the audience,—a fault to which

popular actors are too much inclined, but which mars their acting, and, with competent judges, does not increase their popularity. These are, indeed, as Edmund Kean said of some of his contemporaries, rather *players* than actors, that is, rather triflers than *doers*.

Whether Mr. Boucicault has especially aimed at it or not, he has drawn the play-going public to look upon him as having a *specialité* in the representation of Irish character. Excellent actor as he may be of whatever part he may assume, he has no equal in the portraiture of the wrongs, sorrows, joys, passion, acuteness, sagacity, bewilderment and botheration of the Irishman. It is hard to say to whom among his greatest predecessors he bears closest resemblance, or if he is in any respect like any one of them, each having been so different from his fellows. Some of the early actors of Irish parts must have astounded their audiences. Fancy Mr. Boucicault in Jonson's 'Irish Mask' (acted before *James the First*) having such matter as this to utter!—"For chreeshes sayk, phair iste ta King? plish ish he? I sherve ti majesties own caaher-monger, be me trote, and cry peepeh and pom-watersh inti majestie's shervish." One point was in favour of the actor of Irish character in those days: no one expected a brogue from him. Any assumed accent that was sufficiently barbarous was held to be the *thing*, or as near it as people cared for. It was otherwise with an actor of Charles the Second's reign—*Lacy*, who, like Mr. Boucicault, was author as well as actor, and acted in his own pieces, taking a wide range, and being excellent in all. *Langbaine* says that he performed all parts he undertook "to a miracle," and that if the English stage should ever have his equal, it certainly would never have his superior. *Lacy's* great part was *Teague*, in 'The Committee'; but he could put little brogue into it, nothing of the unctuousness which *Moody*, or the liquid richness which *Johnston* subsequently put into it. Nevertheless, *Lacy* could reach the hearts of his audience, and make their pulses beat for laughter or for tears, and in that difficult attainment, where there must be the utmost art to conceal the labour whereby effect is produced, *Lacy* and Mr. Boucicault are probably as near to each other as great actors can possibly be.

We are inclined to believe that *Bowen*, one of the earliest of the many brilliant actors for whom the English stage is indebted to Ireland, reformed the method and expression of the Irish character on the English stage altogether. He introduced the real, true, and musical Irish accent. Whether it was the tuneful wail from *Kerry*, or the broader and resonant brogue of other districts, it was a new delight, and well appreciated by the English. In *Foigard*, of which he was the original, his mixture of French (such French as a French-Irishman born in Brussels could pour forth to shake the house with laughter) with Irish was a thing talked of at all the coffee-houses in and about Covent Garden. There, young fellows imitated his: "Och, dear joy, I am your moast faithful shervant, and yours alsho!" while others reproduced echoes of the old hilarity by mimicking the semi-foreign, semi-Irish accent with which he used to say so complacently, "I'm of a nation that's not easilly put out of countenance." One may, however, fancy Mr. Boucicault's *Foigard* as having more delicate touches than poor *Bowen* ever gave it. It is delicacy of treatment that distinguishes Mr. Boucicault's style; but *Bowen* was an artist of uncertain impulses and roughish execution.

The stage had not hitherto possessed an Irish gentleman. The first was *Moody*, in Macklin's 'Love à la Mode,' in which he played *Sir Callaghan O'Brallaghan*, a part which silver-tongued *Barry* also performed, on rare occasions, with wonderful effect. *Lady Morgan* is altogether in error when she says that *Moody* knew no more of Ireland than a New Zealander. He was Irish to the very tips of his fingers—till he became fat, rich and indolent. *Lady Morgan* states that *Cumberland* told her father, *Owenson*, that he, *Cumberland*, was the first writer who had introduced an Irish gentleman on the stage, and that *Owenson* was the first to act it (*Major O'Flaherty*) like a gentleman. This is altogether untrue. *Owenson* was a good actor of rough Irishmen, not of Irish gentle-

men. His brogue was of the very richest, but he could never get rid of it; and when he made his first appearance at Drury Lane, as *Tamerlane*, he played it with such a Tipperary accent that the audience went home with their sides aching. Moody was before Owens on acting, as Macklin and Colman were before Cumberland in inventing Irish gentlemen. *Sir Callaghan* is a thorough gentleman, and Colman's *Captain Cutter* is as much so as naval officers could be when 'The Jealous Wife' was written. His talk smacks a little of the time when the brogue was nowhere. He speaks of his "shoul" as the *Stuart Teague* did; but he "will go round the world to sarve her Ladyship," which is an improvement on the earlier form "sherve." Moody played *Teague* better than his successor, Johnston; but Johnston altogether excelled Moody in the latter's original part of *Major O'Flaherty*. Moody was great in the proud outburst of the half-starved Irish running footman, when he is recommended to take up a trade: "An Irishman with a trade! An Irishman scorns a trade. I will run for thee forty miles, but I scorn to have a trade!" Again, nothing could well surpass the simplicity with which he remarked, "If you had the land for nothing, you'd scarce make your money of it!" But he was altogether beaten by Johnston in *Major O'Flaherty*. There are yet old stagers among us who, in their earliest, remember Johnston in his latest, days, and who do not forget the dignity, the dash of impudence, and yet the perfectly gentlemanlike manner with which he said, on his entrance, "I hope, Madam, it is evidence enough of my being present when I have the honour of telling you so myself!"

Of finished actors of Irish characters, there only stands Power between Johnston and Mr. Boucicault. The rest take place on a lower level. One of the latter, Lee, nearly caused the condemnation of Sheridan's *Rivals*, to rescue which the author had recourse to Clinch, a native player, who considered his best part to be *Alexander the Great*, and played it.—Alexander and *Sir Lucius*. Power was a Welshman, but his brogue was almost unexceptionable, and, of course, he could lay it aside when he chose. Mr. Falconer's merit as a delineator of Irish character is warranted by one circumstance, that Mr. Boucicault selected him to be the original representation of *Danny Man*.

Of all those we have mentioned in a line of characters to which Mr. Boucicault has added fresh lustre by his representation of *Johnny Reilly*, most of them lacked something which Mr. Boucicault possesses, leaving to the latter a completeness and perfection in this particular branch of the art to which the others, as far as report enables us to judge, did not in all things so thoroughly attain. Of course, when we say this, we allude to actors of Irishmen, not to Irish actors generally, such as Quin, Barry, Macklin and others. In *Johnny Reilly* there wanted but an Irish song to complete the gratification of the audience; in all other respects the actor left nothing to desire on the part of the audience, and gave much valuable example for patient study to young and unfinished players grouped around him.

PRINCE OF WALES'S.—Mr. T. W. Robertson's new comedy, 'Our's,' is in three acts. The heroine, *Mary Netley* (Miss Marie Wilton), is a dependent ward on the family of *Sir Alexander Shendryn* (Mr. J. W. Ray), a country gentleman and colonel in the army. She suffers under the haughtiness of Lady Shendryn, but finds relief in the vivacity of her disposition. She has a friend in another ward of the baronet's, *Blanche Hays* (Miss Louisa Moore), who, being a heiress, has a poor lover with a cadetship and a long pedigree, *Angus M'Alister* (Mr. Bancroft), whose pride makes him reluctant to propose, though encouraged by the lady. He has a rival in a certain *Prince Perovsky* (Mr. Hare), on a visit to England in search of a suitable wife. *Blanche* is somewhat dazzled at the prospect of becoming a Russian princess, but ultimately declares in favour of *Angus*. *Mary*, likewise, has a lover, a wealthy brewer, *Hugh Chalcot* (Mr. Clarke), an amusing misanthrope. All this may be common enough; but novelty is imparted to the subject by placing the characters in uncommon situations. An early scene presents a match at bowls. The

ladies are driven by a shower of rain under the trees. The party is disposed in separate groups. M'Alister pairs off with *Blanche*, who shares his coat and hat, and joins him in merry song. The Shendryns, in another part, indulge in their usual matrimonial quarrels. A scene in London ensues, where Prince Perovsky is rather inconvenienced by the declaration of war with Russia, and prepares to take his departure. Angus, too, has to join his regiment. A military spirit prevails, and even Chalcot is excited to enthusiasm, and purchases a commission. The last act shows all the parties in the Crimea. They meet in a camp hut, and all have to share in the perils and labours of the time. Chalcot, wounded in the leg, is reduced to act as cook and steward. The ladies are rather amused at the primitive aspect of things. An engagement occurs, and their terror is great. Events are precipitated, and Lady Shendryn discovers that the money which she had suspected her husband has bestowed upon a mistress had been expended in behalf of her own profligate brother. The two other ladies discover that M'Alister and Chalcot are just suited to become their husbands, and so this clever comedy arrives at a happy ending. It is carefully written, and adequately acted. Mr. Clarke plays his part with remarkable unction, Mr. Ray with a proper sense of its importance, and Miss Wilton was all sprightliness and piquancy. Mr. Hare, as Prince Perovsky, was admirably characteristic. Mr. Frederick Younge made his first appearance here as *Sergeant Jones*, the father of twins, and individualized the part so satisfactorily that he gained frequent plaudits.

SADLER'S WELLS.—This theatre has commenced its regular season, under the direction of Miss Marriott, for the performance of the legitimate drama. The history of this house forms a moral lesson touching the course of theatrical development. Commencing as a mere music-house, the resort of "inns-of-court beaus, mingled with an innumerable flock of the blue-frock order," or as Macklin calls them "a mixture of a very odd company," it gradually grew into importance. "The admission was but threepence, except to a few places scuttled off at the sides of the stage at sixpence, which were reserved for people of fashion, who occasionally came to see the fun." Such was the humble beginning of a little house which was destined, when the patents of the two great houses fell through, to afford an opportunity to Mr. Phelps to produce with success the Shakespearean drama, which had failed elsewhere. In the middle of the eighteenth century Sadler's Wells became famous for its pantomime diversissements, and was so successful that greater theatres thought it proper to adopt its class of entertainments. In and previously to the year 1743, Drury Lane, we are told by a recent writer, "had fallen to a level with Sadler's Wells—tumblers and rope-dancers being put forward as the chief attractions." Both the theatres, the little and the great one, have now risen far above this level, and alike aim at the nobler objects of dramatic enterprise. In 1765, the old wooden building disappeared, and an enlarged theatre was erected, in its present form, and at the expense of 4,225*l.*; thirteen years later its interior was taken down and materially improved, the ceiling being considerably raised, and the ascent both of the boxes and pit increased. The improvements in the structure were symbolic of improvements in the management, and we read of the Duke and Duchess of Gloucester visiting the theatre in 1778, and Charles Dibdin the elder composing for it "several extremely clever and very favourite pieces." Four years later the name of Grimaldi appears in connexion with it, and from that time the establishment shared in the fate of the minor theatres, vainly aiming at continued prosperity, until, in 1844, the legislature freed the drama from its injurious restrictions, and enabled this humble house to shelter Melpomene and Thalia, when Covent Garden and Drury Lane no longer afforded them the residences to which they were entitled, but neither of which had ever been to them a comfortable home. From that time to the present, under Mrs. Warner, Mr. Phelps and Miss

Marriott, it has continued, during the winter season, to perform the Elizabethan and poetic drama to remunerative audiences.

The present opening was somewhat remarkable. 'Othello' was produced, and the part of *Iago* was sustained by the only son of Mrs. Warner, above named; *Othello*, himself, by Mr. Slater, a young actor from Liverpool; and *Desdemona*, by Miss Leigh, a very young actress, who had matriculated the previous season in a variety of parts as a novice. That three new beginners, each so youthful, should go through three such parts, not only in safety, but in a manner to please the audience and satisfy those good men, the critics, generally, deserves to be chronicled as an extraordinary occurrence. One *debut* is, in general, hazardous enough; but that three such trials should be smoothly made and cordially welcomed would scarcely have been expected in the ordinary course of business. Perhaps it may be the mission of the conductors of this house in future to introduce young talent to the stage, and win for it the earliest recognitions of the public. If so, a highly honourable career lies before them. On Saturday, Miss Marriott herself appeared as *Julia*, in Sheridan Knowles's play of 'The Hunchback,' and on Monday, in Dr. Marston's play of 'Anne Blake,' as the heroine. The houses on both occasions overflowed, and on the first an Address, written by Mr. G. L. Banks, was spoken by Miss Edith Heraud, declarative of the legitimate aspirations of the manageress, and of her future plans.

MUSICAL AND DRAMATIC GOSSIP.

THE Worcester Festival, last week, is described by our contemporaries as having been successful beyond every previous music-meeting of the Three Choirs; this in spite of the injudicious denunciation of an influential neighbouring nobleman, who fondly imagined that his fiat and veto had power to bind and to loose, — in spite of the unexplained absence of Dr. Weeley, who seems chronically afflicted with a restless and disobliging spirit unworthy of such a good musician as he is known to be,—in spite of "wind and weather," which partially disabled Mr. Sims Reeves from singing all that was set down for him. There was small novelty (as has been said) to call for report. One item, however, in the concert programmes merits a word—Maurer's Concertante for four violins, played by M. Sainton, Messrs. Blagrove, Carrodus and Holmes—the last three English artists. Miss Done, the daughter of the cathedral organist, was the solo piano-player. It may not be amiss to repeat a recommendation frequently made. With more enterprise and less self-importance such as would preclude local bickering and jealousy, for the sake of promoting a good cause, these meetings of the Three Choirs might serve provincial music efficiently, besides being an attraction to distant amateurs. Why should London lovers of music go to Birmingham or Manchester?—why travel so far afield as Aix-la-Chapelle, or Cologne, or Düsseldorf, and not as willingly try Worcester, Hereford or Gloucester?—all towns situated in districts in which picturesque objects lie on every side.

The Chester Eisteddfod is understood to have been, in its results, financially satisfactory.

The *Orchestra* conceives it possible that, instead of the winter operas in English at Her Majesty's Theatre which have been talked of, Signor Arditi's Promenade Concerts will possibly be resumed there. Should this tale prove true, we hope that the clever conductor will take warning by his own impossible programme of last year's entertainments.—One report drives out another. The latest respecting Covent Garden Theatre is, that a new opera, by Mr. A. Mellon, with Madame Linas Martorelli Garcia for heroine, will be played there at Christmas, before the Fantomine.

Another English tenor, Mr. Morgan, who during the last few years has been studying and singing in Italy, is announced as about to return to his native country.

Mr. Sims Reeves was unable to sing, as announced, at the Ballad Concert, on Thursday at the Crystal Palace. The performances of bur-

lesques, &c. on Saturdays are only, we trust, temporary expedients *ad captandum*, to fill up the interim before the Saturday Concerts commence.

A Pianoforte Score of Meyerbeer's 'Struensee' music is about to be published.

It is alike evident that our Music Halls are year by year taking an increasingly important position among our entertainments, and that the works represented in them are rising, not falling, in the scale of excellence, whether as regards selection or execution. The new one at Margate appears so entirely to have answered the purpose of its spirited proprietors as to encourage them to project similar establishments at Southampton, Great Yarmouth and Brighton.

The greatest event of this year—the absorption by Prussia of sundry North German kingdoms—will have an influence on every domain of Art, and not the least on that of theatrical music. The opera-houses of Hanover and Cassel were largely sustained by liberal aid from the government; that of Wiesbaden by the policy of those desirous of alluring guests who might be prevailed on to gamble. This state of things, it is obvious, must undergo great modification. We read that the Hanover Theatre is to be placed on the footing of the Court Theatres in the Prussian capital, and under the same superintendence as theirs. Meanwhile, it is said that Herr Niemann, the splendid and self-complacent tenor, of whom some account was here given a twelvemonth ago, has been transferred to the Berlin Opera-house. The "bath" season has everywhere been unprosperous, as compared with what it was in former years. Mlle. Adelina Patti has been "starring it" at Homburg. At Baden-Baden the usual German operatic performances of the Carlsruhe company have been discontinued. A Mass produced there, by Herr Schwab, of Strasburg, on the Grand-Duke's birthday, is well spoken of.

Madame Rudersdorff is retained to sing in three of the *Gewandhaus* Concerts at Leipzig.

Herr Abert's 'Astorga' has been performed among the first operas selected for the autumn season at Stuttgart.—Certain journals assure us that Herr Wagner intends to give another example of that modesty which is his crowning grace by setting the legend of William Tell as an opera. To be sure, Signor Rossini is a mere sensual trifler as compared with the sublimely ridiculous and ridiculously sublime composer of 'Tristan und Isolde,' and the as yet unrepresented 'Hans Sachs,' and the four Nibelungen operas!

The Italian Opera season at Paris will be opened by Mlle. Adelina Patti, in 'La Sonnambula,' to be followed by Madame Lagrua's appearance in 'Norma.' Bellini's attractions bid fair to outlast those of Signor Verdi. There is some talk of the engagement of Mlle. Lespine Colbran, a niece of the famous singer who was the first Madame Rossini.

There is to be, at last, a monument to Palestrina, for which a Roman committee is collecting subscriptions.

Magnificent promises of scenic effects, hitherto unparagoned, are made for the ballet 'La Source,' which is in preparation for the Grand Opéra at Paris.

Let it be noted, with express reference to the controversy betwixt Mr. G. Macfarren and Mr. Henry F. Chorley on the subject of finality in the methods of musical teaching, that some of the text-books of the Conservatoire of Paris—those especially devoted to vocal cultivation—have been re-edited, under the approval, if not the superintendence, of the most distinguished musicians of France. This is as it should be—a measure clearly indicating that, without licentiousness or formality, there may be settled codes of instruction on which artists of the most diametrically opposite humours conceivable can agree as preparatory,—leaving the pupil free, so soon as he becomes a master, to follow any path or form of composition his fancy can suggest and his success justify.—While on the subject of music-schools we may mention, that two of the professors most important to the Brussels Conservatoire, MM. Leonard and Servais, who sent in their resignation some time ago, have been prevailed on to withdraw it, as Master Trappois hath it, "for a consideration."

Mr. John Oxenford is preparing a melo-drama for Sadler's Wells, founded on Mrs. Banks's novel, 'God's Providence House.'

Mr. Henderson, the manager of the new Prince of Wales's Theatre at Liverpool,—the first stone of which was laid by Mlle. Tietjens,—the other day announced that the building, which will open on the 15th of next month, is to be the finest theatre in England. His programme includes a short series of Italian operas, provided for by Mr. Mapleson's company,—Shakespearean revivals on a scale of ample completeness,—a new play, founded on 'Nicholas Nickleby,' by Mr. Walter Gordon, in which Mr. Toole will personate *Newman Noggs* and *Mr. Squeers*,—and another new play, for Mr. Sothern, by Mr. Tom Taylor.

Herr Beckmann, long a favourite comic actor and singer at Berlin, is dead.

MISCELLANEA

Dante, Chaucer and Spenser.—The extracts in last week's *Athenæum*, showing Spenser's debt to Chaucer, must remind many of your readers of the obligation of the latter to Dante, not only for the idea,—the guidance by Scipio Africanus acting towards Chaucer the part performed by Virgil in conducting Dante,—but for the very words of the first quoted line,

And with that my hand in his he toke anon,
Of which I comfort caught.

—They recall forcibly the corresponding, but richer, picture in the third canto of the *Inferno*,

E poichè la mia mano nella sua pose,
Con lieto volto, ond' i mi confortai,

—richer by the "lieto volto." C. C. A.

Geikie on Kames.—Mr. Geikie ('Scenery of Scotland,' p. 308) says of *kames*, "Notwithstanding all that has been said and written about them, they are as complete a *mystery* as ever to the geologists of this country." And page 311, "He must be a *lucky* (!) observer who succeeds in harmonizing the difficulties and presenting a satisfactory explanation of these remarkable ridges." Did Newton in framing his theory of the universe depend on his *luck*? Or did Hutton, in framing his theory of the earth? Let any one discard the monstrosities of glacialism,† and follow the rain and river theory, and *kames*, instead of being a "mystery," are simplicity itself. Instead of being a *difficulty*, they are a *support* to the theory; and they are found precisely where, according to that theory, they ought to be found. They are simply the remains of patches of alluvial plains formed by rain and rivers, and in the act of being carried away by the same agents. Page 16, 'Rain and Rivers,' I have said, "Any one may make 'parallel terraces' for himself in the road-side gutter. Dam up the run of rain. A pool will form above the dam. Every rain will deposit on the bed of the pool till the flat alluvium rises to the height of the dam. Take away the dam. The rain cuts through the alluvium which it has deposited and runs between two parallel terraces, till they vanish by denudation. This is the whole secret of the terraces of Glen Roy, or of any other valley or river." I might have added, "And this is the whole secret of *kames*." For rain in destroying extensive alluviums cuts them into the ridges and knolls called *kames*. I have repeatedly stated in 'Rain and Rivers,' and in the *Athenæum*, that the cause of the patches of alluvial plain is the differing hardness of the strata of the valley. Wherever the strata are hard, the valley is narrow and the river runs in a gorge. Above every gorge rain and the river cut a wide flat valley at the level of the gorge. The flood-water checked at the gorge over-

flows the flat and deposits an alluvium. The gorge is lowered: away goes the old alluvium, and a new one at a lower level is begun. Mr. Geikie, p. 311, describes the *kames* at Carstairs as the most remarkable that he knows. They have been formed by the Clyde and its affluent the Mouse Water. The singularly hard Devonian conglomerate rocks which still form the falls of the Clyde at Lanark, and the gorge of the Mouse Water between those falls, formerly dammed the waters up as high as the *kames* are now at Carstairs, and allowed the formation of enormous patches of alluvial plains. As the gorges at Bonnington, Stonebyres and Cartland Crag have been lowered, the alluviums have been out through, and they are vanishing in the form of parallel terraces and *kames*. Remains of parallel terraces may be seen between the falls at Lanark and below the falls. Above Lanark and Carstairs the same. And the river is at the same work now, that is, it is still cutting through old and recent "hangs" of all ages and at all levels, and forming *new ones*, which it gives, as Aladdin did his lamps, in exchange for *old ones*. This may be seen from the railway at *express pace*. The common people of Carstairs ignore the word *kames*. They call the ridges hills, and the knolls knows, or, if small, knollys. Thus the farm furthest from the village which overlooks the present alluvial plain of the Mouse Water they call the Hills Farm, and the knolls nearest to Carstairs they call *Columbie Knows*, from the farm of that name. Mr. Geikie seems wantonly to introduce "mystery" and marvel where in Nature simplicity itself reigns. He turns a certain pool in a bog, the Red Loch, into "the crater of a volcano like one of those in the Eifel." The "crater," however, is placed in the trough of a long, boggy bottom. Its main inlet is the long, boggy bottom with a deep artificial drain from the direction of the Hills Farm, and its outlet is the same continuous, flat, boggy bottom with an artificial drain into the White Loch. What is there is a long, boggy bottom like a round crater. Mr. Geikie is equally "unlucky" (as he might say) in his observations on the Clyde and Tweed near Biggar. Page 148, he says, "If good care were not taken of its banks, the Clyde would ere long dig the channel for itself and flow into the Tweed." And page 288, "Some trouble is necessary to keep the former stream (the Clyde) from eating through the loose sandy deposits that line the valley and finding its way over into Tweeddale." Now, what art has done here is precisely the reverse of what Mr. Geikie says that it has done. Art has cut a drain (in most parts, perhaps, six or seven feet deep) continuously over the water-parting from the *side* of the Clyde to the *head* of the Tweed. So that what art has done would *facilitate* the junction of the streams instead of *preventing* it. Following the road from the Clyde to Biggar, the springs and drains at the first house we come to run down to the artificial drain and into the Clyde. Just before reaching the second house, the springs and drains run down to the artificial drain and into the Tweed. The water-parting is between the two houses. In very heavy rain I should think it possible that the artificial drain might hold water continually, and so, as Stodart supposes, that the fry of salmon might pass from the Tweed to the Clyde. But no water runs out of one river into the other. With regard to the future junction of the rivers, if the hard rocks at Lanark continue for some thousands or millions of years more to impede the lowering of the bed of the Clyde, the Tweed may, perhaps, tap the Clyde. But the whole affair depends on the comparative hardness of the different strata and their power of resisting the erosion of Rain and Rivers.

GEORGE GREENWOOD, Colonel.
Brookwood Park, Alresford.

TO CORRESPONDENTS.—W. E. C.—C. W. T.—C. C. C.—M. S.—T. E. Y.—received.
C. O.—We are unable to give the information required.

* * * The full price will be given at the Publishing Office for copies of the *Athenæum* for August 25 and September 1.

Errata.—P. 336, col. 1, line 69, for "Azuano" read *Ag-nano*;—p. 343, col. 3, line 40, for "101. per cent., or the produce," read 10 per cent. on the produce;—p. 347, col. 3, line 19, for "folly" read *jolly*.

MESSRS. MOXON'S AUTUMNAL LIST.

the CHRISTMAS GIFT-BOOK, 1866.—On December 1st, 1866, will be published, in Imperial 4to. with paper and type made expressly for the work, and in elegant cloth, price 12s.

CLAUDE LAMÉ. By Alfred Tennyson; illustrated by GUSTAVE DORÉ, with Nine exquisite full-page Drawings, engraved on steel in the first style of art by Baker, Holi, J. & Co.

The designs of this artist have never been engraved on steel, and consequently have never been interpreted in their fullest sense. DORÉ has made these drawings with special reference to this mode of engraving, and it was at his special request that the publishers determined to incur the great outlay necessary to produce his book. It is also the first time that M. DORÉ has illustrated the works of a contemporary author, and, to use his own words, "desires the work to be a monument to Mr. Tennyson and to his own power. Mon frère a fait cette fois-ci le grand succès qui cra descendre son nom à la postérité."—*Examiner* DORÉ.

Just out, price 12s. in demy 8vo. cloth, profusely illustrated, **CHARLES LAMB: a Memoir.** By BARRY CORNWALL.

"Finely does Mr. Procter draw the moral of the tale he has written: would we could anticipate other such Lives of the Poets and Men of Letters of our century."—*Edinburgh*, July, 1866.

"Full of grace and sweet thought, and grave, glad memories of deep earnestness."—*Athenæum*.

"Very full, very clear, and very free from all the defects of modern biographies."—*Spectator*.

"Strength of simplicity, with fine perception of the truths of life, and delicate expression, give a rare charm to this memoir of Charles Lamb."—*Examiner*.

"It is tenderly and delicately written, enriched with excellent criticism."—*London Review*.

"As a memoir, as well as in its typographical excellencies, the book is perfect."—*Reader*.

In 1 vol. fcap. price 6s. cloth, **LANCELOT and other POEMS.** By W. LUFFORD, M.A. Pembroke College, Oxford.

"We must give Mr. Lufford our warmest praise for the freedom, clearness, and music of every sonnet he has written."—*Public Opinion*, Dec. 2, 1865.

In 1 thick vol. fcap. 8vo. price 10s. 6d. **POEMS by the late EDMUND J. ARMSTRONG,** of Trinity College, Dublin.

"This posthumous book should be prized as a memorial of the earnest labours of a singularly able and sincere writer."—*Public Opinion*, Nov. 25, 1865.

In fcap. 8vo. price 7s. cloth, **BELIGIO ANIMÆ and other POEMS.** By ALFRED EATE RICHARDS.

In fcap. 8vo. cloth, price 5s. **LYRICAL FANCIES.** By S. H. Bradbury.

"Mr. Bradbury's verses are those of a true poet."—*Observer*, Dec. 17, 1865.

FOR THE ANTIQUARY, SCHOOLMASTER, AND THE CLASSICAL STUDENT. A NEW ENGLISH VERSION OF PINDAR.

In fcap. 4to. beautifully printed, price 12s. **TRANSLATIONS from PINDAR.** By HUGH SEYMOUR TREMENEZIERE, M.A., late Fellow of New College, Oxford.

"Translations like the one before us enliven and extend what is likely to live through all time. The language employed by Mr. Tremenezier is of great purity and sweetness."—*Public Opinion*.

In fcap. 8vo. price 5s. **COWL and OAP and other POEMS.** By CATHERINE H. MACREADY.

"This lady writes with clearness, taste, and earnestness, and frequently with the eloquence which characterizes ladies."—*Athenæum*, Dec. 16, 1865.

Shortly, in fcap. 4to. bevelled cloth, price One Guinea, **TUPPER'S PROVERBIAL PHILOSOPHY,** which, in addition to Drawings by Gustave Doré, C. W. Cope, R.A., Fred. R. Pickersdill, A.R.A., John Tenniel, Edward H. Corbould, George Hodgson, Edward Duncan, Birkenhead, John Gilbert, James Goodwin, William Harvey, J. C. Horsley, William L. Leitch, Joseph Severn, Walter Severn, and the Ornamental Initials and Vignettes by Henry Noel Humphreys, will contain some entirely new and important Illustrations.

In fcap. 8vo. price 5s. cloth, **EPHEMERA.** By Helen and Gabrielle CAREL, ILLUSTRATED BY HENRIE CARL.

"Marked by a peculiarly chastened tone of taste and feeling."—*Athenæum*, July 29, 1865.

"Both ladies write with grace, feeling, and address; not a few of the verses have the true poetical ring."—*London Review*, July 29, 1865.

"Awaken respect for their quality, learning, and engaging melody."—*Public Opinion*, July 30, 1865.

"Under the above names de plume two most talented ladies have published a series of poems which will be read with pleasure by all who can appreciate imagery flowing out of a fine and original fancy."—*Lord W. Lennox in the Sporting Magazine*, July 29, 1865.

"One of the prettiest of Christmas books."

SAMPSON LOW & CO'S LIST OF NEW BOOKS.

A HISTORY of the ATLANTIC TELEGRAPH. By HENRY M. FIELD, D.D. Post 8vo. 7s. 6d.

"Full of details that are very interesting. It supplies some of the best material likely to be given to the future chronicler. It is liberal in its tone of thought, right minded, and kindly."
—*Examiner*.

THE JOURNAL of a WAITING GENTLEMAN. Edited by BEATRICE A. JOURDAN. Post 8vo. price 3s.

"We have never read a more tender tale of woman's love, told by a woman, than the autobiographical record before us. The characters are all true to the life, and all well drawn, without exaggeration or affectation."
—*London Review*.

THE THIRD EDITION of TOILERS of the SEA. By VICTOR HUGO. 3 vols. post 8vo. 3s.

"A fisherman encounters all the fury, and caprice, and treachery of outer nature in order to win a woman whom, on his return, he finds to have unconsciously, but irrevocably, lost her heart to another. But this plainest of stories is worked into genuine tragedy by an exercise of poetic power which, at least in some portions of its display, has very rarely been surpassed in literature."
—*Saturday Review*.

THE PRISON LIFE of JEFFERSON DAVIS; embracing Details and Incidents in his Captivity, together with Conversations on Topics of great Public Interest. By JOHN J. CRANFORD, M.D., Physician to the Prisoner during his Confinement. 1 vol. post 8vo. price 3s.

"A book of great interest on many grounds. Taken altogether, this book is very valuable; and the impression it conveys, not only of the fallen Southern chief, but of the Northern officers to whose keeping he was consigned, is in a high degree favourable."
—*Pall Mall Gazette*.

A HISTORY of SAVINGS' BANKS; with an Account of the Origin and Progress of the Government Financial Measures for Post-office Banks, Annuities, and Life Insurance. By WILLIAM LEWINS, Author of 'Her Majesty's Mails.' 8vo. 16s.

"All large employers of labour who take any interest in the social elevation of their work-people will find it particularly interesting. Such books should be diligently read and thoroughly digested."
—*Daily News*.

THE VICARIOUS SACRIFICE: Grounded on Principles of Universal Obligation. By HORACE BUSHNELL, D.D., Author of 'Nature and the Supernatural,' &c. Crown 8vo. 7s. 6d.

"An important contribution to theological literature, whether we regard the amount of thought which it contains, the systematic nature of the treatise, or the practical effect of its teaching. No one can rise from the study of this book without having his mind enlarged by its profound speculation, his devotion stirred by its piety, and his faith established on a broader basis of thought and knowledge."
—*Guardian*.

FAMILIAR WORDS: an Index Ver- borum, or Quotation Handbook. Affording an immediate Reference to the Etymology, and the precise effect of its teaching. No one can rise from the study of this book without having his mind enlarged by its profound speculation, his devotion stirred by its piety, and his faith established on a broader basis of thought and knowledge." —*Guardian*.

"Not only the most extensive dictionary of quotations which we have yet met with, but it has, moreover, an additional merit, that in all cases an exact reference is given to every chapter, act, scene, book, and number of the lines."
—*Notes and Queries*.

LETTERS on ENGLAND. By Louis BLANC. Translated under the Author's Revision. 3 vols. post 8vo. price 16s.

"Well worth reading; it is full of suggestive thought and pointed writing."
—*Guardian*.

THE ELEMENTS of INTER- NATIONAL LAW. By HENRY WHEATON, LL.D. An entirely new and Revised Edition, by R. H. DANA, Esq. Royal 8vo. cloth, 30s.

AFTER the WAR. A Southern Tour, extending from May, 1865, to May, 1866. By WHITLAW REID, Librarian to the House of Representatives. Post 8vo. Illustrated, price 10s. 6d.

THIRTY YEARS of ARMY LIFE on the BORDER. Comprising Descriptions of the Indian Nomads of the Plains; Explorations of New Territory; A Trip across the Rocky Mountains in the Winter; Descriptions of the Habits of different Animals found in the West, and the Methods of Hunting them; with Incidents in the Life of Different Frontier Men, &c. By Colonel R. B. MARCY, U.S.A., Author of 'The Prairie Traveller.' With numerous Illustrations. 8vo. price 12s.

THE LIFE and CORRESPONDENCE of BENJAMIN HILLMAN, M.D. LL.D. late Professor of Chemistry, Mineralogy, and Geology in Yale College, U.S.A. Chiefly from his own MSS. and Diary. By GEORGE FISHER. With Portrait. 3 vols. post 8vo. price 24s.

THE LIFE of the late Dr. MOUN- TAIN, Bishop of Quebec. 8vo. cloth, price 10s. 6d.

A THOUSAND MILES in the ROB ROY CANOE on the HANOVER, MONTELL, RHINE, REUSS, AAR, MAINE, TIEMEN, MATHE, WEINE, MEUNE, and the LAKE of CONSTANCE and LUERNE, &c. By J. MACGREGOR, Trin. Coll. Cambridge, Barrister- at-Law. With Illustrations. Small post 8vo. with a Map, price 3s.

DESCRIPTION of the NEW ROB ROY CANOE, built for a VOYAGE through NORWAY, SWEDEN, and the BALTIK. With Illustrations. Dedicated to the Canoe Club, by the Captain. Price 1s.

London: SAMPSON LOW, SON & MAISTON,
Millon House, Strand, W.C.

"Valuable for reference to all who wish to possess trustworthy
copies of arboreal forms."—*Athenæum*.
"Specimens of magnificent growth."—*Art-Journal*.
In use at several Schools of Art throughout the kingdom.

Subscribers' Names received by T. Hutton, 9, Ship-street, Brighton.

THE COMPLETION OF THE CAMBRIDGE SHAKES- PEARE WORKS OF WILLIAM SHAKESPEARE.

EDITED BY
WILLIAM GEORGE CLARK, M.A.,
Fellow and Tutor of Trinity College, and Public Orator in
the University of Cambridge;
And WILLIAM ALDIS WRIGHT, M.A.,
Librarian of Trinity College, Cambridge.
VOL. IX., completing the Work.

Contents: Antony and Cleopatra—Cymbeline—Pericles—and
the Poems. 8vo. cloth, 10s. 6d. [In a few days.]

THE CAMBRIDGE SHAKESPEARE. WORKS OF WILLIAM SHAKESPEARE. EDITED BY WM. G. CLARK, M.A., and WILLIAM ALDIS WRIGHT, M.A.

9 vols. 8vo. cloth, 4s. 14s. 6d. [Just ready.]

"We regard the appearance of the Cambridge Shakespeare as an epoch in editing the works of the foremost man in the dramatic world. Besides many positive virtues in this edition, the hitherto prevailing errors are avoided. The gross blunders and unauthorized fancies of generations of editors are banished from the text; the more tolerable or the less notorious conjectures are removed to the notes; space is allowed and justice is rendered to all former labourers in the editorial field. He who is indifferent to verbal criticism may read in peace an orthodox text; and he who is curious in such matters will find various readings supplied to him in full measure."
—*Saturday Review*.
Macmillan & Co. London.

A Second Edition of ST. PAUL'S EPISTLE to the GALATIANS. A Revised Text, with Introduction, Notes, and Dissertations. By J. R. LIGHTFOOT, D.D. Second Edition, revised, with Additions. 8vo. cloth, 12s. [This day.]

Also, by the same Author,
ST. PAUL'S EPISTLE to the PHILIPPIANS,
with Introduction, Notes, and Dissertations. [In the Press.]

A Second Edition, revised, of A HISTORY of the CANON of the NEW TESTAMENT during the First Four Centuries. By BROOKE FOSS WESTCOTT, B.D. Crown 8vo. 10s. 6d. [This day.] Macmillan & Co. London.

ENGINEERING SCHOOL CLASS-BOOKS.

I.
In crown 8vo. 4s. 6d. bound, with 200 newly-engraved Diagrams.

EUCLID'S ELEMENTS of PLANE GEOMETRY, with EXPLANATORY APPENDIX, and SUPPLEMENTARY PROPOSITIONS for Exercise. Adapted for the Use of Schools, or for Self-instruction.

By W. D. COOLEY, A.B.,
Author of the 'History of Maritime and Inland Discovery,'
'The Negroland of the Arabs,' &c.

"This is the best edition of the Elements which has yet appeared. By the occasional use of algebraic symbols for words, the author has both shortened and simplified the reasoning."
—*Athenæum*.

"The introductory essay to this edition of Euclid, 'On the Study of Mathematics,' contains some sensible and judicious remarks, especially as the Editor intends his book for the use of schools. On the whole, we consider the Editor to have done all that could be done to make the study of Euclid easy to beginners."
—*Cambridge Chronicle*.

"Mr. Cooley has produced an edition of Euclid's Elements, which for brevity, clearness and discerning attention to the wants of learners, cannot be easily surpassed."
—*Dublin University Magazine*.

Uniform with the 'Elements,' price 3s. 6d.

COOLEY'S GEOMETRICAL PROPO- SITIONS DEMONSTRATED; or, a Supplement to Euclid: being a KEY to the Exercises appended to the 'Elements,' for the use of Teachers and private Students. Upwards of 120 Propositions, deduced from the First Six Books of Euclid, are illustrated in it by new Diagrams.

"The propositions are demonstrated, in most instances, in the plainest and neatest manner; so that the work may justly claim, what it professes, to be a HELP TO TEACHERS."
—*Scholastic Journal*.

"The propositions given as exercises in the valuable Appendix are demonstrated in the Key, which must, therefore, become a very important volume in the eyes of the ambitious and inquiring class of students."
—*United Service Gazette*.

III. New Edition—Fcap. 8vo. price 1s. 6d.

COOLEY'S FIGURES OF EUCLID; being the
Diagrams illustrating the 'Elements,' with the Enunciations
printed separately for Use in the Class-room.
Whittaker & Co. 4, Ave Maria-lane, London.

Now ready, No. I. price 6d.

SALOM'S NEW OPERA AND FIELD GLASS,
AND THE RECONNOITERER GLASS, price 10s. 10d., sent free. This "Tourist's Favourite" through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape 40 miles, Jupiter's moons, &c. The MARK of CARMARTHEN: "The Reconnoiterer is very good."—EARL OF BRIDALBANK: "I find it all you say, and wonderfully powerful for so very small a glass."—EARL OF CAITHNESS: "It is a beautiful glass."—Rev. Lord SCARLE: "I approve of it."—Lord GIFFORD: "Most useful."—Lord GAVRON: "Remarkably good."—Sir Henry CAYLEY: "It gives me complete satisfaction, so much power for its size with so much clearness."—The Field: "We have carefully tried it at an 80-yard rifle range against all the glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—A 100 and Querer: "What intrepid tourist will now start without such an indispensable companion to a pleasure trip?"
The celebrated "HYTHE" GLASS shows bullet-marks at 1,000 yards, and men at 30 miles, price 31s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom's Reconnoiterer" and "Hythe," are only to be had direct from SALOM & CO., 20, Prince-street, EDINBURGH, and 17, Regent-street, LONDON.

The New Story.
Just published, post 8vo.

AUNT MARGARET'S TROUBLE. By a NEW WRITER.

"After wading through the ordinary novels of the season, after learning to what depths of dullness and folly the human intellect can descend, and wondering at the hideous pictures of vice or inanity which men and women can paint as representations of human life, it is positive mental refreshment to come across such a book as 'Aunt Margaret's Trouble,' which for pathos and idyllic tenderness may compete with even the best novel of the day. It has nothing of the grandeur of high art about it; it has nothing of heroic tragedy nor of stately romance, still less of sensationalism; it is absolutely free from all deadly crimes, from all monstrous vices, from all maddening mysteries; being just a quiet story of selfishness on the one hand, and of love betrayed on the other, with the retribution sure to follow upon wrong as the moral justice done at the end. Yet it is a charming book, and worth half a hundred fictions of the more ambitious and elaborate kind.—In the first work of a new and young writer we have to consider, not only the ability it displays or more remotely indicates, but also the cast of mind shown in the work. Thus, if a new book is all about illicit love and the slangy talk of fast men..... we know at once what manner of author we have to deal with. But if the book be sweet and modest, as this is, we know then that, whatever may be the strength or weakness of the future, we shall never be revolted by licentiousness, or shocked by coarseness..... we shall at least have pure work and decent, and sorrow gently touched, and sinfulness dealt with as sinfulness should be dealt with in life—tenderly and yet abhorrently."—*Saturday Review*, Sept. 1, 1866.

New Novel by the Author of 'Clara Vaughan.'

3 vols. post 8vo. at all Libraries.

CRADOCK NOWELL: a Tale of the New Forest. By R. D. BLACKMORE.

"It contains a number of pictures taken from nature which are admirable. Mr. Blackmore has carefully studied the scenery of the forest and the sea-shore, and he has given us some descriptions of both, which are really exquisite. His account of the storm, in the second volume, is one of the truest and most vivid we ever read. The sea, the sky, the clouds, the waves, are brought before our eyes with wonderful power."—*London Review*, Sept. 15, 1866.

New Volume of Dyce's Shakespeare.

The WORKS of SHAKESPEARE. Edited by the Rev. ALEXANDER DYCE. Vol. VIII. 10s.

[This day.

NOTICE.—In consequence of the length to which the Glossary has run, it has been judged expedient to issue it as a separate Volume; so that the Edition will now consist of Nine Volumes, instead of Eight, as originally proposed.

Post 8vo. 8s.

SKETCHES of RUSSIAN LIFE before and during the EMANCIPATION of the SERFS. Edited by HENRY MORLEY.

"The author of this book has spent fifteen of the mature years of his life in Russia, under conditions of business that have caused him to travel from end to end of the empire in various directions, and to make his home now in a remote provincial village, now in a government country town, now in the capital. His duties and his inclination have brought him into close contact with people of every class, and he is a shrewd man with immediate perception of the pith of any incident or conversation. He does not write a history or a dissertation, but he represents the most characteristic features of Russian life in a series of sketches which tell notable things that he has met with in his experience. They are all, as a doctor would say, chosen with an eye to diagnosis; they contribute always a definition of the state of Russia, and that with especial reference to a particular crisis in her social history..... Any page of the book might have served as well as those we have quoted to show the author's clear and animated manner of description, and the strength that lies in plain speaking of what it is worth while to tell, undamaged by the too familiar arts of empty men who struggle to be 'graphic.'"—*Examiner*.

TRENHAM REEKS, Registrar.

ROYAL SCHOOL OF NAVAL ARCHITECTURE AND MARINE ENGINEERING, SOUTH KENSINGTON.—This School will RE-OPEN on the 1st of November next.

Application for information as to Admission, &c., should be made to the Secretary, Science and Art Department, South Kensington Museum, W.

By order of
The Lords of the Committee of Council.

ST. MARY'S HOSPITAL MEDICAL SCHOOL.—The SESSION will COMMENCE on MONDAY, October 1, at 8 o'clock p.m., with an Introductory Address by Mr. Haynes Walton.

At this Hospital the Medical Appointments, including five House-Surgeons, the annual value of which exceeds as many Scholarships of 500. each, and a resident Registrarship at 1000. per annum, are open to the Pupils without fee. It has Obstetric and Ophthalmic Departments, and a Children's Ward (in the new wing). The Clinical and Pathological Instruction is carefully organized.

For Prospectus, Entry, and full Information as to Prizes, &c., apply to any of the Medical Officers and Lecturers, or to ERNEST HART, Dean of the School.

MEDICAL EDUCATION.—The ADDRESSES ON MEDICAL EDUCATION delivered at ST. MARY'S HOSPITAL MEDICAL SCHOOL, Paddington, by the ARCHBISHOP OF YORK (1864), Professor OWEN (1865), and Professor HUXLEY (1866), MAY BE OBTAINED, together with the Prospectus for the ensuing Winter Session, on application to ERNEST HART, Dean of the School.

BLYTHSWOOD HOUSE, BELSIZE PARK, LONDON, N.W.

MISS BLYTH receives a limited number of Young Ladies, the daughters of Gentlemen, as members of her family, whose studies, pursued under eminent masters, are carefully superintended by Miss Blyth, assisted by talented English and Foreign Governesses. Great attention being paid to Foreign Languages, the advantages of a Continental Education are combined with the moral training and domestic comfort of an English School.

Prospectuses and references forwarded on application.

THE SECOND ANNUAL EXHIBITION of WATER-COLOUR DRAWINGS will be OPENED to the Public on MONDAY, November 8th. All Works intended for Exhibition should be sent in not later than 30th October.—T. M'Lean's New Gallery, No. 7, Haymarket, next the Theatre.

R. CLOTHIER, Hon. Sec.

THE PRESS.—FOR DISPOSAL, under very favourable circumstances, the Whole or Half SHARE of a well-established Monthly Class JOURNAL of a Commercial and Literary Character. The most satisfactory reasons can be given for the proposed change, and to any one connected with the book-publishing business, who has a little time at his command, the opening will be found invaluable.—Address, with real name, GAMMA, Phillips's Library, Store-street, Bedford-square.

THE PRESS.—The Proprietors of a leading Provincial Journal, of Liberal politics, are desirous of meeting with a GENTLEMAN, resident in London, to furnish them with an Article weekly, on some current political or social topic. Must be a writer of ability and experience in the newspaper world.—Address, stating terms, nature of present engagements, &c., A. G. B. Mr. White's General Advertising Office, 33, Fleet-street, London.

THE PRESS.—WANTED, by a Young Man, aged 29, fully qualified, a SITUATION as PUBLISHER, Assistant-Publisher, or to fill any appointment of trust. First-class references, and security, if desired.—BETA, Messrs. Adams & Francis, 59, Fleet-street, E.C.

THE PRESS.—WANTED, to PURCHASE, a WEEKLY PAPER, connected with a good Agricultural district. An old-established Liberal organ preferred. None but bona fide applications need be made.—Address WEEKLY, care J. S. CUALLES, Esq., 36, New Bridge-street, Blackfriars.

PRESS.—An Experienced Verbatim REPORTER is open for a RE-ENGAGEMENT on a good Daily.—Address X. X., Adams & Francis, 59, Fleet-street.

TO EDITORS.—A GENTLEMAN is required to EDIT a Weekly Newspaper, a knowledge of French and of the Continent indispensable.—Apply (by letter only) to H. L., care of Vickers & Harrington, 3, Cowper's-court, Cornhill, London.

JOURNALISM.—WANTED, by the Proprietors of a long-established and successful Weekly Paper, ONE or MORE PARTNERS with Capital sufficient to extend it into a Daily. Parties applying must give satisfactory references.—Address by letter, "MILNARD," care of Messrs. Kennedy & Co., Brown-street, Manchester.

WANTED, a JUNIOR ASSISTANT.—Apply to Mr. COANISH, Bookseller, Manchester.

AN EXPERIENCED ACCOUNTANT, who has had the Management of a Daily Paper, will be in WANT of a SITUATION at Christmas.—Letters addressed Mr. KAY, care of J. S. CUALLES, Esq., 36, New Bridge-street, Blackfriars, will receive immediate attention.

LITERARY EMPLOYMENT WANTED.—A London Curate wishes for the above.—Lectures given on Popular Subjects.—Articles written for Newspapers or Periodicals.—Address X. X., 49, Castle-street, Leicester-square, W.C.

TO PUBLISHERS, &c.—Advertiser wishes to PURCHASE a small PUBLISHING BUSINESS, or a Share of one, or the Copyright of a Serial having a paying Circulation: to have a Christian tendency, and to be in London indispensable.—FIDUS, 36, Campbell-terrace, TOLLINGTON Park, N.

WANTED, a JUNIOR ASSISTANT, of good address, for the Bookselling and Stationery Business.—Address Mr. E. SLATER, Bookseller, Manchester.

DRAUGHTSMAN FOR STAINED GLASS.—WANTED, Two or Three ASSISTANTS of first-rate abilities in Figure Drawing. It is indispensable that they be fully conversant with ancient styles, and the technical demands of art as applied to Glass Painting. None but those so qualified need apply. Liberal Salary.—Communications in the first instance by letter, stating experience, &c., to CLAYTON & BELL, 311, Regent-street, W.

TO MUSEUMS.—FOR SALE, at less than their Cost, a number of well-finished GLASS CASES, with polished Oak Frames, made for a Museum.—Apply to Mr. DAWOS, Weymouth.

AN ENGAGEMENT as GOVERNESS is required for a German, age 38, a Protestant: competent to teach German, French, Music, and the usual Branches of Education; has satisfactory references; and a Lady in whose family she resided will answer any inquiries addressed to F. E., Clifton, Bedale, Yorkshire.

TO PRINCIPALS OF FIRST-CLASS SCHOOLS.—A Lady, of Middle Age, desires a RE-ENGAGEMENT as MATRON and HOUSEKEEPER in a School of Education for Young Gentlemen. She has had many years' experience in similar situations, and possesses unexceptionable Testimonials and References.—Address X. X., College of Preceptors, 43, Queen-square, Bloomsbury, W.C.

MORNING PREPARATORY CLASS for the SONS of GENTLEMEN (exclusively), 11, Somerset-street, Finsbury-square.—THE MICHAELMAS TERM will commence TUESDAY, October 2.

A highly-accomplished LADY, who has been a successful Finishing Governess for many years, wishes to RECEIVE a YOUNG LADY, or TWO SISTERS, to EDUCATE. Unexceptionable Testimonials.—Address M. N., Mr. Sharland's Library, Southampton.

ROYAL COLLEGES OF PHYSICIANS AND SURGEONS OF EDINBURGH.

PRELIMINARY EXAMINATIONS IN GENERAL EDUCATION.

NOTICE IS HEREBY GIVEN that the EXAMINATIONS in General Education by the Royal Colleges of Physicians and Surgeons of Edinburgh, for the years 1866-67, will take place at the following periods, viz.: SATURDAY, October 27, 1866, SATURDAY, November 10, 1866, SATURDAY, April 27, 1867, and SATURDAY, July 17, 1867; and on each occasion the Examination will be continued on the succeeding Monday.

Intending Students of Medicine are reminded that a Certificate of having passed the above Examinations, or one of those recognized by the General Medical Council as equivalent to it, is required before their names can be enrolled in the Register of Medical Students.

Lists of the Subjects of Examination, and all other Information, can be had from the Officer of either College.

D. R. HALDANE, Secretary to the Royal College of Physicians.

JAMES SIMSON, Secretary to the Royal College of Surgeons.

LIBRARIES BOUGHT.

IMPORTANT TO SELLERS OF LIBRARIES.

Executors or Gentlemen having for sale Libraries of Books, either large or small, in Town or Country, or wishing to exchange the same for others, are respectfully reminded by the Advertisers, who have been long known as the most extensive Purchasers and Sellers of Books, every class in London, how much more advantageous it is for them to dispose of their Property by private arrangement, rather than trust it to the risks of a Sale by Auction. WILLIS & SOTHERAN are not only ready at all times to give the highest prices for Books, but they save the Seller the delays and losses frequently arising from Sales by Auction, for it is notorious that, in addition to the large expenses attending the latter mode, property, unless sold at particular seasons, is often unduly sacrificed. They also Value, Catalogue, Arrange, and Renovate Libraries, either in Town or Country.

WILLIS & SOTHERAN, Booksellers, 136, Strand, near Waterloo Bridge.

SAUNDERS, OTLEY & Co. 66, Brook-street, W.LATIN GRAMMARS
IN USE AT THE PUBLIC SCHOOLS.Now ready, Eighteenth Edition, revised, 12mo. 3s. 6d.
KING EDWARD with LATIN
GRAMMAR: Latin Grammatical Rudiments; or, an Intro-
duction to the Latin Tongue, for the Use of Schools.One peculiar characteristic of this Grammar is to be seen in the
labour that has been bestowed on the selection of examples for the
illustration of the Rules. These examples have been chosen with
a careful attention to their intrinsic value, moral, intellectual,
and historical; so that the student who learns this Grammar will
find that he has committed to memory a large stock of the best
sayings of the best Latin Authors, both in prose and verse.
It contains also a valuable Appendix, from various sources,
some of them original, on Roman History, Chronology, Lite-
rature, and Language.Also, Fifth Edition, revised, 12mo. 3s. 6d.
KING EDWARD with FIRST
LATIN BOOK: The Latin Accidence; including a Short Syntax
and Prosody, with an English Translation, for Junior Classes.
JOHN MURRAY, Albemarle-street.

FOR SCHOOLS and YOUNG PERSONS.

Now ready, with 6 Maps, 30 Illustrations, and numerous
Woodcuts, 622 pp. crown 8vo. 7s. 6d.**A SMALLER BIBLE DICTIO-**
NARY, for the Use of Schools and Young Persons; containing its
Antiquities, Biography, Geography, and Natural History. By
WM. SMITH, LL.D., Classical Examiner in the University of
London."The Larger Dictionary of the Bible" is mainly intended for
Divines and Scholars, and 'The Concise Dictionary' for Families
and Students; but a smaller and more elementary work is needed
for the use of Schools, Sunday-School Teachers, and Young Per-
sons. This work has been drawn up with this object, and contains
such an account of Biblical antiquities, biography, geography,
and natural history as a young person is likely to require in the
study of the Bible as the Smaller Classical Dictionaries
have done for the study of the Greek and Roman Classics in
schools. — *Editor's Preface.*Lately published,
Dr. WM. SMITH'S CONCISE BIBLE
DICTIONARY, for the Use of Families and Students. With
Illustrations. 1,060 pp. medium 8vo. 21s.III.
Dr. WM. SMITH'S LARGER BIBLE
DICTIONARY, for Divines and Scholars. With numerous illus-
trations. 3 vols. medium 8vo. 51. 5s.

JOHN MURRAY, Albemarle-street.

RICHARD BENTLEY, New Burlington-street.

NEW BOOKS,

AT ALL LIBRARIES AND BOOKSELLERS'.

New Story by Florence Marryat.

FOR EVER and EVER: a Novel.
 BY FLORENCE MARRYAT, Author of 'Love's Conflict' and 'Too Good for Him.' 3 vols. post 8vo.

SECOND EDITION OF UP THE COUNTRY. By the Hon. EMILY EDEN, Author of 'The Semi-Detached House' and 'The Semi-Attached Couple.' 2 vols. crown 8vo.

From the Times.—"In cabinet pictures of domestic life in India Miss Eden's book is scarcely equalled. To those who have never seen the country they will be as full of interest and amusement as to the old Indian, for of all the letters here reprinted there is not one which is not full of life and humour. They contain by far the most picturesque and vivid descriptions of life in India which have been laid before the public for many years, and are as fresh and vigorous as if they had only come by the last overland mail."

AFTER the STORM; or, Brother Jonathan and his Neighbours in 1866-67. By J. R. HILARY SKINNER, Barrister-at-Law, Author of 'The Tale of Danish Heroism.' In 2 vols. post 8vo. 2s.
 "As readable and thoroughly entertaining a book about American life and politics as any we have read for some time past. Mr. Skinner deserves emphatic praise for his sagacity in reading character, and the lightness and skill with which he tells a good story."—*Athenæum*.

THRICE HIS: a Novel. In 2 vols. post 8vo.
 "A well-written tale, giving much information about life in India."—*Reader*.

WHICH SHALL IT BE? a Novel. In 3 vols. post 8vo.
 "No one can read this book without being struck by the more than ordinary ability it displays. It is written with an ease and a ripeness of worldly wisdom that would indicate the practised hand of a mature writer. The character of Madeline throughout is of great psychological power, and the way in which she trembles on the confines of terrible faults shows a rare power of discrimination. Madame de Fontaine is also a masterly sketch."—*Saturday Review*.

THE NATURALIST IN VANCOUVER ISLAND AND BRITISH COLUMBIA. By JOHN KEAST LORD, F.Z.S., late Naturalist to the British North American Boundary Commission. 3 vols. crown 8vo. with many beautiful illustrations. 54s.

"One of the very pleasantest works on natural history that has been our fortune to meet with. The author has a free and happy pencil, and in his descriptions bird, beast, fish and insect live before us, until we seem to know them."—*Globe*.

Also, early Next Month,

THE FOURTH VOLUME OF Dr. MOMMSEN'S HISTORY OF ROME. Completing the History to the Fall of the Republic. Translated by the Author's sanction, and Additions, by the Rev. WILLIAM P. DICKSON, D.D. In crown 8vo.

RICHARD BENTLEY, New Burlington-street, W.,
 Publisher to Her Majesty.

13, Great Marlborough-street.

HURST & BLACKETT'S NEW WORKS.

Vol. II. of the LIFE OF WEDGWOOD.

From his Private Correspondence and Family Papers. By ELIZA METEYARD. Dedicated to the Right Hon. W. E. GLADSTONE. 8vo. 21s. bound. [Now ready.]
 "This volume (completing the work) is embellished with nearly 800 beautiful illustrations."

TRAVELS in FRANCE and GER-

MANY in 1865 and 1866; including a Steam Voyage down the Danube, and a Ride across the Mountains of European Turkey, from Belgrade to Montenegro. By Capt. SPENCER, Author of 'Travels in Circassia.' &c. 3 vols. 21s.

"The clearness, good temper, and sound sense with which Capt. Spencer describes every subject that comes under his notice, the picturesque variety of his descriptions, and the minuteness as well as comprehensiveness of his observations, can be appreciated only by reading his volumes."—*Daily News*.

FIELD-MARSHAL VISCOUNT COMBERMERÉ'S MEMOIRS and CORRESPONDENCE.

By the RIGHT HON. MARY, VISCONTRESS COMBERMERÉ, and Capt. W. W. KNOLLYS. 3 vols. 8vo. with Portraits, &c. 30s. bound.

The SPORTSMAN and NATURAL-

IST IN CANADA; or, Notes on the Natural History of the Game, Game-Birds, and Fish of that Country. By MAJOR W. ROSS KING, F.R.G.S., F.S.A.S. Royal 8vo. illustrated with beautiful Coloured Plates and Woodcuts, &c. bound.

COLBURN'S UNITED SERVICE

MAGAZINE and NAVAL and MILITARY JOURNAL, for OCTOBER, contains:—Naval Affairs during the last Seven Years—Modifications in War caused by Breech loaders—The French Navy—The Wounds of Rifle Bullets—British Light Drill—The Organization of a British Landwehr—Adventures of Edmund Leigh of the Line—Recollections of Sandhurst—From England to Tonquin—Burmah—Curiosities of Naval Literature—The Two Cids—Foreign Summary—Wreck Register for 1865—Canada and the Fenians—New Infantry Drill and Tactics—The Continental War and the Political State of Europe—Promotions and Appointments, &c.

THE NEW NOVELS.

RACHEL'S SECRET. By the Author of 'THE MASTER OF MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*.
 "A novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Star*.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MACDONALD, M.A., Author of 'Alec Forbes,' 'David Elphinstone,' &c. 3 vols. [Oct. 5.]

NORA'S TRIAL. 3 vols.

Ah! let not aught amiss within dispose
 A noble mind to practise on herself."—*Wordsworth*.

LORDS and LADIES. By the Author

of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.
 "Lords and Ladies' is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

THE WILD FLOWER of RAVENS-

WORTH. By the AUTHOR of 'JOHN and I,' &c. 3 vols.
 "A beautiful tale, written with deep feeling. It charms by its elegance, and moves by its pathos."—*Illustrated News*.

THE MOTHER'S FAVOURITE. By

B. RUSSELL WHITNEY. 3 vols.
 "A work of no small ability. The plot is not only well conceived, but admirably executed."—*John Bull*.

BOOKS FOR THE COUNTRY.

Each Work complete in 1 vol. price 5s. (any of which can be had separately), elegantly printed and bound, and illustrated by MILLAIS, HOLMAN HUNT, LEACH, BIRKET FOSTER, JOHN GILBERT, TENNIEL, &c.

LITERATURE

History of England from the Fall of Wolsey to the Death of Elizabeth. By James Anthony Froude, M.A.—*Reign of Elizabeth*, Vols. III. and IV. (Longmans & Co.)

IN the two volumes which Mr. Froude has added to his historical series the story of Elizabeth's reign is advanced six years. These years extend from the early part of 1567 to the middle of 1573. They were eventful years generally; very critical years for England especially. Within their limit Mary Stuart married the murderer, probably her own confederate in the murder, of her husband. The comedy, or rather the tragedy, of the marriage was soon played out. A short month or so brought separation to the guilty couple, at Carberry Hill. Mary resigned her crown; her half-brother, the Regent Murray, placed it on the brow of her infant son, and the Scottish Parliament condemned her as an accomplice in her husband's murder, and confined her in Lochleven Castle. Meanwhile, in England, Gresham was creating facilities for the extension of English commerce, by laying the foundations of the Royal Exchange; Elizabeth was paying homage to learning, by attending the public disputations at Oxford, and was trifling with the serious interest which the country, anxious for an undisputed succession and fearful of a renewal of the Wars of the Roses, took in the question of her marriage. With the pretensions of the Archduke of Austria and of the Duke of Anjou, with the suits of less likely men abroad and the hopes of aspiring men at home, Elizabeth partly amused herself, partly served her own purpose.

Therewith she had other and heavier business on hand. Shan O'Neill in rebellion, Desmond and Ormond in arms in Ireland;—there was this serious matter to deal with, and it was dealt with not to our national glory. More difficult still was the position into which both Mary Stuart and Elizabeth fell when the issue of the day at Langside sent Mary a refugee, then a prisoner and conspirator, into England, and condemned Elizabeth to crooked policy, tempered by some compassion, to cruel uncertainty of feeling, followed by politic cruelty of action, towards her sister-queen, and which made of herself a stern but suffering, though successful, woman to the hour of her death.

More than half of this present portion of the work is occupied by the story of the wickedness, the wrongs, the intrigues, and the courage of Mary. In brilliant chapters are narrated the strange story of the inquiry in England into the question of her guilt as a murderess, and of the reasons for withholding a sentence and condemnation, on the justice of which all men, save those who hoped to see in her the restorer of the Romish religion and the destroyer of heresy and heretics in England, were agreed. With prospective tragedies, the successive acts of which were to reveal the triumph of Mary, the vengeance wrong from her old adversaries in Scotland, and her accession to the English throne, while its late occupant lay waiting for worse consummation in the Tower, there was her comedy of her variously projected marriages. With her passion for her former husband-*assassin*, Bothwell, unsatiated,—while such marriage as hers was to her bloody-handed bird husband not set aside,—Mary Stuart was ready to wed again with any man by whose means she might be redeemed from captivity and restored to opportunity, for which she thirsted, of full and sanguinary revenge. Nor-

folk, young Carey, Lord Arbroath, Don John, any one was acceptable, not for her love, but the uses she might make of him. While affecting deep regard for the first, a union with whom seemed not unpopular with the English, who looked on her as the undisputed heir to the English crown, she ridiculed him, and confessed her hatred of the religion he avowed, to the King of Spain, for whose kinsman, Don John, and the faith he and Spain might aid her in establishing in England, she was ready to obey any behests from Spain or Rome that would clear the path to her anticipated glory and avenging retribution.

When the end seemed long a-coming, and men knew less what was to be made of the wavering and capacious Elizabeth than what might be made by the delivery of Mary from prison, broke out the two abortive attempts to bring affairs to a crisis by the rising in the North, headed by the Earls of Northumberland and Westmoreland, and the less dangerous, but not less maliciously meant one, at the head of which was crook-backed Leonard Dacres. This Queen of Scots was a source of calamity to all connected with, and indeed to many who were connected against her. Because of her the north of England was half devastated, Scotland in despair, Elizabeth's life never safe, and yet the cause of it all was a woman of the most fascinating manners, who had been a consenting, if not an active, party to her husband's murder, who was also heir to the English throne, anxious to hurl from it her more fortunate kinswoman, and to make of a united England and Scotland a sort of vicerealty, the real master of which should be at Rome. The papal excommunication of Elizabeth made of her murder an act of merit; but though the English Queen's life was often aimed at, the agents to attempt the execution only lost their own. The Regent Murray, less fortunate, was murdered by the villain to whom he had given that villain's life when it had been justly forfeited; the Regent Lennox, too, was assassinated; the Regent Mar died; and Morton succeeded to the unenviable eminency,—all within the limits of the period embraced in these volumes. It is a period of the fiercest storms, the intensity of which is only matched by the mendacity of those who were tossed by the tempest or who sought to direct it. Cecil stands supreme in sagacity, and not lower, at least, than any of his fellows in uprightness. When Elizabeth felt that Mary, whose infamous character she had spared, and therefore had rendered her detention of the Queen of Scots a seeming injustice,—when Elizabeth and her Parliament felt that Mary was the focus of continual conspiracy, the object of which was to destroy the religion and liberties of England with the Queen herself, it was a mere matter of defence to decree that to propose with Rome was to incur the guilt of high treason. The penalty of such guilt was also justly levelled against every and all who should affirm that Elizabeth's right to wear the crown was less than the alleged right of any other individual, and against any and all who might dare to hold that Queen and Parliament together could not limit the succession.

The echoes of the massacre of St. Bartholomew, for which work Rome rendered ostentatious thanks to Heaven, only stirred England to greater watchfulness and resolution. She is still in need of that vigilance, and is girding herself daily more closely with characteristic resolution, and the storm is still roaring around her, and the horizon behind indicating heavier hurricane in the distance, when the story is broken off—to be renewed. The tempest is so fierce, the perils so seemingly inevitable, the

threatened destruction so fatal to the peace, honourable policy, the liberty, nay, the very existence of the nation as an independent kingdom, that one has scarcely leisure or inclination to note events of interest, that are of lesser import. Yet we may note that, within this storm-tossed period, the learned Roger Ascham passed to his rest; the bishops quietly addressed themselves to a new translation of the Bible; that lotteries were drawn, night and day, for months together, at the door of St. Paul's; that our merchants opened trade with Ham-burgh, Russia, and Persia; and that the Queen ennobled trade and tradesmen by dining with Sir Thomas Gresham, at the Royal Exchange. There are other incidents of the time not unworthy of record by the chroniclers, though historians may, perhaps, rather apply than repeat them. But there is one incident of the period that should not be allowed to drop out of memory. There was a member of the House of Commons, named Strickland, who, falling under the displeasure of the Privy Council, was forbidden by that all-ruling and over-ruling body, to go down to the assembly of which he was an elected member. At this prohibition the Commons took fire, before which outburst the Privy Council gave way, and affected to permit what it could not prevent, the order of the House that Mr. Strickland should take his seat. Popular liberty was here asserted, and the People's Council, formed of the people's representatives, took its position above the Privy Council, which, in the person of Mr. Strickland, had presumed to attack the people's freedom.

We have noticed that a great portion of the two volumes before us is devoted to the history of Mary Stuart. We may add, moreover, that the result of Mr. Froude's dealing with the story to the Queen of Scots will probably be some increase, not exactly of sympathy, yet of pity for the heroine. She was guilty, no doubt, if not of every crime laid to her charge, yet of much from which modern feeling revolts, but which was not construed so harshly when the standard of judgment and the moral point of view were altogether different from what they are now. The author seems less to care to officiate as a judge, with Mary Stuart at the bar of public opinion, than as an advocate of the strongest partisan spirit. When retained for the defendant, Henry the Eighth, he almost persuaded the world of the complete innocence of the client. Holding now a brief against Mary Stuart, he is not merely violent, but merciless, in the destruction of her character. Or, if Mr. Froude presents himself occasionally to us in the character of a judge, he does not wear the aspect of a calm, unimpassioned, discriminating, anxious awarder of justice, as we are accustomed to see in our courts, where Justice sits, heeds, and decrees, but rather of a French judge, who always assumes that the prisoner is guilty, is eager to prove him so, and fumes and frets, occasionally abusing the witnesses to character, till he obtains a conviction. The verdict would have been to the same purport, probably, without the judge being not only judge, but a party in the cause. It is the ferocity with which some French judges assail the guilty wretch before them that provokes French jurors to snatch him from the extremity of punishment to which the judge would condemn him, by adding to the verdict of "guilty," the saving words, "with extenuating circumstances."

In Mary Stuart's case, these saving words seem to Mr. Froude, we think, altogether inadmissible. She was guilty enough, the woman who slept on the bosom of her husband's murderer, a brief month or two after the hus-

band's slaying, was guilty of all the crime, even if she had not talked of its possibility before it was done, nor been so near at hand when it was doing. But it is not therefore necessary to catch at every straw carried on the hot air of an accuser's breath. Yet nothing comes amiss to Mr. Froude that serves to make "the murderess," "the adulteress," as he, with much iteration, proclaims her, as baser than most murderesses, more unclean than most adulteresses. If proof could possibly arise at this late hour, that Mary was guiltless of the blood of that wayward, cruel, treacherous and loathsome wretch who was, nevertheless, her husband, her character would not be established, that is, if we are to adopt Mr. Froude's estimate of it, and accept as good testimony against her all that he adopts himself and would fain force upon our acceptance. He flings a quiet sarcasm at the application of poetry and painting, by which it has been sought to give dignity or tenderness to some incidents in her life. However Mr. Froude may respect the work, he evidently refuses to be touched by the poetry of Schiller and Pierre Lebrun, or by the illustration of Mary taking leave of her child, as rendered on canvas by Mrs. E. M. Ward.

We must, in justice to the author, remark, that while hunting Mary Stuart to death and disgrace, Mr. Froude is by no means too partial to his client, Elizabeth. He is something like those barristers who profess to be considerably ashamed of the parties whose cases they have to support, but who assail all the more heartily the unlucky persons against whom the case is to be sustained. Then it is the most difficult thing in the world to return a verdict upon conflicting evidence, based upon hard swearing, unless there be one point, which the jury must keep invariably in sight, establishing guilt or innocence, irrespective of what may be deposed on either side by the hard swearers. Now, in the great case, the still vexed question of Mary Stuart's criminality or justification, there are one or two patent facts which establish her wickedness; but as regards deponents, as regards her accusers, as regards her defenders, with respect to her foes in the background, and to her friends who served or affected to serve her unobtrusively,—nay, with respect to Elizabeth and Mary themselves, there is not one who may be implicitly believed. There was among them all a total disregard for truth. The noblest men lied like horse-coupers at a fair; the holiest dignitaries looked at heaven steadily and lied the while fearlessly; and gentle women perverted the truth as audaciously and recklessly as the other two put together.

There is such an atmosphere of mendacity spread over and about everything, that Truth is almost as difficult to come at as if she were at the bottom of the well, dead and irrecoverable. Before Darnley's—nay, previous to Rizzio's—murder, the confederated assassins were deceiving or preparing deception towards each other; after the later of the catastrophes, the false dealing and assertion increased. "Inconsistencies" in Murray, Mary and Elizabeth were only the result of continual antagonism between act and deed. When Mary fell into the hands of Elizabeth, the lying increased tenfold. Both Queens wrote in contrary sense to what they intended. Elizabeth was white one day, black the next; and Mary was not a whit behind her unscrupulous sister. Norfolk, with the prospect of marrying the Queen of Scots (whose passion for Bothwell was never extinguished), and therewith sharing the throne of England with her, was, or he feigned to be, in a fever of delight. His suit was, as it were, at Mary's feet; but to Norfolk's Norfolk joked against the

band had been her accomplice in the murder of the former one, and a union with whom, he said, would bode fatal unrest to his pillow. Nevertheless, he persisted on the one hand, while on the other he solemnly denied to Elizabeth that such an idea could ever enter his imagination as marriage with a woman who was not only oppressed by a burthen of domestic guilt, but who had asserted that her right to the crown of England was better than Elizabeth's. Then, while Mary affected to be willing to wed with Norfolk, she was denouncing his pretensions; and while she feigned to be ready to tolerate, favour, nay, promote Anglicanism, she was assuring her Roman Catholic friends of her orthodoxy, and manifesting feelings which, if they could ever have been carried into action, would have deluged England with blood and sent Elizabeth to the scaffold.

It is to be observed, too, by those who are painfully searching after truth, that it was as little practised by grave men who watched Mary's interests and served her with apparent earnestness and faithfulness. The chief of these was Leslie, Bishop of Ross, who was the most lively liar, for a man of gravity, that any history can produce.

Let us now turn from comment and speculation to the text of the work itself. Here is a scene at Holyrood, on the morning of Bothwell's mock trial, in order to obtain a postponement of which Elizabeth had despatched an officer with a letter addressed to Mary Stuart:—

"His coming had been expected, and precautions had been taken to prevent him from gaining admittance. On alighting at the gate and telling the porter that he was the bearer of a despatch from the Queen of England, he was informed that the Queen of Scots was not yet awake and could not be disturbed. The door was closed in his face, and he wandered about the meadows till between nine and ten, when he again presented himself. By this time all the Palace was astir; groups of Bothwell's retainers were lounging about the lodge; it was known among them that some one was come from England 'to stay the assize,' and when the officer attempted to pass in, he was thrust back with violence. At the noise of the struggle, one of the Hepburns came up and told him that the Earl, understanding that he had letters for the Queen, advised him to go away and return in the evening; 'the Queen was so molested and disquieted with the business of that day, that he saw no likelihood of any time to serve his turn till after the Assize.' He argued with the man, but to no sort of purpose. The gate was thrown back, and the quadrangle and the open space below the windows were fast filling with a crowd, through which there was no passage. Troopers were girthing up their saddles and belting on their sabres; the French guard were trimming their harquebusses, and the stable-boys leading up and down the horses of the knights. The Laird of Skirling, Captain of the Castle under Bothwell, strode by and told the guide that he deserved to be hanged for bringing English villains there; and presently the Earl appeared, walking with Maitland. The officer was chafing under 'the reproaches' of the 'beggars' Scots, who were thronging round him and cursing him. They fell back as Bothwell approached, and he presented his letter. The Earl perhaps felt that too absolute a defiance might be unwise. He took it, and went back into the Palace, but presently returned and said, 'that the Queen was still sleeping; it would be given to her when the work of the morning was over.' A groom at this moment led round his horse—Darnley's horse it had been, and once, perhaps, like Roan Barbary, 'ate bread from Richard's royal hand!' The Earl sprang upon his back, turned round and glanced at the windows of the Queen's room. A servant of the French Ambassador touched the Englishman, and he too looked in the same direction, and saw the Queen 'that was asleep and could not be disturbed,' nodding a farewell to her hero as he rode insolently off."

Of English volunteers in the days of Elizabeth there is interesting notice, under the date 1567. Philip of Spain was on his road from that kingdom to the Low Countries, and he might possibly visit Portsmouth on his way. As it was not quite sure in what humour he might visit us, Government issued the following "Order for the encouragement of Harquebuss-men," or Matchlock Volunteers:—

"In the port towns along the south and west from Newcastle to Plymouth a corps to be formed of 4,000 harquebuss-men, to be taken from the artificers of each town, between the ages of eighteen and thirty, to be duly exercised and held ready for service when called upon. Every member of the corps to receive four pounds a year—out of the which at his own cost to provide a morion, a good substantial harquebuss, with a compass stock of such bore that every three shots may weigh one ounce; flask, touch-box, sword and dagger—a jerkin of cloth, open at the sides and sleeves, with a hood of the same cloth fastened to the collar of the same jerkin. The Queen to provide ammunition. For the better alluring of men to the service, the persons joining to have certain immunities, estimations, and liberties"—as "to be called Harquebuss-men of the Crown—to wear a scutcheon of silver with a harquebuss under a crown, and to be promised preferment in garrisons royal as places should fall vacant; to be free of the towns where they dwell; to pay no tenths, fifteenths, nor subsidies; to be free from all town rates and from muster-rolls except their own; to have liberty to shoot at certain fowl, with respect of time and place, and without hail shot. The magistrates to provide each year public games of shooting; the best prizes to be of twenty shillings at least, the second fifteen shillings, and every man's adventure to be but sixpence. An old soldier in every town to be sergeant. The use of the bow to be continued in villages—and pleasant means to be used to draw the youth thereunto."

The picture and the policy portrayed in the next extract are of equal interest and importance. The success of Alva in the revolted and reformed Netherlands had called forth from Elizabeth congratulations which she could not have felt:—

"Something of this language was perhaps affected. Elizabeth, with the Queen of Scots upon her hands, could not afford to sympathise with rebels. Unfortunately, rebellion and Protestantism in all countries but her own were going hand in hand, and she was alike frightened and exasperated at seeing that the Reforming part of her own subjects were drifting further and further from her own standing-ground. More and more every day they were shifting in the Genevan direction; her own Council was tainted, and her Catholic subjects had better and better ground for complaining of the laws, which forbade them the exercise of their own creed; when doctrines equally heretical from the Lutheran point of view might be taught openly in the churches. Thus, being for ever in fear of the example being turned against herself, she disclaimed for herself all sympathy with the foreign Protestants. She ostentatiously claimed communion for her own Anglicanism with the mystic body of the visible Church, and de Silva caught at every opportunity of encouraging her humour, applauding the loyalty of her Catholic subjects, and contrasting their temper with the anarchic libertinism of the heretics. She was going on progress at the end of the summer. On the 6th of August she came down from Hampton Court, and spent a day at the Charterhouse as a guest of the Duke of Norfolk. She went through the streets as usual in an open carriage, that the people might see her. She was received everywhere with the passionate enthusiasm which showed that her policy had endeared her permanently to the people. De Silva, who accompanied her, remarked on the pleasure which such a scene must give her. She said that her subjects loved her because, while the other nations of Europe were tearing each other in pieces, they alone, under her rule, were living in safety under their own vine and fig-tree. 'To God, she owed it,' she said; 'it was the marvellous work of His hand.' Where

the crowd was thickest, she stopped her horses, stood up, and spoke to those who were nearest to her. At one place de Silva remarked a venerable-looking man putting himself conspicuously forward, shouting 'Vivat Regina! Honi soit qui mal y pense!'—'That,' said the Queen, with evident pride, 'is a priest of the old religion.'—'And thus, Madam,' said the Ambassador, 'you see a proof of what Catholics are. Catholics are the support of thrones, which heretics destroy. In them your Majesty will find the loyalty which will be your stay in the day of trouble, and therefore I have ever prayed you to take care of them, and to forbid their ill-treatment.' Elizabeth had clung as it were convulsively to this happier aspect of her Catholic subjects, hoping that a time would come when the Anglicans and they could come together on some moderate common ground—such a ground as might have been found for all Europe, had not passion been called in to deal with questions which only intellect could grapple with. But the passion was there, and growing. The two moving powers in the Western Churches were Calvinism and Ultramontanism, and it became daily more manifest to Elizabeth that, besides these moderate loyal Catholics, there were others, disciples of the new school of Jesuitry and the Tridentine Council; men by whom she was herself regarded as the bastard offspring of adultery, who acknowledged no Sovereign on earth but the Pope of Rome, and no country but the so-called Church—men who were only watching for the moment when she could be tripped up and hurled out of her seat, to make room for the murderer of Darnley."

Something in the way of help towards this end occurred when, in 1569, there was prospect of a war with Spain:—

"The prospect of a war with Spain kindled the hopes of the Catholics, and made her friends more anxious than ever to secure Philip's interest for her. The Bishop of Ross told Don Guerau that all the noblemen who were interested for his mistress would stand by Spain in the present quarrel. Mary Stuart herself, so sanguine was she, sent him word that if the King of Spain would help her, she would in three months be Queen of England, and mass should be said in every church throughout the island; and stealthy language of the same kind began to be used to him by English Peers themselves. Don Guerau's instructions left him unable to enter into any engagements in Mary Stuart's interests; but under the new circumstances he held himself at liberty to hear what her friends had to say; and the Earl of Northumberland came one night to his house, and had a long conversation with him. Unfortunately for the Catholic cause, an awkward quarrel had arisen among the noblemen most inclined to it. Lord Dacres of Naworth, the richest and most powerful of the northern Peers, had died without a male heir, leaving two daughters. His widow had married the Duke of Norfolk, and died also a few months later, leaving him the guardian of her children. According to ancient usage, the Dacres estate would have gone with the title to the late lord's brother, Leonard. But Norfolk, not for his wards' sake entirely, but to secure the splendid inheritance in his own family, had betrothed the girls to his two sons, and claimed the property for them against their uncle. The suit was pending at this particular moment. Leonard Dacres—Leonard of the crooked back as he was called—had assumed the title and taken possession of Naworth Castle. He was a strong Catholic, and his cause was warmly supported by the Earls of Northumberland, Cumberland, and many of the gentry of the northern shires. There was a general unwillingness to see another great family perish out of the already attenuated ranks of the English Peerage. The Queen was holding the balance between the claimants, and the decision seemed likely to rest rather with her than with the Judges. With the prospect of a revolution which would transfer the crown to Mary Stuart, the Northern Lords had been throughout unfavourable to the scheme for marrying her to the Duke of Norfolk, who was not a Catholic, and, too powerful already, would then carry all before him. They had communicated their views to the Queen of Scots herself, but she

was anxious at any rate to use Norfolk's help till she was extricated from her difficulties, and begged them to be silent."

In the above passage there are samples of Mr. Froude's power, clearness, and, also, of his ready inaccuracy. He has mis-stated the leading incidents of the history of the Dacres succession.

The Lord Dacres to whom Mr. Froude refers as Lord Dacres of Naworth was properly styled Lord Dacres of Gillesland, or of the North. He was the fifth of that line. He died in 1566, not, as Mr. Froude says, without a male heir; he was succeeded by his son George, who was summoned to Parliament the same year, and died a minor three years later. This George had not two, but three sisters, and it was at George's death that his uncle, crook-backed Leonard Dacres, properly assumed the title of Lord Dacres of Gillesland. The Duke of Norfolk, as Earl Marshal of England, had the right of trying the validity of this assumption. He waived the right, however, and referred the decision to Commissioners appointed by the Queen. It was a trial of property as well as of title. The powerful Duke had not only married the widow of the fifth baron, but he had also given the baron's three daughters as wives to his own three sons; Leonard had no chance against such weight of competition and superior influence. The barony was declared to be in abeyance. Leonard Dacres and his brother Edward were subsequently attainted of high treason, and died abroad in great poverty. There was a third brother who had kept aloof from Mary Stuart's quarrels, Francis Dacres, who was only a little less poor than his exiled brothers. He left a son, Randal Dacres, the last of the lawful Lords Dacres of Gillesland; but the declaration barred his inheritance, and he died, in London, in 1634, so destitute that there was not money enough of his own wherewith to bury him. There was then no Duke of Norfolk existing, but the Earl Marshal who represented him, and who was enjoying a portion of poor Randal's inheritance, buried him decently among his ancestors the Lords Dacres, at Gillesland. The award of Elizabeth's Commissioners of course affects persons now living. The Lords Petres and Stourton, as heirs of the eldest daughter of the fifth Lord Dacres, who died in 1566, and the Earl of Carlisle as heir of the other of the three daughters, who left children, are co-heirs of the barony in abeyance. If the Queen were to pronounce in favour of either of them it would not restore the rightful heir, neither would it injure him, for the male line is extinct, and to the Howards and their kindred has fallen the splendid state and inheritance once enjoyed by the proud and powerful Dacres of Gillesland.

Leonard Dacres seems to have played fast and loose in the "insurrection of the earls," as it was called in the North, which was so near succeeding. Had Mary Stuart been freed by it, and Elizabeth's army worsted, England would have become "Catholic," Scotland would have lost her Calvinism in the shedding of the blood of its professors, and a foreign army would have polluted the English counties. Elizabeth's feelings, with reference to the question of religion and insurrection, are thus clearly expressed:—

"With tears in her eyes, she protested that she had not deserved the rebellion. For her relations with the Continent, she desired only that neither her own subjects should assist in creating trouble elsewhere, nor French or Spanish Catholics encourage insurrection in England. She spoke with horror of bloodshed. Except for her honour's sake, she said, she would have already pardoned the Earls, and she hoped they would of themselves abandon their enterprise. La Mothe observed that while there were differences of religion, Europe

could never be quiet. Elizabeth admitted in answer that between the Pope's pretended power to absolve subjects from their allegiance and the Protestant theory of the right of subjects to depose their sovereigns, Governments had a bad time before them. It was time to do something, and she would gladly come to some understanding with other Sovereigns on these matters. As to the re-union of Christendom, there was nothing for which she was more anxious. There would be no difficulty with her. She had told Cardinal Chatillon that whatever he and his party might think of the abomination of going to mass, she would herself sooner have heard a thousand than have caused the least of the million villanies which had been committed on account of it. Remarkable words, throwing the truest light now attainable upon the spiritual convictions of Elizabeth. They might be called wise from the modern point of view, to which varieties of religious forms seem like words in different languages expressing the same idea. For men to kill each other about a piece of bread appears, when so stated, the supreme culmination of human folly. Yet Knox and Coligny were, after all, more right than the Queen of England. The idol was nothing, and the thing offered to the idol was nothing; but the mass in the sixteenth century meant the stake, the rack, the gibbet, the Inquisition dungeons, the Devil enthroned upon the judgment-seat of the world, with steel, cord, and fire to execute his sentences."

Our space will not permit of our extending this imperfect notice, or of continuing extracts which, apart from the sustained story, convey but faint idea of the beauty of the edifice from which they are taken. The most interesting portion of the work, to those whom Mr. Froude roughly designates as "sentimentalists," will be found in those pages (and particularly p. 271, vol. 4) where, in drawing a parallel between Mary Stuart and Elizabeth, he presses less harshly than usual against the former, and weighs differences without passion. Again, although much exception may be taken to many of the acts and expressions of Knox, no one will be slow to acknowledge the simple, picturesque power with which Mr. Froude has described his death, and the force, beauty, and, generally speaking, truth with which he has drawn the character of that remarkable man, a man to whom Scotland owes nearly all her final victory, and England much of its consequent good result.

Religio Animæ; and other Poems. By Alfred B. Richards. (Moxon & Co.)

THE young poets of our time cannot complain that we have been backward in welcoming them. When have they put forth any buds of promise that we have not hastened to recognize and joyfully proclaim? When have we tried to trample under foot any single blossom of the Immortal Flower? We are only too glad to find any sign of poetry in the numerous books of verse that come before us. After traversing such sandy desert wastes of words, the smallest bit of living leaf is too precious, when found, for us to speak cynically or unkindly of the giver. Let the writers supply the poetry, and we will award the praise. All we ask is to be inspired. All we want is to feel the communicative warmth which a book with life in it cannot fail to breathe.

But if a writer have not the root of the matter in him, and his book of verse shows neither the flower nor fruit of poetry, we are in duty bound to say so. We should have been pleased to have lent a hand to help the author of these poems up that hill which we find rendered so ludicrously in the frontispiece to Messrs. Moxon's books; but, honestly, we cannot. We sympathize with his earnestness on behalf of the suffering poor, who are treated so shame-

fully in the workhouse wards; but he has not the knack of getting the poetry out of his subject. It takes a Hood to go deep enough for that: to pierce through the rags of wretchedness, the dirt and squalor of poverty, and see and set the human poetry glistening through tears. Mr. Richards has paraphrased a portion of Mr. Greenwood's account of his night spent in the Lambeth Casual Ward. The poetry, however, and the power remain in the prose of the one, not in the well-meant verse of the other. We likewise sympathize with Mr. Richards in his zeal for the Volunteer movement, but he has aided it infinitely better in other ways than in appealing to his countrymen in lines like these:—

By all the Gods of England,
Neath the Almighty God—
Arm, ye who love your country.

This has a startling sound to us, who had thought that England professed to obey the command, "Thou shalt have no other gods before me," and, at least, did not profess to have any other. It is not easy to convert earnestness, whether social, political or patriotic, into poetic force when the one thing needful is lacking. Aspiration is not inspiration, though often mistaken for it. Some people can write poetry when they are very much in earnest, while others can only swear; a good deal depends on natural gifts. Many of these pieces appear to have been written years ago; but here is a stanza from a lyric dated 1862, which could not have been worse. The subject is 'Our Volunteers':—

It is a glorious gallant band!
A phalanx grand and rare,
That heart-linked thus doth firmly stand,
Let meet it they who dare!
The chivalry of labour hand-
in-hand with knightly crew—
What living belt boasts other land
As potent and as true?

It must be admitted that the minstrel sings flat and out of tune in parts. This is a strange mixture:—

Hoar ocean chants his war-runes,
When billows change and die—
His rhythm of emerald ripples
Breathes to calm's turquoise sky.

Again, who is to read this?—

While sombre *Jaques* makes moralizing moan.

But to show that our author is no poet, and that he has nothing to *sing* that could possibly have been spoilt by being *said*, we will begin at the beginning of his book. Here are the first lines:—

When summer days are longest,
And summer nights are sweet;
As the shadows of dusk ruins,
Steal softly to her feet.
While the moon shines o'er the forest,
As she hath shone before,
Lighting fair forms of lovers,
Ten myriad, love! and more.

Well, we ask, what then? And we are told that, at such a time,

We seem in unbid fancy,
Thus to have lived before,

—which, as a presentiment of some pre-existence, is not altogether unlike the feeling of the "young man called John" in Holmes's 'Autocrat of the Breakfast Table,' who had an impression, whilst smoking a cigar, that he had previously passed through a similar sort of experience. Also, on such a night, our author feels that we "shall live hereafter"! And this extraordinary revelation of the moonlight night comes to him in a most curious way. He says—

This is my Religion:
I hold it from on high;
It falls upon my forehead
Like lustre from the sky.

This comes of receiving inspiration from the moon! However, there is one advantage in having such a religion,—it is not likely to become morbidly subjective. As few other

people get their religion in this external way, our author cries—

Oh! for a solemn whisper,
To thrill thro' deafest ear:
A tongue of flame to under
Man's blindness like a spear!

The desire is praiseworthy, but the expression is unfortunate. What would be the use of a *whisper* to affect the *deafest ear*? And how could a tongue of flame sunder man's blindness, even if the tongue had assumed the shape of a spear? We speak of *couching* a spear, but have no notion of a spear being used for the purpose of couching an eye. Our author may think us hypercritical, but we are only minutely noting the little signs of imagery and language which, were there no other and larger, tell in a moment whether a man has the divine gift in any degree. With Mr. Richards the proofs are only too plentiful that he is all the while trying to make other mental faculties do the work of the poetic one. He speaks of—

Mountain summits,
Staircased by heroic deeds.

This is carpentry—not poetry, and as puzzling to us as was that resting-place of Dives, in the old carol which tells us how he

Took his seat all on a serpent's knee.

Again, he has—

Great eels with saucer eyes that peep
Thro' drowned ports in play.

How could he print such incongruity! The fact must stare every one in the face that *saucer eyes don't peep*. From sheer lack of the informing imagination, our author applies phrases most grossly physical to things spiritual. In one piece we find—

Bleed in the dark, my soul!

Of course the *soul* does not, and cannot bleed; but let that pass, as being on the border-land of the permissible in metaphorical expression. In another, the speaker says, he "found Sleep dead," and he lies down alongside of the

Sleep that was murdered in vain.

Now, as the four matter-of-fact Scots who replied to Charles Lamb's wish respecting Burns could have told our author, "that was impossible." He could not have found Sleep dead, because it never was alive. We might as well speak of finding the ancient scythe and hour-glass after we had been "killing Time." Shakespeare made Macbeth speak of having murdered Sleep, and Mr. Richards has discovered the *dead body* lying by him in bed. In a love lyric, the singer sings rather ruefully—

There is a scar beneath my hair,
There is a sorrow at my heart;
The one in old age I shall bear,
The other may not from me part.

We admire the look of vanity given to the last two lines by the statement that he cannot part with the one, and the other will not part from him, although it comes to the same thing in both cases. But we cannot admire the singer's want of gallantry. What a conjugal reminder for a love lyric! "It's come to a fine pass," said the Scotchwoman who had just thrown a three-legged stool at her husband's head, "gin a wife canna kame her ain head!" And if the affair did leave a scar, was it wise, was it judicious to put it into verse? Would it not have been better to remember, with silent gratitude, that the lady had left sufficient hair wherewith to cover the scar? We are not merely jesting. It is our object to illustrate the want of poetic perception in this writer's use of phrases. There is the same mishap in the treatment of facts when he attempts to set them forth figuratively. Of the Duke of Wellington's death, we are told—

The aged oak is withered
Which grew from every heart.

But *how* we cannot see. In 'L'Amour qui passe et l'Espoir qui vient,' the lovers say of his lady—

She swore that she lived in my smile, look, or nod.

Did she indeed! This is provocative of punning, and we might excuse indulgence in it by referring to page 286, where we find some lines "On a late Occurrence," headed with the motto, "*Cur me querelis exanimas tuis?*" These are the first four lines—

'Tis pleasant when a big dog from a small one,
With generous motive, turns him round and flies;
'Tis sweet to see a short man brave a tall one,
And hear an unexpected "D—n your eyes."

So it may be. Still, tastes will differ.

Two of the best pieces in the book are 'Helen and Cassandra' and 'Danaë.' In these the writer seems to have approached his nearest to poetry by the aid of painting, as both are written on pictures. In the piece entitled 'Shakespeare,' there is a good descriptive touch where Falstaff is spoken of as one

Whose wit was nimble sword-player to his sins.

—But such a line as the first, which is addressed to Shakespeare himself—

Wit unsurpassed! Tragedian divine!—
is bad enough to kill the poem in the birth.

Mr. Richards professes to have collected the following "dittie" from two MSS. in the Lincoln's Inn Library. This we take to be a joke. And yet the ballad has a lyric flow and is musical beyond anything else in the book:—

YE DITTIE OF "ALTOUNE TOURES."

O pleasant is ye moneth of Maie,
And swete are vernall shoures,
Whanne sothe they bydde mee forth to stail,
And dyne atte "Altoune Toures."

Myne herte! Thys is a gamesome worlde,
Ye erth hath purfild floures;
Lord Chancellere hys wig hath curled:
Hee slepes atte "Altoune Toures."

Come hyther, come hyther, mie fayre yonge warde!
Busk ye in bonny bowres!
Soe sadde, shee sayde, wilt stail, mie Lorde,
Ane weeke atte "Altoune Toures!"

"Come hyther, come hyther, mie Ladye Abbess,
Said why thy pale fronte loures!"
"Now, by ye roode a boone! Hee bless
Thys moneth atte "Altoune Toures."

Ye proud Erl twies hys win hee spylt,
"Syr Chancellere, 'tis ours
To bydde your presence, an Crist wylt,
Ane yere atte "Altoune Toures."

O, "Altoune Toures" are fayre to see,
And blacke are monikish powres;
Ye fayre yonge mayde to ye nonnerie
And ye Peere to Altoune Toures.

Merly doe ye smale foules syng
Whanne milke it sonest sours:
Alle in a darke vell forth the byrges,
Swete Maie of "Altoune Toures."

And down hir chekis dyd yronne ye byrges,
Hir said forme quails and cowers;
Lord Chancellere hee spyed hys win
Blythlie atte "Altoune Toures."

'Mid lothlie nonnes hir lyfe is passed
Wepynge ye waefulle houres;
For weedes of blacke ye gynghams cast
Shee wore atte "Altoune Toures."

Ryghte to hir dethe ye maden weped;
Fayre girles with meikle dowres,
God send ye a Chancellere hath not sleped
Or dyed atte "Altoune Toures."

With these lines we are enabled to take leave of the writer in friendly spirit.

History of the Atlantic Telegraph. By Henry M. Field, D.D. (Low & Co.)

This history of the great achievement of the century is dated from New York, and proceeds from the pen of one who has been an eye-witness of most, if not all, of the attempts that have been made to carry the earth's girdle round the portion of her circumference which lies between the Old and New Worlds. Dr. Field is related to Mr. Cyrus W. Field; and that circumstance, as he tells us in his Preface, has given him peculiar facilities for obtaining information on all points necessary to an authentic history. The narrative thus produced is a model history of its kind, the materials being so handled as to sustain an unflagging interest, with just sufficient scientific information to render the work

useful as well as agreeable. Dr. Field, in short, has shown excellent judgment in his selection of facts, having borne in mind throughout that he was writing a history for the world in general, and not a purely scientific treatise for the learned. The result is, that in a couple of hours every person who understands the English tongue may be almost as well "posted up" as the actual promoters of the scheme in all that it is necessary or profitable for ordinary people to know on the subject.

Some of our readers will probably be a little surprised when we remind them that no less than four attempts were made, before that of the present year, to pierce the Atlantic with electricity. In this busy age events succeed each other with such rapidity, that the records even of great facts are rubbed out, as it were, from memory's tablets by the constant attrition of new phenomena. For ourselves, we confess our obligation to Dr. Field for brushing up our recollection of the earliest expeditions made with the object of establishing a telegraphic communication between Europe and America. The first was made in 1857, by the *Agamemnon* and *Niagara*, and the cable was paid out successfully to the extent of 335 miles. But consternation was occasioned on the instant, by the discovery that the electrical continuity was lost. To the inexpressible delight, however, of everybody on board, the electricity suddenly returned, just as the scientific authorities were going to give the order to cut the cable and wind in. Before morning their joy was turned to sadness, for the brakes were applied to stop the cable from running out too fast, and as the stern of the ship rose from the trough of the sea the strain was too sudden, and the cable parted for ever.

The next attempt, early in 1858, was made under the immediate direction of Mr. Cyrus W. Field, who, after having been from the commencement the most lavish promoter of the scheme, had now accepted the post of general manager, generously refusing a proffered salary, and preferring to discharge gratuitously the onerous duties of his office. Mr. Everett had now designed a paying-out machine on a new principle, and Mr. Apold had invented "self-releasing brakes," so constructed as to give way when the strain exceeded a ton and a half. As the cable was calculated to support a strain of something over three tons, the recurrence of the accident of the previous year was thus rendered impossible. On this occasion the laying of the cable was commenced in mid-ocean, the *Niagara* and *Agamemnon* proceeding in opposite directions after splicing their respective portions. Twice the cable broke when the ships had not long separated, and twice the gallant ships met again and renewed the splice. The third time the ships receded from one another as far as 200 miles, when the electric current again ceased to flow. This time the cable was found broken within 20 feet of the *Agamemnon*! No one could then guess the cause of the disaster; and by experiments which were made before cutting off the now useless remnant from the *Niagara*, it appeared that the cable, or what remained of it, was capable of supporting a strain of four tons for an hour and forty minutes.

Notwithstanding this failure, Mr. Field and his friends persevered; and as they had luckily still got enough cable for the entire length, they determined to make another attempt in the same year. This, the third expedition, gave rise to the greatest triumph, and subsequently to the deepest despondency, that had yet been known in the annals of the Atlantic Telegraph. The *Agamemnon* and *Niagara*, after remaining

in Europe just long enough to take in coal and provisions, sailed at once to their rendezvous in mid-ocean, and commenced operations on the 29th of July. On the 5th of August Mr. Cyrus W. Field, from the *Niagara*, Trinity Bay, Newfoundland, telegraphed to the Associated Press, New York, that the Atlantic Telegraph was completed. No words can express the enthusiasm with which Mr. Field was received as he steamed in triumph into New York. He was the man who, by his energy and wealth, had first practically started the expeditions, and by his skill and perseverance had now carried them to a successful issue. He was in every sense the hero of the occasion, and the New Yorkers were justly proud of their countryman. Alas! on the very day which they had set apart to do him special honour, the speaking, living existence of the cable was at an end, and it lay along the bed of the Atlantic an inanimate and useless mass!

From that time to 1865, a period of seven years, no fresh attempt was made. There needs no stronger proof of the intense disappointment occasioned by the barren success, ten times worse than failure, of the second expedition of 1858. There were not wanting pseudo-wise men, who had always vaguely scoffed at the idea of any Atlantic Telegraph, and who now, emboldened by seeing the realization of their sinister predictions, mustered up courage to explain gravely why such a scheme could never answer. Some declared that the telegraph plateau—that wonderful submarine highway which runs straight from Ireland to Newfoundland between jagged rocks and stupendous mountains—was a myth and a phantom of the imagination. Yet this plain had been carefully sounded both by American and English mariners, and the chart of its conformation rested on the authority of men who were in no way concerned in the speculation. Other critics, more flippant and still less learned, called the scheme "a moon-hoax," and wrote sarcastic articles under such titles as "Very like a whale," and "Was the Atlantic Cable a humbug?" In the mean time the gallant band held their own, and found some consolation in recollecting that the defunct cable was in many respects imperfectly constructed, and that it had been wound and unwound a great many times, carelessly exposed to vicissitudes of weather, and badly shaken in the heavy gales of 1858. It must be admitted that these revelations, if they comforted the advocates of the scheme, were a little awkward to confess to the public, who would naturally ask, why so momentous a struggle had been undertaken with imperfect weapons? Perhaps the answer might have been, that as there was a sufficient quantity of cable standing over from 1857, the persons in authority did not venture to recommend the company to order any more without first trying what they could do with the old stock.

The expeditions of 1865 and 1866 are fresh in the memory of all, and both have been graphically described in the various daily journals published in London. Dr. Field gives his own heart-stirring account of all the expeditions, availing himself, however, occasionally, of a sparkling passage from the pen of Mr. Woods or Dr. Russell. Perhaps, however, the most instructive part of the book is that which can be found in no newspaper—the personal narrative, which the author can only have derived, as a whole, from the actual promoters of the scheme. It was while turning round a globe, and meditating on Mr. Gisborne's proposition for a telegraph from Newfoundland to New York, that a young merchant, who had retired from business with an ample fortune, was led to ask

himself the question, Why should not there be a wire across the Atlantic Ocean itself? The subject had occupied other people's minds; and Lieut. Berryman, sent out by the Navy Department to study winds and currents, had already reported the existence of the deep-sea plateau. Accordingly, when Mr. Field wrote to the National Observatory at Washington to ask for scientific advice as to the feasibility of the telegraph scheme, Lieut. Maury answered,— "Singularity enough, just as I received your letter I was closing one to the Secretary of the Navy on the same subject." He inclosed a copy of this official letter, and it contained the following remarkable words:—"Whether it would be better to lead the wires from Newfoundland or Labrador is not now the question; nor do I pretend to consider the question as to the possibility of finding a time calm enough, the sea smooth enough, a wire long enough, a ship big enough, to lay a coil of wire sixteen hundred miles in length. . . . A wire laid across from either of the above-named places on this side will pass to the north of the Grand Banks, and rest on that beautiful plateau to which I have alluded, and where the waters of the sea appear to be as quiet and as completely at rest as it is at the bottom of a mill-pond." Strange that this "beautiful plateau" should occur at the narrowest part of the ocean, and between countries which are both occupied by energetic Anglo-Saxons! Here, then, was sufficient encouragement: other men, to whom science was a regular pursuit, had prepared the course, Cyrus Field was the man to run the race. He at once set to work with extraordinary energy, and, with his own example to back his arguments, succeeded in inducing four other men of large fortune to enlist themselves in the enterprise. With some little trouble a very liberal charter was obtained from the Government of Newfoundland, and at six o'clock, one Monday morning, at the house of Mr. Cyrus Field's brother, a company was organized with five directors, the charter was formally accepted, and a capital of a million and a half of dollars was subscribed.

Such was the small beginning of this gigantic enterprise; small, we mean, in numerical force, but great in courage and activity, and powerful in its pecuniary resources. There was a noble self-devotion in the determination of Mr. Field and his four friends, men of secure position, who might have lived without anxiety for the rest of their lives, to throw themselves and their treasures once more into the *mêlée*, for the sake of achieving a result which would benefit the world in general, more than themselves individually. If they met with a good deal of discouragement in some quarters, they were occasionally buoyed up by the most generous faith in others. We are rather proud to say that, while the scheme originated in the United States, England has not been backward in the efforts which have brought it to a successful conclusion. While the American Senate passed the bill brought forward by a majority of one, the English Government, without thinking it necessary to go to Parliament, guaranteed, as early as 1856, work to the amount of 14,000*l.* per annum (or 4*l.* per cent. on the assumed capital) for a certain period, and 10,000*l.* per annum for 25 years afterwards. Before that, Newfoundland, an English colony of no very great wealth, had guaranteed the interest of 50,000*l.* bonds, made a grant of fifty square miles of land, and promised 5,000*l.* towards the construction of a road through the barren plains and wild forests of the interior. Before commencing operations, it was necessary to have recourse to England for additional capital, or a new company. The latter course was chosen, and there was an Atlantic Tele-

graph Company on either side of the ocean. It would appear, then, that the two great branches of the Anglo-Saxon race, the old and the new, have each had an important share in bringing about the great result. To gauge their respective services, and say which has done most, would be difficult, if not impossible. Let us hope, then, that there will never be any national jealousy on this subject, and that Briton and American will be content for ever to share the fame, as cordially as on board the Great Eastern they shared the labour, the anxiety, and the final triumph—a triumph which, we trust, will be enduring, and not again “interrupted.”

NEW NOVELS.

Dr. Austin's Guests. By William Gilbert. 2 vols. (Strahan.)

TOWARDS the end of 1864, or at the commencement of 1865, a tale made its appearance which attracted attention by its peculiar title, ‘*De Profundis*,’ and which, on examination, was generally pronounced to be above the average of the novels and stories of the day. It was, on its own showing, a “tale of social deposits”; but the author, while dealing entirely with low life, had the taste and judgment to reject the adventitious aid which novelists too frequently borrow from the curiosities of vulgarity and the startling effects of crime. Such a beginning was well suited to raise the hopes of the novel-reading public; and we are happy to say that those who read ‘*Dr. Austin's Guests*’ will find that it fully sustains the reputation of its author. The idea of the book is very singular. It is the autobiography of a gentleman of education and talent, who has become insane by brooding over a fancied scientific discovery, and who consents, as he imagines, to become an inmate of a private asylum, in order to withdraw himself from the temptation of injuring the world by the immensity of his imaginary schemes. Of course he is, in fact, a monomaniac; but his family and his medical attendants manage to humour his weakness with such tender delicacy that he never doubts his own sanity, though he knows himself to be surrounded by madmen. Imitating the tact of his keepers, he shows much forbearance to the poor deluded creatures about him, affecting to believe in their discoveries, and good-naturedly putting up with their eccentricities. Now and then, however, his patience gives way, and then a battle royal ensues. The situations which are thus produced are exceedingly amusing, and the skill of the author is conspicuous in the treatment of such scenes. To present the ludicrous side of a story to the reader, while the narrator seems all unconscious of the effect he produces, is no easy task, unless a tone of burlesque is adopted. Such a tone would destroy the character of ‘*Dr. Austin's Guests*,’ which is supposed to be genuine and serious throughout; yet the reader can always see through the superficial coating, and can understand both what the real facts are, and how it is that the narrator fails to comprehend them. The chapter entitled “*A Scientific Evening*” is perhaps as remarkable for quiet humour as any in the book. Three inmates of the asylum are represented as communicating to each other their marvellous discoveries, one for burning sea water, another for moving the universe, a third for the “concentration of eternity.” They converse for some time with perfect politeness, each of them looking upon the other two as harmless enthusiasts, mistaken of course in their views, but rather to be pitied than blamed. At last, however, the insupportable spirit of controversy arises,

the narrator venturing to point out a flaw in the “concentration” scheme. The spark soon bursts into a flame, and the three friends part on about the same terms as a couple of rival doctors or philosophers in Molière. Besides the narrator's own adventures, the machinery of his story is used to introduce numerous accounts of other “guests,” some of which are very pathetic, and others interesting (if founded on fact) in a psychological point of view. One of the most ludicrous features of the connecting story is the perfect *naïveté* with which, after a long string of ills and grievances suffered at the hands of some other patient, the narrator invariably mentions that the Doctor, under some singular misapprehension, takes a different view of the subject, and looks upon him (the narrator) as having been the aggressor throughout!

The Co-Heiress. By the Author of ‘*Charley Nugent*.’ 3 vols. (Tinsley Brothers.)

WE should have declared ‘*The Co-Heiress*’ to be a first attempt in novel-writing were it not that the names of two other productions figure on the title-page. Much that we said of ‘*Charley Nugent*’ is applicable to the three closely-written volumes before us. This story would have been far better if told in half the number of pages; the writer would then have been spared a vast amount of manual labour, and the reader, of intense weariness. The ingredients of a good novel are here. The *dramatis personæ* imitate the sensational element throughout; but the domestic scenes are far too minutely described, the details are wearying, the repetitions tiresome, the characters, too, are not natural or life-like. The hero, Sir Charles Bellingham, is represented as a fascinating young gentleman, irresistible among women: he is possessed of every virtue, but, unfortunately, is not blessed with the faculty of knowing his own mind. His mother, Lady Agnes, is supposed, at the mature age of fifty, to be past most of the troubles and pleasures of this life, except a constant course of knitting, to which employment her declining years are devoted. When we remember that Mrs. Piozzi was a swimmer at above fourscore, and that a lively old gentleman lately lost his life by a fall from his horse when he had passed, by several years, the limit of threescore and ten, we think Lady Agnes Bellingham deprived of her rights rather early, even though she was the daughter of one of England's proudest earls, and “patrician was written in every look and gesture, as well as in the stately curve of her still round throat.” Sir John de Burgh, father of the heroines, is of much too kind and genial a nature to have acted as is here described. His character is not that of a man who could desert his youngest child, and separate himself from her for sixteen years, because his idolized young wife died at the child's birth. He is made to selfishly wish to forget his own sorrow, and he thinks the sight of his child, who closely resembles her mother, calculated only to keep her image constantly before his eye. We are prepared from the beginning to discover that Augusta, the co-heiress of Sir John de Burgh, will not be a model young lady. She is descended from two families, of which one being “proud and hot,” and the other “proud and cold,” it is unlikely that this infant scion will not possess some of the ruling traits of both. The best drawn, indeed a rather charming, character, is Emily Crewe, an Irish girl. Her appearance is always a pleasure to the reader. Her wish to influence, for his own good, the vacillating young hero, even at the expense of her own feelings, is touching; and one can fancy her a somewhat fascinating creature,

though her style of beauty is uncommon,—grey eyes and reddish-gold hair not usually assimilating, particularly in one of Erin's daughters. The scene of the story is, for the most part, in Rome, though, but for a foreign name or two, and an occasional allusion, at long intervals, to some peculiar beauty in the scenery, we might as well have met the actors in an English country town. All opportunity is avoided of describing life and its ways. The author has not taken the trouble of at least attempting to imbue his heroes and heroines with individuality. It may have been a light task to compose the novel in which they figure; we wish it were not a heavy one to read it. ‘*The Co-Heiress*’ may, perhaps, be admired by very young persons just allowed an insight into the world of fiction, and ignorant of its best creations; but to those who are familiar with better delineations of character by more finished artists, ‘*The Co-Heiress*’ will be found flat, stale, and unprofitable.

Thrown on the World: a Story. By Ennis Keir. 2 vols. (Newby.)

ALTHOUGH this is a new book, the story contained in it is one with which we have all been familiar from childhood. It is that of a wealthy family who lose fortune and position by an unlucky speculation, and are left to struggle for existence in a world that once seemed ready to place its treasures at their feet. The author desires to show “not what trouble is,” but “the readiest and most practicable way of getting out of it, or the best and most cheerful way of bearing it.” If he does not entirely perform this promise, we must not blame him severely; for so much could scarcely be done in two short volumes. Those who read the book will probably think, as we do, that if the Dallas family were “thrown on the world,” they fell on a softer soil than most people who meet with a similar catastrophe. One young lady at once gets a situation of 80*l.* a year; another becomes companion to a lady who is a very jewel of good humour and affability; a third is promptly engaged and married to one of the aristocratic friends of her more prosperous days. In the mean time, the brother goes out to Australia, gets employment immediately, and comes home with a large fortune, in four or five years. This is a somewhat Utopian view of the difficulties of life; but the book is readable enough, and is free from all objectionable matter.

The Law of the Rubric; and the Transition Period of the Church of England. By the Rev. W. H. Pinnock, LL.D. (Cambridge, Hall & Son; London, Whittaker & Co.)

THIS very exhaustive treatise is devoted to a consideration, legal and historical, of the vestments which may or should be used in the English Church. And Dr. Pinnock's conclusion is, “that the Ritualists are *legally right* in their interpretation of the Rubric; but that in the exercise of that advantage they have ventured on proceedings which are in some points *morally wrong*, and, in other points, *legally wrong*.” We are glad to agree with the last half of this sentence; but, after careful consideration of the subject and the authorities, we consider Dr. Pinnock doubly wrong in the first half, and that the very case he makes out for the Ritualists is the strongest argument against them.

To begin with a simple statement of the point at issue. The words of the Rubric are, “And here is to be noted, that such ornaments of the Church, and of the Ministers thereof, at all times of their Ministration, shall be retained, and be in use, as were in this Church of Eng-

land, by the authority of Parliament, in the Second Year of the Reign of King Edward the Sixth." It is on the authority of this Rubric that the Ritualists claim to wear their divers garments. The ground has been disputed inch by inch. Every clause, every word, has been weighed. The most opposite meanings have been tortured out of the plainest sentences. Great lawyers have come to the conclusion that a clergyman wearing the vestments prescribed by the Prayer-Book issued under the authority of Parliament in the second year of the reign of King Edward the Sixth infringed the law, and committed an offence cognizable by a legal tribunal. Leading members of the Ritualist party have argued that the ornaments and ceremonial in use by the authority of Parliament in the second year of King Edward the Sixth were those imposed upon the province of Canterbury by the Constitution of Merton, in 1305, and accepted by the 25 Henry 8. c. 19. So far as we can understand Dr. Pinnock, he inclines to the legality of the latter view. But he has overloaded his treatise with so many needless details as to cloud over, not only his own meaning, but the clear meaning of the Rubric; and he has blinded himself to the fact that, by his own *ipse dixit*, he contradicts the highest judicial authority in the kingdom.

We do not hold that Judges are infallible; but if a Judge says one thing and Dr. Pinnock says another, we should be apt to look carefully at the dictum of the Judge before setting up that of Dr. Pinnock against it. If the subject was the legal interpretation of words in a statute, we should be still more cautious. And if we found, on inquiry, that the Judge had the distinct words of another statute in his favour, while Dr. Pinnock had nothing but a fancied analogy of language, we should side with the Judge, and not with the Doctor.

Now, the point is this. The Rubric quotes the authority of Parliament in the second year of King Edward the Sixth. The first and most natural question is, What was done by Parliament in that year? We find that the 2 & 3 Edward 6. c. 1. is entitled, 'An Act of Uniformity of Service and Administration of the Sacraments throughout the Realm,' and that by it the Book of Common Prayer, commonly called King Edward the Sixth's First Prayer-Book, received parliamentary sanction. By this Prayer-Book a certain usage was for the first time established throughout the Church of England. Before that time there had been—we learn from the Prayer-Book itself—various uses, "some following Salisbury use, some Herford use, some the use of Bangor, some of Yorke, and some of Lincolne." These were now to be abolished. Down to that year a great many ornaments had been used in churches and by the ministers, according to the provincial constitutions of different dioceses, or the "uses" of others. These were now to be controlled and made uniform. Before that time the ornaments of the minister had included albe, amice, chasuble, cope, dalmatic, and other garments. By the first Prayer-Book, the minister saying or singing mattens and evensong, baptizing and burying, in parish churches, was to wear a surplice, and, when administering the sacrament, a white albe, plain, with a vestment or cope. Seeing, then, that the first legislative act of the second year of Edward the Sixth was to prescribe uniformity for the Church of England, we might think that there was no difficulty in referring the subsequent Rubric to this Act and this Prayer-Book.

But Dr. Pinnock says No. The Rubric cannot refer to the first attempt at uniformity, but to the variety which existed before it. His reason is, that as the Act probably did not receive the

royal assent till after the expiration of the second year of Edward the Sixth,—and as, at all events, the first Prayer-Book could not have been printed, published, and brought into use till some time in the third year,—there could have been no ornaments in use under that authority during the second year; and, consequently, whatever ornaments were in use under any previous authority are those referred to by the Rubric. That is to say, the book which opens with a statement of the benefits of uniformity purposely refers us to the time before uniformity existed! It purposely misleads us by referring to the end of that time, not to any part of it when variety was sanctioned. And this theory is maintained in the face of the Privy Council judgment, which says most clearly—

"There seems no reason to doubt that the Act in question received the Royal assent in the second year of Edward VI. It concerned a matter of great urgency which had been long under consideration, and was the first Act of the Session; it passed through one House of Parliament on January 15th, 1549, N.S., and the other on the 21st of the same month; and the second year of the reign of Edward the Sixth did not expire till January 28th. In the Act of the 5th & 6th Edw. VI. c. 1. s. 5. it is expressly referred to as the Act 'made in the second year of the King's Majesty's reign.' Upon this point therefore no difficulty can arise. It is very true that the *New Prayer-Book* could not come in use until after the expiration of that year, because time must be allowed for printing and distributing the Books; but its use, and the injunctions contained in it, were established by authority of Parliament in the second year of Edward VIth, and this is the plain meaning of the Rubric."

It is strange that Dr. Pinnock cannot see the legal force of this argument. A Rubric, which is part of the statute law, refers to the authority of Parliament in a certain year. The plain inference is that it refers to an Act made in that year, because if it referred to an Act made in an earlier year, that earlier year would be specified. If it referred to the state of things existing until the passing of a certain Act, it would never mention the year in which that Act was passed, for the simple reason that in that same year two states of things existed; and if it meant the earlier state of things, it would make its meaning clear by the words "down to the passing of such and such an Act." Any doubt as to the year in which an Act is passed may be removed, first by the history of the Act, and then by its description. If an Act forbids you to throw offensive matter into the Thames "from and after the passing of this Act," it would be sufficient answer that the matter was thrown in before the Act came in force. But if a subsequent Act referred to the Thames Navigation Bill as the Act of the 29th and 30th of the Queen, it would be no answer that it did not come into force till the year after. This is the case here; and the argument used by the Privy Council, that this Act is described in another statute as the Act made in the second year of the King's reign, completes the description. Whether this description is historically accurate or not, makes little difference. The object is not to discover in what year such an Act was passed, but to what Act such another Act refers. It is immaterial to know whether the royal assent was given in the second or the third year; but it is very material to know whether successive statutes agree in speaking of the Act as that of the second or the third year; and when we find one statute speaking of it as the Act of the second year, the logical inference is that another statute alludes to it when it cites the same authority and the same date.

Dr. Pinnock's ground is untenable for another

reason. The Rubric of Charles the Second's Prayer-Book is a clause in Elizabeth's Act of Uniformity. It is a well-known rule, that doubtful expressions in statutes are to be interpreted by the context. Charles's Act of Uniformity, sanctioning his Prayer-Book and its rubrics, begins, "Whereas in the first year of the late Queen Elizabeth there was one uniform order of common service and prayer." We turn to Elizabeth's Act of Uniformity, which begins with very similar words—"Where at the death of our late sovereign lord King Edward the Sixth there remained one uniforme order of common service and prayer." It is plain, then, that the object of the Act is to promote uniformity. Expressions, therefore, which might bear two meanings must be interpreted in a manner consonant to this object. Which is more consonant, that the ornaments should be settled directly by the Act of Edward, which gave them fixed rules, or indirectly by an Act of Henry the Eighth, which allowed every conceivable variety? It is clear that the second interpretation would defeat the statute.

We conceive that Dr. Pinnock's mistake arises from the carelessness with which the Rubric was drawn up and worded. He writes as if the clause "shall be retained and be in use as were in this Church of England," meant "as were retained and were in use." But this interpretation is by no means necessary. The "were" applies more properly to the words "by parliamentary authority," and does not of itself include previous usage. Still, the wording is not clear, and must be explained by reference to the facts and to the law. Dr. Pinnock twists both facts and law to this obscure wording, instead of looking to them for its explanation. He is so enamoured of his interpretation that he sacrifices to it the scope and purport of all the Acts of Uniformity. And what does he gain by it? Simply this, that he has no chance of a hearing save from those who are already on his side, and that he is put out of court as soon as the question comes to be really argued.

When we say that the Rubric was drawn up carelessly, we allude to something more than the wording. But as it does not justify a recurrence to the state of things before the First Prayer-Book, we do not mean that it errs in want of precision. What it errs in, is, in taking half a clause of Elizabeth's Act, and never inquiring to what that clause alluded. The Act of Elizabeth declared that such ornaments should be in use "until other order shall be therein taken by the authority of the Queen's Majesty, with the advice of her Commissioners appointed and authorized under the Great Seal of England for causes ecclesiastical, or of the metropolitan of this realm." The Rubric of Charles does not appear to have noticed this reservation, or to have decided what was exactly wanted. It merely adopted a clause that seemed to have worked well, and it left the ground open to subsequent disputes.

Hitherto the argument of the Ritualists has been, that they may wear copes and vestments by the permission of the First Prayer-Book; but now they are not content with this. They take Dr. Pinnock's line, and abandon the First Prayer-Book for the state of things which existed down to the second year of King Edward. By so doing, they cut their own throats. There may be some doubt whether they can claim the cope,—there cannot be the shadow of a doubt that they cannot claim the "use of Sarum" or the Provincial Constitutions. And if they themselves give up the First Prayer-Book, they will not find that any others will keep it for them.

There is another point, which has slipped out of Dr. Pinnock's memory. The Rubric may be

undecided as regards ornaments, but it gives no latitude as to ceremonial. The Act of Charles the Second is very positive on this head. All ministers are bound to say and use the "morning prayer, evening prayer, celebration and administration of both the sacraments, and all other public and common prayer, in such order and form as is mentioned in the said book annexed and joined to the present Act." This of itself settles the further pretensions of the Ritualists, and disposes of many of their ornaments; for, as the purely Roman ornaments are unmeaning without much alteration of the English ceremonial, there is only a choice between what is unmeaning and what is illegal.

We have no wish to see Ritualism put down by law. We fully agree with the noble words of Dean Stanley, that the vestments matter little, but the zeal shown in the cause of religion is of great importance. Only we do not wish it to be supposed that Acts of Uniformity countenance every variety of usage, and that appeals to the legislation of a certain year can be made to cover the absence of legislation in the years preceding.

Stonewall Jackson: a Military Biography. With a Portrait and Maps. By John Esten Cooke. (New York, Appleton & Co.)

Life of Lieut.-Gen. Thomas J. Jackson (Stonewall Jackson). By Prof. R. L. Dabney, D.D. Vol. II. (Nisbet & Co.)

Of writing about the most popular and successful of the Southern chieftains there is no end. As soon as we lay aside one memoir of his career, another is put into our hands; and, unless rumour is at fault, many biographies of the same hero are still in course of preparation for the press. Of the two sketches now upon our desk—both of them by writers who served under the General and enjoyed excellent opportunities for studying his character—each has its own good points, but neither makes any important addition to our knowledge of the soldier.

Possessing considerable ability, Capt. Cooke re-tells with completeness and force the story of Stonewall Jackson's brief and glorious course from comparative obscurity to an honourable grave; but, notwithstanding its meritorious qualities, his book confirms our opinion that enough has been written about the gallant commander in recognition of whose military instincts and services no language can be too emphatic. Even to those who cherish the deepest veneration for General Jackson, it must by this time be apparent that he is a poor subject for biographic art. The interest of his career lies altogether in its last two years, and the incidents of that closing period of an honourable life are affairs of national rather than personal history. Apart from his profession, in which he was conspicuous for no great length of time, even his most prudent eulogists admit that he was an awkward, prosaic person,—amiable, manly, and thoroughly respectable, but in no respect an actor who would have been deemed worthy of historic honours, or meet to figure as the hero of a tale, had he died before the outbreak of the rebellion. As soon as he fell, he was made the subject of many memoirs, which created a general impression that the record of his battles would be the only story of the quarrel that would have any permanent value; and this judgment has not been discredited by any later attempts at a literary portraiture of the man. Occasionally Mr. Cooke gives us a new anecdote; but in outline, and in the picture on his canvas, he gives us a familiar likeness.

Here is a favourable specimen of the style of the personal narrative:—

"He was by nature kindly, and on many occasions displayed an exquisite sense of true courtesy, and spoke very nobly. Just before Chancellorsville, while riding with General Lee, he met Col. Wickham, of the cavalry, who received some instructions from General Lee as to the disposition of his force. When General Lee had finished, Jackson said, 'Colonel, there is a gap in the line yonder; General Wright is too much to the left. Tell him to close up with your cavalry.' Col. Wickham looked at the speaker, whose dress exhibited no evidences of his rank, and said, 'From whom shall I say the order comes, sir?'—'Why, Colonel,' said General Lee, 'don't you know General Jackson?' Col. Wickham bowed and replied, 'I did not, General. I keep with my command, and never before had the pleasure to meet or know you, General Jackson.'—'But I know you, Colonel,' replied Jackson, with the bow of a nobleman and his most winning smile. * * He was very simple and unostentatious in his manners and habits; used neither tea, coffee nor tobacco, and never touched spirit, except as a medicine. When he was sick one day, Dr. M'Guire, his surgeon, gave him some whisky, and he made a wry face in swallowing it. Dr. M'Guire asked him if it was not good, when he replied, 'O yes, very good. I like liquor, both the taste and the effect, and that is the reason I don't drink it.' He cared not what he ate, and would sleep in a fence corner with perfect content. There was never a greater sleeper. His physical constitution seemed to require it, and he would drop asleep under a tree, in his chair, or in the saddle on a march. 'If his rest was broken for one night,' says Dr. M'Guire, 'he was almost sure to go to sleep upon his horse if riding next day.' On one of these occasions, when he was swaying uneasily with the movements of his horse, a soldier who did not recognize him called out and asked facetiously 'where he got his liquor.' The noise woke the General, and he laughed heartily. His propensity for lying on the ground had much to do with the dingy appearance of his uniform. His old coat was covered with dust collected from the battle-fields of many regions, as he slept upon the earth, in rude bivouac, after the hard-fought day. All this endeared him to his soldiers, at whose camp-fires he would stop to talk in the friendly fashion of the officers of Napoleon, and whose rations he would frequently share. The sight of his faded coat and cadet cap was the sign to cheer, and 'Old Jack' was personally adored, as in his military capacity he was regarded by his men as the greatest of leaders. Even his peculiarities became sources of popularity, and endeared him to his troops. It was said of Suwarrow that his men mimicked him, gave him nicknames, and adored him. It was the same with Jackson. His troops laughed at his dingy old uniform, his cap, tilting forward over his nose, his awkward strides, his abstracted air, and christening him 'Old Jack,' made him their first and greatest of favourites. There was one peculiarity of the individual, however, which they regarded with something like superstition. We refer to the singular fashion he had of raising his arm aloft, and then suddenly letting his hand fall at his side. On many occasions he made this strange gesture as his veterans moved slowly before him, advancing to the charge. At such moments his face would be raised to heaven, his eyes closed, and his lips would move, evidently in prayer. The same gesture was observed in him, as we have seen, at Chancellorsville, whilst gazing at the body of one of his old command."

However these details are construed, they are interesting, and none more so than the need for much sleep, which distinguished the soldier whose rapid movements and startling appearances at points from which he was supposed to be far distant, encouraged the impression that he required less repose than ordinary mortals. In his account of the calamitous blunder which closed for ever the eyes of this immoderate sleeper who caused so much anxious wakefulness at Northern camp-fires,

Mr. Cooke thus notices a circumstance that is unmentioned in most accounts of the disaster:—

"The firing had ceased as suddenly as it began, and Jackson was back in the road near the spot where he had received the first volley. None but Capts. Wilbourn and Wynn, of the signal corps, were present now; the rest were dead or scattered. But some one was seen sitting on his horse by the side of the road, and looking on, motionless and silent. This unknown individual was clad in a dark dress, which strongly resembled the Federal uniform; but he was directed to 'ride up there, and see what troops those were,'—the men who had fired the volleys. The stranger slowly rode in the direction pointed out, but never returned. Who this silent person was, is left to conjecture."

To glorify his hero is the avowed object of the author, whose volume concludes with these words: "He sleeps now, cold to praise or blame; but a poor writer, proud to have touched his hand and followed him, offers this tribute to his illustrious memory." Upon the whole, however, Mr. Cooke effects his purpose with fairness, neither displaying any want of generosity to his opponents nor making extravagant claims for the heroes of his own side. But though his work is sufficiently truthful on all matters of importance, it contains more than a few stories concerning the genuineness of which we have our doubts. "Hence," says the biographer with respect to one feature of the commander's military policy, "his inscrutable mystery. He would not permit his men to inquire the names of the towns through which they passed; and on the march against General M'Clellan at Richmond, issued that order directing the troops to reply 'I don't know' to every question. He said that if his coat knew what he designed, he would take it off and burn it."—The same sentiment was more happily expressed by Wellington, who used to say that "if his own hair discovered his secrets, he would shave and wear a wig."

Introducing himself as the official and authorized biographer of the General, Dr. Dabney announces that he reluctantly undertook his onerous task at the request of "the widow and family of General Jackson, supported by the urgency of his successor in command, Lieut.-General Ewell, of his venerable pastor, and of many other friends in and out of the army." Moreover, he informs us that he was permitted to examine "the correspondence of General Jackson with his family, his pastor and his most prominent friends," and was furnished "with copies of all the important official papers on file in the War Department of the late Confederate Government." But though the Doctor enjoyed these and other special advantages, he tells us very little that is new, and, upon the whole, is less successful than Mr. Cooke as a delineator of the hero's moral and intellectual characteristics. In one respect only does he differ greatly from previous writers, and on that point the evidence is so directly opposed to his representations that we are inclined to think that, after the fashion of official biographers, he must have been more anxious to gratify the members of a private circle than to tell the unvarnished truth, when he resolved to divest his hero "of those bizarre traits which the popular fancy loves to find in its especial favourites," and to relieve him of all those quaint and ungainly peculiarities which were amongst his most prominent though least important features. But though we are compelled to question his sincerity on this matter, we would cast no doubt on the general honesty of the writer, who proclaims himself a partisan unconverted by defeat, and frankly intimates that his readers had better exercise their judgment in making due allowance for the strength of his prejudices and the violence of his political

antipathies. Scarcely less amusing than this candour is the ingenuity with which he finds in every event an occasion for glorifying his own side. When the Southerners are defeated, the disaster is invariably attributed to the overwhelming numbers of their enemy; when they gain a victory, the success is attributed solely to their patriotism and valour, which, under the guidance of consummate generals, enabled them to wrest a triumph for adverse circumstances. Even the Doctor's account of the evacuation of Winchester concludes with an intimation that if Jackson had not been persuaded against his judgment to make the retreat and relinquish his plan for a night attack, he would assuredly have made the Northern cowards fly in terror before his troops. "The Federalists found not a single prisoner, horse, musket, or waggon, to enrich their conquest. The citizens of Winchester, who saw their nervous timidity at the thought of Stonewall Jackson's proximity, and their ignorance of his real numbers, were convinced that, had the night attack been made, they would have been utterly routed." There is sometimes consolation for the fallen in imagining what might have taken place if that which did take place had not taken place; but it is not often that an historian ventures to record such consolatory imaginations to the credit of his chosen hero. Having thus given honour to Jackson for a battle which he *might* have won, the biographer, in another part of his volume, glorifies the chieftain at the expense of his men, by arguing that, at a time when he was supposed to have a numerous army under his command, his force had been largely reduced by desertion, straggling and other consequences of bad discipline. Hence the reader is led to magnify the heroism of the faithful few who maintained the contest under every variety of discouragement.

Describing the state of Lee's army at the battle of Sharpsburg, the Doctor says:—

"Here, then, was one explanation of the imperfection of General Lee's victory. Another, more important, was in the miserable vice of straggling, which the mistaken good nature of officers had fostered. For in this army, so heroic as a body, there were two elements commingled,—the precious metal and the vile dross,—the true patriot, citizen-soldier, animated by a high principle, and the base skulker, who did nothing save under compulsion. The great vice of the Southern armies was on this occasion prevalent: that the ignorance of the practical details of duty among officers, with the easy *bonhomie* of their character, remitted the bonds of discipline; so that the base were not compelled to act with the true, as one body. The losses of the army from straggling had begun upon the Rappahannock. When it moved thence against Pope, at Manassas, the country behind it was left infested with thousands of laggards and deserters, who preyed upon the substance of the citizens, and wandered about, with arms in their hands, defying arrest. At every stage of the march this depletion increased, until, at the final struggle, there were fewer Confederate soldiers in line of battle, along the Antietam, than there were along the course of the Potomac, and the roads over which the army had marched. General Lee declares that the battle was fought with less than forty thousand men. The confusion reigning in many parts of the army makes an accurate enumeration for ever impossible. But the highest estimate made by well-informed actors in the scene gave him thirty-three thousand effective men."

Of the firmness and prompt resolution with which Jackson checked, in the "Stonewall" brigade, the demoralization which unquestionably prevailed to a very great extent in several sections of the Southern army at a comparatively early period of the contest, a good illustration is found in the following anecdote:—

"One incident remains to be mentioned, illustrating Jackson's iron will, which occurred while the army paused on this march, at M'Dowell. A part of the men of the 27th regiment, in the Stonewall Brigade, who had volunteered for twelve months, now found their year just expired. Assuming that the application of the late conscription to them was a breach of faith, they demanded their discharge, and laying down their arms, refused to serve another day. Their gallant Colonel, Grigby, referred the case to General Jackson for instructions. On hearing it detailed, he exclaimed, his eye flashing, and his brow rigid with a portentous sternness, 'What is this but mutiny? Why does Colonel Grigby refer to me, to know what to do with a mutiny? He should shoot them where they stand.' He then turned to his Adjutant, and dictated an order to the Colonel to parade his regiment instantly, with loaded muskets, to draw up the insubordinate companies in front of them, disarmed, and offer them the alternative of returning to duty, or being fusilled on the spot. The order was obeyed, and the mutineers, when thus confronted with instant death, promptly reconsidered their resolution. They could not be afterwards distinguished from the rest of the regiment in their soldierly behaviour; and this was the last attempt at organized disobedience in the army."

When we say that the above story is the only new anecdote of Jackson that we have discovered in Dr. Dabney's volume, there is no need to add, that students desirous of further information concerning the General will not find much to satisfy their curiosity in the authorized memoir of the gallant and devout soldier.

English Church Furniture, Ornaments and Decorations, at the Period of the Reformation. As Exhibited in a List of the Goods Destroyed in Certain Lincolnshire Churches, A.D. 1666. Edited by Edward Peacock. (Hotten.)

MARVELLOUS must have been the bewilderment of a steady orthodox clergyman, in a remote district of England, during the changes which were crowded into some thirty or forty years in the middle of the sixteenth century. It mattered not "whatever king did reign,"—or queen either,—Henry, Edward, Mary or Elizabeth,—every one of them was continually turning over a new theological leaf, alternating forwards and backwards, now in this direction, now in that, "to one thing constant never." True, the fine old clerical gentleman whom we are imagining was still the Vicar of Bray—there was consolation in that; but—how he must have grieved over the hard fate which condemned him to live in a period in which everything that he was acquainted with was turned topsy-turvy! How he must have sighed over the recollection of the good old times before Wolsey began to meddle with the monasteries! Conceive a clerical worthy of the *Mumpsimus* class, or one like that other good man who, having the cure of three thousand souls, was somewhat maliciously asked by a Vicar-General at a visitation to explain the meaning of the word "function"—conceive, we say, the heaviness of heart with which an old doctor of that school of divines must have been oppressed, if in the year 1666—to which the book before us relates—he permitted his mind to revert to some of the changes which had been effected by that merciless deluge in the very vortex of which he, who admired quiet and rest above everything, had passed his whirligig existence! The monks, among whom he had probably picked up many an honest penny by serving their churches for them, were all gone, "black, white and grey, with all their trumpery." The Pope had followed them!—it had been a world of trouble to our old friend to scratch the name of his Holiness out of the mass-book. The Latin service was gone!

—he no longer stood at the altar as a sacrificing priest, but had to descend to a reading-desk, and lead the devotions of a body of worshippers according to a book, in which it must have been a great trouble to him even to find his place. Then conceive the loss of dignity, the wound to his personal vanity, inflicted by the deprivation of his beautiful garments. Any one who has seen a priest unlock his cope-box, and draw forth for admiration his vestments of white, red, green, purple, black, and perhaps other colours, of silk, and satin, and damask, and sarcenet, can imagine what a parting that must have been! How affectionately he smooths down the ruffled edgings of lace, and dwells upon the beauty of the embroidery, and all the other peculiarities of a frippery which excites his own self-conceit and makes him an object of envy and admiration to the silly women of his congregation. To be robbed of all these adornments was a calamity—a spoliation—which, to many men, must alone have made the Reformation hateful. Nor was the trouble lessened—far from it—when our old priest looked around upon his bare and empty church, denuded of the rood and the other images, and all those pretty little knick-knacks, those ecclesiastical playthings, which art and excellent workmanship rendered beautiful in their kind, and in the symmetry and costliness of which there was great rivalry between neighbouring churches. Where was the chrismatory for his holy oil, where the dear little boat for his incense, where the scaring and the sanctus bells, the splendid candlesticks, and especially the gigantic Easter post, the censers and the banner-cloths and the cross-cloths—where the many things which are termed, in one of the documents here published, the "trifling toys and trumpery" which had been deemed necessary accessories to the service of God?—all gone! For a few years these articles had, indeed, re-appeared during the reign of Mary, and an instructive chapter in the history of the religious feelings of the people might be written on the way in which the churches, dismantled of all this kind of ecclesiastical furniture during the reign of Edward the Sixth, were supplied again in the days of his successor. That gloomy and un-English reign at an end, and the preceding state of things restored on the accession of Elizabeth, what, then, became of all the renewed clerical stock-in-trade? Who succeeded to the priests' trappings? What was the fate of all the pretty little articles of *virtù* then scattered over the country? Did they find their way into the royal treasure-house, into the collections of the curious, or to the dealers, or where else?

The book before us answers these questions with respect to about 150 parishes in Lincolnshire. We will give a few extracts, which will show the nature of the answers and the character of the documents, which, it will be observed, are churchwardens' returns. We modernize the spelling.—

Alford. The rood, Mary and John, and all other pictures [*i.e.* images], brent.—The censers, cruets, and such like trash was sold by the churchward[ens] and defaced.

Ashby juxta Seaford. A cope, which we borrowed of Mrs. Stringar of Darbie, and restored to her again, *anno primo Elizabethæ*, not defaced.

Ashby juxta Spilaby. Our rood, with Mary and John and the rest of the popish pictures, *anno primo Elizab.*, was brent, Thomas Goodchere and John Bowghe then being churchwardens.—Rood-loft, sold *anno tertio reginæ*, which is defaced.—Our mass-book, with all the rest of the popish books, brent by the churchwardens.—Altar-stones, broken, *anno secundo Eliz.*—One vestment, with cross-cloths, given to the poor, *anno tertio Eliz.*—An alb, whereof we made a surplice.—One holy water stock, whereof is made a mortar.

Aslackby. One altar-stone, laid upon a grave and so continueth.—The pixes, the cruets, and the pax, defaced in the second or third year of the Queen's reign that now is, upon our oaths.—The mass-books, the processioners, the manual, and all such peltry of the Pope's sinful service, was made away, torn and defaced in the second or third year of the reign of our sovereign lady that now is.

Aswarby. All the mass-books, and all books of papistry, were torn in pieces in *anno primo Eliz.*, and sold to pedlars to lap spice in.—One cruet, cruste [crushed] in pieces, and sold to a plumber for solder.—One chrismatory, sold to a tinker, but it was first broken in pieces.

Bardney. One mass-book and all the other popish books were taken away by one Sir Robert Cambrige, which was our priest, and what he hath done with them we cannot tell.

Barholm. A rood, Mary and John, were burnt before the parish in the first year of the reign of the Queen's Majesty that now is.—A pix of latten and an old cloth, destroyed before the parish in the said first year.—An altar-stone broken in the said first year.

Barrowby. The rood, Mary and John, and all other images of papistry, burnt by the whole parish in 1561.—One cross-cloth, sold to Mrs. Thimbleby, and she hath made a cushion thereof.—[Mr. Peacock's researches have drawn to light three Mrs. Thimblebys, all living in 1566. Which was the naughty Mrs. Thimbleby he cannot decide.]

Belton juxta Grantham. A rood-loft, taken down and part of it given to poor folk, and the other part occupied about the mending of the pinfold gates and the churchyard gates.

Bickfield. Two altar-stones, broken in pieces, *anno Eliz. primo*, which altar-stones lieth on Broad Bridge to bear up the bank.

Billingborough. One cope remaineth in our parish church with a surplice and five towels, which we occupy about the communion; but all the trumpery and popish ornaments is sold and defaced, so that there remaineth no superstitious monument within our parish church.

Birton. Two albs and two linen sheets, cut in pieces, and given to three poor women.—One sacring bell, William Eland had, and hung it by his horse[s] ear a long time; but now it is broken.

Bradley. One altar-stone, broken and laid in the highways.

Braunton. To Robert Bellamy, two corporasses sold this year, whereof his wife made of one a stomacher for her wench, and of the other, being ripped, she will make a purse.—A mass-book, a grill, a portees, and a manual, cut in pieces before my Lord of Lincoln, four years since, when he was there and preaching.—[This was Bishop Nicholas Bullingham.]

Castle Bythe. As for mass-books and other books of papistry, we had none but that we borrowed of our vicar, which he had again at the time of the defacing of all papistry, which vicar is now dead.

Croaby. Rood, Mary and John, were burned the last year, to make a plumber fire, which mended the church leads.—Two altar-stones; one Mr. Sheffield hath made a sink of in his kitchen, and the other maketh a bridge in that town.—A cross-cloth, sold to a poor woman for 1d.

Deeping James. The image of the rood with Mary and John and all other images of superstition were burned by the churchwardens in the face of the whole parish, *anno 1560*.—Three copes sold to two men of Leicester for the sum of 20s., which money was debt to the poor of the same parish, and defaced.—Two old copes and two old vestments sold for the sum of 5s., and bestowed, *anno 1562*, in the setting forth of soldiers to Newhaven, and defaced.—One cross-cloth and two hand-bells, sold by the said churchwardens *anno 1562* for the sum of 20d., and the money bestowed upon shows, and given to a poor child within the parish; defaced.

Dowsby. One vestment, one alb, with all things thereunto belonging, sold to Robert Warren, one of the churchwardens, who defaced it, and thereof made necessary things for his children, and cushions for his house, and hangings for his bed.—One altar-stone, paved on the top of a grave, and part of it broken.

Dunsby. The rood-loft was taken down by the churchwardens, and sold to the whole parish, and they have made bars and rails for a bridge thereof.

Durrington. Sepulchre was broke and sold to William Storre and Robert Cappe, who have made a hen-pen of it.

Edenham. All mass-books and other books serving for idolatry before the time of King Edward were, by Mr. Gilby, being parson here, defaced and burnt before Queen Mary's reign.

Everby. 16 candlesticks, 2 hand-bells, a holy water stock, and two crosses, were all broken, saving the candlestick, and sold to one Cuthbert, a pewterer, of Lincoln.

Folkingham. We had neither mass-books, grayles, legends, couchers, and but only one portuis, which was carried from Folkingham by one Sir John Tyson, for all other were rent, burned, and utterly destroyed in King Edward's days, and never any other bought by the parish.—The rood-loft, besides the images, were sold in 1560.—The images belonging to the same rood-loft, as the image called the rood, Mary and John, with another image called St. Andrew, were burnt in the same year by the churchwardens.—The other ornaments, as two copes, crosses, a pax, a chrismatory, a pix, a pair of censers, a ship of brass to put frankincense in, two candlesticks of brass, and one cruet, were sold in the forenamed year to one John Townsend, tinker, dwelling in Haconby, who brake them in pieces, and put them to other profane uses.

Gonwarby. All the priest's apparel that he was wont to wear at mass, cut in pieces *anno primo Eliz.* and sold to William Carter, tailor.

Grantham. The rood-loft stood up in carved work in the first year of the Queen's reign, and was broken down and sold to the use of the poor.—The rood, Mary and John, and all other idols and pictures, mass-books, legend-books, and all other papistical books and ceremonies, was openly burned at the Market Cross.—The vestments, copes, albs, tunicles, and all other such baggages was defaced and openly sold, by a general consent of the whole corporation, and the money employed to setting up desks in the church, and making of a decent communion-table, and the remnant to the poor.—Two chalices of silver, their patens, and a silver and copper shrine called St. Wulfran's shrine was sold, and bought with the price thereof a silver pot, parcel gilt, and a ewer of silver for the ministration of the holy and most sacred supper of our Lord Jesus Christ called the Holy Communion.

Horbling. The rood-loft sold to two persons who had made a weaver's loom thereof and windows and such like things.—Two vestments, one hath Thomas Wright and hath cut it in pieces and made bed hangings thereof, and the other was given to Richard Colson, a scholar, and he hath made a player's coat thereof.

Oneby. One pillow which lay on the altar given to a maid to make her a stomacher of.

Stallingbrook. A cross-cloth, sold to players, who defaced it.

Tallington. Two altar-stones, given to the mending of Tallington bridge.—Two banner-cloths, sold to John Wright, which painted them, and made cloths for to hang his hall with."

Such was the fate of these "monuments of superstition." Our extracts tell the tale with sufficient distinctness. It is one from which we might deduce many inferences, but we prefer to deal only with the historical facts; others may point from them the morals which they clearly teach.

The editor's work would have been more complete if, instead of his reflections, which might have been beneficially curtailed, he had given us, in his Introduction, a general account of the class of documents to which these returns belong, with some information respecting the peculiar circumstances which called forth this particular inventory. Passages in his text make us occasionally doubt whether his manuscript has been copied with sufficient care, and his use of what is called record type is strangely inaccurate. These peculiar characters have definite meanings. Each one of them indicates not

merely that letters are omitted, but that certain letters are omitted. To use them in improper places is therefore tantamount to absurd misspelling.

The author's glossarial notes are extremely useful. He explains the nature and uses of the various articles mentioned in his text with the knowledge and feeling of a Roman Catholic, but (greatly to his credit) without an atom of bitterness. The following respecting Holy Bread contains facts which will probably be new to many people. We do not agree with the author's reasoning respecting the non-responsibility of the Church for the superstitions which it incorporated into its system; but it is right that the Roman Catholic view of these matters should be known.—

"The holy bread has sometimes been confounded by moderns with the eucharistic bread, but the two were quite distinct. No writer, Protestant or Catholic, of the Reformation period, ever confuses the two. Unleavened bread in the wafer form was alone used in the holy communion from the days of St. Augustine until the publication of the Prayer-Book in 1552. The holy bread, holy loaf, or Eulogia, was ordinary leavened bread blessed by the priest after mass, cut up into small pieces and given to the people. It was also customary for women, when they came for their purification or churching after childbirth, to have some of this blessed bread given to them. The words of blessing varied in different churches; the following is the Roman form:—'*Domine Jesu Christe, panis angelorum, panis vivus eternæ vitæ, benedicere dignare panem istum, sicut benedixisti quinque panes in deserto, ut omnes eo gustantes, inde corporis et animæ percipiant sanitatem.*' This holy bread was frequently, in early times at least, carried home by its receivers. The religious feelings of the people led them to believe that miracles were often wrought by its agency. Thus we are told by Bede, that when a certain Hildmer, an officer of King Eadfrid's court, was confined to his bed by a sickness that his friends thought mortal, one of them gave him a cup of water in which was a little fragment of a holy loaf blessed by St. Cuthbert. As soon as the water was swallowed, the pain in the sick man entirely departed, and ere long he was restored to robust health. Imaginative legends such as this, the offspring of a time when medical science, as we understand it, had no existence, were the result of forces that had been in operation long before Christianity was planted among us. The Church was not responsible for them any more than she was for the darkness or the poetry of the times on which she worked; but it is owing to her influence that imagination did not harden into a fixed creed or degenerate into magical dogma. One of the demands of the Devonshire men who rose in rebellion in the year 1549 for the restoration of the religion of their youth, was, 'We will have holy bread and holy water every Sunday'; and when these same rebels marched to lay siege to Exeter, they bore before them the host under a canopy, with crosses, banners, candlesticks, holy bread and holy water. Foxe, the Martyrologist, has preserved for us the words which Hugh Latimer was accustomed to use when he gave the *Panis Benedictus* to his parishioners:—

Of Christ's body this is a token,
Which on the cross for your sins was broken;
Wherefore of your sins you must be forsakers,
If of Christ's death ye will be partakers."

Like a true antiquary, the author draws into his notes a good deal of genealogical matter, with a few pedigrees (his own, of course), hanging them upon the briefest mention of some Lincolnshire people in his text. The particulars which are thus given are often useful, but who would ever dream of finding them in a collection of Lists of Church Furniture? Who would look in such a book for particulars respecting Kelham, the author of the Norman Dictionary and the book on Domesday, —or of Ferne, who wrote the 'Blazon of Gentrie,'—or of other worthies of the times of the Tudors and Stuarts? Who, for example, would

turn to such a volume for a discussion on that difficulty in legal biography, the parentage of Sir Christopher Wray, the Lord Chief Justice in the reign of Elizabeth? It seems that a "Mr. Wraye" bought three of the vestments which belonged to the parish of Glentworth. Our editor plunges thereupon into the question of Sir Christopher's birth. Mr. Foss states the difficulty, and abandons it in despair; Mr. Peacock thinks he solves it by the help of heraldry. Rumour has it, that the Chief Justice was a son of "Sir Christopher Wray, the parson of Hornby," his mother unknown, and he brought up at Bedale by a brother of his priestly father. This uncle married a Jackson. Mr. Peacock finds that the Chief Justice in his heraldic bearings quartered the arms of Jackson. He deems this quite conclusive. "If he had been the bastard son of" the parish priest, the editor remarks, "he would, in fact, have had no right to coat armour at all; whereas, if he were the legitimate issue of Thomas Wray, by his wife, a co-heiress of the Yorkshire family of that name, it was natural for him to do so." With all submission to Mr. Peacock, we think it very natural in either case. Legitimate or illegitimate, when the Lord Chief Justice wanted arms,—indispensable for a gentleman in those days,—would it have been "natural" for him to have proclaimed his own illegitimacy and to have sued to the heralds for a coat, or quietly to have assumed those of the uncle and aunt by whom he had been brought up, who were to him as father and mother, and in all probability were so termed by him, even if he knew that such was not their actual relationship? As to any difficulty with the heralds, we take it that the gentlemen of that College often, in those days, found it necessary to treat little family secrets very tenderly. He would have been a bold herald who would have raised the question of "right" with the Lord Chief Justice.

Differing from Mr. Peacock on many points of opinion, we yet commend his book, as containing curious facts applicable to a variety of important subjects.

OUR LIBRARY TABLE.

A Shilling Book of Old Testament History for National and Elementary Schools. By the Rev. G. F. Maclear, M.A. (Macmillan & Co.)

THIS is an attempt to give a brief summary of Old Testament history from the Creation till the reforms of Nehemiah. And the attempt is not unsuccessful. The author has put a great quantity of matter together in a very small compass, clearly and lucidly arranged. Everywhere the narrative in the Old Testament is taken literally, and treated as though it were infallibly correct. The author seldom explains, but adheres to the words or obvious sense of the text. Sometimes he throws in a phrase or two by way of elucidation; sometimes, and oftener, not. To write a shilling book like this correctly and well requires a good knowledge of the results of modern criticism, otherwise wrong ideas will be countenanced or given. We doubt whether the author knows enough to avoid the inculcation of erroneous views both by what he says and by what he avoids saying. His little book might have been better executed had he explained the words of Scripture where they are ambiguous, instead of merely repeating them; and if he had inserted more of the principal dates. Could he not have given his own view of the history as he goes along, especially if that view be the one which criticism has fairly established? In this way he would have taught much more than he does. As an instance of culpable reticence we take Jephthah's vow, where the language of Scripture is simply retained, instead of its being said that the daughter was sacrificed. The poetical language of Joshua commanding the sun to stand still is also given as prose, without a hint of the quotation of it from

the book of Jasher. Many of the remarks are incorrect. Thus of Solomon's songs it is said that the Song of Songs alone remains. Ecclesiastes i. 12-18 is referred to in proof that Solomon confessed the vanity of his life in his latter days. After stating that the creation of the world took place in six days, "or periods of time" is appended, which is wrong. *Lamech* is interpreted *powerful*, and *Manasseh* *forgetter*. The age of the Book of Job is said to be unknown, whereas it is well ascertained. Darius the Mede is called, without a shadow of authority, Cyrus's "viceroy." Of course the compiler's standpoint leads him to narrate as historical all that is contained in the Books of Daniel and Esther; and to repeat that Cain built the first city, in the land of Nod. But with all its drawbacks, and they are many, the 'Shilling Book of Old Testament History' is likely to be useful. With a good teacher to supplement the information and to expound what the author leaves as he found it, it will save time and trouble. It cannot be followed implicitly, nor does it meet the requirements of the day. Neither shilling books nor larger ones should be pitched in a key which scholars disallow.

The Student's Manual of Modern History, containing the Rise and Progress of the Principal European Nations, their Political History and the Changes in their Social Condition; with a History of the Colonies founded by Europeans. By W. Cooke Taylor, LL.D. New Edition, revised and edited by C. Duke Yonge. (Longmans & Co.)

Dr. Taylor's Manual for Students of Modern History is one of those excellent works which needed an able editor to continue the narratives which it tells so skilfully. The Manual is not a cramming book; it is a collection of *résumés* of history, which are of great value to those who wish to keep in memory the leading facts of which they have read in works of great detail. No man could write such a manual who had not great powers of condensation and of explaining clearly all that was condensed. These are very rare powers, but they were possessed by the late Dr. Taylor, and they distinguish Mr. Yonge. The latter gentleman has shown equal judgment in what he has omitted of the old edition, and what he has added in the new.

A Synopsis of Heraldry; or, a Short and Easy Method of Acquiring the Art of Blazon. With upwards of Four Hundred Engravings illustrating the Arms of many Families. By C. N. Elvin. (Hardwicke.)

THERE was a time when a man who could not read a coat of arms was held to be without the knowledge that became a gentleman. If a gentleman had few books, one on heraldry was sure to be among them. The time has gone by when such a circumstance settled a man's character; but the numerous works published on heraldry show the interest that is still taken in the subject. It is a subject which, we hope, will continue to meet with favour. In Mr. Elvin's Synopsis, the learner will find great assistance. It may even be profitably referred to by persons who read descriptions of shields, the terms used in the blazoning of which, he will find explained as in a dictionary. With this Synopsis, Cussan's Grammar, and Dr. Barrington's Lectures, the student will be able to enjoy Boutelle, and hold up his head with Garter, York, Somerset, Rouge Croix, or any other of the gentlemen of the dignified College of Heraldry.

Food for the Celestials. By Sir Crank Fitz-Crank, Bart. (Ward, Lock & Tyler.)

THE title of this book is the funniest part of it, and that is not saying much. The oddity of the name consists in its having nothing at all to do with the contents. The book may be described as the story of an eccentric young man, who, having been accustomed in joke to represent himself as being many hundred years old, is taken at his word by the learned Professor Swigwiffer, who sincerely believes him to have lived in mythological ages, and to have been on familiar terms with the heroes of the Iliad. The German Professor has long indulged in a theory that there are numerous people of the "Wandering Jew" description mixing in society under various disguises,

and he is most anxious to decapitate Sir Crank Fitz-Crank, and to ascertain his age by "counting his rings," like those of a veteran oak. To this proceeding Sir Crank decidedly objects, and he wholly refuses to credit the Professor's assertion that he can "vancouver" heads on again without any inconvenience to the owner. Finding the Professor resolute, he seeks safety in flight; but the "Swigs" or "Wiffers," the disciples of the learned antiquary, are legion, and he is in peril wherever he goes. Such is the conception of the book, and it is an idea of quaint originality, out of which much nonsensical fun might be made. But the author has mistaken his vocation; his power does not lie in exciting the risible muscles of mankind.

We have on our table, *Novum Testamentum, Græcè, in Usum Scholarum, ad Fidem Testium Antiquissimorum recensuit* Thomas H. Candy, B.D. (Rivingtons).—*Selections New and Old*, with a Preface by the Right Rev. the Lord Bishop of Oxford (Masters).—*Discourses on the Lord's Prayer*, by Caleb Webb (Houlston & Wright).—*Godly Meditations upon the most Holy Sacrament of the Lord's Supper*, by Christopher Sutton, D.D. (Parker).—*Reflections concerning the Expediency of a Council of the Church of England and the Church of Rome being holden, with a View to accommodate Religious Differences, and to promote the Unity of Religion in the Bond of Peace*, by Samuel Wix (Church Press Company, Limited).—*The Everyday Companion*, Part II., from Whitsuntide to Advent, by the Rev. W. H. Ridley, M.A. (Parker).—*New Editions of Knowledge is Power*, by Charles Knight (Bell & Daldy).—*The Sea, the Railway Journey, and other Poems*, by the Rev. Edward Dalton, D.D. (Dalton & Lucy).—*The Inductorium, or Induction Coil: being a Popular Explanation of the Electrical Principles on which it is constructed, with a Description of Experiments illustrative of the Phenomena of the Induced Current*, by Henry M. Noad (Churchill).—*An Old Acquaintance*, by Frank Foster (Snow & Co.).—*A Bad Beginning*, by K. T. Macquoid (Smith & Elder).—*Gilderoy: a Scottish Tradition*, by Robert S. Fittis (Routledge).—*Moods*, by Louisa M. Alcott (Routledge).—*The Three Musketeers*, by Alexandre Dumas (Routledge). We have also the following Pamphlets: *A Sister's Love: a Sermon preached at St. Martin's Church, Liverpool, on the 14th Sunday after Trinity, 1866; being the Sunday after the Death of Sister Charlotte, of St. Martin's Sisterhood, Liverpool*, by the Rev. Cecil Wray (Rivingtons).—*The Prayers of Scripture*, compiled and adapted for Family Worship, by the Rev. C. R. Teape (Edinburgh, Grant & Son).—*A Plea for Tolerance toward our Fellow-Subjects in Ireland who profess the Roman Catholic Religion*, with a Prefatory Letter addressed to His Excellency the Earl of Kimberley, by Orlando T. Dobbin, LL.D. (Longmans).—*Hints for Harvest Services, and Notes for Harvest Sermons*, by John Baines, M.A. (Parker).—*The Signs of the Times; Democracy and the Brotherhood of Nations; Hints for whom they may concern*. No. I. England's Free Slavery. Dedicated to Government (Hall & Co.).—*Treaty of Alliance against Paraguay; signed on the 1st of May, 1865, by the Plenipotentiaries of the Oriental Republic of Uruguay, the Empire of Brazil, and the Argentine Republic* (Lucy & Gregory).—*How People manage Things in Manchester; or, Sir E. A. as a Trustee*, by John Burd (Printed for the Author).—*The Reformers' Reform Bill: being a proposed New and Complete Code of Electoral Law for the United Kingdom*, by Montague R. Leverson (Trübner).

LIST OF NEW BOOKS.

Bacon's Theory of Colouring, 12mo. 2/6 cl.
Carpenter's Six Months at the White House, post 8vo. 7/6 cl.
Champer's Health and Longevity, 12mo. 4/ cl.
Child's Garland of Little Poems, 18mo. sq. 7/6 cl.
Collins's Critical Commentary on Old and New Test. vol. 3, 15/ cl.
Donald Cameron, or Trust winneth Troth, 18mo. 2/ cl.
Ellis (Lieut.-Gen. Sir S. B.), Memoirs of Services of, 8vo. 21/ cl.
Great Fun, Stories by T. Hood and T. Archer, 48 illust. sold. sq. 6/ cl.
Heiress of Blackburnfoot, 12mo. 1/ swd.
Hort's Henna, or Life in Tahiti, 2 vols. post 8vo. 21/ cl.
Kennedy's Legendary Fictions of the Irish Celts, cr. 8vo. 7/6 cl.
Lewis's English Language, its Grammar and History, fcap. 8vo. 1/6 cl.
Literary Pearls strung at Random, by R. A. M. fcap. 8vo. 5/ cl.
Macleod's Acheolic Diseases, Jaundice, &c. post 8vo. 5/6 cl.
Meadows's Dame Perkins and her Grey Mare, illus. by Philz, 5/ cl.
Meredith's Evan Harrington, post 8vo. 6/ cl.

Nora's Trial, 3 vols. post 8vo. 31/6 cl.

Old Picture Bible (The), 2nd series, large sq. 2/6 each, cl.
 Payne's Eclectic Medicine, 12mo. 1/6 cl.
 Platt's Anglo Lyons, 3 vols. post 8vo. 31/6 cl.
 Sansom's Arrest and Prevention of Cholera, 12mo. 2/6 cl.
 Shakespeare, Cambridge Edition, Vol. 9, 8vo. 10/6 cl.
 Smith's (H.) Sermons, Vol. 2, cr. 8vo. 4/6 cl.
 Stallard's Female Casual and her Lodging, cr. 8vo. 2/6 cl.
 Story of Nelly Dillon, 2 vols. post 8vo. 21/ cl.
 Walcott's Memorials of Bath and Wells, 8vo. 2/6 cl.
 Wedgwood, Life of, by Meteyard, Vol. 2, 8vo. 21/ cl.

LITERARY ANNOUNCEMENTS.

THE list of works announced as just ready, or forthcoming, by the Messrs. Longmans, is rich and varied. In Biography, we find the 'Life and Correspondence of Archbishop Whately,' by Miss E. J. Whately, and 'Some Account of the Life and Opinions of a Fifth-Monarchy Man, chiefly extracted from the Writings of John Rogers, Preacher,' edited by the Rev. E. Rogers. In History, we have 'The History of Philosophy, from Thales to the Present Day,' by G. H. Lewes, a new edition, re-written and enlarged, 'The History of France, from Clovis to Napoleon the Third,' by E. E. Crowe, Vol. IV. From the Revocation of the Edict of Nantes, 1685, to the Close of the Convention, October, 1795,—and 'Florence the New Capital of Italy,' by C. R. Weld. In Natural History, there are 'The Wild Elephant, its Structure and Habits, with the Method of Taking and Training it in Ceylon,' by Sir J. E. Tennent,—and 'A Hunter's Experiences in the Southern States of America, being an Account of the Natural History of the various Quadrupeds and Birds which are the Objects of Chase in those Countries,' by Capt. Flack (The Ranger). In Art, Science, and Philosophy, are to be enumerated 'Ure's Dictionary of Arts, Manufactures, and Mines,' re-written and enlarged by R. Hunt,—'Maudslayi's Scientific and Literary Treasury,' in great part re-written, with upwards of 1,000 New Articles, by J. Y. Johnson,—'Outlines of Physiology,' by J. Marshall,—'Six Lectures on Sound,' by J. Tyndall,—'Gwilt's Encyclopedia of Architecture,' by W. Papworth,—and 'McCulloch's Dictionary, Geographical, Statistical, and Historical, brought up to the latest returns,' by F. Martin. For religious study, there are 'The Acts of the Apostles, with Commentary,' by the Rev. F. C. Cook,—'Sunday Afternoons at the Parish Church of a University City,' by A. K. H. B.,—and 'Our Sermons: an Attempt to consider familiarly but reverently the Preacher's Work in the Present Day,' by R. Gee. Poetry yields an 'Illustrated Edition of Miss Ingelow's Poems,'—'The Æneid of Virgil,' translated into English Verse, by Prof. J. Conington,—and a 'Miniature Edition of Macaulay's Lays of Ancient Rome.' To Music are devoted 'An Introduction to the Study of National Music,' by C. Engel,—'Sacred Music for Family Use,'—and 'Part Music, Sacred and Secular, for Soprano, Alto, Tenor, and Bass,' both edited by J. Hullah. These, with 'Notes on the Folk-Lore of the Northern Counties of England and the Borders,' by W. Henderson,—and 'Occasional Essays,' by C. W. Hoakyna, close the Messrs. Longmans' list.

Among works of general or especial interest about to be issued by the Messrs. Rivington may be noted:—'Curious Myths of the Middle Ages,' by the Rev. S. B. Gould,—'Songs of the People,' by the Rev. A. Brodick,—and 'Some Account of the Bodleian Library, Historical and Descriptive,' by the Rev. W. D. Macray. One of Dr. Goulburn's popular single volumes is promised in 'The Acts of the Deacons,' and another may be looked for in 'The Distinctive Peculiarities of the Evangelists,' by the late Rev. J. T. Round. The Rev. H. Jones contributes to the list 'Priest and Parish,' and one of the offices of a priest when he gets there is treated of in a work 'On the Duty and the Discipline of Extemporary Preaching,' by the Rev. F. B. Zincke. A useful book is promised, by the Rev. O. Shipley, in 'A Glossary of Ecclesiastical Terms,'—the Rev. J. H. Blunt furnishes the concluding part of his 'Annotated Book of Common Prayer'; and 'A Christian View of Christian History,' 'The Bampton Lectures for 1866,' by the Rev. H. P. Seddon, are in preparation for publication; and to these works we may add the announcement of a new series of classical authors, commencing with twelve Books of the Iliad, and the Electra of Sophocles, the former edited by Mr. J. H. Rey-

nolds, of Brasenose, the latter by Mr. Jebb, of Trinity, Cambridge.

Messrs. Hurst & Blackett announce the following new works for publication in October and November:—'A Book about Lawyers,' by J. C. Jeaffreson,—'Annals of a Quiet Neighbourhood,' by G. MacDonald,—'Madonna Mary,' by Mrs. Oliphant,—'Lights and Shadows of London Life,' by the Author of 'Mirk Abbey,'—'Christie's Faith,' by the Author of 'No Church,'—'A Winter with the Swallows,' by M. Betham Edwards,—'My Pilgrimage to Eastern Shrines,' by Eliza C. Bush,—'Kingsford,' by the Author of 'Son and Heir.' The same publishers have also in preparation new works by the Hon. Mrs. Norton, the Author of 'John Halifax,' Miss Amelia B. Edwards, Miss Kavanagh, Mr. Hepworth Dixon, Mr. Mark Lemon, and the Rev. J. C. M. Bellaw.

Messrs. Churchill's literary announcements include, among entirely new works, 'Lectures on the Relation of Chemistry and Mechanics to Pathology and Therapeutics,' by Dr. H. Bence Jones,—'Emotional Disorders of the Sympathetic System of Nerves,' by Dr. W. Murray,—'Acholitic Diseases; comprising Jaundice, Diarrhoea, Dysentery, and Cholera,' by Dr. A. C. Macleod,—an English edition of Hirschfeld's 'Descriptive Treatise on the Nervous System of Man, with the Manner of Dissecting it,' by A. M. Macdougall: an Atlas of Coloured Illustrations, by J. B. Leveillé, is contained in this edition, which will be published in monthly parts,—'A New Method of Treatment for Cancer,' by Dr. W. H. Broadbent,—'A Manual of Comparative Anatomy,' by Prof. T. H. Huxley,—'Chemistry, Inorganic and Organic,' by Prof. C. L. Bloxam,—'On some of the more Important Diseases of the Eye,' by H. Power,—'The Indigestions,' by Dr. T. K. Chambers,—'Clubfoot,' by W. Adams,—'The Application of the Graphical Method to the Study of Diseases of the Heart and Great Vessels,' by Dr. B. W. Foster,—'Uterine Disorders,' by Dr. H. G. Wright,—'Treatises on Diseases of the Skin,' by Erasmus Wilson and G. Naylor,—Various Clinical Lectures and Hospital Reports,—'On Curvature of the Spine, and other Deformities of the Trunk and Upper Extremities,' by T. P. Salt,—'The Tropical Resident at Home. Letters addressed to Europeans on their return from India and the Colonies, on Subjects connected with their Health and General Welfare,' by Dr. E. J. Waring,—'Handbook of Local Anæsthesia,' by Dr. B. W. Richardson,—'On Epilepsy, Hysteria, and Ataxy,' by Dr. J. Althaus,—Vol. II. of 'Diagnosis and Treatment of Diseases of the Ovaries,' by T. S. Wells,—'On Apoplexy and Allied Affections of the Brain,' by W. B. Mushet,—'Clinical Histories, with Comments,' by Dr. H. Day,—and 'The Induction Coil: being a Popular Explanation of the Electrical Principles on which it is constructed,' by H. M. Nead, Ph.D.

For this week the above must suffice; with the next we may afford additional proof that for the coming winter there will be ample provision for the thought, amusement, and improvement of mankind.

THE WORKMEN'S EXHIBITION AT ISLINGTON.

SOON after the Industrial Exhibition of the City of London Working Classes, in the Guildhall, in the spring of the present year, the prospectus of another exhibition, on a larger and more extended scale, appeared, and a "Metropolitan and Provincial Working Classes Exhibition and Industrial Festival" was announced to take place in the Agricultural Hall, at Islington, in the autumn. Contributions of skilled workmanship and amateur productions were requested from all parts of London, the provinces, Scotland, Ireland, and the colonies; and the principal railway companies undertook to return unsold goods free of charge. Prize medals were to be awarded, the sale of articles exhibited was to be specially encouraged, small workshops were to be fitted up for those who desired to manufacture and sell, lectures were to be delivered, *conversazioni* and flower-shows held, choral and musical entertainments to be given, and an Art and Industrial Union was to be established for the sale of articles the exhibitors might desire to dispose of. What, too, gave as much, perhaps

more, promise even than this extensive programme, was the fact that the Executive Council consisted of men of sufficient position in society to be looked up to by the working men amongst themselves, and yet neither removed nor dissociated from their own class. The promise of success has been realized, and the great Hall has been well filled with objects of interest.

The combination of a workmanship exhibition with an industrial festival must necessarily, it may be thought, make the criticism of the institution almost as bizarre as the collections displayed and as the characters of the entertainments; but in reality there are two directions in which criticism may be fairly and legitimately pursued to its ultimate ends. In the first and highest place is the judgment of the absolute merits of works of skill; in the second the charitable and encouraging views to be taken of the works of amusement and recreation.

Taking first the skilled workmanship, we have altogether to express greater satisfaction than we could conscientiously have done in regard to any previous display of the same character. Unless the working men can or will employ the manufacturer's machinery, they cannot, in their special exhibitions, compete in the excellence of their productions with the grand types and examples in international exhibitions; and the consequence will be that the highest and best branches of workmanship will be unrepresented, and the objects displayed will be confined mainly to a few classes, for which manual labour, and not machinery, is best adapted. This fact is prominent at the present time at Islington, the main mass of meritorious objects consisting of models, carpentry, and hammered iron-work, wood-carving, metal-chasing, and the like results of absolute manual dexterity. Many of the models convey original ideas of much utility, most of them are exquisitely finished; and there are higher flights towards machinery of a practical nature which cannot but produce future better results, not merely in future exhibitions, but in the workshops of the world. Mr. Harvey, for example, produces a model of a mast-making machine, which appears to have many claims to admission into our ship-building yards; and the planing-machine devised by Mr. Munro will probably hereafter exert more influence upon the productions of the smaller tradesmen's workshops than anything that has been devised for many years, especially in respect to ordinary iron-work and metal fittings. No filing, no hammering, no repeated succession of cuts or blows will ever produce the same clean effects as the plane, and up to the present time all metal-planing has been done by steam-power. Here, however, the common treadle or the fly-wheel is applied as the motive power, and the cutter, plough or plane, and the travelling bed are conveniently fitted, as it may be said, to an ordinary bench. The apparatus may stand in any workshop, costs nothing for fuel, and all small work may be turned out by it as effectually as by the more costly machinery of the steam-factory.

The railway-switch of Mr. Deas is a simple but useful improvement upon the common one in this respect, that in using it the lever-handle which works the rails is moved away from the ballast, not towards it, and is automatically brought back again into position by a weight. Shoes are made now-a-days by the hundred, and not, as in days of yore, by the pair. It would be difficult, however, to cut out by the hand more than one at a time; so for the larger numbers more rapid means have been devised. Nothing neater for this purpose has come before us than the stamping-out machine of Mr. Patrick. The vertical action is obtained direct from a cam, and in rising and falling the upper bed presses on a cutting mould, stamping out a dozen leathers at a time. The motion is derived from the foot by a pedal acting on a spur-wheel, and the pressure exerted is thus very considerable. The same machine can be employed for paper collars, cuffs and various other articles by simply changing the cutting mould and punching die.

To take a brief glance over the whole collection, we may select as a few of the most prominent and praiseworthy objects, Mr. Christie's plan for expe-

the delivery of books in free libraries; the rain-hand wagonette of Mr. Betts; Mr. Bryant's, with double doors and an arrangement of axles and bolts than which it is difficult to conceive anything more effectual against thieves desiring to break through and steal; Mr. Puxley's grindstone; Waite's model of Howard's moulding-machine; Thompson's jointed leather straps for machinery; Mr. Price's sash-pulley and fastener; Mr. Curtis's tramway for colonial back-districts; Mr. Witt's screw-propellers; and Mr. Saunders's railway coupling-hooks.

In wood-carving, the most meritorious works are 'The Hawk and Rat,' and 'Dead Game,' a bit of matting, by Mr. Richards, and Mr. McKelburn's lions in walnut-wood, for the buttresses of a chiffoier. In hammered iron-work, nothing at all so good as Mr. Albon's has appeared any recent exhibitions. The pair of gates, too, Mr. Winstanley and fourteen other workmen, is good; but are unequal in quality in various parts, and in none come up to the excellence of Mr. Albon's correctness of curve and outline.

The mechanical models are the gems of the exhibition, and their merits rank high, as we have already indicated. They are nearly without exception worthy of careful examination. Mr. Tyrrell's locomotive and Mr. Franklin's plough are prominent examples; but there are models of another sort, of which we do not personally think nearly so well. There are at Islington, as there were at the Guildhall, very numerous ornamental models, as they are termed in the Catalogue, which occupy a considerable number of tables. We do not think so much prominence has been given to them in this as there was in the former case, and some now, as when—nay, many—have very slight claims to the descriptive title. Amongst the best—and really they are not condemnable efforts—are 'May-Day in the Olden Times'; 'The Maypole Inn,' a scene from 'Barnaby Rudge'; and 'Bosobel House,' in Hampshire, the refuge of Charles the Second after the battle of Worcester, by Mr. and Mrs. Aldred. The stuffed birds, and the cases of butterflies, show taste in arrangement.

In painting on porcelain, Mr. Evans, of Great Gorton, in Staffordshire, stands first, and exhibits some really good work. Mr. Cunningham has laboured, by illumination and gilding, a very same subject—the rules of Billiards—into a very gorgeous picture; but, withal, restraining his efforts entirely within the legitimate bounds of art and good taste; and there are many pen-and-ink sketches by various persons, peculiarly good for their class.

In all the groups of skilled work, there are representatives of many provincial towns, showing how wide has been the sympathy with the movement and the institution; and amongst the pictures are the names of one or two colonial painters of promise. The great collection of pictures, however, cannot claim a very large amount of praise, as most are the mere desultory efforts of scanty leisure or childish ambition. Some there are, indeed, which deserve encouragement even when under an artist's criticism, such are, Miss Anne Paulson, of Victoria, Australia, for her pictures of Mushrooms and Vegetables; Mr. Scholz for his small picture of A Miser astonished by the Apparition of the Skeleton in the Closet, a not very intelligible subject, but carefully and neatly handled. There are some landscapes of considerable excellence, and some very fair water-colour drawings; but the good are so mingled with the meagre, the talented with the devoid of talent, that it is a work of difficulty, if not impracticability, to do justice. On another occasion we would suggest that the artistic works be selected from the purely recreative and amateur, and that those who have any just pretensions to be regarded as artists may be judged of by themselves. It would be well, too, if a line of merit were drawn, upon which the best pictures should be hung. Such a line of honour it would be an ambition to lay claim to, and a healthy rivalry might be created in this way; whilst, if such a rivalry had already germinated, it would be effectually stifled by a continuous persistence in the depressing system of covering the walls with as many pictures of all sorts as possible. The postman-artist, Mr.

Major, again comes out with a most meritorious fruit-picture, 'The Uninvited Visitor to the Desert,' a work of such excellence as to make it a duty on the part of the critic to encourage him to court a higher rivalry than mere amateurs, and to urge him to try for space amongst the true artists in the Academy Exhibition next May.

The evening entertainments have often been on grand scales, the Band of Hope children and other societies having mustered largely, and many hundreds of voices often joining in the concerts. Flower-shows have been added to the entertainments; and in every way the executive have endeavoured to carry out their scheme, and to give effect to the Exhibition.

DISCOVERY IN THE EAST.

Athenæum Club, Sept. 22, 1866.

It may interest those who are engaged in the study of the Semitic Palæography of the Holy Land to be informed of the discovery of an early type of Chaldeo-Pehlvi writing on the coins of Artaxias, the Satrap of Armenia, who, about the year 189 B.C., disavowed his allegiance to Antiochus the Great, and established the independence of the kingdom of Armenia, which descended, after an interval, to the subordinate branch of the Parthian Arsacide.

A modified form of this species of character has long been known to orientalists, as having gradually intruded upon the Greek on the later coins of the Imperial Arsacide, and as being largely employed in the Bilingual Inscriptions of the early Sassanians in Western Persia—(De Sacy, Ker Porter, *Journ. R. Asiatic Soc.* xii. 253, xlii. 373; Prinsep's 'Essays on Indian Antiquities,' ii. 163).

The legends on the coins of Artaxias have hitherto defied all attempts at satisfactory interpretation through the medium of purely Phœnician palæography (Duc de Luynes' 'Satraps,' *Numismatic Chronicle*, xviii. p. 143), and it is only by a summary change in the value of certain letters, fully authorized, however, by the subsequent alphabets, that the nominal identifications have now been effected.

The legends may be transcribed into modern Hebrew as follows:—בְּנֵי יְהוֹרְזַרְזֵי אֲרִיָּאסִי

I will not detain your readers with any critical examination of the proper version of the name of Artaxias, which varies in its orthography even in the limited Numismatic examples available, and is likewise singularly distorted in the various classical reproductions (Strabo, xi. c. xiv. s. 5-15; Justin, xlii. c. ii); it may be sufficient to say, that the identification is supported by a large amount of direct and collateral evidence. The opening term *Bagdi*, "divine," is in complete accord with the Eastern usage of the time; and the concluding title of *Arsak* may possibly contain the real elements of the titular name of *Arsaces* (Scythic *ira*, "great"?), which was borne, in his younger days, by Artaxerxes Mnemon,—and traces of which may be found in the designation of *Ares* (the son of Artaxerxes Ochus).

A second royal name that appears on medals of identical fabric, and which reads יְהוֹרְזַרְזֵי אֲרִיָּאסִי, may be associated with *Artavandus*, the son of Artaxias. Later types of money furnish the name of יְהוֹרְזַרְזֵי, *Iturdad*,—an authoritative version of the ancient Armenian Ardoates or Artovart (St. Martin, i. 409); and still more modern specimens of the coinage exhibit the name of יְהוֹרְזַרְזֵי, *Tiridates*, with an obverse bust closely imitating those of Tiridates I. (Arsaces II.) of Parthia.

Were I not averse to entering largely into numismatic details, there is much to be gathered from the types and devices of this local currency. Artaxias appears, in the first instance, wearing a Persian turban, which might have served for the exact model of the head-dress of the Parsees of Bombay at the present day; he is next represented in a quasi-Scythic garment,† with the bonnet projecting over the front, and the ears and throat closely covered, after the fashion (as has been shown by Mr. Vaux) prevailing in the costume

† One—if not more than one—of these coins has been struck upon a piece of Alexander the Great; his profile is still to be seen on the edge of the coin, outside the new die.

figured on some of the early Darics. His son, Artavandus, continues the same style of head-dress, while the rulers next in succession adopt a well-shaped helmet surmounted by a Roman eagle. It is to be noted that the coins of this series are altogether deficient in legends. The helmet in the succeeding division of Mint issues is decorated with a crescent, from which the gradation passes to purely Parthian designs. The reverse devices are also highly suggestive,—commencing with an adaptation of the seated figure of Baal-Tars and the Jupiter of the Macedonians, which is here converted into the representation of the king on his throne, crowned as on the obverse, and wearing the long Median robe. This design is almost immediately replaced by the Fire Temple, with the ministering King. This device is subjected to successive modifications, indicative of the progress of the creed and its varying outward emblems, while the earlier inscriptions in the severally associated terms יְהוֹרְזַרְזֵי אֲרִיָּאסִי seem to point to an already advanced stage of Zoroastrian teaching.

EDWARD THOMAS.

THE LEE PENNY.

AMONG some family papers which have lately fallen into the hands of a Correspondent, he found the subjoined record concerning the "Lee Penny," which contains matter illustrative of history and social manners worthy of being preserved:—

"That curious piece of Antiquity called the Lee Penny, is a stone of a dark red Colour and Triangular shape, and its size about half an Inch each side. It is set in a piece of silver coin which tho' much defaced by some Letters still remaining is supposed to be a shilling of Edward the first, the cross being very plain, as is on his shillings, it has been by Tradition in the Lee Family since the year 1320: odds, that is a little after the Death of King Robert Bruce, who having ordered His Heart to be Carried to the Holy Land, there to be Buried, one of the Noble Family of Douglas was sent with it, and tis said got the Crowned heart in his Arms from that Circumstance, but the person who carried the Royal Heart was Sir Simon Locard of Lee who just about that time borrowed a large sum of money from Sir William De Lindsey, Prior of Ayr, for which he granted a Bond of Annuity of Ten Pounds of Silver during the Life of the said Sir Wm De Lindsey out of his Lands of Lee, and Cartland, the original Bond dated 1323, and witnessed by the Principal Nobility of the Country, is still remaining among the family papers. as this was a great Sum in those Days, tis thought it was borrowed for that Expedition, and from his being the Person who carried the Royal Heart he changed his Name from Locard, to Lockheart (as tis sometimes spelt) or Lockhart, and got a heart, within a Lock, for part of his Arms with the motto, Corda, Serrata, Pando. This Simon Lockhart, having taken a Saracen Prince, or Chief Prisoner, His Wife came to Ransome Him, and on counting out the Money or Jewels, this Stone fell out of Her Purse, which she hastily snatched up, which Simon Lockhart observing, insisted to have it, else he would not give up his Prisoner, upon this the Lady gave it to him, and told him its many Virtues Viz.: that it cured all Diseases in Cattle, and the bite of a Mad Dog, both in Man, and beast, tis used by dipping the stone, in water, which is given to the diseased Cattle to drink, and the Person who has been bit with a mad dog, and the wound, or part infected, is washed with the water. there are no words used in the dipping of the stone, nor any money taken by the servants, without incurring the owners displeasure. many cures are said to be performed by it, and people come from all parts of Scotland, and even as far up in England, as Yorkshire, to get the water in which the stone is dipped, to give their Cattle, when ill of the Murra. Especially, or Black Leg. a great many years ago, a Complaint was made to the Ecclesiastical Courts, against the Laird of Lee, then Sir James Lockhart, for using Witchcraft, a Copy of the act is annexed, there is no date but both by the orthography, and the Complainers being called Goodman of Raplock, a title then given to the smaller Lairds, and by Sir James being the Name of the Laird of

Lee, it must be at least an Hundred years ago. tis said when the Plague was last at Newcastle, the Inhabitants sent for the Lee Penny, and gave a Bond for a large Sum in trust for the Loan (5000*l.* it is said) and that thus it did so much good, they offered to pay the money, and keep the Lee Penny, but the owner would not part with it: a Copy of this Bond is very well attested, to have been, among the Family Papers, but supposed to have been spoiled along with many more valuable ones, about 50 years ago, by Rain getting into the Charter Room during a long minority, and no Family residing at Lee House. the most Remarkable cure performed upon any person, was that of a Lady Baird, of Saughton Hall, near Edinburgh, who having been bit by a mad dog, was come the Lenght of the Hydrophobia, upon which having begged the Lee Penny might be sent to her house, she drank the water for some weeks, and Bathed with it, and was quite Recovered, this happened about 80 years ago, and is well attested having been told by the Lady of the then Laird of Lee, who died within these 30 years, she also told that her husband Mr Lockhart, and she, were Entertained at Saughton Hall, by Sir — Baird, and his Lady for several Days in the most sumptuous manner, on account of the Ladys Recovery, and in Gratitude for the Loan of the Lee Penny, so long as it is never allowed to be carried away from the House of Lee. N.B. it was tried by a Lapidary, and found to be a stone, but of what kind he could not tell."

"Copy of an Act of the Synode and Assembly at Glasgow 25th Debr.

"Quhilk Dye amongst the Referies of the Brethern of the Ministrie of Lanark it was propoundit, to the Synode, that Gawen Hamiltonne of Raplocke had preferit ane complaint before them against St James Lockhart of Lee, anent the Superstitious using of ane Stone, set in silver for the curing of diseased Cattel, qlk the said Gawen affirmed could not be Lawfullie Vsed, and that they had differtit to give any decisione therein till the advise of the Asemblie might be had concerning the same, the Asemblie having inquired of the manner of Vsing thereof and particularlie understood be examinationne of the said Laird of Lee, and otherwise that the custome is only to cast the stone in sume water, and give the diseasit cattell therof to drink, and y^t the same [is] done without using onie wordes such as charmers and soceres use in their Unlawful Practisess and considering that in nature they are many thinges sain to work strange effects, q^t of no humane wit can give a reason, it having pleased God to give unto stones & herbes a special Vertue for the healinge of many Infirmities in man and beast, advises the Brethern to surcease thair process as qrin they perseive no ground of offence and admonishes the Laird of Lee in the Vsing the said stone, to tak heed that it be Vst heir after wt the least scandall that possiblie may be. extract out of the Bookes of Asemblie Halden at Glasgow, and subscribed by thair Clerk by thair Comand. M: Robert Young Clerk to the Asemblie at Glasgow."

OUR WEEKLY GOSSIP.

UNDER the presidency of the Earl of Shaftesbury, the National Association for the Promotion of Social Science will begin its week's session, at Manchester, on Wednesday, the 3rd of October. Six addresses will be delivered by presidents of departments, including one (perhaps) on Thursday, by Lord Brougham, who on the 19th inst. entered his 89th year. Besides the addresses and disputations, there will be *soirées*, excursions to co-operative factories, and a banquet, of course.

The amenities of literature continue to receive droll illustration. The Rev. Dr. Maziere Brady is in various ways (of course metaphorically) setting fire to the Irish Church. He is demolishing its traditionary history with alacrity, and pooh-poohing a great deal of what we believe the Reverend Doctor held fast by when he was himself a viceregal chaplain. Of late he has particularly disgusted his old friends and brethren by pronouncing as mere moonshine the accredited history that, at the time of the Reformation, the Irish bishops accepted

the new doctrine. The Doctor, in fact, deprives the Irish Church of its apostolical descent, and levels it to the condition of a mere *parvenu*. But his pamphlet has been answered by the Archdeacon of Ardagh, the Rev. J. Martin, who, among other flowers of speech, says that Dr. Brady is ignorant of what he himself means, as well as of how to prove it; that such proofs as he puts forward are unfounded and ridiculous; that his assertions are groundless; and "that his pamphlet presents so many examples of mis-statement, or misquotation, or unfair omission, or inaccuracy and illogicality, that it is almost beyond the limits of christian charity to believe that some of its errors are not wilful."—This is as close sailing to giving "the lie direct" as was ever performed even by an Irish Archdeacon.

A new serial story, by Mr. Shirley Brooks, is announced for publication,—"Sooner or Later."

Mr. Halliwell has sent us the following note:—

"Eastbourne, Sept. 28, 1866.
"The interest you have always taken in Shakespearean matters induces me to believe that you will support any step tending to increase the circulation of the writings of the great dramatist, and that the announcement of a new edition of the complete works of Shakespeare, now in preparation by Mr. Hotten, to be published by him at the very low price of *one shilling*, will be favourably received. My chief object, however, in now addressing you, arises from a natural desire on the part of the publisher and myself that this undertaking may not be considered a refinement on the idea of any recent cheap edition. The fact is, that 'The Shilling Shakespeare' was projected as long since as 1863, and after the size, type, and general appearance had been settled, the work was placed in the printer's hands early in 1864. Some difficulties in the way of publishing having been arranged, it will now be completed forthwith, the most anxious care being taken to ensure typographical accuracy.
J. O. HALLIWELL.

As companion-volumes to his "Shilling Shakespeare," Mr. Hotten announces a "Library of World-wide Authors," including the best productions of Fielding, Smollett, Victor Hugo, Lamartine, and other famous writers, together with the principal novels of Sir Walter Scott, at the low price of sixpence each.

It seems that Lord Portarlington not only had the temerity to prophesy about the weather generally, but he especially foretold a wonderfully fine September! Thereby he is accused not only of wronging the Irish farmers by his "deceit," but Irish seaside visitors, who, confiding in his Lordship's confidential relations with that well-known personage, the Clerk of the Weather, thronged into Bundoran, which (having, happily, nothing whatever in common with the place to which it is likened) is called "the Irish Brighton." But at Bundoran all the visitors have been living throughout this month under hatches. The consequent fury against the prophetic lord is both terrific and amusing. The visitors rush into indignation literature in the journals, and there seems a universal wish to have Lord Portarlington sent down among them, to share the misery of which they accuse him of being the author.

The Salterns, near Lymington, formerly used for the manufacture of sea salt, but which have long been in disuse, have been recently converted into oyster-breeding grounds, by Mr. Dawson, and are likely to be made available in adding largely to our supplies of this delicacy.

A project is on foot, at Brighton, to give a ball on the new pier, which would be covered in for the occasion. Wind and weather allowing, and the ball-room not as much inclined to dance as the company, the light fantastic toe will be left to trip it above the sad sea wave.

Mr. Carpenter writes to us as follows:—

"53, Norland Square, Notting Hill, Sept. 22, 1866.

"In your long notice of some little song-books published by Messrs. Routledge & Sons, you complain, in this day's *Athenæum*, that the titles do not bear out the contents. Permit me to say that I never knew of the titles until I saw the books

in Messrs. Routledge's warehouse; the four parts are portions of a half-crown volume of Miscellaneous Songs and Ballads which I compiled for them and which they themselves divided and published, under the titles reviewed, for trade purposes. I am quite content to bear any blame that may legitimately fall on myself as compiler, but trust to your justice to allow me to explain this, and, if you will, to observe that songs like the 'Wail of Agricultural Distress' you admire so much are not so well calculated to *sell* a book of popular songs as those included in the compilations of, Yours, &c.,
"J. E. CARPENTER."

One of the most curious of blunders is going the round of the press in this form:—"The effect of *Adonais* is slightly marred by the remembrance of the doggerel verses which, it is alleged, Shelley first wrote on the death of Keats. It seems almost incredible that the pen which could so eloquently express grief, affection, fame, and friendship, could have written the mock epitaph,

'Who killed poor Keats?'
'It was I,' said the Quarterly,
So savage and Tartarly,' &c.

There was an old version even more naive, as it stated that on Keats's death Shelley wrote a poem called 'Adonais,' beginning "Who killed John Keats," &c.; but the story as it stands above could hardly be mended.—Another story is misleading the public, to the effect that Theodore Hook, when at Westminster, succeeded, in the disguise of a beggar woman, in obtaining alms from the head master. Theodore was of Harrow. The sprightly Westminster lad was his much elder brother James, who ended a successful ecclesiastical career as Dean of Worcester, who wrote two novels ('Pen Owen' and 'Percy Mallory'); the first, at least, better than anything of his brother's in that way, and who was the author of two farcical pieces, which (except by Barham) are invariably ascribed to Theodore,—'Jack of Newbury' and 'Diamond cut Diamond.'

The MS. sermons and addresses of Alexander Henderson, a Scottish Presbyterian minister, delivered in 1638, have been recently discovered (so it is said), and are being prepared for publication by Mr. Maclaren, of Edinburgh. They were delivered during the weeks between the first signing of the Covenant and the Glasgow Assembly. A report of his, the preacher's, words is said to have been made with copiousness and fidelity. Any genuine remains of Henderson, it is supposed, will command attention. We are told that some specimens of the MS. having been submitted to Thomas Carlyle in the beginning of August last, he was pleased to say in reply: "I may fairly expect there will be something of interest for me in these excerpts, so soon as I have leisure to read them with due deliberation," which, after all, is not compromising to Mr. Carlyle. On the other hand, Dr. M'Crie writes to Mr. Martin: "It opens up a curious chapter in our history. The prayers and the prefaces are singular, affording us glimpses into the interior of a Presbyterian church in 1638." Dr. M'Crie has contributed the weight of his authority in behalf of the genuineness of the whole collection, "which of itself would be decisive of the question," so says the Prospect; but in these clever days we shall require something more decisive.

The Registrar-General's half-yearly Report on Births, Deaths and Marriages in Ireland contains a statement which is worth thinking about by those who take an interest in Irish affairs. In the quarter ending the 30th of June last the number of births was 38,816; of deaths 24,763, and of emigrants 41,124; the result of which is a diminution of the population of Ireland by 27,071 in the three months. Does this represent a continuous movement? If it does, the cry throughout Ireland will be in a few years—immigrants, not emigrants. Some of the public works are pining for want of convicts as labourers: what will she do when the honest labourers are all gone?

We lately noted the state of the famous well of St. Keyne, near Liskeard, by way of supplement and correction for the guide-books. Not far from this place is another long reputed well, the present

condition of which is incorrectly described, even in the last edition of Mr. Murray's 'Devon and Cornwall,' although that volume is dated with the present year. The Well of St. Clare, a saint known out of Cornwall as Clere, so far from being "the ivy-mantled ruin of the baptistery or chapel," as the guide-book describes it, was restored some two or three years since, by way of memorial to the late vicar of the parish, and has hardly a leaf about it. "Murray" is unreasonably silent about the church of St. Clare, which is very picturesquely situated, and interesting in its character. There is a good stoup in the remarkably fine north porch; these remains are common in Cornwall. The structure points E.S.E., whereas most of its fellows incline to the north. The tower is an excellent example in its class, and of that Perpendicular period which prevails throughout the county, and noteworthy by some for the growth of those large bushes which hold valiantly to the chinks of the granite, and defy the breezes of their lofty station. The interior comprises a nave and two aisles; the roof of the latter, on the south side, is somewhat higher from the floor than that of the nave; the general style of the interior is Perpendicular; the caps of the nave-arcade on the south side are fairly carved, no common thing in the neighbourhood of granite; the roof is of the prevalent waggon form, panelled out by lines of mouldings, and decorated with bosses of admirable workmanship. There is a large hagioscope, or squint, on the north side of the altar. On an altar-tomb on the east end of the south aisle is a curiously carved and incised slab of slate, which in two compartments commemorates the family of Robert Langeford, who is stated to have died in 1614, and Petronilla, his wife, whose death-date is not given in the space reserved for it; the figures of this pair kneel before their faldstools. Thus for one half of the slab. The other half is subdivided, and represents, by the same means, 1, the son of these persons, and his wife, kneeling; 2, nine children of the same. On the wall, above this tomb, is placed the injunction of a dole to those who could answer questions as to their faith. Also, a curiously-jumbled inscription, combining "Oh, Redeptor" with a highly pagan allusion to "the fatal sistris' knife." On the edge of the altar-slab is an acrostic of "Robertus Langeford." The dole has been long ago misappropriated. In the north porch still stand the venerable pariah stocks, with evidences of ample service. The ground stage of the tower within contains upon its wall a quaint inscription painted on a board, to the following effect:—

THE RINGER'S ARTICLES.

We ring ye Quick to Church
The dead to grave.
Good is our use,
Such usage let us have.
Who swears or curses
In an angry mood,
Quarrell or skilful
Although he draw no blood,
Who wears his hat, or
Spits, curreturns a bell,
Or through unskillfull
ringing marris a peal,
Shall forfeit sixpence
For each single sin,
'Twill make him cautious
against another time.

Against the superstition of Friday being an unlucky day, especially to sailors, a Correspondent, C. W. H., has a protest. "See," he remarks, "how many lucky Fridays we find in the history of the most momentous of all maritime enterprises in the discovery and exploration of America:—Aug. 3, 1492, Columbus sets sail on his voyage of discovery, —Oct. 12, 1492, first discovery of land by Columbus, —Jan. 4, 1493, sets sail on his return, —March 15, 1493, arrival at Palos, —Nov. 22, 1493, —arrival at Hispaniola on his second voyage, —June 13, 1494, discovery of the American continent. "All these days," says C. W. H., "were Fridays."

Astronomical observers of the sun will be interested to know that M. L. Foucault has discovered a method of diminishing the effect of the sun's rays on the focus of telescope lenses. By means of an extremely thin layer of silver placed on the object-glass, the sun can be observed without any injury

to the sight. M. Foucault has communicated the particulars of his invention to the Paris Academy of Sciences.

Science is beginning to establish herself on the River Plate. Buenos Ayres has a public museum, and, under the editorship of Dr. German Burmeister, has just published, in large quarto, with plates, the first part of 'Anales del Museo Publico de Buenos Aires,' in which new or little known objects of natural history are described. The contents of this part are, a summary of the history of the museum, —Paleontology in its present tendencies and results, —on the Picafores, and descriptions of fossil remains, the *Macrauchenia Patagonica* and the *Glyptodontes* of the museum. The printing and lithography are creditable specimens of South-American workmanship.

Our Naples Correspondent writes:—"The excavations which have long been suspended in Herculaneum will be shortly resumed. For years it has been in contemplation to push the work of discovery under a piece of ground on the left of the city as you enter. It is said that the commencement of these excavations will be inaugurated with a certain degree of solemnity, as it is a fact of the highest interest to the archaeological world. In Herculaneum were the first efforts made to bring to light the artistic wealth of past ages; and however beautiful may be the works discovered in Pompeii, it was in Herculaneum that were found those graceful models which have so modified and refined the taste of the civilized world. No doubt it is due to the incessant representations of Commandatore Fiorelli, the learned and laborious Director of Excavations in Southern Italy, that the Government has resolved on an enterprise which will create an epoch in its history. By a decree dated the 16th of last month, there has been established in Naples, and, indeed, for the whole province, a Consulting Commission of Fine Arts, dependent on the Minister of Public Instruction, and presided over by the Superintendent of the National Museum in this city. The Commission is to be divided into four sections: one of Painting, one of Sculpture, one of Architecture, and one of Archaeology and Artistic Erudition. Each section is to be composed of three counsellors, nominated as are those of the Consulting Commission of Florence. The National Museum of Naples and the excavations will, however, continue to be under the exclusive direction of the Superintendent-General and Director of the Excavations of Antiquity."

MR. MOREY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 34, Cornhill. This Collection contains examples of Clarkson Stanfield, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—J. Lewis, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Picherrell, R.A.—Galderson, R.A.—Bant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frère—Ruipers—Brillouin—Lidderdale—George Smith—Duverger, &c.—Admission on presentation of address card.

ROYAL POLYTECHNIC.—George Buckland's Musical Entertainment, entitled 'The Castaway; or, the Unlucky Cruiser, commonly called Cruise.'—The Cherubs floating in the Air, and Shakespeare and his Creations, with F. Damer Cape's Recitals.—Exhibition of the Prussian Needle-Gun—Dugwar's Indian Feats.—Matthew's Magic, &c.—Open from 12 till 5, and 7 till 10. Admission, 1s.

SCIENCE

British Spiders: an Introduction to the Study of the Arachnida of Great Britain and Ireland.
By E. F. Staveley. (Reeve & Co.)

LIKE some of his betters, the Spider is at length being drawn from his obscure corners in the world, and examined in the full light of day. After long years of neglect and contumely, he is at length receiving pictorial if not poetical justice. Mr. Blackwall has been the chief patron of the spider, as Buxton was of the negro. No doubt housewives and housemaids will still pursue him with remorseless brooms; no doubt silly girls will still shriek at his presence; no doubt he is doomed to destruction wherever discovered and disliked. Planters and Americans once bound and abhorred the

blacks; but the negro is now free and befriended; and the spider is vindicated and written about. Pictorially, and not poetically, as we have said, full justice and even flattery are being meted out to him, which, if any one doubt, we recommend him to inspect the numerous and beautiful coloured plates of the volume before us.

At the same time, distinction and justice have their inconveniences for the spider, as they have for the negro; but in very opposite ways. The negroes do not know what to do with their freedom; the spiders, on the other hand, do not know how to brook captivity. To understand the true qualities of the negro, as we have long been told, you must set him free, while to understand the true characters of the spider, you must catch and imprison him. Only since increased attention has been paid to this insect have prisons been prepared for him. Could he but be aware of the boxes with trays, of the pill-boxes, and of the little open-mouthed bottles of spirit, the camel-hair brushes wetted with spirit, the capacious nets, and half-a-dozen other cunning instruments and preparations for his capture, which every spider-seeker is furnished withal, he would be moodily content with his dark and dirty corner, or his home of earth, or his old brick wall, or deep, dark cellar, and never court the perils of notoriety or the vanities of pictorial portraiture.

To be properly classified and to be duly placed and painted in Plate III. or IV., is but a poor compensation for being boxed or bottled or impaled. Freedom is pleasant even in the centre or corner of a suspended web, and life is enjoyable even in the dark places of the earth, and in the haunts of blue-bottle and other flies. If Baalzebub, or any other synonym or relative of Baal, was really the god of flies, no doubt his idol-image was encircled by admiring and gloating spiders, and enwrapped with floating webs. No doubt the biggest spiders solemnly ensconced themselves in the pagan temple or grove, and awaited, like sacrificing priests, the flying multitudes of adoring flies, many of whom were instantly entangled and mangled in honour of Baalzebub. But in process of ages the tables are turned, and the spiders themselves become the victims; and perhaps in their present webbed retirement they deplore these times of enlightenment, and the march of Entomology, which sacrifices them in hecatombs, and which, under the name of Science, perpetrates deliberate cruelty and perpetuates hopeless captivity.

Poor spiders! we deeply sympathize with you; but if it be any consolation to you, you are not alone in your captivity. The whole race of insects is equally under systematic pursuit and persecution at home and abroad. Your friends the beetles are more mobile than you, yet they cannot escape. Your winged and gay and swiftly passing friends the butterflies are still more nimble, but nets and snares are spread abroad for them. Nay, your very victim cannot escape scientific disquisitions, for is not Miss Louisa Lane Clarke (as she herself informs our readers) at this very hour writing "an easy history of the Diptera—flies in the garden, flies on our window-pane," &c.; to which, of course, she will add—flies in the spider's web? Since pursuers and pursued, the whole family of insects is thus under the pen of authors, and consequently within the power of persecutors, it is vain to mourn, for all must submit to their fate. Brooms, or pill-boxes, or spirit-bottles, or sweeping-nets, or some kind of capturing implement, await us all. In one shape or another they come even upon poets and authors, for are there not

remorseless critics and cruel reviewers? They come, too, upon poor tourists, for are there not rapacious innkeepers and greedy guides? They come upon most people in one form or another, with this great difference in *your* favour, that none of us are so carefully delineated and so prettily coloured as you are by the Blackwalls and Staveleys of the day.

The *naïveté* with which Mr. (if it be not Miss or Mrs.) Staveley gives advice "On Collecting Spiders" is charming. Thus, "The first difficulty to be overcome is that of catching the spiders, which is greater than might be expected," and then "every spider missed should be a help towards catching the next individual of the same species which may be met with." This maxim is plainly of far broader application than it here receives. Further, the beginner is carefully instructed to "start with a pocketful of empty pill-boxes, a pencil and a card on one side, and an empty pocket to receive filled pill-boxes on the other. Probably he will see several cobwebs before he sees one spider. Let him take up his station before one of these, and determine to find its inhabitant." When he has been found, advice is given as to his capture. But "before attempting the capture of a spider, the beginner should carefully observe the character of the snare; and when the spider is in the box, should note upon the lid what he has remarked. If the web was a geometrical one, he should note whether it was placed horizontally, obliquely, or vertically. 'Geo. hor.' is soon written, and will be a great help when he examines the contents of his pill-boxes." Conceive only of the happiness of the spider-collector with a dozen pill-boxes before him, each containing a captive spider, and each inscribed "geo. hor."! A useful addition is a glass-topped pill-box (of course without any such inscription as geo. hor.) and the spider inside, the watchfully observed of the capturing observer. But a worse fate than being closely watched is before the poor captive; he is to be dropped into spirit, which is one mode of killing him, but not such instantaneous insecticide as dropping him into boiling water. His cemetery is a homeopathic tube filled with spirit or turpentine. Such is the end and final lot of these long-legged but short-lived little prisoners.

Sad effects may possibly result from this pursuit. It would, for instance, be alarming to contemplate the consequences to any delicate or highly nervous lady of unexpectedly opening a case in order to find her favourite homeopathic globules, and suddenly discovering only an array of bottled and labelled spiders! Equally painful would it be for any valetudinarian gentleman to rise in the night to take a pill, and to be misled by the feebleness of his chamber-light into the innocent error of mistaking some pill-box inscribed "geo. hor." for the one he required. Possibly disgust and dismay might give a healthy shock to his system.

To attempt to find out any entomological novelty in the present volume is out of the question, as the author professedly "lays no claim to originality. The writer, therefore, here begs to acknowledge Mr. Blackwall as the chief authority, his work on British spiders having been most freely used. The writings of MM. Latreille, Simon and several others have also been made use of without acknowledgment in the body of the work."

For ourselves, in drawing attention to the pill-box imprisonments and spirituous murders of these unhappy insects, hundreds, if not thousands, of whom I doubtless, passed into homeopathic vases, with no other epitaph than "geo. hor." we do trust that we have earned some atonement to the

honourable title of "The Friend of the British Spider"!

We had purposed to say something in a different strain about the spider's web. Its formation, shape, contexture and fibre are all subjects for curious disquisition and careful examination. But we fear we should spin too long a yarn if we descanted upon the work of this wonderful spinner, who apparently derives his English name from his aerial workmanship. It is singular that in the early English Psalter (printed by the Surtees Society) our insect is styled (Ps. lxxxix.) Spinnandweb. Moreover, the ingenious labours of our garden spiders have been already commented upon in some popular works. Yet many minute matters remain to be explained, and many, perhaps, to be observed and recorded. Our younger microscopists may not be aware that the thread spun by the genus named *Epeira*—that family of the Epeiridae, which are to most non-entomologists representative of the whole order,—the thread composing the spiral line which intersects the radiating lines of the web of this genus of spiders, differs from that spun by any kind of spiders. "It presents," says our author, "the appearance of a string of glittering beads, sometimes of uniform size, sometimes varying in size at uniform intervals, and sometimes presenting some irregularity of size and interval. A more beautiful object than these threads seen under a moderately high magnifying power can hardly be found." All who have thus seen it will long remember it; and as the object is plentiful, young microscopists may be thankful for the hint.

The present volume is neatly got up, and, as we have before remarked, well illustrated.

SOCIETIES.

ENTOMOLOGICAL.—Sept. 3.—Sir John Lubbock, Bart., President, in the chair.—M. A. Dupuiset, of Paris, was elected a Foreign Member.—Mr. A. F. Sheppard exhibited a box of Lepidoptera, all bred or captured in the Isle of Man by Mr. Gregson, and including *Dianthæcia cæsia*, *D. caposiphila*, *Sesia philanthiformis*, *Sericoris littorana*, *Eupacilia albicapitana*, *Sciaphila Colquhounana*, *Gelechia vicinella*, and *G. leucomelanella* (which Mr. Gregson believed to be but one species), and the new Phycis allied to *P. ditulæ*, of which Mr. Bond exhibited a specimen at the July meeting.—Mr. Stainton exhibited *Gelechia vicinella*, bred by Mr. Gregson from larvæ which fed on *Silene maritima*; and *G. atrella*, bred by Mr. Jeffrey from larvæ collected near Saffron Walden, which fed in the stems of *Hypericum*. Mr. Stainton also exhibited a series of Micro-Lepidoptera, received from M. Millière, of Lyons, amongst which were *Depressaria Rutana*, of Fabricius, bred from *Ruta angustifolia*, and a new *Gelechia*, allied to *G. costella* and bred from *Hyocyanus albus*.—Mr. Bond exhibited a male specimen of *Bombyx Cynthia*, measuring 6½ inches in expanse; those bred by Dr. Wallace at Colchester during the present season varied in size from 3 to 6½ inches.—Mr. Pascoe referred to an account, by Mr. Consul Meadows, recently published in the *Times*, of a Chinese silkworm, of which the pupæ were a favourite article of food.—Prof. Brayley communicated an extract from the report of Mr. Consul Lay on the trade of Che-foo, respecting a brown silk produced from wild silkworms which swarmed in the mountain forests.—Mr. S. Stevens exhibited a house-fly with six cheliferous upon it; and had observed another upon which were no less than eight of those parasites. Mr. Stevens also exhibited some coloured drawings of butterflies of extreme beauty and the most minute accuracy, executed without the aid of a lens by Mr. Mitchell, who was present as a visitor.—Mr. Janson exhibited a small collection of Jamaican insects, principally Coleoptera, but including a few Hemiptera, &c., the produce of the first two or three weeks of Mr. C. P. Gloyne's residence in that island.—

Mr. M'Lachlan mentioned that the genus of Trichoptera recently published by him under the name of *Sciops* was identical with the *Hydromanicus* of Brauer, which had priority over *Sciops*, so that the latter name must sink; the species described by Mr. M'Lachlan were, however, both different from Dr. Brauer's *Hydromanicus irroratus*.—Mr. E. S. Haines sent for exhibition a curious specimen of *Cidaria fluctuata*, captured in Staffordshire in 1864, and resembling the var. *costarata* of Haworth.—Mr. F. Moore read an extract from the *Journal of the Asiatic Society of Bengal* respecting the simultaneous exhibition and extinction of their light by fire-flies. The writer, Mr. W. Theobald, jun., stated that though in Bengal he had never witnessed the phenomenon in question, yet in Pegu he had seen "myriads of fire-flies emitting their light and again relapsing into darkness in the most perfect rhythmic union," and the synchronous flashing of the Pegu fire-flies was corroborated by Mr. Montgomery, of the Survey Department.—The Secretary exhibited coloured drawings of the larva, pupa and both sexes of the imago of a new Geometrideous moth, belonging to the genus *Agathia*; these were communicated by Mr. H. L. Schrader, of Shanghai, who found the larvae on a *Salix*, but which for some time escaped detection by reason of their resemblance to the remains of a leaf, of which the softer parts had been eaten away. The Secretary read a communication respecting the injury done to the cotton crop of Louisiana by the "army worm," the larva of *Heliothis armigera*.—Mr. C. A. Wilson communicated a further instalment of his 'Notes on the Buprestidae of South Australia.'—Mr. Pascoe read a description, under the name of *Anastetha*, of a new genus of Tenebrionidae, from Rockhampton, Queensland.—A paper, entitled 'Notes on the Butterflies of Mauritius,' by Mr. Roland Trimen; and a paper, entitled 'Notes on some Hymenopterous Insects collected by Mr. Peckolt at Catagallo, South Brazil,' by Mr. F. Smith, were read; in the latter was described the long-desiderated female of *Trigona*.—The President announced that there would not be any meeting of the Society in October; and that the future meetings would, by permission of the Linnean Society, be held in Burlington House, Piccadilly.

FINE ARTS

ART-UNIONS.

MANY parliamentary committees have concerned themselves with the operations of Art-Unions and the nature of the laws affecting them. As it is not uncommon, these committees have reported in diverse ways. The ordinary middle-course has been adopted in the matter; so that what is in reality favour has been shown to one class of associations, while others have been vigorously condemned, if not rigorously prosecuted. Thus, no fewer than fifty-one unions have been permitted to exist and flourish as well as they could, "for the encouragement of the Fine Arts," while hundreds of goose and plum-pudding clubs, raffles, and one knows not what, which were equally lotteries, and obnoxious to the principle of the law, have been objects of attack by the Home Office. Even a poor fellow who wanted to dispose of a gigantic bride-cake, proposing to do so at the Hanover Square Rooms by lottery, and in the most "respectable" manner, was admonished by the highest authority that in doing so he would become amenable to the Lottery laws, and be proceeded against by Her Majesty's Government.

We have the excellent authority of the Librarian of the Board of Trade, a witness before the latest of these Art-Union Committees, to show that the Lottery laws are inoperative. The witness recommends they should be abrogated *en masse*, and the evil they were intended to suppress left "to work itself out." In truth, a purely British arrangement exists with regard to the method of putting these injunctions in force. Mr. Bucknall, the witness in question, enlightens us on this point by stating that the Board of Trade cannot stop infringements of those laws; that is the duty of the Home Office; but it can grant exemptions from their action in favour of Art-Unions: and to show how it has done so

to some effect, it is stated that the "Board" "inadvertently" sanctioned the working of a scheme for the distribution of works of art applied to manufacture, to wit, as one of the committee expressed it, "candlesticks and teapots." Nothing could be in this way more desirable than to bring articles of this sort into common use. Nevertheless, it appears that that had better be effected in the ordinary manner of trade, by means of the growth of public taste and education, than in an exceptional fashion, and with the aid of the gambling spirit which, even by the honest advocates of Art-Unions, is admitted to enter so largely into the causes of their success.

What is the true nature of many of the associations which style themselves "Art-Unions," how much the subscribers pay for their "chances" of prizes, the character of those prizes, the effect on Art of their distribution, the cost and moral results of the present state of the law, which seems to stultify itself with exceptions of the most illogical order, cannot be better stated than in the words of the Report, as drawn from the evidence to which it relates, both of which are before us.

The good faith and pure intentions of several among the agents of the associations which concern themselves with the Fine Arts are testified to by all speakers. Others, so says the official witness whose name we have quoted, act in open defiance of the law (Reply 118), and are "practically," i. e. unofficially, known to carry on their work, although the sanction of the legally authorized persons has been refused to it (Reply 119).

The Art-Union Act was passed in 1846, and, under the pretence of benefiting Art, exempted from the operation of the Lottery laws those schemes which were ostensibly devised for the distribution of pictures and engravings. Sir R. Peel, as became his statesmanship, strenuously opposed the passing of this Act, saying that it was a violation of right principle, and, like all such, sure to produce great practical inconvenience. He doubted if this violation would be of advantage to Art, and still more did he doubt if a high style of Art would be encouraged by the exceptional nature of the Act he opposed. This does not, however, as it seems to us, necessarily imply that the kind of Art now most frequently chosen for distribution is best fitted for its supposed purpose of pleasing the multitude; on the contrary, we believe that the best Art is commonly the most popular, and that, had the aims of promoters of Art-Unions been really what they professed, they might plead now in their defence that they had always chosen noble examples for distribution, instead of very many absolutely bad ones, or, as is commonly the case, merely indifferent subjects; such—to take in hand the working of the best of these societies, the Art-Union of London—as 'The Last Supper' of Leonardo da Vinci, in place of 'Raphael and the Fornarina' of Sir Augustus Wall Callcott.

There is no work of art so popular as the former; every one knows it; electrotypy, lithography, all the methods of engraving, wood-cutting, photography, and even Berlin wool, have been employed in its reproduction; nevertheless, it is true, also, that only at an outrageous cost, such as the masterpiece of Raphael Morghen demands, is even a tolerable copy of it to be had by any of these processes; probably the worst is the most pretending. Had the Art-Union of London set to work to produce such a desired engraving and sold it to the subscribers, who can doubt but that, however objectionable the means, the result would have been promising of good? Raphael's Cartoons are best reproduced in photography; yet what dismal copies are these of originals most enjoyed? Could not good Art have been fostered by the circulation of fair transcripts by the Society? For a pleasing subject, and by way of varying the serious elevation of such themes as the above-named, would not the very famous and most attractive of Guido's pictures, the 'Aurora,' which is probably the only sound one among them, have been greeted in preference to that very poor thing 'Jephtha's Daughter,' by Mr. O'Neil,—wretched work as it was, and aptly produced at a cost of more than 4,000*l*.? There would be nothing to pay for

copyright in such subjects as these we suggest; whereas that had to be bought from the "modern masters," at a cost which must have swallowed up a large portion of what might have produced a second print.

It is out of the power of any one to say that good Art, whether modern or ancient, is not loved by the people. The success which attended the engraving of 'The Horse Fair,' by Middle. Rosa Bonheur, surpassed that which followed the merely "pretty" 'Ramsgate Sands,' although produced by the same means, and even more energetically "put upon the market." The result is equal with the former, although the aim of the promoters is very different, when we compare the profitability of 'Raising the Maypole,' which cost 3,757*l*. 6*s*. to bring out, or 'The Water Party,' by Mr. F. Goodall, that surpassed the last in expense. To give a modern instance, it will hardly cost greater sums than these to reproduce such noble Art as Mr. Holman Hunt's 'Finding of the Saviour in the Temple,' although engraved by the most admirable hands,—hands whose wonderful ability has been occupied for at least one of the probable thirty years of their perfected practice upon a work by M. Meissonnier, a production of so decidedly inferior an order. Thus prodigal are we of genius, thus futile are our complaints of the decay of Art, that the now unrivalled powers of M. Blanchard are deliberately given, rather say woefully wasted, on what any fair cutter of copper could have done fortunately enough.

The strength of the challengers of Art-Unions and the weakness of their managers' defence are shown by these instances; the latter persons rarely aim at the publication of good Art, rather at that which is merely popular, without being good. That they effect benefit to Art is thus effectually disproved, and, of course, with it the only merit of their existence in violation of the principle of the law. It can be shown, also, that bad art does not pay, comparatively, better than good art, however published. Thus, of thirty prints and series of illustrations, only three or four have had even the pretence to first-rate quality, 'The Castle of Iechia,' 'The Clemency of Richard Cœur de Lion,' 'The Norman Conquest,' &c. Those named cost less than 'Life at the Seaside,' 'Claude Duval,' 'A Water Party,' 'Jephtha's Daughter,' 'English Merry-making in the Olden Time,' and other simply popular or utterly trivial conceptions. To issue to the subscribers, the first-named three works cost, with another, 11,000*l*.; on the other hand, 'Life at the Seaside' cost singly nearly 7,000*l*. (6,980*l*. 18*s*.), or about double as much as 'Richard Cœur de Lion,' with another, or 'The Norman Conquest.' 'Jephtha's Daughter' cost no less than 4,060*l*., and was every way unworthy. Strange to say, yet significant to those who go with us in this matter, the returns of subscribers to this society for the years succeeding those which witness the distribution of merely popular prints have by no means answered the hopes of such as expected a larger harvest from the meaner appeal, and more guineas to flow in when an untalented constituency was addressed. Thus, since 1857, a period which has produced by the society a greater number of inferior "popular" pictures than before, the amount of money paid in subscriptions has been below the average, and, by nearly 4,500*l*., the total of the preceding eight years. The subscriptions for 'Claude Duval' were nearly 1,000*l*. less than for the by no means excellent work that preceded it,—2,000*l*. less than that attained by 'The Norman Conquest' of Mr. MacIise, which immediately followed it,—and 2,000*l*. less than that which attended the announcement that the 'Richard Cœur de Lion' of Mr. Cross was in prospect.

It must be remembered that these publications are announced long beforehand, and subscribers are to a very great extent influenced by the choice of prints offered in exchange for their guineas. Other conditions being equal, 'Life by the Seaside' produced—notwithstanding the universally admitted spread of taste in Art between 1859 and 1845, when Mulready's by no means remarkably excellent picture, 'The Convalescent,' was issued—280*l*. less than the latter, a purely unpuffed but otherwise meritorious work, which

had, nevertheless,—so one would think—ininitely less popular attractiveness. 'Raphael and the Fornarina' brought 12,334*l*.; while 'The Castle of Iechia,' a landscape only, brought 14,848*l*., and 'The Convalescent,' which immediately followed these, 15,440*l*. It may fairly be presumed that the impetus of these satisfactory publications continued for sometime; for 'Jephtha's Daughter' and 'The Last Embrace,' with another commonplace work, brought the receipts to 16,979*l*. and 17,871*l*. odd respectively, from which they precipitately fell to 12,800*l*. odd in the next year, when 'The Prisoner of Gisors' came out,—a work which one would think most attractive; it really was not the most trivial. 'Sabrina,' by Mr. Frost, was pretty enough for any public, however emaculate; yet the decline continued, and went lower with 'The Smile' and 'The Frown'—unobjectionable works as they were, however tame. 'English Merry-making' surpassed 'The Prisoner of Gisors' in cash attractions by no more than 60*l*., although it was a much larger work; both were weaker in pecuniary effects than the 'Richard Cœur de Lion' before named as an admirable picture. The bound upwards from 11,743*l*. was to no less an amount than 13,684*l*. between the years 1865 and 1866, when the 'Claude Duval' was followed by 'The Story of the Norman Conquest.' 'Claude Duval' brought nearly 1,000*l*. less than even 'The Ancient Mariner,' 'Raising the Maypole' about an equal sum less than even 'Italy'—a landscape. Probably some effect was produced in this case by the glutting of inferior tastes with those pictures of the same class which had preceded it, i. e. 'English Merry-making' and 'Ramsgate Sands.' In some cases engraved outlines were given, in addition to the print; yet the effect on the year's subscription was not always commensurate. A wretched series issued in 1849, to illustrate 'The Entry to Jerusalem,' joined by 'Sabrina,' did not save a fall of more than 2,500*l*. from the receipts which attended the unobjectionable 'Prisoner of Gisors.' 'Italy' cost 2,101*l*., and brought 10,882*l*.; while 'Life at the Seaside,' costing nearly 7,000*l*., brought but 15,210*l*. Thus it appears that by catering for a low order of taste the very society which is admitted to be least objectionable in its class has by no means secured the most of the loaves and fishes. These results are very startling, and do away with one of the apologies for Art-Unions, that they must necessarily supply common orders of taste.

It appears that the production of such works as we have named has had no good effect on public taste, but that whatever improvement may have taken place in that direction, the reality of which we are very much inclined to doubt, has been due rather to the spread of wealth and luxury, than to the distribution (as the advocates of these societies allege) of Art of such questionable or trivial quality as was supplied in 'Life at the Seaside,' 'Raising the Maypole,' and 'A Water Party.' Some statistics are obtainable from this Report, which are strongly condemnatory of the practice of the societies in question. The average value of the prizes of the London Art-Union is 32*l*. 16*s*.; the chance against winning a prize is 99 to 1; in 1859, the chance against winning a 25*l*. prize was 144 to 1. Thus much for the value and economy of the Art-Union process of distributing pictures. How it acts with regard to the alleged aim of encouraging fine and good Art by the circulation of prints we have just shown. It is to the engraving the public are told to look for the effect on Art of these societies (Reply 826).

The case is far worse with the "little goes" of the shilling Art-Unions, where the average value of the prizes is from 5*l*. up to 15*l*. In the Birmingham Shilling Art-Union the chance against winning a 15*l*. prize, in 1859, was 325 to 1. The expenses of the shilling art-unions generally swallow up at least 50 per cent. of their revenues. The Liverpool Shilling Art-Union was found to engender so much evil, that the artists of that town entirely withdrew from it. Like all other shilling Art-Unions, it is a mere lottery, worked by the secretary for his own profit: if Mr. Pelham's evidence be correct. The secretary of the Liverpool Art-Union is paid 500*l*. a year, and receives large sums of

money for clerks and "office expenses." There is no check on the sale of tickets, and each prizeholder receives from the secretary a prize, the value of which is not more than half the amount which he was supposed to have won. It is, moreover, always doubtful whether a ticket obtains even the chance of a prize, for it never can be ascertained whether any ticket has been put into the wheel. The public pay twice as much for their shares as those shares are worth.

FINE-ART GOSSIP.

BESIDE the town-hall about to be erected in Todenham a site has been chosen for the bronze statue of the late John Fielden, Esq., M.P., the work of Mr. Foley, R.A. Mr. Fielden took an active part in the movement for the better regulation of the hours of factory labour. This statue was completed three years ago (the result of general subscription). The erection of it has been deferred until the present appropriate site was prepared.

In noticing some of the great line-engravers in our last number, we omitted one who should not be passed over—Mr. Vernon, the engraver of Dyce's 'Virgin and Child,' of Herr Winterhalter's two portraits of 'The Lady Constance Grosvenor' and 'The Princess Helena,' of Mr. Cope's 'First Born,' of Leslie's 'Olivia Unveiling,' and other works, which, as a Correspondent who notes our omission, remarks, "display a degree of learning and mastery that entitle him to rank amongst the very best artists in this difficult and now little practised branch of Art."

Gustave Doré's drawings for the illustration of Milton's 'Paradise Lost' are now all complete, and will shortly appear in a folio volume from the press of Messrs. Cassell, Petter & Galpin. This will afford the Art-critics a fair opportunity of judging how far the prolific pencil of the young French artist is equal to rendering the text of one of our greatest English poets.

Messrs. Marion & Son, Soho Square, have published 'Fifteen Photographs, taken from the original marble statues, &c., by Thorwaldsen, in the Church of Notre Dame, Copenhagen,' as produced by M. Georg E. Hansen. These comprise the twelve figures of the Apostles, which, after the fashion which has been so wofully destructive to the dignity and beauty of innumerable Gothic churches, are placed against the piers of the remarkable edifice in question,—but in this case, it must be owned, without injury to the building, and without noteworthy effect further than that of creating a resemblance to a sculpture gallery. Also, the statue of Christ, which, as if still further to increase the force of the resemblance to which we refer, or to complete the suggestion which is otherwise offered, of a pagan temple, stands behind the altar in the apse, beneath the cornice of which is sculptured the well-known procession, in bas-relief, of "Christ bearing the Cross." Lastly, the much-admired "Angel Font" of the same church,—the design of which, it may be said in passing, has supplied a model to at least half-a-dozen drinking fountains in London. As a work of Art, this font seems to us to be founded on what might have been originally a good, indeed, a noble idea, but which, in working out, sank to one of the tamest, most soulless, of modern sculptures, very little, if at all, superior to statuary in sugar. The photographs are extremely good, very soft and clear, and well lighted; in fact, most desirable by those who wish to satisfy themselves whether or not these famous works, by one of the most highly-praised of recent sculptors, are truly inspired by a vigorous, original and healthy spirit, and are remote from that triviality, meanness and inanity of conception which has been ascribed to them. Few will look at the "Angel Font" without wonder at its reputation. The features of the angel are regular, but void of elevation and spirituality; the execution is smooth enough for any taste. The figure of Christ poses well, but moves not the spectator with any deeper appeal than for admiration at the drapery and the modelling of the surface. That chiselling is a thing of the most learned kind. The designs are so obvious in the designs that brings the same

results before us, is visible in the statues of the Apostles. Nothing can be "nicer" than the disposition of the hair and beard of St. Thaddeus, parted and ordered as they are; but few attitudes are tamer than that it shows of placing the tips of the fingers together, without purport,—the one leg advanced with its knee bent, after the antique fashion, which is highly beneficial to the drapery, but singularly insignificant. The figure of St. James is superior to this; that of St. Peter, apart from its obvious debt to the antique, has much character. Probably the best statue is that of St. Thomas. On the whole, notwithstanding the exceptions the works named afford to the generally conventional and insipid character of the series, it is undeniable that they exhibit too much of that sentimentality, as distinguished from sentiment, and that attitudinizing, which is so obvious in the works of Ary Scheffer, cold and affectedly abstracted from passion as these are, without that grandeur of design which, rising above humanity, justifies departure from the simplicity of Nature herself.

The well-known and, for its date of 1498, fine brass of Abbot Esteney, of Westminster, Caxton's patron, which has of late years lain in the floor of the north ambulatory of his church, exposed to much wear, has been placed on a simple chest of stone, standing about eighteen inches from the ground at top, and removed about two feet six inches to the north of its recent position, so as to bring it close to the foot of Wolfe's monument, which last, in the most unfortunate manner, divides the Chapel of St. John the Evangelist from the ambulatory, and entirely masks the noble tomb of Sir Francis Vere, which is in the last-named chapel. A cast from the Vere monument is in the North Court, South Kensington Museum. Dart says, with reference to Abbot Esteney's brass, that it was in his time on the top of a raised tomb, forming, with Sir John Harpedon's monument, part of the screen of the chapel of St. John the Evangelist. The Harpedon monument is also a brass, sadly impaired, but retaining traces of its original value, and now inserted in the pavement of the north ambulatory of the Abbey, near the foot of the monument of Aveline, Countess of Lancaster; it is dated c. 1457. Mr. G. G. Scott's (Burgess's) 'Gleanings from Westminster Abbey' states that Abbot Esteney's tomb has been twice opened, 1706 and 1772, when, as usual, the body was found dressed in eucharistic vestments, similar to those of the effigy, where the pastoral staff points outwards.

In a few weeks the Archbishop of Canterbury will lay the foundation-stone of a new cathedral, at Inverness. The building will probably be completed, so far as at present contemplated for erection, in about three years.

The church of St. Michael, near St. Albans, built on the confines of Verulamium, and famous as containing the tomb of Bacon, has been restored under the direction of Mr. G. G. Scott. The tomb of the great Chancellor has been protected during the recent works. The building was in a very bad state of repair.

MUSIC AND THE DRAMA

DRURY LANE.—When the present theatre in Drury Lane, built by Wyatt, first opened its doors, in October, 1812, the "publick" were "respectfully informed, in order to prevent disappointment, that every seat in the boxes has been taken for some days past, for this evening." Some such announcement might have been published last Saturday, when the theatre entered on its fifty-fourth year, with a double measure of homage to Shakespeare, the pieces chosen for representation being 'King John' and 'The Comedy of Errors.' There is no theatre in Europe that presents a more brilliant spectacle than Drury Lane when it is filled, as it was on Saturday, from the base to the roof. It is almost perfect in the beauty and appropriateness of its architecture in the interior, the decorations are profusely rich and eminently tasteful, and these are heightened by a flood of light, which adds splendour without giving inconvenience to the audience. When that vast audience arose on

Saturday night, as the first notes of 'God save the Queen' were played, the spectacle was as dazzling as a transformation scene. The boxes looked like moving masses of flowers, and the variety of colour and beauty there was enhanced by an oriental costume or two, which seemed to flash additional light over all around. The other parts of the house lent all the force which excited crowds could give to the picture. The opening night, in 1812, could not have afforded a more gratifying sight, when 'Hamlet' was played, with Elliston for the Dane. Of all the company of that much-talked-of night, the Ophelia alone survives. Miss Kelly may still be occasionally seen, we are told, wearing her years with the content and complacency that health and happy memories alone can give.

To play-goers, and especially to those whose admiration is almost exclusively confined to Shakespeare's works,—and there are very many whose enthusiasm cannot be otherwise moved,—there were various sources of attraction on Saturday night. It was not merely that there were old favourites, like Mr. Phelps and some of his gifted fellows, to welcome, but there was Mrs. Vezin about to try a new and bolder flight than she has been wont to take, and Mr. Barry Sullivan, back from the Antipodes, to challenge the public judgment by his assumption of *Faulconbridge*. We take Mrs. Vezin's line to belong to comedy; her *Mr. Oakley*, as charming an interpretation of character as the stage has seen for many years, settled that matter last season, when she was ably supported by Mr. Phelps, as *Mr. Oakley*. But the *Lady Constance* is another matter. It is a part full of difficulties, presenting pit-falls and temptations to actresses lacking judgment, and hardly possible to be played otherwise than very well or very ill. The famous interpreters of this character began a hundred and thirty years ago with Mrs. Hallam, and there has been a brilliant and intellectual succession of representatives in Mrs. Cibber, Mrs. Bellamy, Mrs. Spranger Barry, Mrs. Yates, Mrs. Siddons, Miss O'Neil, perhaps Mrs. W. West, who certainly did not play it ill, Mrs. Faucit, who acted it with remarkable force and dignity, and her accomplished daughter, Miss Helen Faucit, whose rendering of the character was, with less physical strength, and not quite such noble presence, as dignified as that of her mother.

Mrs. Vezin, it will be seen, succeeded to a perilous inheritance; but she showed herself worthy and competent. She avoided that into which all inferior Constances fall, *rant*. There was not any over-piling of the agony. The *Lady Constance* of the night made you feel that she was the most wronged and wretched of ladies, not by screeching assertion of her misery, but by touching expression of her sorrows. Now and then, indeed, Mrs. Vezin seemed a little over-weighted by her part. It really requires an intellectual giantess in some portions; but she met the difficulty with an art which surmounted it, and, by intonation and action, left little to be desired in the illustration of her heart-crushing woe. The famous incident where the majesty of her misery takes the earth for its throne, and she bids kings come there and worship her, was enacted with the discretion and effect which only a true artist could give to it; and, in here taking leave of Mrs. Vezin for the moment, we will add, by way of suggestion, that no true artist should obey a call to come forward, always uttered by the least discriminating part of the audience, when obedience to the call interrupts the business of the scene. Miss Helen Faucit avoids such obedience, as far as she may, even between the acts; but to come forward after an exit, and interrupt a scene, the stage kept waiting, the actors thrown out of gear, while the heart-broken mother of *Arthur* breaks into wretched smiles, and a noisy portion of the house makes them broader and more expressively radiant by its senseless shouts, is what no great artist should stoop to, nor any effective stage-manager allow.

The *Constance* of the evening was, however, a decided success; and in equal measure was the new *Faulconbridge*, represented by Mr. Barry Sullivan. This fine part has always been a favourite one with the greatest actors, some of whom have, nevertheless, perilled their laurels in it. Taken for all in

all, perhaps, it has never had a more effective representative than Walker. We are accustomed to associate Walker with one single character, of which he was the original representation, *Captain Macheath*. But Walker was only an operatic hero by accident. He was the young lover and gay prince of the stage, was the original *Charles* in Cibber's 'Nonjuror,' and played the *Rambles*, and *Plumes*, and *Townleys* with hilarious effect. Indeed, we may say that Walker was a general actor, who played everything with great effect, from *Cato* and *Oronooko*, from *Young Fashion* and *Harcourt*, to heavy gentlemen and to dreary sovereigns, like *Henry the Sixth* in 'Richard the Third.' *Captain Macheath* was his great part; but Walker's greatest part was his *Faulconbridge*. In him alone, say now long silent critics, "were found the several requisites for the character,—a strong and muscular person, a bold and intrepid look, manly deportment, vigorous action, and a humour which descended with an easy familiarity in conveying a jest or sarcasm with uncommon poignancy."

This is high praise, and, probably, need not be qualified even now, though Walker's successors comprise Ryan, Delane, and Sparks, who did not approach him; silver-toned Spranger Barry, supreme in all else, but whose only qualification for *Faulconbridge* was his incomparable figure; Garrick, who had none of the requisites, not even figure; Holland and Palmer, dull butterflies; Lewis, a voluble comedian; Smith, almost too "gentleman-like"; Wroughton; Charles Kemble, admirable in intention, look, bearing, significance, in everything but that weak pipe of a voice, so unheroic in all his heroes; Wallack, with his effeminate beauty; Wigan, with rare skill in presentation; and, latest of all, Mr. Anderson, with his rough and ready way, thundering voice, and absence of feeling.

The new *Faulconbridge* was safe with his audience from his very first utterances. Mr. Sullivan's conception of the character is nearer to that of Charles Kemble than of any other actor within the memory of contemporaries. There is an abundance, but not a superabundance of spirit in it; the utmost freedom without vulgarity, a graceful ease, and not a braggart swagger. The "bastard *Faulconbridge*" is a phrase which seems to have suggested to some actors that he to whom it is applied was a fellow cast upon the world; a common soldier, with barrack or camp ways and speech and licence; without education, save such as he had picked up in hosteleries, and with no more reflection than such as he might catch by finding his own face, after a deep draught, at the bottom of a tankard. Mr. Sullivan's *Faulconbridge* is a true gentleman and a soldier. He becomes his rank; and his freedom in the King's presence just indicates the pleasant licence he allows himself by right of his royal blood, of which he is so proud, though he comes of it a little awkwardly. The capital scene in which he taunts *Austria* was replete with this spirit. The sarcasm was winged with the wit of a brave gentleman, not made potent by the resonant delivery of a truculent guardsman. It was all the better winged, and all the more effectually pointed, because delicacy was mingled with force; and we never saw an audience more hilarious, or a pit more joyously carried away by it. Mr. Sullivan's success was not confined to the comedy or melo-dramatic element of the character. There were other portions in which his display of feeling was given with a quiet but telling effect, no jot of which was lost with the critical part of his audience, who were closely scanning his speech, action, bearing, and expression. His by-play was equally good; that is, his part in the drama was never forgotten. His very bow to *King John* was of a real Sir Richard to a substantial king; and, when he bent over the body of the dying monarch, there was earnestness of significance in the action, as if the gallant knight felt a respectful sorrow for the condition of his uncle. Old Drury, in short, may be congratulated on its acquisition of Mr. Barry Sullivan. Some time has passed since he won golden opinions by his impersonation of *Hamlet*; but a certain lack of strength and want of practice were observable. Since then, however, his experience in the colonies has made a considerable difference in this respect.

As manager and chief actor of an Australian theatre, he was compelled to venture what in England he might have avoided; and having, by his excellent conduct of his establishment, secured an extensive patronage, was enabled to make essay of his powers in the most trying parts. He succeeded, and now has so manifestly improved in health and physique, that he supported the part of *Faulconbridge* with the utmost ability and success.

Of the other performers there is nothing new to be added. Mr. Phelps's *King John* is one of the most effectively rendered of his heroic parts. Though heroic, it is perfectly natural, and the bursts of his rage and the villany in his suggestiveness for the commission of villany, were not more remarkable than the simple truthfulness and great effect with which he haughtily interfered between the two saucy exchangers of rough words, in a royal presence, in his delivery of "We like not this." Let us add, before the curtain falls, a word of praise for Mr. Mead, who played the *King of France*. He has been in a bad school, and come very well out of it. His utterance was so clear, without being in the least strained, that no syllable of it was lost. It was the same in 'The Comedy of Errors,' in which he made interesting an unthankful part by his intelligible delivery of the text. To us, this was a matter of as much interest as the lively buffooning of the brothers Webb, and their antique impersonation of the two *Dromios*.

OLYMPIC.—Reserving till next week fuller account of Mr. Tom Taylor's new drama, 'The White Boy,' acted for the first time on Thursday, we will simply record here that a full-dress rehearsal of it took place, with success, on Wednesday night, before a select group of critics and playgoers, privately invited by Mr. Horace Wigan. We give warrant for the excellence of the story when we say it is taken from Mrs. S. C. Hall's 'White Boy,' a fact which should have been mentioned in the bills. It is skilfully adapted to the stage, but lacking force, however, in the delineation of the heroine, as is often the case in Mr. Taylor's dramas. Every old member of the company acted his best. Two additions to it are to be noticed, Mr. Dominick Murray, who showed himself a genuine actor, and Miss Milly Palmer, from the Strand, who acted with grace, good taste and feeling. We will point out as matters to be amended after a rehearsal, that in a drama, the date of which is 1795, a young officer should not wear boots of the time of William the Third; that teetotalism and the pledge and lighting *dudeens* with lucifer matches are all anachronisms in another direction, and that never since Ireland rose out of the ocean was there ever such a thing seen in it as native peasants dancing in smock frocks! White Boys wore shirts, at night, over their dress, but real old Saxon smocks, like Somersetshire rustics, never! These matters are for the consideration of the manager. In all other respects (barring the brogue and the moon, which declined to move) every one may be congratulated, and Mr. Wigan may hope for a prosperous season, though the graceful pillar of his house has gone with the departure of Miss Kate Terry.

SADLER'S WELLS.—Dr. Marston's well-known 'Anne Blake,' recently produced here, is in five acts, but it scarcely occupies two hours in performance. In structure it is very simple, and deals with a single action. Every act is worked up to, an effective tableau, and great skill is exhibited in the drawing of the characters, each standing out most distinctly and contributing to the general effect of the plot. But the two main characters, that of *Anne Blake* and her lover *Thorold*, are especially prominent, and command the serious attention of the spectator. We need not repeat the well-known plot. It is only necessary to say that Miss Marriott, who has won a reputation for her ability to sustain the masculine women of the drama, and also some of its male personages which admit of a feminine interpretation, such as *Hamlet*, *Romeo* and *Ion*, came to the present assumption with specific credentials, and they were well borne out by this example of her powers. The scenes of passionate emotion were distinguished from the rest, not only by their vehemence, but their truth of expression.

As each of the tableaux denotes a crisis in *Anne Blake's* moral state, Miss Marriott had to reserve her force for its demonstration, and every time brought down the curtain to enthusiastic plaudits. We have also to praise Mr. J. H. Slater for the very careful style in which he brought out the points in the character of *Thorold*. Mr. L. Warner, as *Llanistion*, did not, unfortunately, see all the capabilities of his part. Mrs. Saville, as *Lady Toppington*, realized the part, both in manner and costume, with the discrimination of a well-practised actress; and Mr. Sheppard rendered *Sir Joshua* effective without caricaturing his extreme selfishness and want of principle.—On Saturday Miss Marriott acted the part of *Hamlet*. It is an extraordinary performance, and combines much ideality with force of acting. She works out a conception with persistent energy, and a grace of attitude, which gives to the delineation gentleness and tender relief, and she pleasingly varies the transitions of thought and passion with which the character abounds. The part of *Ophelia* was charmingly impersonated by the young lady with the stage name of Miss Leigh. The mad scenes were enacted with great delicacy and beauty. There is bright promise in her, the realization of which, we hope, will not be obstructed by that sort of praise which often prevents what it implies.

GRECIAN.—This theatre has commenced the autumn season with a new piece, by Mr. H. Leslie, entitled 'The Sin and the Sorrow.' It was enthusiastically received by a crowded house, and is well calculated to attract all the play-going population of the neighbourhood.

MUSICAL AND DRAMATIC GOSSIP.

IN the season, or out of the season, a greater sensation has been rarely made than by Herr Wilhelm's appearance at Mr. Mellon's Promenade Concerts. It may be recollected that, a few years ago, after hearing at Leipzig this best of Herr David's pupils, we predicted a career for him of no ordinary brilliancy. For the moment the above announcement of its having commenced must suffice. We shall not fail to have many opportunities of speaking in detail of his amazing executive powers.

Hardly is the past season disposed of than we receive notices of music, professional, religious and amateur, in every corner of the kingdom. The *Glasgow Choral Union*, whose efficient aid to the Festival held there is not forgotten, has been giving a choral and orchestral concert of sacred music in the nave of the Cathedral, conducted by Mr. Lambeth. The selection was good and well varied.

The last two Ballad Concerts at the Crystal Palace have been conducted by Mr. Sullivan. We are told that he is preparing a new overture for the Norwich Festival. The Saturday Winter Concerts at Sydenham will commence this day week.

Mr. W. Harrison, say the journals, is to take the part of *Faust* in the new dramatic version of the story which will be produced at Drury Lane. The original intention was to assign it to Mr. E. Phelps.

A rumour is abroad that Signor Arditì will no longer conduct Mr. Mapleson's Italian operas. The successor named is Signor Bottesini.

M. Offenbach's new opera (or should we not rather say one of his new operas?), about to be presented at the Théâtre du Châtelet, will bear the title of 'Haroun-al-Raschid.'

M. Dumas, we are told, is to write the book of the opera to be fabricated for Mdlle. Carlotta Patti, drawing on his own novel, 'Le Vicomte de Bragelonne,' for materials. M. von Flotow is named as the composer.

A late number of the *Pall Mall Gazette* contained a curious letter from Antwerp, describing a performance there of a miracle-play, after the fashion of those singular exhibitions which are held every twenty years in the Ober Ammergau, near Munich (one of which was so graphically described by Miss Howitt). A drama on the sufferings and death of the Saviour, not after Bavarian fashion in the open

air, but behind the footlights of a modern stage (the play, be it observed, sanctioned by the Roman Catholic Church), offers a jumble of things sacred and profane so strange as almost to make us doubt the sight of Time, or the reality of progress.

The October term of the Conservatory of Music at Cologne will commence on the 3rd of next month.

The *Gazette Musicale* announces the approaching *début* at Leipzig of a son of Herr Wachtel, who, like his father, is said to possess a tenor voice of the finest quality.

A word in addition to our last week's obituary notice of a valuable musician and a good citizen (such was Mr. Brownsmith). Though he was outdone in execution on his instrument, the organ, by other players who could be named, as an orchestral performer, otherwise as supporting and accompanying choral music (a task by no means so easy as some might fancy), he could not well be exceeded. The value of his services to such performances as those of the Sacred Harmonic Society, and the great Handelian celebrations at Sydenham, was as great as its unobtrusiveness.

MISCELLANEA

Assyrian Inscription.—While examining part of the Assyrian collection in the British Museum, I lately discovered a short inscription of Shalmaneser II., King of Assyria, in which it is stated that Jehu, King of Israel, sent him tribute in the eighteenth year of his reign. That he received tribute from Jehu is well known from the Black Obelisk Inscription, but the date of the event has not been previously ascertained. This fact is of chronological interest. I may add, that Jehu in this inscription is styled "Son of Omri," the same as on the black obelisk. GEORGE SMITH.

Routes to India.—In noticing the Overland journey of Mr. Edwards, in 1837, we merely wished to praise, as it deserved, the adventurous spirit of that gentleman, who, when just entering the service of Government, and never having visited the East before, chose a route which might still be called experimental, as no regular communication had been established by it between England and India. Capt. Wilson has well shown in his pamphlet, 'Facts connected with the Origin and Progress of Steam Communication between India and England,' that since 1819 many efforts had been made to open the Overland route, and to establish regular communication by it, and that amongst the "Pioneers" of this important route no one is entitled to so conspicuous a place as Capt. Wilson himself, who commanded the *Hugh Lindsay* in her voyage from Bombay to Suez in 1830.

Vivisection Prize Essays.—In a review of 'Vivisection Prize Essays,' in your last number, you say you "do not know whether Prof. Owen took an active part in the labours of adjudication." Will you allow me to call your attention to the words in the Preface to Dr. Markham's essay: "I have the satisfaction of knowing, and am permitted to state, that it received the approbation of those scientific members of my own profession whose opinion was taken on the occasion." And will you also let me add, that the gentlemen in question were Prof. Owen, Prof. Carpenter and Dr. Quain. These three men of science, I happen to know, not only selected this essay of Dr. Markham's out of some thirty competing essays (and, of course, without any knowledge at the time of who was the author), but recommended it to the Society for Prevention of Cruelty to Animals in very warm terms of approbation as the prize essay.

PHYSIOLOGIST.

Shakespeare Readings.—'The Tempest,' act iv. scene 1.—

Your banks with pioned and twilled brims,
That spongy April at thy best betrims.

This passage has caused the commentators great trouble. Hammer or Stevens altered it to "Peonied and tulip'd brims," and this emendation has, I think, been followed by most editors; but I cannot say that I am satisfied with it; for letting alone

its great departure from the text, which I consider an insuperable objection, I cannot see in what way Ceres is connected with flowers,—they belong to the domain of Flora, to the garden, and not to the field. Now I believe that by "pioned and twilled brims" Shakespeare only meant to express that which is now expressed by hedged and ditched. To *pion* is, I take it, an old term for to bank, to make good or repair with the spade; whence we derive our word pioneer. Spenser uses the word "pioning." Twilled has reference to the fence; it means to weave or interlace, a meaning that it still bears in our textile fabrics. Now, if any one will visit the country about March he will see this work of pioning and twilling going on. The hedges and banks being now bare of foliage, the weak parts, both in the one and the other, are perceived; and their reparation takes place in the following manner. The earth is thrown out from the bottom of the ditch into its brow, and the bank, particularly that part of it next to the roots of the fence, viz. its brim, is made good by fresh earth being thrown up and plastered down, as it were, with the spade upon it: this is the pioned brim. The reparation of the fence takes place thus. The dead wood is cleared away, whilst the living, consisting in Shakespeare's time of various kinds—such as hazel, maple, elder, sloe, and bramble (for they had not then our quick-set hedge of whitethorn)—is beat down and interlaced or twilled one with another. The stouter portions, in order to make them pliant, without destroying their vitality, being partially cut through; they are, in short, braided together much after the fashion of a wicker hurdle; now this, I think, is the meaning of the word "twilled." Before the spring this work is completed; the banks have then their brims pioned and twilled; and in that state they await the decorating touch of April; with the spring they burst into leaf and blossom; the white sloe is then seen blending with the wild rose, far more fitting for the chaste crowns here spoken of than either peonies or tulips. For these reasons I think we must adhere to the original text. J. NICHOLS, M.R.C.P. Lond.

Pose.—Your Correspondent E. V. asks whether this word is used in any part of England. It is used in the West Riding of Yorkshire, but not in any of the senses he mentions. To *pose* is there employed in the place of *to kick*, to *lift with the foot*. I believe this use of the word is confined to the West Riding; at all events, I never met with it in the eastern part of the county, where I have resided for some time. S.

Brock and Brockley.—I cannot allow Mr. Airy to divert the generic meaning of the word Brock, without entering a protest; it means Badger, and Brockley means the Badger's Meadow; Brockleys, Brockwells, Brockholes and Brockhursts, are freely scattered all over England. A. H.

A Shadow of the Flint Age.—In addition to the notes that have already appeared in the *Athenæum* concerning the zerim or flint knives of the Hebrews, in the time of Joshua (fifteenth century B.C.), it seems that four centuries later there was no smith amongst the Israelites, the Philistines keeping the art of working iron to themselves as a matter of policy (1 Sam. xiii. 19). From a recent number of the *Comptes Rendus* we gather that the Chinese emperor, Woo-wang (B.C. 1122) received arrows with stone points as tribute from the inhabitants of So-tchin, which people continued the use of them in the time of Confucius. The long time Noah took to build the ark would imply the want of proper tools, which might be explained by Tubal Cain's knowledge being confined to the descendants of Cain; and this having been swept away by the flood, the world would have to begin again with flint or stone implements.

JOHN JOS. LAKE.

TO CORRESPONDENTS.—A. L.—R. U.—M. A. D.—A. J.—received.

T. N. will perceive, on reference to the *Athenæum*, that the subject-matter of his letter has already been treated in our columns.

. The full price will be given at the Publishing Office for copies of the *Athenæum* for August 25 and September 1.

NEW NOVEL,

In One Volume.

Post 8vo. 8s.

THE JOURNAL OF A WAITING GENTLEWOMAN.

Edited by BEATRICE A. JOURDAN.

"We have never read a more tender tale of woman's love, told by a woman, than the autobiographical record before us. The characters are all true to the life, and all well drawn, without exaggeration or affectation."

London Review.

"That the imaginative migration to the age of Charles II. may have been some little stimulus to Miss Jourdan's literary power in this delicately finished novelette, we do not doubt; but there is a clearness and certainty of touch about most of the characters, which seem to indicate that the authoress has gone back to the past rather from sympathy with the slightly formal, reserved, dignified tone of calm which marked the feminine sentiment of the olden days, than from any need of the stimulus of the change of costume. The old-world touches are singularly moderate, and the reader is made to feel how like the life then was to the life now, rather than how different. The story itself is natural, simple, and yet original, and very artistically worked out."—*Spectator*.

AUSTIN ON JURISPRUDENCE.

Now ready, complete in 3 vols. 8vo. 39s.

THE PROVINCE of JURISPRUDENCE DETERMINED: a Series of Lectures on Jurisprudence; or, the Philosophy of Positive Law. By the late JOHN AUSTIN, of the Inner Temple, Barrister-at-Law.

"These Lectures possess a degree of value, and deserve a position in English literature, which it is difficult to rate too highly. With the single exception of Jeremy Bentham, the late Mr. Austin was the only Englishman of any considerable ability who ever made the study of jurisprudence proper the object of his life."

John Murray, Albemarle-street. Saturday Review.

PHYSICAL GEOGRAPHY.

INTRODUCTORY TEXT-BOOK of PHYSICAL GEOGRAPHY. By DAVID PAGE, F.R.S.E. F.G.S. With Sketch-Maps and Illustrations. Second Edition.

"The author of this 'Introductory Text-Book' has produced a work which cannot fail to be useful to all who are entering on the study of Physical Geography. We believe, indeed, that many will be induced to enter on the study from a perusal of this little work. The divisions of the subject are so clearly defined, the explanations are so lucid, the relations of one portion of the subject to another are so satisfactorily shown, and, above all, the bearing of the Allied Sciences to Physical Geography are brought out with so much precision, that every reader will feel that difficulties have been removed, and the path of study smoothed before him. With those opinions it is our pleasant duty to recommend this 'Introductory Text-Book of Physical Geography' to all who are in any way interested in the external conditions of the globe which we inhabit."

—*Athenæum*.

By the same Author,

ADVANCED TEXT-BOOK of PHYSICAL GEOGRAPHY. With Engravings. 5s.

"A thoroughly good Text-Book of Physical Geography."

"A comprehensive outline of the science, well suited for private study, or for use in schools."—*Examiner*.

EXAMINATIONS on PHYSICAL GEOGRAPHY. A Progressive Series of Questions, adapted to the Introductory and Advanced Text-Books of Physical Geography. 9d.

ATLAS of PHYSICAL GEOGRAPHY, illustrating, in a Series of Original Designs, the Elementary Facts of Geology, Hydrology, Meteorology, and Natural History, 20 Coloured Maps, by A. Keith Johnston, F.R.S.E., &c. Half bound, 12s. 6d.

Of whom may be had, uniform with the above,

SALEM CHAPEL. 5s.—THE RECTOR, and THE DOCTOR'S FAMILY. 4s.
THE PERPETUAL CURATE. 6s.

Just published, crown 8vo. 7s. 6d.

REMINISCENCES OF A BENGAL CIVILIAN.

By WILLIAM EDWARDS, Esq.,
Judge of Her Majesty's High Court of Agra.

"The narrative of the author's personal adventures as a fugitive in Rohilkund, Fettehghur, and Oude, his narrow escapes from death, impending over him at every step, and his final arrival at Cawnpore, will be read with thrilling interest. A Chapter on 'Facts and Reflections connected with the Indian Rebellion' concludes a volume which its title leads us to view more clearly the causes of that commotion, discloses past errors more distinctly, and points out the means of future improvements more intelligently, than most of the innumerable works published on those important subjects."—*Morning Post*.
"On all subjects connected with India, Mr. Edwards's long and varied experience, and his intimate knowledge of its character, entitle him to a respectful hearing; and we feel bound to commend his 'Reflections' to the careful consideration of all who are interested in the continuation of our Empire in the East."—*Athenæum*.

SMITH, ELDER & Co. 65, Cornhill.

THE NEW PLAY,
"THE LONG STRIKE,"

mainly derived from that celebrated Novel, Mrs. GASKELL'S 'MARY BARTON.' The Tenth Edition is now ready in the "Select Library of Fiction." 'RUTH: a Novel,' by the same Authoress, Eighth Edition, is just ready. Price 2s. each.

London: CHAPMAN & HALL; sold by all Booksellers.

FRITH'S LARGE-SIZED PHOTOGRAPHS

OF

EAT BRITAIN, SWITZERLAND, ITALY, NORMANDY, &c.

Size, 8½ by 6½ inches, on Mounts 14½ by 11½ inches.

sale of prices is very low; whilst in artistic beauty, and as specimens of the Art, the series is certainly unequalled. About 500 sample Subjects may be seen at 31, Cornhill—BECK & BECK; and 130, Strand—W. ROUGH & Co.; or, address the Publisher,

F. FRITH, Brightlands, Reigate, Surrey.

ANGLICAN CHURCH ORNAMENTS.

NOTICE.—ENGLISH CHURCH FURNITURE, ORNAMENTS and DECORATIONS, at the period of the REFORMATION, as Exhibited in the List of the Goods displayed in certain Lincolnshire Churches, A.D. 1566; edited by Ed. Peacock, F.S.A., with Glossary and Illustrations of the Fresco of the Seven Sacraments; the Hearse; the Easter Sepulchre, &c., is ready this day, thick 8vo. cloth, gilt, price 15s.

curious, as showing what articles of Church Furniture were in those days considered to be idolatrous or un-
ry. The book also gives the oldest known Churchwarden's account.

London: JOHN CAMDEN HOTTEN, 74 and 75, Piccadilly.

SALOM'S NEW OPERA and FIELD GLASS, and THE RECONQUERER GLASS, price 10s. 10d., sent free.—This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape at 30 miles, Jupiter's moons, &c.—The MARSHES OF CAMBAY: "The Reconquerer is very good."—*EARL OF BRADSLAW*: "I find it all you say, and wonderfully powerful for so very small a glass."—*EARL OF CAITHNESS*: "It is a beautiful glass."—*Rev. Lord SCARSDALE* "approves of it."—*Lord GIFFORD*: "Most useful."—*Lord GARVAGH*: "Remarkably good."—*Sir Dugald CLYDE*: "It gives me complete satisfaction, and is wonderfully good."—*Capt. SNEYD*, Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—*F. H. HAWKES*, of Farley, Esq.: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power for its size with so much clearness."—*The Field*: "We have carefully tried it at an 800-yd. rifle range against all the glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—*Notes and Queries*: "What intending tourist will now start without such an indispensable companion to a pleasure trip?"

The celebrated "HYTHIE" GLASS shows bullet-marks at 1,200 yards, and men at 3½ miles, price 31s. 6d. All the above glasses, respectively bearing the registered trade-marks, "Salom," "Reconquerer," and "Hythie," are only to be had direct from SALOM & CO., 21, PRINCES-STREET, EDINBURGH, and 137, REGENT-STREET, LONDON.

DRAWING-ROOM FURNITURE.
 In new and elegant designs, covered in Rep. Turkey Cloth, and Silk Damasks, &c. This Department is also complete with the latest Parisian Novelties, Cabinets, Walnut, &c.
 Good Solid Dining-room Sets, in Mahogany and Oak.
 Iron and Brass Bedsteads in great variety.
 The new patent Spring Mattress stands alone for its strength and comfort.
 The Bedding is all made on the Premises, and under inspection.
 Their famous polished Pine Bed-room Sets demand attention.
 Extract from the Builder.
 "We were shown a short time since a bedroom fitted out by Earl for his own occasional occupation at the end of the year, every piece of furniture, save the iron bedstead, was made of white wood in question. Dressing-table, washstand, and towel-rails, and chairs, were as spotless as the crest of the beating on the shore, and the very height of cleanliness attained."

THE STOCK OF CARPETS.
 Is one of the choicest in London, embracing Turkey, Velvet, Brussels, Kidder, Felt, &c.
 Floor-cloth, Kamptulit, Linoleum, and Cork Carpet, &c.
 and laid down to any size and plan.
 Furnishing Drapery of every description.
 Damask, Rep., and Felted Cloths, French and English &c.

THE STOCK OF HOUSEHOLD LINEN.
 Is well worthy the attention of Clubs, Hotels, and large sumers, who will be treated with most liberal terms.

AUTUMN COUGHS, COLDS, ASTHMA and INFLUENZA, Are speedily cured by the Use of

SPENCER'S PULMONIC ELIXIR, prepared from the Recipe of the late C. SPENCER, Esq., Surgeon, & Salford, deservedly celebrated as the most successful Practitioner in all Pulmonary Affections.

Opinion and Testimonial received from the Churchwarden of Christ Church, Newcastle, in the City of London.

"Gentlemen,—I have been troubled with a bad cough for many years past. A friend sent me a bottle of your SPENCER'S PULMONIC ELIXIR, and I have received so much benefit from its use that I am desirous of writing my best recommendation in favour of this excellent medicine.

"Please send me immediately a 2s. 6d. bottle, and receive cash. I am, yours faithfully, WILLIAM MARK CLARK, Churchwarden of Christ Church, Newcastle-street, in the City of London."

"8, Crane-court, Fleet-street."

Prepared with great care by the Proprietors, T. ROBERTS & CO., 8, Crane-court, Fleet-street, London.—May be had of all Medicine Vendors in the Kingdom, in Bottles of 1s. 1d. and 2s. 6d. each.

STAINED GLASS WINDOWS and CHURCH DECORATIONS.

HEATON, BUTLER & BAYNE,
GARRICK-STREET, COVENT-GARDEN, LONDON.
ILLUSTRATED CATALOGUE, 3s. 6d. post free.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without springs, wires, or ligatures. They so perfectly resemble the natural teeth, as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and is guaranteed to restore articulation and mastication. Decayed teeth stopped and rendered sound and useful in mastication.—52, Fleet-street.

PEPSINE.—MORSON'S PEPSINE WINE. MORSON'S PEPSINE LOZENGES are perfectly palatable forms for administering this valuable remedy for weak digestion. Manufactured by T. MORSON & SONS, 124, SOUTHAMPTON-ROW, Russell-square, London, W.C.
PEPSINE WINE in Bottles at 2s., 3s. and 4s. each.
LOZENGES in Boxes at 2s. 6d. and 4s. 6d. each.
Pepsine Globules in Bottles at 2s., 3s. 6d. and 4s. 6d. each.

TONIC BITTERS.—WATERS' QUININE WINE, the most palatable and wholesome Bitter in existence. AN EFFICIENT TONIC. An unequalled stomachic, and a gentle stimulant. Sold by Grocers, Italian Warehousemen, Wine-Merchants, Confectioners, and others, at 2s. a dozen. Manufactured by WATERS & WILLIAMS, 2, MARTIN'S-LANE, CANNON-STREET, LONDON. Wholesale Agents, E. Lewis & Co. Worcester.

THE POPE'S HEALTH RESTORED by DU BARRY'S FOOD. Cure No. 68,412.—Rome, July 21st, 1866.—The health of the Holy Father is excellent, especially since abandoning all other remedies he has confined himself entirely to Du Barry's Revalenta Arabica Food, which has produced a surprisingly beneficial effect on his health, and his Holiness cannot praise this excellent food too highly.—From the *Gazette du Midi*, July 25th.

DU BARRY'S delicious, health-restoring REVALENTA ARABICA FOOD restores good appetite, perfect digestion, strong nerves, sound lungs and liver, refreshing sleep, functional regularity and energy to the most enfeebled or disordered, without medicine, inconvenience, or expense, as it saves fifty times its cost in other remedies, curing dyspepsia (indigestion), constipation, flatulency, phlegm, debility, consumption, nervous, bilious, liver and stomach complaints, low spirits, as proved by 60,000 cases which have been recorded in books.—In tin, at 1s. 1d.; 1lb. 2s. 6d.; 2lb. 4s. 6d.; 12lb. 22s.—DU BARRY & CO., 77, REGENT-STREET, London; and all Grocers and Chemists.

THE MOMENTOUS QUESTION.

CRINOLINE.—LADIES should at once see THOMSON'S NEW STYLE, which, light, graceful, and elegant in outline, combines comfort and economy with the very latest fashion. Observe the name, "Thomson," and the Trade Mark "A Crown." Sold everywhere.

CONSUMPTION.—Dr. CHURCHILL'S Successful Treatment of Consumption, Diseases of the Chest, Chronic Cough, General Debility, Loss of Appetite, &c., by the Syrops of Hypophosphite of Lime, Soda, and Iron, and by the Pills of Hypophosphite of Quinine and of Manganese, prepared by H. H. SWANN, of Paris. Price 4s. 6d. per bottle. Wholesale and Retail Agents, DINNEFORD & Co., Chemists, 172, New Bond-street, London.

DINNEFORD'S FLUID MAGNESIA.—The Medical Profession for thirty years have approved of this pure Solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Gout, Gravel, Biliary Disorders, and as a mild aperient it is especially adapted for Ladies and Children. Prepared by DINNEFORD & CO., Chemists, &c., 172, NEW BOND-STREET, LONDON, W. And sold throughout the World by all respectable Chemists. Caution.—See that "Dinneford & Co." is on each Bottle and red label over the cork.

DELICATE and CLEAR COMPLEXIONS, with a delightful and lasting fragrance, by using THE CELEBRATED UNITED SERVICE SOAP TABLET, 4d. and 6d. each. Manufactured by J. C. & J. FIELD, UPPER MARSH, LAMBETH. Order of your Chemist, Grocer, or Chandler.

BILE and INDIGESTION, Sick Headache, Flatulency, Heartburn, and all Bilious and Liver Affections are speedily removed by the use of COCKLE'S ANTIBILIOUS PILLS, which have been held in the highest estimation by all classes of society for upwards of sixty-five years. May be had throughout the United Kingdom, in Boxes at 1s. 1d., 2s. 6d., 4s. 6d. and 12s.

DR. DE JONGH'S

LIGHT-BROWN COD LIVER OIL, Invariably pure, palatable, and easily taken. Prescribed as the safest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, and DEBILITY of ADULTS and CHILDREN.

Pronounced by the highest Medical Authorities to be INCOMPARABLY SUPERIOR TO EVERY OTHER KIND. Sold only in capuled Imperial Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 9s.; by respectable Chemists throughout the world.

Publishing Department on First Floor of No. 22.

THE CHADBURN LANTERN, for projecting enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This instrument supplies a great want in scientific and amusing illustrations; by it Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail, thus rendering paintings on glass needless.—To be had direct from CH. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

Sales by Auction

LITERARY SALE ROOMS,

115, CHANCERY-LANE, W.C.

MR. HODGSON begs to announce that his Season for SALES by AUCTION of LIBRARIES, Stocks of Books, and Literary Property of every Description, will commence on the 11th of October, and at the same time to assure his Friends and the Public that the best mode of Disposal of Libraries, and Books of all sorts, is Sale by Auction in London. Mr. Hodgson's Sale Rooms were built expressly for the purpose, are very commodious, and their position extremely central. All Property entrusted to him may be considered insured from loss by fire; and the same punctuality and regularity in the transaction of his business, for which it has been characterised during the last forty years, will still continue to be exercised.
October, 1866.

THE BATTLE of the TWO PHILOSOPHIES.

By an INQUIRER.

"The Author is a man who thoroughly understands what he is about—a diligent student of Sir William Hamilton's writings, and, apparently, also, a personal pupil of the late Professor. The 'Inquirer' has evidently so far profited by his master's teaching as to be able thoroughly to grasp his meaning, and to give the essence of his speculations in a concise and lucid form; while his personal relations to the deceased philosopher give an additional interest to his little work, by enabling him to add the seal of an attached friend to the sympathy of an intelligent and liberal critic. . . . The 'Inquirer,' whoever he may be, well deserves the praise, and it is no slight praise, of being one of the very few writers about Sir William Hamilton's philosophy who really understand what they are writing about."—*Contemporary Review*.

London: Longmans, Green, and Co. Paternoster-row.

Just published, in 12mo. price 2s. 6d. cloth.

THE NEW NOVELS, AT ALL THE LIBRARIES.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MACDONALD, M.A., Author of "Alec Forbes," "David Elginbrod," &c. 3 vols.

RACHEL'S SECRET. By the Author of "THE MASTER of MARTON." 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*. "A novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Ser.*

NORA'S TRIAL. 3 vols.

"A noble mind to practice on herself."—*Wordsworth*. "There is much to interest and entertain in the history of 'Nora's Trial.'"—*Ser.* "This story is touching and well written."—*Ser.*

LORDS and LADIES. By the Author of "MARGARET and HER BRIDESMAIDS," &c. 3 vols.

"Lords and Ladies" is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will remain as it is highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

A NOBLE LIFE. By the Author of "JOHN HALIFAX," "CHRISTIAN'S MISTAKE," &c. 3 vols.

"A story of powerful and pathetic interest."—*Daily News*.

THE WILD FLOWER of RAVENSWORTH. By the AUTHOR of "JOHN and I," &c. 3 vols.

"A beautiful tale, written with deep feeling. It charms by its elegance, and moves by its pathos."—*Illustrated News*. "A charming story, of great originality, full of pathos and grand nobility of thought and action."—*Observer*.

THE MOTHER'S FAVOURITE. By S. RUSSELL WHITNEY. 3 vols.

"A work of no small ability. The plot is not only well conceived, but admirably executed."—*John Bull*. "This story is a fair example of the popular school, and carries out the interest of its plot to the last of its pages."—*Messenger*.

KINGSFORD. By the Author of "SON and HEIR." 3 vols.

(Just ready.)

HURST & BLACKETT, Publishers, 13, Great Marlborough-street.

THE CHRISTMAS GIFT-BOOK, 1866.

On December 1st, 1866, will be published, in imp. 4to. with paper and type made expressly for the work, and in elegant cloth, price 21s.

ELAINE. By ALFRED TENNYSON.

Illustrated by GUSTAVE DORÉ, with Nine exquisite full-page Drawings, engraved on steel in the first style of art by HALL, HOLL, JAMES, &c. The designs of this Artist have never been engraved on steel, and consequently have never been interpreted in their fullest sense. Mr. Doré has made these Drawings with special reference to this mode of Engraving, and it was at his special request that the Publishers determined to incur the cost of this work. It is also the first time that Mr. Doré has illustrated the works of a contemporary author, and, to use his own words, he desires the work "To be a monument to Mr. Tennyson, and to his own powers. Men from a faint note of the grand words to his own delectable son from a poet's pen."—*Edmund Doré*.

London: Edward Moxon & Co., Dover-street, W.

Crown 8vo. cloth, price 2s. 6d.

A LEXICON to HOMER, for the Use of Schools, containing all the Words in the Iliad and Odyssey, by the late W. WITTEGEL, Professor, University College, London. Williams & Norgate, 14, Henrietta-street, Covent-garden, London; and 29, South Frederick-street, Edinburgh.

This day is published, price 12s.

A DICTIONARY of BRITISH BIRDS, containing a full account of the Plumage, Weight, Habits, Food, Migrations, Nest and Eggs of every Bird found in Great Britain and Ireland. The whole arranged under the English name, and in Alphabetical Order. Edited by EDWARD NEWMAN, F.L.S., F.Z.S., &c.

London: Van Voorst, Paternoster-row.

ANATOMY, DISSECTION, and the Completion of the GEN-
ERAL ANATOMY. Many Illustrations. 10s. 6d. [November.]

SMITH'S HISTORY of the WORLD.
Complete in 2 vols. 8vo. with Maps and Plans, 21. 2s.
An ANCIENT HISTORY, from the
EARLIEST TIMES to the FALL of the WESTERN
EMPIRE: forming the First Period of the 'History of
the World.' By PHILIP SMITH, B.A., one of the Princi-
pal Contributors to Dr. Smith's Classical Dictionary.

"His points of transition are well chosen, and his wide and
various panorama of principalities, powers, and dominions clearly
arranged. He has availed himself liberally of the new lights
thrown by recent discovery and philology upon the annals of the
East, and in all that relates to the Oriental empires and African
kingdoms or republics his work is far in advance of any Ancient
History in our language."—*Saturday Review*.
"The style of the volumes is sustained with the equal tone of a
single, able, unimpeded and dignified historian throughout."
—*Athenæum*.

On RAILWAY and other INJURIES
of the NERVOUS SYSTEM. By JOHN ERICHSEN,
Emeritus Professor of Surgery in University College; Surgeon
to University College Hospital. Small 8vo. 4s. 6d.

The POET'S HOUR. Poetry selected
and arranged for Children. By FRANCES MARTIN, Super-
intendent of the Bedford College School. Fcap. 8vo. 2s. 6d.
cloth.

"The principle of selection here is not one chiefly of personal
taste, but experience. She has formed it on the strength of a
careful induction of children's taste; not, indeed, left to them-
selves, but guided by a light hand, that directs rather than con-
trols; in other words, of children's taste under the influence of
her personal preference. Anyhow, it is a very good and whole-
some taste, refined, but not too refined, for ordinary children."
—*Spectator*.

SPRING-TIME with the POETS.
Poetry selected and arranged by FRANCES MARTIN,
Superintendent of the Bedford College School. Printed on
tinted paper. Fcap. 8vo. 4s. 6d. cloth.

"The selection is a very full one, and represents our national
poetic literature in its whole range. It is especially rich in spec-
imens of our best living poets—to a degree, indeed, which would
not have been possible without the most willing and liberal co-
operation of authors, publishers, and other owners of copyright.
We have no hesitation in saying that, for the purposes which the
author has set forth, this is by far the best selection of poetry in
the language."—*Daily News*.

A SMALLER CLASSICAL MYTHO-
LOGY. Edited by Dr. WILLIAM SMITH. Many Illus-
trations. Fcap. 8vo. 3s. 6d. cloth. [Nearly ready.]

Uniform with the above,
A SMALLER HISTORY of ENGLAND.
Edited by Dr. W. M. SMITH. Fcap. 8vo. 3s. 6d.

A SMALLER HISTORY of ROME. By Dr.
SMITH. Fcap. 8vo. 3s. 6d.

A SMALLER HISTORY of GREECE. By
Dr. SMITH. Fcap. 8vo. 3s. 6d.

MODERN CHEMISTRY. Expe-
rimental and Theoretical. By A. W. HOFMANN, LL.D.
F.R.S., Professor of Chemistry in the Royal School of Mines.
Many Illustrations. Small 8vo. 4s. 6d.

London: TINSLEY BROTHERS, 18, Catherine-street,
Strand.

COMPLETION OF DR. MOMMSEN'S HISTORY OF ROME.

In a few days, Vol. IV., completing the HISTORY to the FALL
of the REPUBLIC,

RICHARD BENTLEY, Publisher in Ordinary to Her
Majesty.

The Novels of the Season.

FLORENCE MARRYAT'S FOR EVER AND EVER.

3 vols.

WHICH SHALL IT BE?

3 vols.

"No one can read this book without being struck by the more
than ordinary ability it displays. It is written with an ease and
a ripeness of worldly wisdom that indicate the practised hand
of a mature writer. The character of Madeline throughout is
of great psychological power, and the way in which she trembles
on the confines of terrible faults shows a rare power of discrimi-
nation. Madame de Fontenay is also a masterly sketch."
Saturday Review.

THRICE HIS!

2 vols.

"The production of a clever, dashing woman."

NOTICE.

EDINBURGH,

5th October, 1866.

In consequence of statements
regarding the expiry of the copy-
right of the WAVERLEY NOVELS,
the Publishers take this oppor-
tunity of reminding the Public
that the only portion of these
Works now out of copyright is
that which was first issued from
the press in 1814.

SIR WALTER SCOTT, in 1829,
carefully corrected and improved
the text of this first issue to such
an extent that hardly a page re-
mained without material altera-
tion, and, besides, added the Notes
and Introductions.

To this amended Edition he
gave the name of the "AUTHOR'S
EDITION," as being the only one
he desired the Public to regard as
bearing his sanction and approval.

All other Editions must there-
fore be regarded as imperfect in
the Text and incomplete in the
Notes and Introductions.

A. & C. BLACK.

NEW WORKS.

The Story of Jonah the Prophet.

By Rev. Dr. RALEIGH; Canonbury.

(In crown 8vo. next month.)

Edinburgh: ADAM & CHARLES BLACK.

LONDON, SATURDAY, OCTOBER 6, 1866.

LITERATURE.

Extracts from the Diary of the Rev. Peter Walkden, Nonconformist Minister, for the Years 1725, 1729 and 1730. With Notes by William Dobson. (Preston, Dobson; London, Simpkin, Marshall & Co.)

Two very simple little chapels still exist in thinly populated districts of Lancashire, one at Newton, in Bowland, the other near the village of Chipping. The first is above one hundred and seventy years old; the second dates from 1705. In those chapels the Rev. Peter Walkden officiated, in the first half of the last century, on alternate Sundays and on certain "preparation days." He seems to have been a successor of some of the old ejected clergy, and he exercised his office under the protecting shield of the Toleration Act.

If a man is ever to be got at at all, which is very doubtful, it must certainly be in his own diary, which he never intends for any mortal eye but his own. But then there probably was never diary written under such condition, except that of Pepys, and therein lies its especial excellence and use. We see in that journal (or rather should, if the diary were printed as Pepys wrote it) all that Pepys intended that Mrs. Pepys, their friends, and the world generally, should not see. It is something the same with Miss Burney's diary: as given to the world, it is a poor milk-and-water thing. Why it is not published as Fanny Burney wrote it, we cannot imagine. Conjecture has ventured to say that the susceptibilities of high persons might be wounded by the little scandal revelations of their grand-fathers, -mothers, -uncles, -aunts, and, in short, grand *et cetera*. We confess to disbelief in any such susceptibilities. Fanny Burney wrote of what she saw around her at Court; and as the entries were made for herself and not for the public, we are extremely desirous of seeing all that Fanny Burney saw, and heard, and thought, and said. As for Brunswick, Hanover, Hohenzollern, or either of the Mecklenburgs, being ruffled by the details, we repudiate such ideas altogether,—especially at a time when a King of Hanover is violently ejected from his house, and afterwards bidden by his cousin, the ejector, to send back the pocket-money which he happened to carry away with him.

The motives which induce men to write diaries are various. The young Duc de Saint-Simon, at the gay Court of Louis the Fourteenth, with every moment occupied by duties and dissipation, thought of nothing so little as of keeping a diary, till the Grand Monarque one day hoped he would never think of such a pastime, as chronicling Court-life was a sort of petty treason. From that time, Saint-Simon began secretly that wonderful journal which reveals all that the King would have had the ducal courtier not betray. In its way, there is no such book in the world for showing us the inner life of courts: Pepys's unfolds the inner ways of society.

Down in then desolate Lancashire, Peter Walkden, with no Court-life to tell, took spontaneously to the work which Saint-Simon followed, and chronicled the small beer of his Nonconformist and farming life in the North. The period was one when England was unquiet, and rebellion was scotched, not killed,—nay, actively afoot, with nothing less in view than overturning the throne, dislodging Brunswick, extinguishing the Church, and setting up the Stuart, Jacobitism and Popery, with a promise of toleration, to be observed or not as expe-

diency suggested. Of all this turmoil, the recent struggles, the present intrigues, the future prospects, Peter Walkden takes no more notice than if there were neither existence nor prospect of them. Falling thrones are nothing to him when his hay is going to ruin under falling rain; he talks more of his barns than the Church; and always less of anything else than of himself. A Nonconformist minister going into an alehouse to warm himself (on cold Sunday mornings) with a pint of ale and a pipe before he goes into chapel, and who sometimes—after entering the chapel, and finding no sufficient congregation collected,—returns to the alehouse, his pint and his pipe, till the faithful assemble in greater numbers,—is still a picture of the times in a distant locality, worth the contemplating now, and not unworthy the describing then. In the act itself offence was neither given nor taken. Why should not the "minister," who has ridden far in the cold and wet, have the comfort of his pint and his pipe before he came to expound to his people the law and the prophets? They could wait half an hour; they were not particular; the Rev. Peter would be all the warmer and stronger for his work; a touch of ginger or a cast of spice in his ale, they thought, would do Peter no harm; a flash of spirit in his drink was no stumbling-block to the faithful. Much good might it do him! Worthy creatures! they had nothing to object to a man who, on "May 25, Lord's Day, at noon went to Walmsley's, and got refreshed at the expense of William Richmond, and catechized as to who is the Redeemer of God's elect."

The Rev. Peter Walkden's residence was a modest house, for which he paid less than 6d. a week; four-and-twenty shillings a year, of fifty-two weeks to the year, on a lease of eleven years! In that modest house he had a wife, of whom he always speaks as "my love." And there was drunk, not merely ale, cold or spiced, but good claret wine, at 5s. 8d. the gallon. For 45s. and his clothes, he binds one of his sons to a "pled weaver." When we find him mixing ale and milk in one draught, we are concerned for his digestion, but the minister goes on his way rejoicing. Sometimes he is wayfaring to Preston, but he calls it "proud Preston," whereupon Mr. Dobson, jealous of the honour of his northern town, informs us, in a note, that it was so called, not because it is "proud" in the offensive sense, but on account of "its proud, i.e. genteel, inhabitants." The gentility of the minister's own family was partly maintained by giving his children a respectable education; but he calls his daughter's governess, Ann Parkinson, the "school dame," and what we should call "terms," or "fees," he roundly calls "wages." "She told us that our daughter's quarters were up on Tuesday last, and that the wages due to her should go towards paying for the quarter of coals she has had of me, and that she would have me bring half a quarter more, at my leisure." Thus, Mr. Walkden dealt in coals, as well as expounded the Gospel. There was a good deal of paying in kind went on, and a reciprocity of labour. "John Wilkinson sent his daughters, Jane and Jennet, who helped us all day, for help again." And there was much lending, and paying, and settling of little accounts, over pipes and penny pots of ale. The latter was not "small drink," or why, after due allowance of the tipples, did the Rev. Mr. Walkden leave his gloves at the Cross Keys, after the butcher treated him, and forget the hough of beef which he had taken in with him to the Flying Horse? As a sample of the dealing which took place, we may notice the entry wherein it is said: "Came to James

Corner's shop, and paid for wetting and soleing my shoes, 1s. 6d.; but he having bought veal of me, as much as came to 6d., I having since bought mutton of him that came to 5d., he owed me a penny on the flesh account, which is referred to a further reckoning." Stupendous balance!

It is to be remarked that Nonconformists observed the public church feasts and thanksgivings. We fancy they could not help themselves; but neither did they much trouble themselves, one way or the other. Thus, on a "Guy-Faux Day," Mr. Walkden rode over to Newton chapel—and "went into Edward Parkinson's, and got a pint of ale, and warmed me; then went to chapel, and prayed. . . then dismissed the people; and Mrs. Salisbury came to me, and gave me 2s. 6d., and desired my prayers; and Jane Parson came to me, and told me how bad health she had had . . . and desired me to pray for her, that it might be sanctified to the highest ends. I promised both to pray for 'em, and I parted . . . and I got a pint of ale and a toast, and was for coming home, but a mighty rain began to fall, with thunder, which caused me to call for another pint. . . I paid the landlady 6d. for meat, drink, and hay; the smith 9d. for shoeing and removing (the shoes of) my mare."

We are a little taken aback by one entry which tells us that "Old Mr. Townley, vicar of Slaidburn, was dead, on Monday last," and that "the parish was glad of his death, in hopes that the tithes would now fall into new hands." We are surprised, because Mr. Townley made in his will "an earnest request to the curates of Burnley for ever, that they will, by the grace of God, make their lives suitable to their doctrine," and many pious exhortations and solemn counsels are given by a man who appears to have entirely neglected his own benefice. The looser parishioners did not entirely neglect the church ordinances; for Mr. Townley found, on one sacrament day, that the sacrilegious villains had tapped the wine, and, having drunk it all, he was fain to beg a couple of gallons of claret of the squire! Indeed, it may be said that if most of these northern folk were less wicked than the above graceless rogues, everybody was quite as thirsty. "I, being not very well, sat and got 2 pints of ale," writes the minister, who, in his estimate of that liquor, was sanctioned by Bishop Still, the alleged author of its praises.

There are a few entries which bring the Church and Nonconformists together in a curious way. For example:—

"Dec. 17.—Spent the day wholly at home, and most in offering to winnow oats for the kilns, and son John went to Eccleshill coalpit for 2 loads of coals for Henry Richmond's. The wind was dull, that I dressed not the oats, but got the chaff out of the most of 'em; in the evening, John got well from the coalpit. . . P.S.—This afternoon, William Dilworth, clerk of Chipping, came to me, and wanted me to give account what children I have baptized these 3 years past. I gave him account of 2 of Ralph Ellison's, 2 of James Proctor's, 2 of Henry Graves's, one of Richard Parkinson's, and one of mine own, viz., daughter Catherine. I paid him for Katherine's baptism, viz., 6d., and he went his way."

The Toleration Act of William the Third enabled Dissenting ministers, among other rights secured to them, to baptize the children of their people. Down to the present time, however, there are clergymen who refuse to consider baptism by Dissenting ministers valid; and yet lay baptism is not, under certain circumstances, illegal. Mr. Walkden's payment was probably a fee for copying his own register into that of the parish, the usual custom at the

present time. On April 20, 1730, he met with a strange visitor:—

"April 20.—In the evening came old Mr. Holt, an old itinerant mendicant preacher in the Church of England, and lodged with us, he being an old neighbour to me when at my father's house."

Although Mr. Walkden speaks of "Thursday next being what is commonly called Christmas Day," the dissenters then, as now, making no especial account of it, he had a service in his chapel, but no reference to the season is made in his record of the service. It would seem as if the dissenters of that time were obliged to follow certain observances of Church customs; to open their chapels, for instance, on festival days, when the church was open. Lancashire clergymen do not appear to have made any difficulties touching the burial of dissenters. The Mr. Weatherhead named in the following extract was the minister of the parish:—

"So, being Robert Sympton's burial to-day, I got ready at 10 a clock. I got my mare, and went to John Parker's, o' th' Lees . . . and I set an hour. I got my mare, and went direct to the burying-house, and got in just before the servitors set, and I dined with them. So the corpse was carried forth, and they set forward with 'em [it] towards Slaiburn, and I set and smoked a pipe. Then got my mare, and followed 'em, and overtook 'em at the Wood end, and attended 'em to Slaiburn, and was in the church and at the grave till Mr. Weatherhead read over the office of burial. So I got my mare, and came with John Jackson and one Bee, of Hoddernside, to the Knowle stones. Then we parted, they going homewards, and I going to Gregill . . . and set while supper was ready. Then supped, and in some time after I read Scriptures, and we sung part of a psalm, and I prayed in the family."

There was a good deal of feasting in, and some out of, the house on these solemn occasions. "Ann Seed, o' th' Little Town, came with some remains of the burying provisions, of which my love gave us each a taste." We find, too, that this Nonconformist wrote his discourses: "Finished the composition of Alice Martin's funeral sermon." After it was preached, (in "a gown," too, it would seem,) he says ruefully: "Set awhile with Alice Martin's relatives, and expected they would have paid me for the sermon, but I got nothing." Small gratuities were not declined by him: "At the Chapel Chamber, William Fell came to me and thanked me for what I had done for him in his last sickness, and gave me a shilling to buy me what I pleased with." Although evidently a sincerely pious man, honest, hard-working farmer and chapman, doing the best for his many children (who after their school time, were glad to be servants and labourers), fulfilling his ministerial duties regularly, and digging, delving, ploughing, harrowing, ditching, on his little farm, ending the day with prayer, praise and thanksgiving at home, the Rev. Peter Walkden had common human failings; he could grow angry and indulge in the consequences:—

"March 20.—I got a guinea changed at cousin Throop's, and spent 6d., so came home, and in the way was bawled at by Thomas Rhodes for saying that he had said that I could never pay my rent. I said I never said so, and was angry at him, and smote him with my stick 2 or 3 times about his hat. So we talked on till at last I left him, and called at his wife to see what she had said. She said Bartholomew Eccles told her that I had said so of Thomas. But I said he had never been in my mouth nor mind, till he spoke to me, of all the time that I was at Throop's."

What came of it is not recorded. Most events were wound up at the alehouse; even membership with the little community was celebrated over a gill:—

"F" . . . signified to me her desire to sit

down with us at the Lord's table [on the following Sunday], having formerly set down at Forton, with Mr. Aray. I accepted her, and she and I and my love went into James Walsley's, and had each a pennyworth of ale."

These are strange illustrations of old Northern life. Occasionally the routine was broken in upon by the welcome arrival of a newspaper. The interested reader thinks it worth while to record that the Czar is really dead, or Copenhagen in distress, or the old Pope has gone to his account. The only home news which he chronicles is the trial of the infamous Col. Charteris, his sentence "to be hanged." "He is said to be worth 200,000l.; that his estates, goods and chattels in London, Lancashire, and Buckinghamshire, were all seized or forfeited to the Crown." But this arch-monster was pardoned. It has often been said that his blood and his name had happily perished away and out of thought; but this is not the case. When this monster of uncleanness was pardoned, he recovered his estates. He had one only child, a daughter, Janet Charteris, whose hand, with the heaviest of tochers in it, was asked for, and won by, James, the fourth Earl of Wemyss. The son of James and Janet (the fifth Earl), inheriting the vast estates of his infamous grandfather, stooped to take his name. Estates and name have lineally descended to the present Earl Wemyss; and his son, the well-known Lord Elcho, is heir to the double inheritance and responsibilities.

But let us return to the Rev. Peter Walkden's chroniclings.

Of customs and spoken phrases, there are many curious samples. A man's verbal will, properly witnessed, was as good as all the written and misleading, unpunctuated verbiage of the lawyers. Indeed, nuncupative wills were legal till 1837. Then we find that if the parson Trullibers did not care to read the funeral service, the office was performed by the clerk, as well as he could get through it. Now and then a "wandering straggled-brained clergyman" would look in on the Nonconformist and "get some refreshment"; but occasionally, too, a "minister" turns up, whose backslidings are more serious than those of the clergyman, who may have forgot what the wise king said, —that he who goeth bond for another shall smart for it. Then Mr. Walkden buys beef by the foot, and describes a cross fellow as "humorous." He tells us that he set his son John to "lead hassocks off Longridge," which means to carry thence the rushes so called, of which what church people call hassocks were originally, and are often still, made. On one day he makes joyous record of being "clear of all the scots," which is no offence to his cousins over the Border, but an honest self-gratulation at having no more debt on hand. "Scot" is Anglo-Saxon for payment due, and, as the intelligent editor remarks, a "scot-and-lot voter" is one who "pays his share of taxes and bears his lot, or part, of public offices." And this mention of taxes reminds us that when the window duty was in force (that was from 1689 to 1851) there was an official whose duty consisted in going over a house to count the windows, and charge for them accordingly, and sometimes more than accordingly. Northern people called him "the window-peeper" contemptuously. "We, having ten windows," says Mr. Walkden, "must make one up, or pay 6s. a year, 'that is 25 per cent. on his annual rent.—When the minister 'sets out his great mare to plow,' it implies that the mare is let for hire; and when he and 'my love' get home after paying certain debts (those scots would come back again) and sit down to 'the tailor's supper,' we are to understand that there was little on the table

and nothing to come after it. Again, we find him and his son John "lashing wheat" a whole day through, that is, "beating it against an upright flag and shaking the loose grain previous to thrashing"; the remnants left on the floor, after thrashing, were called the "brots." We can very well understand the minister when he says that on Saturday evening he "supped and barbed," that is, he shaved after supper, to save time on Sunday morning; but when he says that "Elizabeth came into our house and borrowed our *tempe*," we cannot understand what John Eccles's wife took away with her, unless it was a sieve [*temese*]. Brother Henry Woodward, on the other hand, is praised for being "very officious," a word which is now only used in a disparaging sense, and has fallen away from its proper signification. We are not sure that our stable-folk have improved on the old wootack, weam, or wombtack, by calling it the "belly-band"; to be sure, a refined groom would call it "girth." The last is a Saxon word too, and of these old words we sometimes change one for another; "house-fellow" of the old day was the companion of the house, or hus-band,—wife, as we should now say. The old words were generally significant, thus *alegar* and *vinegar* were two acid productions from sour ale and sour wine. Moreover, there was a difference between an ale-house and a host-house, though the master in each case was "mine host." In the first, good drink, and nothing more, was sold; but the host-house took in lodgers; it was the hostelry or hotel, in fact, where there is bed as well as board. To "right side" such, or any other house, was to put it in order, and to "side" your affairs would imply to settle them pleasantly. For "settle," Yorkshire now says "fettle"; there and in Lancashire to be "throng," is simply to be exceedingly busy. Even there, however, it is only rarely that we should hear that "Thomas Morton iled our calf," that is, depreciated its merits when he was about to be a purchaser.

A difference in form of expression between *now* and *then* is observable in the entry that "Thomas Fell came to me and paid me his half year's salary," which really meant Fell's quota towards Mr. Walkden's stipend. More explicit is the form of acquittance, "clear of all demands from the beginning of the world to this day." When we find the diarist speaking of things done "to year" (for *this year*), however old-fashioned it may seem, it is a form which we all use in the words expressing things done or said by us "to-day"—for *this day*. By the way, there was one period in the year that had a singular immunity; wherefore, it is not easy to say: "I wanted Thomas Parkinson," says the diarist, "to go with me to Astley House, and secure me my rent, from Henry and Mary Richmond, one way or other. He said he couldn't tell what to say to me, for he durst not seize the goods for rent of a cottage, afore May Day." The intelligent editor fails to enlighten us on this point; nevertheless, he has rendered good service in putting before the world this simple record of a simple chronicler in bygone days.

The Female Casual and her Lodging. By J. H. Stallard, M.B. (Saunders, Otley & Co.)

THE great excitement occasioned by the unexpected revelations of a writer whom we may designate as the original male Amateur Casual has stirred up the managers of London newspapers to repeat or imitate the experiment in a variety of ways; and it is not surprising that an attempt should have been made to ascertain the state of female casual wards in the metropolitan workhouses. This investigation seems

to have been judiciously managed, and it has elicited sufficient information to induce a medical gentleman of standing to indorse the record with his name, and to make it the text of various suggestions for the improvement of a system which, at present, is perhaps as bad as it can be, and very much worse than could have been imagined. There was considerable difficulty in finding a proper person to undertake the distasteful mission. In the case even of the male casual wards this must have been a matter of some delicacy; but among the numerous contributors to our magazines and newspapers it was, perhaps, not very difficult to find a man of education and literary experience who had sufficient tact to make his way through the gates of the workhouse, and sufficient resolution to endure the horrors that he found within. In the case of the female wards the difficulty was much more serious. It was probably an absolute impossibility to find a gently nurtured lady who would venture to trust herself in so questionable a situation; and even if any such person had volunteered to undertake the responsibility, there can be little doubt that she would have been detected by the officials, and expelled ignominiously from the charming "lady's bower" which it is the pride of the nineteenth century to have invented. A satisfactory emissary, however, was at last found in the person of a female of small means, who was willing, from motives of gratitude, to assist in what she considered a good work, and whose known respectability was thought a sufficient guarantee for the accuracy of her statements. From the verbal narrative of this woman the story of the "Female Casual" has been compiled; and we are told that there is every reason to believe that the picture is practically correct.

One of the most striking features of the female casual wards appears to be that they contain an almost incredible number of unbidden guests: in other words, they swarm with minute animal life to an extent which precludes the possibility of sleep until daylight. No doubt these creatures are brought thither in ample numbers by the casuists; but that is not a sufficient explanation of all that we read. We are told that at one establishment they are seen issuing from crevices in the walls one after another, just like wasps coming singly but in a continuous string out of the neat little hole in the side of the nest. The "Female Casual" at this particular workhouse put her allowance of bread upon the bed, and very soon afterwards she saw it covered with black vermin. She found it impossible to lie in her bed, for the moment she pulled the rug over her the persecution was intolerable, and she was fain to sit for hours together on the side of a kind of wooden trough, which did duty as a bedstead. On one occasion she was seized with a severe choleraic attack which utterly prostrated her, and she was forced to seek for shelter beneath the dreaded coverlet. She describes her feelings thus: "I got very cold, and, vomiting incessantly, I was forced to cover myself with the rug to preserve my life, and from that moment my torture was beyond the power of any tongue to tell. It was impossible to see anything; but I felt stung and irritated until I tore my flesh till it bled in every part of my body."

It is impossible in these columns to detail all the horrors of the nights passed in four public institutions provided for the relief of the poor in gay and wealthy London. Even in the book itself the narrative is somewhat softened down, the bad language of the vagrants, especially, having been subjected to a considerate censorship. Enough, however, is told to show that these places are the abodes

of unheard of wretchedness and filth, and that, whatever may be the real obstacles to keeping such resorts in anything like decent order and cleanliness, the authorities, in most cases, seem to do nothing, and have therefore no right to take refuge from public censure in the difficulty of their situation.

We have abstained from mentioning the names of the particular workhouses visited by the "Female Casual," for we feel that it would be unjust to assail the authorities of any particular locality on the testimony of an anonymous witness. It is clear, too, that the woman who was unhappy enough to go through this experience was guilty of numerous deviations from truth, having, in each instance, deliberately made use of false pretences to obtain admission. This is no more, it may be argued, than the detective police do every day in their efforts to bring criminals to justice; but the cases differ widely in this particular, that the policeman ultimately appears in the witness-box and gives his evidence in solemn form, while the "Female Casual" is ever hidden from view, and her statements have not received the sanction of an oath. Still, however, we are inclined to believe her story. A trial at law would often be left undecided if it were necessary that every witness should be immaculate. The jury have to balance the evidence, and to rely a good deal on the manner in which it is given; and in numerous cases where the testimony has been doubtful and confused, the subsequent confession of the criminal has confirmed the accuracy of the verdict. We believe that the "Female Casual" has done her best to tell a true story,—first, because her manner is natural and unassuming; and, secondly, because the picture drawn by her is similar to those which we have met with before, without bearing that close resemblance which would give it the air of a copy.

That there is something horribly wrong in the existence, under authority, of such places as our "casual wards," there can be no doubt in any reasonable mind. But it is when we try to think of a remedy that the real difficulty begins. No humane person would admit that any poor creature of either sex, however sinful or however covered with parasitic abominations, ought to be driven out to perish in the hard streets; and yet, if we take such people in, we must have them with their concomitants of bad language, vermin, and filth. There is no excuse, of course, for those guardians who allow voracious insects to swarm and propagate in their very walls; but even with the greatest care it would seem that a casual ward, as now constituted, must be a dreadful place, from the very nature of the majority of the inmates. Dr. Stallard proposes as a remedy that the Government should take charge of determined vagrants, and that casual wards should be abolished. The suggestion is, perhaps, rather startling, but with the facts before us we cannot see that it is unreasonable. Before there was a casual ward at Paddington Workhouse there were no vagrants there. And why? Because instead of passing one night in purgatory and then going forth to idle about as usual, all who came there were obliged to stay until the board of guardians met. This was distasteful to professional vagrants, who made idling and begging a practice; and those only who were in real and unavoidable distress applied for relief. Supposing Dr. Stallard's plan to be carried out, the regular vagrant might in many instances be reclaimed and turned into a useful labourer, while our roads and fields would be freed from a frightful incubus, and the workhouses, relieved from the miserable duty of promoting vagrancy, might open their doors more liberally to the deserving

poor. We cannot, at first sight, judge whether there are any objections which would counter-balance the apparent advantages of this scheme; but we feel assured that it is the duty of an enlightened Government, with or without precedent, to step in wherever it sees an obvious evil; and there is surely a *dignus vindice nodus* when an almost unparalleled barbarism exists among us, side by side with imperial luxury, and in the midst of noble charities whose aggregate annual income rivals the budget of a nation.

Confederation considered in Relation to the Interests of the Empire. By the Hon. Joseph Howe. (Stanford.)

Newfoundland v. Confederation. The Petition of the Merchants, Traders, Fishermen, and other Inhabitants of Newfoundland.

Nova Scotia v. Confederation. Petitions from Inhabitants of Nova Scotia.

SINCE Messrs. Bolton and Webber, of the Royal Artillery, published their able treatise on the British-American question, English politicians have seen reason to modify their first opinions with respect to the scheme for a federal union of Canada and the maritime provinces. Anyhow, it is clear that, far from being an object of unanimous desire with the persons principally concerned, Confederation is regarded with suspicion and aversion by a considerable proportion of the more intelligent and loyal colonists. The proposal has occasioned party contest, which has been carried on by either side with a vehemence and acrimony unusual even in the political feuds of small societies; and the struggle for confederal fusion on the one hand, and separate existence on the other, has now reached a point when the appearance of Mr. Howe's trenchant pamphlet will not appear premature either to his friends or his foes. Notwithstanding the greater favour which the project appears to have recently won in New Brunswick and Nova Scotia, the relative strength of the belligerents has not altered much in the course of contention, and the question seems no nearer a satisfactory settlement than it did immediately after the collapse of the "Quebec Scheme." Canada, of course, is still an enthusiastic supporter of Confederation. As the power with whom the proposal originated, she would for consistency's sake exert herself for its attainment, even if it held out to her ambition no pleasant hope of individual aggrandizement; but as the colony which, according to the admissions of her admirers and the taunts of her detractors, would be the principal gainer from the contemplated change, she may be applauded for straining every nerve to establish the joint-stock company of which she would be the despotic manager, although she would bring to its possessions nothing more valuable than an indefensible frontier, a disunited population, and a wide area of unoccupied territory. Newfoundland and Prince Edward's Island still hold to their original determination, and firmly refuse to sacrifice their independence for the sake of the Canadas. As a gratifying contrast to the obstinacy of these self-sufficient islands, the advocates of Confederation point triumphantly to the change which argument and reflection have brought about in New Brunswick and Nova Scotia, who, after disdainfully rejecting the Quebec scheme, have at length consented to take part in a convention to be held in London, for the purpose of devising some more practicable plan of union. No doubt this is a great concession on the part of the New Brunswickers and Nova-Scotians; but its importance is likely to be exaggerated by those who fail

to rate at their true value the intelligence and moral weight of the minorities who in each of those provinces are protesting against the action of the agitators for Confederation. The voice of a minority is sometimes more authoritative than the votes of a majority; and an opposition, whose leaders can speak to such good purpose as Messrs. Bolton, Webber, and Howe, may become the victorious side at any moment in the delicate and treacherous warfare of parties. In like manner, the enthusiastic supporters of Confederation are likely to fall into error through overlooking the fact that the majorities of Nova Scotia and New Brunswick are not so desirous of union on any terms as to declare themselves willing to become partners in a federation which shall not comprise the other maritime States. At present they have merely consented to send representatives to a convention to be held in London, and to be composed of an equal number of delegates from all the provinces. Of course this concession is an important matter; but it is only one of several steps that must be taken before Nova Scotia and New Brunswick can be held to have committed themselves irrevocably to the cause of Confederation.

In substance Mr. Howe's pamphlet is a repetition of the arguments which Messrs. Bolton and Webber brought against the scheme for a British-American confederacy several months since. Like those joint-authors, he demonstrates the evil consequences that would ensue to the maritime States and to imperial interests, if Canada should achieve her ambition. Successively he calls attention to all the weak points of Canada's harness,—her proximity to the United States, her long line of defenceless frontier, her internal dissensions, her proneness to rebellion, her abundant disloyalty; and in setting forth these matters the practised debater and trenchant speaker of the Nova Scotia Legislature alternately exhibits a lively humour and an excited imagination. His fervour and occasional tendency to bombastic extravagance of diction will do him disservice with English readers whose judicial coolness will make them slow to see in the Quebec scheme "a measure of spoliation and appropriation, on a more gigantic scale than any that has startled Europe"; but for the most part his criticisms are just, and his language well chosen. In his remarks upon the United States, and the light in which that power would naturally regard the new nationality banded together and called into existence for the express purpose of causing her trouble, he draws attention to an aspect of the question which should not be overlooked. Nor is he less successful in another way when he laughs at the awkward position of the twelve delegates from Nova Scotia and New Brunswick who have already arrived in London to confer with delegates from all the other provinces, at a convention, from which Newfoundland and Prince Edward's Island have decided to absent themselves. "Two 'bodies of delegates' as the papers inform us," observes the pamphleteer with a malicious smile, "came over here from Nova Scotia and New Brunswick a month ago. They were twelve in number, and it is presumed that they have been puzzled to know what to do with themselves, and Lord Carnarvon quite as much puzzled to know what to do with them, seeing that Newfoundland and Prince Edward Island have refused to take part in the conference; and that the Canadians, busy with sectional, national and religious disputes, as usual, have as yet had nobody to spare, and do not intend to send over their delegates till October. If all the colonies represented by equal

numbers, there would be just thirty-six of those delegates here, costing a pretty round sum of money, and doing what might be more becomingly done at home." When the delegates of the consenting States shall have met, Mr. Howe is of opinion that Lord Carnarvon ought to dismiss them in some such words as these:—"Gentlemen, it is unfair for you to come here and attempt to mix the Government and Parliament of England up in your disputes. You possess ample powers to mature a scheme of government. Go home, and hold your conference in some public hall, where the people to be affected by your decision can hear your debates and be influenced by your arguments. If you can agree upon a plan of union, publish it for three months, and dissolve your legislatures. If the people accept it, the Parliament of England, unless controlled by imperial policy and interests, will probably ratify their decision; but, as the people may not, it would be unfair to compromise me by getting me to pledge myself to a measure which, until it is ratified by the suffrages of those it is to affect, must obviously be too crude and immature to require serious attention."

That the gentlemen who have already arrived in London from Nova Scotia and New Brunswick have no intention of returning to their homes until they have done their best to create a confederation of some sort, we infer from a letter which Mr. Charles Tupper, the Prime Minister of Nova Scotia, has recently addressed from his lodgings at the Alexandra Hotel to a daily journal. "The co-operation of the islands of Newfoundland and Prince Edward," says Mr. Tupper, "though desirable, is by no means so essential as to render the union of Upper and Lower Canada, Nova Scotia and New Brunswick—possessing an area of 400,000 square miles, and a population of nearly four millions—under a united government 'a lame and impotent conclusion.'" Most persons will differ from Mr. Tupper on this point. In our judgment a confederation of Canada, Nova Scotia and New Brunswick, without the other two maritime States, would be a most unsatisfactory and ridiculous termination to a movement which has led a very large number, if not a majority, of English politicians to believe that the proposal for a British-American confederacy is a project which must be shelved until the imperial reasons and colonial desire for its adoption shall have acquired greater strength. Moreover a confederation of those powers would most likely fail to satisfy more than one of three. Canada, no doubt, would rather have two federal allies than none; but though majorities in Nova Scotia and New Brunswick have declared in favour of a confederation similar in outline to the Quebec scheme, it does not follow that those States contain even so much as an influential minority in favour of a union which should not comprise Newfoundland and Prince Edward's Island. In a federation of the five States—or six States, if Canada be reckoned as two—the smaller provinces could by combination resist the encroachments and check the ambition of the Canadian statesmen; but in a union composed of Canada, Nova Scotia and New Brunswick, the two inferior States would be completely at the mercy of their powerful companion. Unless the delegates, whose presence in London is an affair for pleasantry with Mr. Howe, have grounds for thinking with Mr. Tupper that a confederation limited to three powers would be acceptable to their constituents, they may as well spare themselves the labour of attending a convention which is not likely to have any practical result.

Catholic Orthodoxy and Anglo-Catholicism: a Word about Intercommunion between the English and the Orthodox Churches. By L. J. Overbeck, D.D. (Trübner & Co.)

THE author of this book is a scholar and a foreigner, who writes German better than English, though his English is good and strong, stirring and direct. He is evidently an earnest man, who has distinct views of religion, of doctrine, and of the Catholic Church. His spirit is not bad, nor is his mind cast in a narrow mould. He speaks out fearlessly what he thinks, sketches religious parties with a bold hand, and knows what he discourses about. Those who begin his book will scarcely lay it aside, for it is full of vigorous writing, strong opinions, and great liveliness. The author deserves a patient hearing, and will receive it, we trust, from the sects he speaks of, to whom he preaches a certain amount of wholesome truth. Belonging to the Orthodox Church, as he terms the Eastern, and believing it to be the only true Catholic Church, his object is to bring about a reunion of the other Christian churches, chiefly of the English Church, with the so-called orthodox one.

We do not accept his belief that the Eastern is the only true catholic orthodox church; nor can we wish for the reunion of the Anglican Church with it. His tilts against Protestantism, founded as it is on the right of private judgment, are harmless; and his notions of heresy may be satisfactory to himself, without injuring such as he deems heretical. Indeed he lives in an ideal atmosphere to a large extent, dreaming about a unity which no Church exhibits except it be thickly encrusted with ignorance, and which it is undesirable that any Church aiming at catholicity should try to present. The varieties of the human mind must be allowed reasonable scope within any organized society claiming to be free and intelligent at the same time. While, therefore, Dr. Overbeck surveys from his orthodox watch-tower the Churches which have fallen away from the truth more or less as he supposes, and pities their disorganized state or doctrinal errors, the pure society to which he belongs is as far from perfection as some of the ecclesiastical organizations which he freely criticizes. It will be a long time ere any Protestant Church is incorporated with it. The Roman Catholic Church itself will continue to stand aloof. An infallible community has no desire to approach any other.

The following is a sketch of the Evangelical party in the Established Church:—

"The Evangelicals scarcely will yield by themselves to any plan of orthodox intercommunion. Their inveterate self-conceit can only be broken, as it were, by a wonder. They display great activity, have a fervent love for the Bible, and a fervent hatred of all that contradicts their opinions. They do not love the Bible, but their Bible. After having infused into the Bible their misconceptions, they like this their subjective Bible, cherishing in the Bible nothing but their own conceited self, fondling their Bibleized Calvin. They read the Bible, are fond of the Bible, as being their home-made book, not as the God-sent church-book. I call this an egotistical worship; I call this *Bibliolatry*. They love Christ, and Dr. Pusey forgives them a great many errors on account of their love of Christ. But 'if any man shall say unto you, Lo, here is Christ, or there, believe it not; for there shall arise false Christs.' I openly confess that I dislike a Calvinistic Christ, and that I do not 'go forth into the desert to see him.' I only like the true, historical Christ of the Church, not the heretical phantom of Christ, preaching Calvin's doctrines—and awful doctrines they are—subverting the very foundation of all Catholic truth, haunting poor mankind and hunting them into despair for three

centuries past. Such a Christ was not crucified for us; he cannot atone us, because he sprang from the brains of Calvin, but did not descend from heaven. 'But they intend, at least, to love the real Christ, and their good intention will save them.' I hope so myself; however, the idolater also intends to worship the real God, not the brass or ivory idol, but the hidden God, represented by these images, and still nobody doubts his idolatry. I will not carry this momentous question any further, but content myself with hinting how deeply Protestantism has uprooted the Christian truth."

Here is a picture of the English Church:—

"The English Church separated from Rome. We have no reason to blame her for that, since Rome itself was schismatically separated from the East. If England's schism had proved a *restitution of true Catholic principles*, it would have been a blessing to herself and to all Western Catholic Christendom. The East would have hastened to embrace her sister church, and to support the great work of occidental reunion. Alas! the Anglican Church, after having shaken off Rome's fetters, fell in with the Reformers, and was carried off, far away from Catholic ground, by the fluctuations of private judgment. It is true there is a strong Catholic feature in the English character, which even three centuries of Protestant influence could not efface, and which made of Anglicanism a strange compound of Protestantism and Catholicism. This feature is the *innate traditional and conservative disposition of the English mind* sticking to history as the living foundation of nations and of all their vital institutions. The German mind is inclined to soar in ideal spheres far above the real life here below. Philosophical conceptions, subjective fancies are to replace the matter-of-fact reality. Luther was the chief incarnation and representative of this German mind, and the father of Protestantism. Had Luther kept the historical ground of the Catholic Church, had he dived into the vast depths of dogmas divinely taught and heartily to be embraced, he might have become a father in the Church, a father mightier than many a faithful philosopher and profound divine in bygone ages, a popular father of the Catholic people at large. But Luther, emancipating the *subject* from the *objective* ground and condition of man rooted in history, became the curse and scourge of his race. The English had enough German blood in their veins to follow with curiosity the progress of the Reformation, but not enough to break thoroughly with the past, to strip themselves of every thing substantial. The English people never introduced reformation; it was imposed upon them and, so to say, '*octroyée*,' by unprincipled tyrants supported by a handful of innovators. But in spite of tyranny and persecution, the English would not part with their Church, and only when something like a church, some delusive phantom, was presented to their eyes, they were duped into what they considered their ancient church, cleansed from Popish rubbish. This is the real history of the English Reformation; and the inconsistency of Anglicanism is but its glory and hope in the eyes of all true Catholics. It is gratifying to muse on the English Church, and to think that this is the only Protestant body which tenaciously clings to the idea of the Catholic Church. All Protestant sects, indeed, claim for themselves Catholicity; but none, except the Anglicans, think, at least to a certain extent, to be saved by the instrumentality of their Church. Hence the more intense Catholic feeling of the Anglicans; hence their yearning towards reunion with the rest of Catholic Christendom."

Dr. Overbeek writes, as our readers will see, with a dashing force and dogmatic air, dealing in wholesale statements which may be questioned or denied. As a guide he is neither safe nor cautious. While exercising the right of private judgment very freely, he ought not to decry it as the privilege of a Church. He is evidently incapable of calm philosophizing or profound thought in relation to questions that concern a divine revelation and the way in which it should be interpreted. His censures of

churches and men are scattered abroad with liberal hand; and one would suppose that he belonged to an infallible church were it not that he finds great fault with Roman Catholicism. It cannot be said with truth that he is uncharitable; but he is certainly self-sufficient in his own opinion. He exhibits boldness rather than wisdom—rashness rather than breadth of view or accuracy. His book is alike amusing and instructive. The lusty German, safe for eternity in the only Catholic Church, tells us what he thinks about other religionists, and his thoughts may pass for what they are worth. He sees clearly, and his sketches have an element of truth; but they do not inspire confidence nor claim hearty assent. Above all, they will not win any to the Church of the writer, who must speak more wisely to Englishmen before the charms of the Eastern Church attract our regards, or private judgment ceases to be thought a right thing in spiritual matters.

NEW NOVELS.

For Ever and Ever: a Drama of Life. By Florence Marryat. 3 vols. (Bentley.)

'For Ever and Ever' is a novel that will be known in a far wider circle and will number many more readers than any of Miss Marryat's former works. She has made a long step in advance since her last production, published but a short time ago. The characters described are full of life and action, and are not mere pasteboard creations in which it is difficult to be interested; they act and speak like human beings. Were this book from a man's pen, we might give it more unqualified praise than we feel justified in now doing. Were it, in such case, less full of the promise of talent, we still might be lenient in criticism; but there is a vein of coarseness meandering through some of the descriptions which must be protested against. Miss Marryat at times renders character so well, and describes scenes so feelingly, that we are shocked when she wastes her powers on vulgarity. We have a right to expect nothing but what is wholesome and pure from the pen of a lady who has originated so charming a character as Henrietta Stuart. We acknowledge Miss Marryat's power. Her style is spirited though simple; and the moral reflections interspersed afford conclusive evidence that she possesses womanly feelings which prompt her to censure the conduct she describes. Her book is not a healthy one, yet it arouses interest. Few who begin it will lay it down unfinished; it is a feverishly exciting book, that will not be particularly beneficial to its readers.

The story is principally composed of the adventures of a young man who, not having a pleasant home, and having a talent for Art, comes to London for its perfecting. There is a short prologue in which the old, but always touching, story of the young girl is told,—who, accustomed to every comfort and luxury in her home, leaves it for the miserably unhomelike dwelling of the barracks, with a husband who, after the first few months, wearies of her society, and prefers to spend his morning hours in flirtations, and his evenings in smoking and in gambling orgies. The deserted wife is left to nurse her sickly child, in scarlet fever, under which the mother sinks, and the boy recovers, to be met, fifteen years after, as the hero of this novel. Mrs. Wardlaw, having no earthly happiness but what is centered in her child, has made it her constant prayer that, whether for good or evil, his life may be spared. Though warned by a benevolent friend that such a prayer, without reserve, may bring a curse instead of a blessing, the mother's cry is still the same. The prayer is heard, but the boy

lives only to wish through many a bitter hour that life and all its terrible lessons had been denied him. Those readers who object to meet any but the highest members of society must not send for 'For Ever and Ever.' They will find themselves in many of the paths of Bohemia. At one time we are behind the scenes of a theatre, and often in very questionable company. The artist with whom the hero, John Wardlaw, comes to study is not one of those favoured mortals who rejoice in luxurious surroundings while at their easels. Tom Cornicott has to dispense with antique carving or Venetian glass in his studio; but his house is ornamented with eleven children and a wife who looks like an untidy charwoman. They all live together in the kitchen, and keep up their ideas of cheerfulness on underdone yellow ham and weak tea. Miss Marryat accuses the artistic brotherhood of more egotistical conceit about their productions than is shown by other branches of the working ten thousand. She attributes this to the fact of their pictures growing too dear to them, having progressed day by day under their eye from a faint outline to the finishing touch. This can scarcely be the reason, we think, even if the surmise be correct, which we incline to doubt. The talent of a musician, whether it be of the vocal or instrumental order, is equally always with him; his compositions are never out of his mind, and the notes of a first-rate voice, as they daily develop, are a continual fresh source of delight to their possessor. The literary brain, too, is ever alive with new conceptions and ideas, which it treasures and never loses sight of; and if the painter's eye be always on the watch for each artistic point in the scenery it views or the face it gazes on, surely the life object of the *litterati* is not allowed to elude them for an instant; each familiar friend is studied for original characteristics; every new object is made of use. Then, we may fairly object to the over-importance which Miss Marryat assigns to great beauty. Its possessor is made to trade on it in every look, action, and pose. Intellectuality is made of no value in comparison with creamy skins, flashing eyes, and flowing hair. Beauty is a great and a wonderful fascinator; but John Wardlaw, in yielding himself a slave to the *evil* influence of Rowena Bellew, is overcome too soon by the power of her external charms. The extenuating plea is, that he had been brought up in the country; that "his sight had not been glutted with loveliness, or his ear with flattery; that he had associated very little with women, and had no fear of them, or, what was worse, of himself." The "devouring passion" with which John Wardlaw is possessed is dwelt upon at great length; and though we are not allowed to fancy the author intends to confound it with true love and affection, still the description of Rowena's alluring looks (not words, for she is cold and bad tempered to every one) is returned to again and again. In the delineation of a character like this, something of the kind must be said; but it is unnecessary to dwell so much upon it, as though it were the pleasantest part of the work. In describing a great city, we must make mention of its impure alleys and slums; but we turn to the accounts of wide and healthy thoroughfares with a sensation of relief. We may add, that in 'For Ever and Ever,' though the wicked do not flourish like green bays, the innocent suffer much; and, without telling the plot, we may remark that Henrietta Stuart's devoted lover need not have been made quite so insignificant. The *stammer* is *de trop*; the sacrifice on her part would have been great enough without that. There is great change of scenery in the book. When away from London,

we are shown pretty sights in the hop-gardens of Kent, and finish up with a peep at Burmah, and well-given descriptions of the country and inhabitants, particularly of the girls, who stick gay flowers coquettishly in their hair and flutter along in bright-coloured garments. We caution Miss Marryat again, as we did on a former occasion, not to let her talent be wasted on what is not healthy. She has it in her power, we are certain, to do much better than she has done even in the work before us, though that, in spite of its faults, will be popular. The story is well conceived and carried out. The sentences are flowing; and, moreover, the Queen's English has received due consideration, and is not murdered on every occasion.

Views and Opinions. By Matthew Browne. (Strahan.)

WE do not remember to have encountered before, in print, the name of Mr. Matthew Browne; but it is no novice who favours us with this little book of essays, brimful of good thought and feeling, noticeable for many new and true things, thoroughly expressed. Mr. Browne is essentially a nervous man, if his own description of the nervous temperament, as given in the first essay, be a correct one; and he is as sensitive to the change of mental atmosphere attending the introduction of a new thought, as to the shock consequent on violent sympathetic emotion. Any proposition essentially false, and terrible in its remote applications, seems to affect him like foul air; any violent sympathy, unjust in its application, reacts upon him so powerfully as to hurry him with electric power to the contingent truth. In a word, Mr. Browne has something of Keats's wondrous power—that of recognizing Truth by the mere sense of touch. A current of electric sensation plays vividly along every line of passages like these:—

"There is a sort of customary chivalry which has, so far as I am aware, no particular maxim to support it, though it might, and perhaps does at times, find more than one in the New Testament. The world could not carry on its affairs for a day, it is said, if it were not for 'gentlemanly constructions,' conventional allowances, and many kinds of chivalric hard winking which are better understood than described. Now, that the world *should* carry on its affairs is not the most necessary thing in this universe. The most necessary thing is that the will of God—the right—should be done; and if that involves the staying of the world's affairs, why, they must be stayed. If, then, that process of chivalrous ignoring which goes on all around us is against the will of God, let the world declare itself insolvent to-morrow, but let it have done with 'gentlemanly constructions.' I do not, however, suppose Havelock would have refused to let a soldier of drunken character fight at Lucknow; or that he would have been slow to acknowledge his bravery if he fought well. He would not have called *that* sanctioning the man's intemperance; though he would have been glad to see him an honourable member of the temperate band known as Havelock's Saints. That word 'sanctioning' is constantly on the lips of good people with weak heads and generally thin natures. It seems to me that it is only the weak folks,—those who are not capable of magnanimity in *other* kinds,—that do not understand magnanimity in *this* kind. I have indeed been struck with (may I call it) the great-hearted, fraternal recklessness of *strong* good people. I do not mean recklessness in submitting to intercourse on low terms, but a half-divine unconcernedness, which in reality enables them to dictate terms. When I have found the *weak* good people condemn Mr. Greatheart (who is pretty sure also to be Mr. Greathead) for recognizing, on any defined platform of common pursuit, the special qualities of somebody in whom he would have said (if the point had arisen) there was much to be

blamed, I have said to the weak people who complained that Mr. Greatheart was 'sanctioning' the blamable one,—'You must obey your own consciences,—at your peril, then, do it. But mind that your conscience is not sophisticated by love of giving pain, love of power, or love of safety. Let me suppose that this person, from whom Mr. Greatheart does not (to your scandal) run away, were, in the course of events, to save your life, or lose a limb in your service. Suppose your town were in a state of siege, and his was the only hand that could defend you,—would you still be so tender of "sanctioning" him, as you call it? If not, it may be that Mr. Greatheart sees deeper than you do into the things which unite and the things which sever,—how far those join men, how far these part them. Let me take an illustration from British law. There is the great common law of the land, which is antecedent to statute law, both logically and chronologically. This great common law is the charter of our lives and first liberties. If any man alleges a statutory exception, the burden of proof rests with him.' But this subject is really far too large to be dealt with at any such length as can be afforded under a general heading."

Few readers will be inclined to deny that this is very bold and veracious writing. Not the least of the praise due to the above passage and many others in the book is the statement that they deliberately and legitimately attach to themselves "sensations" which in most circles would be regarded as extremely unscientific. Rare are the essayists who can first prepare the mind with a broad and purifying proposition, and then overcome opposition by means of what we might call a shock from the nervous system of the writer, and finally attest veracity by a variety of original illustration. Most essayists deliver themselves too elaborately to arrive at anything more than a mere science of life: they work evenly enough in one direction, and never by any accident make allowance for the countless negatives in the mind of every reader of experience. But Mr. Browne, purely because he feels very acutely that life is far more than a science, shows everywhere that the purest and only true form of individual opinion is that of sensitive suggestion. He obtrudes nothing on his readers, though sometimes, as in the following passage, he slyly leaves them open to peculiar consequences:—

"One other cause, indeed, has conspicuously assisted in determining the bent of energetic young minds of fine culture in these days. For reasons which have been sufficiently discussed, our most highly-educated young men are, in very large proportion, leading celibate lives. Now, a celibate life in all its forms, from monasticism downwards or upwards, is favourable to the cultivation of autocratic tendencies. Life in the family, while it promotes stability and peace, quickens our sympathy with the pain of others, heightens our estimate of the importance of *mutual* responsibility, and in this way tends to freedom in political relations, when other conditions are not unfavourable (it is not necessary that they should be actively favourable). It might at first sight appear that a nation of men who had given hostages to fortune must be easier to oppress, and slower to form and to utter free opinion; but it is not so, for reasons which it would be long to discuss, though they are far from being obscure in themselves. Nor must it be forgotten, that among masses of cultivated men, leading celibate lives under the conditions of highly-civilized society, Taste would tend rapidly to become the captain and guide of existence, instead of remaining its drill-sergeant only. This is what is actually happening—what has happened before our eyes. And Taste loves authority. It is, till man shall be perfect, the creature of comfort and convenience—of a life that has glided away from irritation and anxious forth-looking of all kinds. It leans to what is courtly and statuesque; broad, smooth avenues; goodness and greatness tamed out of their splendid passion; and virtue stamped into coinage of convenience. It wants above all

things a quiet population and a strong government. There is no doubt that for the present the working power, the *force*, of the community tends to lodge itself in centres represented by wealth; and thus, under the rule of a police of public taste, wealth becomes to a large extent the arbiter of public virtue. For with plenty of money a man may do almost anything he likes, without offending a virtuous taste."

Quotation must cease now,—and further comment is unnecessary. We have here a volume which, in an extremely unpretending form, contains more absolute reflection on men and things than many pretending folios. Unlike almost all other volumes of the kind which we have read, it contains nothing positive, yet represents a mind fully acquainted with the finalities, and capable of apprehending the services, of modern positivism.

Memoirs and Services of the late Lieut.-General Sir S. B. Ellis, K.C.B., Royal Marines. From his own Memoranda. Edited by Lady Ellis. (Saunders, Otley & Co.)

THE late gallant marine, whose body now rests in a modest grave in Charlton Churchyard, left no record of the year of his birth. We only know that in 1804, after resolutely declining to carry out his articles as clerk in a lawyer's office, he was a second Lieutenant in the Royal Marines, and that his career ended last year, as a Lieutenant-General, at Woolwich. Sir Samuel Ellis had something more than half a century of hard work, and got very little by it. He was at Trafalgar and at the Dardanelles,—names which refer to great events. Whenever it was "war time," the marine was afloat and in the very thickest of the fray. No lack of work, more than enough of responsibility, continual peril of life, inadequate pay, few honours, small thanks—that is the sum of the marine officer's life. Yet he is not discontented. In his plain, sailorly, unscholarly, but not ineffective phrase, he says—"The writer of the following memoirs is one who is himself content with the state in which it has pleased God to place him: he would not exchange his identity, were it possible, for that of any created being. Yet 'many and evil have been the days of his pilgrimage.' He has experienced great risks of life, cares, troubles, vexations, disappointments, sickness, and affliction. He has known what it is to extend his sensibility to external attachments, to suffer for the sufferings of those who were most dear to him, and to feel the stroke of death that cut off 'his fairest hopes of sublunary bliss.' He has toiled with ill success for the means of temporal enjoyments, and has been visited by griefs which use has accommodated to his nature. And in this review of his destiny he believes that he sees the general lot of all the human race." This is not exactly the fact: life has some prizes, and even Sir Samuel was not for ever drawing blanks. Victory attended him whenever he was afloat. He did not, like Nelson, become a fool with womankind when he was ashore. Perhaps he did worse; for in his later days Sir Samuel was induced to become a railway director, and much sorrow was the consequence. He was not one of those ready-tongued, liberal-phrased "Admirals," who are the travelling wind-bags of shoddy companies—smart fellows, who talk dupes out of their cash, and make fortunes by speculations which fail. Sir Samuel lent his name, bought his shares, and came to grief, like many of his kind.

His book is more a record of the general naval history in which he took a part than one of special and personal incidents. He handles the professional part deftly enough, but when treating of other matters Sir Samuel is apt to

forget that what may be new and amusing to him is trite and stripped of all interest for those with whom such matters have been familiar from childhood. The gallant marine, moreover, is apt to moralize and to deliver himself of maxims that are, perhaps, not so original as he thought when he penned them. At the end of one naval affair of fighting and victory, he alludes to the principal actors, and adds, that "The world's a stage, life the play, and men and women merely players,"—which is not to be gainsaid, yet we fancy we have heard something like it before. Here is something newer touching Trafalgar and the famous signal:—

"This glorious battle, which so greatly influenced the affairs of Europe, and gave to England the supremacy of the seas, was one through which our ship passed with but little loss. There was scarcely any wind at the time, and we approached the enemy at not more than a knot and a half an hour. As we neared the French fleet, I was sent below with orders, and was much struck with the preparations made by the blue-jackets, the majority of whom were stripped to the waist, a handkerchief was bound tightly round their heads and over the ears, to deaden the noise of the cannon, many men being deaf for days after the action. The men were variously occupied: some were sharpening their cutlasses, others polishing the guns, as though an inspection were about to take place instead of a mortal combat, whilst three or four, as if in mere bravado, were dancing a hornpipe; but all seemed deeply anxious to come to close quarters with the enemy. Occasionally they would look out of the ports, and speculate as to the various ships of the enemy, many of which had been on former occasions engaged by our vessels. It was at this time that Nelson's famous signal, 'England expects every man to do his duty,' was hoisted at the main-mast-head of the Admiral's ship. These words were requested to be delivered to the men, and I was desired to inform those on the main-deck of the Admiral's signal. Upon acquainting one of the quartermasters of the order, he assembled the men with 'Avast there, lads, come and hear the Admiral's words.' When the men were mustered, I delivered, with becoming dignity, the sentence,—rather anticipating that the effect on the men would be to awe them by its grandeur. Jack, however, did not appreciate it, for there were murmurs from some, whilst others in an audible whisper muttered, 'Do our duty! Of course we'll do our duty. I've always done mine, haven't you? Let us come alongside of 'em, and we'll soon show whether we will do our duty.' Still the men cheered vociferously,—more, I believe, from love and admiration of their Admiral and leaders, than from a full appreciation of this well-known signal."

Honours were thickly showered on some of the victors, but "the brevet rank of major, conferred on one captain, was considered adequate to the claims of the royal marines whose gallant exertions so materially contributed to the important results of this gloriously-fought day." We turn from this to an incident of the war with America, in 1815. The *Majestic*, *Endymion*, and *Pomona* were looking out for the American ships *President*, *Hornet*, and *Peacock*, in American waters:—

"At dawn of day of the 15th January, 1815, the *Majestic* made signal for an enemy in sight; we bore up in chase, passing the *Majestic* and approaching the enemy, which was evidently an American frigate; the *Pomona*'s signal was now made to keep more to starboard, and endeavour to prevent the enemy's bearing up, which again threw us out of the direct line of chase. At twelve the *Endymion* was fast closing the stranger, and in half an hour the latter opened her stern guns, which was returned by the bow chasers of the former. The *Pomona* still approaching, though slowly, the wind falling light, the *Endymion* maintained a running fight with the enemy with much apparent success, when finding the *Endymion* outstripped her, she bore up and gave her her broadside, which was returned with great spirit and effect by the *Endymion*. The object

of this manœuvre was to disable the latter, probably imagining she might escape during the darkness of the night. A running fight was afterwards supported by the two ships; the firing gradually ceased, and at ten wholly discontinued; the *Endymion*, from the injury she had received in her masts and sails, falling astern of us. However, the *Pomona* still gained upon the enemy, and at eleven we ranged up alongside, fired our starboard broadside, gave three cheers, and then a second and third broadside; the enemy did not return our fire, but hailed and surrendered. A boat was instantly despatched from us to take possession. I went on board with a party of marines, accompanying the First Lieutenant; on our arrival we had the satisfaction to learn that the captured vessel was the United States frigate, *President*, Commander Decatur, mounting 54 guns. She suffered considerably from the fire of the *Endymion* and *Pomona*, having between 90 and 100 men killed and wounded,—her first, fourth, and fifth lieutenants being among the former. When Commander Decatur inquired the name of the ship to whose captain he had surrendered, we informed him it was the *Pomona*. 'The *Pomona*!' he exclaimed; 'I thought it was the *Majestic*; I could have sunk you in five minutes.' The sight on the deck of the American frigate was strange indeed. Guns were there named by familiar titles; there was the *Nelson* and *Nile*, the *Trafalgar*, and others, just as if Englishmen were her crew; her lower deck and cockpit were covered with dead and wounded. Most of the killed I succeeded in getting thrown overboard, excepting the three lieutenants, who were laid in their cabins. On the *President* surrendering to the *Pomona*, fifty Englishmen (a disgrace to their country) threw themselves overboard,—seeking death to avoid a more ignominious one, which the violated laws and feelings of England would justly have inflicted."

There is a reverse side to the war-medal. Smiling *Victory* is radiant on one face of it, but the suffering victors are depicted on the other. This is how the sick and wounded were cared for in the Chinese war of a score of years or so ago:—

"I went with Dr. Lindsay on shore to the Military Hospital of the 26th Regiment. I had never witnessed a more distressing scene,—460 persons of the finest regiment of the expedition when we arrived in China, lying on mattresses on the floors of several rooms of an extensive building, from the drummer-boy to the old soldier, variously afflicted with grievous complaints of dysentery, diarrhoea, and ague fever,—some dying, and all in want of many comforts requisite to their recovery, such as fresh and wholesome nourishment, good nursing and cleanliness, yet they were not to be procured; the sick were so crowded that with some difficulty we passed between their lines on the floor without inconvenience to them. The condition of many was quite hopeless. Sickness and mortality were so much on the increase, that of the original number of 3,500 who landed in July last, not more than 800 bayonets could then be mustered for duty."

A great many of the good eggs to which the French proverb refers were broken in the making of the Chinese omelette; and the omelette was not very digestible, after all! Sometimes we were well-nigh losing whole basket-fuls of our very best eggs; for instance—

"About sunset an entire company of the 37th Native Infantry was missing; two companies of the 49th were sent out in search. I was also requested to detach a company of Royal Marines for the same object. I selected the 8th, armed with percussion muskets, giving the command to Lieut. Whiting. Capt. Duff of the 37th accompanied him; and after a long and tedious march of six miles, through paddy fields filled with water, they succeeded, amidst much peril, in recovering this company, surrounded by Chinese, who were actively engaged in getting two guns in position for their destruction. The 37th were formed in square on a small mound, with their fire-arms, excepting one, unavailable from the rain's effects, and were only aware of their rescue and the proximity of

the marines by the latter firing a musket and giving three loud cheers, which were gladly responded to. The effect was instantaneous and most beneficial. The Chinese, not knowing the amount of force so unexpectedly near, separated a little; the 37th company retreated; and Lieut. Whiting, watching his opportunity, judiciously fired a volley or two amongst them, whereby the two companies were enabled to return to their respective corps unmolested."

Later in life Sir Samuel reaped some honours, and advantages which do not always accompany honours. Thus, when he was promoted from Commandant to Lieutenant-General, "he lost his good-service pension, and suffered other reductions in his income." Then, at over sixty years of age he married a widow, and he "allowed his name to appear as a director in the Direct Exeter and Plymouth Railway." The failure of the line led to the ruin of the old marine, who died, some half-way between seventy and fourscore, leaving his family unprovided for, and his widow pensionless. Government contributes 20*l.* a year each for two young orphan sons till they reach an age when education is supposed to be "finished." This was a gloomy ending for the young fellow who looked out of the port-holes of the *Ajax* at Trafalgar. One cannot help reflecting how different a story he might have had to tell if he had only stuck to his articles in the attorney's office in Yarmouth.

Liber Monasterii de Hyda; comprising a Chronicle of the Affairs of England, from the Settlement of the Saxons to the Reign of King Cnut; and Chartulary of the Abbey of Hyde, in Hampshire, A.D. 455—1023. Edited by Edward Edwards. Published by the authority of the Lords Commissioners of Her Majesty's Treasury, under the direction of the Master of the Rolls. (Longmans & Co.)

THE fortunes and vicissitudes of Hyde Abbey, near Winchester,—the "New Minster" of between eight and nine hundred years ago,—equal perhaps, in striking interest, those of any among our religious foundations of early times that fell a victim to the caprice of our eighth Henry and the unlimited rapacity of his courtiers.

Tracing this comparatively small but illustrious monastery to its very sources, the reasons for its foundation, not by Alfred the Great, as has been very generally assumed, but by his son, cannot be more appropriately explained than in the words of the editor's Introduction to the volume now under notice:—

"For more than two centuries the Abbey of Hyde was known as the New Monastery. The entire history of monasticism is—in one and not the least instructive of its aspects—a history of successive reformations. Not a few of these have been the result of the perceptions and reflections of men of vigorous character, and often of mature age, who have been suddenly transplanted into a new scene of labour, far remote from that of their own education and early efforts. New Minster was the result of the thoughts of Grimbald about what he saw at Winchester, and compared both with his knowledge elsewhere acquired and with his own ideal monastery of the future. This Chronicle testifies that it was chiefly King Alfred's anxiety for the better education of the children of his nobles which made him summon Grimbald from France; and that it was Grimbald's desire, as well as Alfred's, to make his new monastery pre-eminently a place of education. Alfred's long-nourished ambition to be himself the founder of the new community was frustrated, we are told, by death. But scarcely had Edward the Elder succeeded to the crown, when he was solemnly and publicly exhorted by Grimbald to carry out his father's plans. In this sense, Alfred may truly be called the founder of New Minster; but in this sense only."

The first mention of New Minster in the 'Book of Hyde' is in the account given of the embassy sent by Alfred to the Archbishop of Rheims and the Abbot of St. Bertin's Monastery, requesting their sanction to the transfer of Grimbald from that place, in order that he might establish, conformably with ecclesiastical ritual, a new monastery within the walls of the city of Winchester:—

"The desired permission was obtained, and Grimbald arrived in England in the year 884, or, according to the brief annals of Hyde, prefixed to its principal Charters, in 885. Why an interval of more than fifteen years should have elapsed between this arrival and Alfred's death, and yet scarcely the first steps have been taken towards the accomplishment of the main object for which Grimbald was avowedly invited, there is nothing in the 'Book of Hyde' to explain."

The first inclination of King Edward was to found the new Monastery at the expense of the old Cathedral Monastery of St. Swithun; but from this he was dissuaded by Grimbald, on being cogently reminded by him that "God will not accept robbery for burnt offering." Many of the nobles and clergy offering contributions towards its endowment, within two years the New Minster was built and decorated: whether Mr. Edwards is justified in asserting that it was not only new, but "stately," is more than we can confidently say, taking the word in its acceptation at the present day. The work of dedication completed, the remains of Alfred, its intended founder, and Ealhswith, his wife, were solemnly transferred to it from the Cathedral Church of St. Swithun. Receiving constant accessions of lands and benefactions from almost every Saxon king who succeeded to the English throne, in 965 it experienced its first revolution. In that year the Secular Canons, originally established there by Grimbald, under the Augustinian rule, were summarily compelled, by force of a Papal Bull of Pope John the Thirteenth, to assume the Benedictine habit or to vacate their stalls,—"the actual robes and cowls being provided beforehand, and brought into the choir before their eyes. To submit to the Benedictine rule or to suffer the pains of expulsion, was their alternative. A small number took the cowl; the majority were expelled. A colony of monks from Abingdon replaced the deprived canons, under the abbacy of Algar, or Ethelgar. In the following year King Edgar issued his famous Code for the government of the newly-reformed abbey—a code which was doubtless the production of Bishop Ethelwold himself, acting in unison with the all-powerful Dunstan."

The names of its earlier Abbots are unknown. "In Ethelgar," as the learned editor says, "we have not only a recorded name, but a character and career of marked savour and individuality." Trained originally under Dunstan, at Glastonbury, and at Abingdon under Ethelwold, the "Father of Monks," he eventually became Bishop of Selsey, and Archbishop of Canterbury; from his time the names of the Abbots are recorded.

King Cnut, the Dane, entertained towards the Abbey the spirit of munificence shown by his Saxon predecessors.—"His liberality to New Minster was shown by his grant of the manor of Drayton, in Hampshire, containing five hides of land, and by the gift of a magnificent golden cross, richly adorned with precious stones, with two great images of gold and silver, and with sundry relics of saints. This gorgeous and much-coveted cross figures very notably in the subsequent history of the abbey."

The beneficent spirit of the Saxon Kings towards the New Minster revived in Edward the Confessor and his mother. "The Dowager

Queen Emma, widow of Ethelred and of Cnut, gave, in 1041, to its altars—to reward the prayers of the monks for her deceased son, King Harthacnut—the head of that famous St. Valentine, who was decapitated at Rome in the year 270, and is honoured—not by the Roman Church alone—on the 14th of February. How this venerated relic came, after the lapse of nearly eight centuries, to England, we are not told. But thenceforth, at all events, the monks of New Minster showed to their admiring worshippers St. Valentine's sacred head, as well as the remains of St. Josse, and those of their truly venerable founder, St. Grimbald, in his rich silver shrine."

The second Abbot of the name of Elfwy, or Alwy, who assumed that office in 1063, was brother of Earl Godwin, and uncle of King Harold the Second; the result, of course, being that Harold's cause against the invading Norman was supported by the people of New Minster with all their might. Twelve of its stoutest monks, supported by twenty men-at-arms as their retainers, fought under the banner of Harold at Hastings; and there is reason to believe, Mr. Edwards tells us,—

"that the Winchester recruits, new as they must have been to such a scene, did not forget that 'their limbs were made in England,' but showed very gallantly the true mettle of their pasture, and fell almost to a man on the field. Utterly uncanonical as was such a fate, the fact must ever be regarded as not the least striking incident of that memorable battle, as well as a notable event in the annals of New Minster. The Conqueror, of whose grim pleasantry so many anecdotes survive, is reported to have said that the abbot must have been worth a barony, and the twelve monks a manor apiece; and that such should be the mulct inflicted on the offending community. But William's vindictive punishment was not to stop there. Two years passed before he would allow of the election of a new abbot. It may be well imagined that during that long interregnum the monastery, in all that remained of its worldly possessions, lay very much at the mercy of the Norman officials and of the Norman soldiery."

In the confiscation which so largely followed—the second revolution which overtook them—the inmates of New Minster were stripped by the Conqueror of broad lands and manors, in Hants, Wilts, Portsea, and Wight, amounting to little short of 17,000 acres. And not only in the loss of their more distant lands were these patriots of the cowl thus punished: another instalment of kingly vengeance was reserved for them, and one which they must have sorely felt—for some years at least:—

"The desire for the shelter of the walls of Winchester had originally cooped up the inmates in very narrow confines. So closely packed together were the two communities of St. Swithun and of St. Peter (the New Minster), that between the foundations of their respective buildings there was scarcely, we are told, room for a man to pass along. The old chronicler who has recorded this fact, and its consequences, in quite pathetic terms, goes on to say that the choral service of the one monastery conflicted with that of the other, so that both were spoiled; and that the ringing of their bells together produced a horrid discord. This being so, King William now deprived the monks of the younger community of one half of their narrow enclosure, and built thereon a royal palace. Perhaps he thought that such a neighbour would make it safe that on no future emergency would monks in armour ride forth from New Minster to battle."

Mr. Edwards, who is evidently well acquainted with these localities, has very thoughtfully illustrated his narrative with a diagram, showing the encroachment of the Conqueror's palace upon the New Minster curtilage.

We find these unlucky people next falling

under the tender mercies of the Red King and his unprincipled minister, Ranulph Flambard, or Passeflambard (*Pass-the-torch*); the latter of whom had the assurance to sell the then vacant Abbacy, by simoniacal contract, to Herbert de Losinga, Bishop of Norwich, by way of making snug provision for the bishop's father, Robert, who, according to the terms of the contract, was to contribute liberally to the exchequer of Rufus from the Abbey revenues.

In the earlier part of the reign of Henry the First, the monks of New Minster, thoroughly tired, no doubt, of their present locality, cooped up as it was between the Conqueror's palace and the church and premises of St. Swithun, selected a new site for their Abbey, in Hyde Mead, without the walls of Winchester; the scene of the fabled combat between Guy of Warwick and Colbrand the Dane, and where, no doubt, in some preceding age, a "real and memorable combat between Dane and Englishman," as Mr. Edwards says, had taken place.

After much trouble in bringing the soil of this mead, which was of a soft and springy nature,—a "natural water-meadow," in fact,—to the requisite consistency for a foundation, by laying on adventitious masses of beaten clay, to a depth of near four feet, the New Minster rose once again, at Hyde, and in 1110 was ready to receive its inmates. In that year, "the monks of New Minster marched, in long procession, to their new home, carrying with them their sacred relics; the cross of silver and gold which Cnut the Dane had given, and William the Norman had restored; and the more precious remains of the illustrious dead who had so long reposed within their walls. Once again the body of Alfred was carried, in solemn pomp, to a new resting-place, where it was to lie undisturbed even by the sacrilegious excesses which so often degraded the Reformation of the sixteenth century. It was now to rest in peace till the verge of the nineteenth century, and then—only too characteristically—to be rooted up for the better accommodation of the Hampshire felons." The site of the old Abbey was forthwith surrendered into the King's hands, and by him transferred to the Bishop and monks of the Cathedral church.

The new-built Abbey lasted only thirty years. Dissensions between the monks and William Giffard, the Bishop of Winchester, speedily followed this change of site, and by his successor, Henry of Blois, also Abbot of Glastonbury, and brother of King Stephen, it was despoiled, devastated, and finally burnt; by the agency of "fire-balls" thrown from Wolvesey Castle, the Bishop's residence, into the part of the city and suburbs held by his adversaries. At least twenty other churches, the Chroniclers say, and the Abbey of St. Mary, shared its fate:—

"The crowning drop in the bitter cup of the monks of Hyde came after the raising of the siege, a raising precipitated . . . by the strange escape of the Empress Maud from Winchester Castle, concealed in a leaden coffin. When the many sufferers were groping among the ruins for such salvage as they could gather, our monks found that theirs was considerable. The Bishop . . . forced, or in some way induced, the monks to yield up the precious 'ashes' of the cross of Cnut, and of their other church vessels and furniture. Sixty pounds in weight of silver; fifteen pounds in weight of gold; three diadems, adorned with precious stones; two golden images of the Virgin and of St. John, one of which the Bishop stripped of its gold and gems; two silver patens, handsomely ornamented with gold; two very precious and richly-adorned vessels, of the sort called 'Salomonic'; a silver vase for holy water, given by Cnut; with numerous other precious vases, censers, reliquaries, and the like, figure in the long bills of indictment and of

damages which the monks sent successively to the king; to the universal judge of ecclesiastical appeals in that day, St. Bernard of Clairvaux; and to the Pope. The monks complained, also, of great ravages made by the Bishop on some of their estates; and they estimated their total loss as equivalent, in money, to the enormous sum of 4,862*l*. The suits against the Bishop dragged on their weary length for nearly twenty years."

The Abbey was but slowly rebuilt, and its restoration very gradual. Rudborne dates the reconstruction of the church in 1182; but 130 years after that date, Bishop Henry Wodlock states, in an episcopal letter, that part of the monastery was then still in ruins, and that the estates were insufficient for its complete restoration, and for the maintenance of due hospitality. For information as to the further succession of its abbots,—none of them, till we come to the very last, as Mr. Edwards remarks, distinguished for learning,—and the further fortunes and mishaps of the foundation, the insurrection of its tenants, its temporary surrender, from sheer poverty and inanition, into the hands of William Edyndon, Bishop of Winchester, and the benevolence shown to it by William de Wykeham, his successor, we must refer the reader to the lengthy and elaborate Introduction to the volume; to the research shown in which, equally with the text of the 'Book of Hyde' itself, we are indebted to the preceding facts.

The last, and perhaps the most able, of its Abbots, John Salcot, a favourite alike of Wolsey and of Henry the Eighth, took an active part in precipitating the downfall of Hyde Abbey. After duly making his terms with the King's Commissioners, headed by "Master Thomas Wrythysley" (Wriothesley), a man as unscrupulous as himself, in April, 1538, a surrender of the monastery, and of all its possessions, was made into the King's hands; pensions being formally assigned to the Abbot, Prior, and nineteen other monks. Wriothesley had not been busy in the matter for nothing; he received, as a gift, several of the richest manors of Hyde Abbey, and a short lease of its site having been granted to him, apparently for that specific purpose, he lost little time in levelling the buildings with the ground, and selling the materials; this done, the reversion of the site passed, together with the demesne lands of the Abbey, by royal grant, to Richard Bethell. In the days of Leland and Camden, a few heaps of ruins alone marked the spot where the royal Abbey of Hyde had once stood. In 1788, its former site, then a field, was purchased for the purpose of erecting there a County "Bridewell," or House of Correction. Many stone coffins were discovered in the excavations, the bones in which were scattered about, and the coffins broken to pieces, or turned into water-troughs. Numerous patens, chalices, and rings were also found. Immediately in front of where the high altar had stood, three coffins, of evidently a superior description, were dug up; supposed, with every presumption of probability, to have contained the bones of King Alfred, his wife Ealhswith, and Edward the Elder, his son. The decayed lead of the principal coffin was sold as old metal for two guineas.—*Sic transit gloria mundi*.

The Chronicle of Hyde Abbey, published in the present volume, has been long known to the antiquarian world as the 'Liber de Hyda,' but only, during the last two centuries, through an abridged and unfinished transcript made by John Stow, the Chronicler, in 1572, now preserved among the Lansdowne MSS. (No. 717) in the British Museum. The original manuscript itself, after having been quoted by several Church historians in the early part of the seven-

teenth century, seems to have disappeared for a considerable time from public notice; only to be discovered by the present writer in 1861, in the Library of the Earl of Macclesfield, at Shirburn Castle, in Oxfordshire; its identification being owing to a description of the Lansdowne Manuscript in Mr. Duffus Hardy's 'Descriptive Catalogue of MSS. relating to the Early History of Great Britain' (published in the present Series), *sub anno* 959. How the manuscript found its way to Shirburn is now unknown; but whatever may have been its previous devolutions of ownership, the noble Earl, with a becoming public spirit and genuine liberality, has placed it unreservedly at the editor's disposal for publication.

Though commencing with the early Legend of Albina and Brut, and entering largely into the history of the Anglo-Saxon times, the 'Book of Hyde' is, in reality, a compilation from earlier and various sources, made at a comparatively recent date. From internal evidence Mr. Edwards satisfies himself that its date of compilation must be "subsequent to the year 1354"; but as there is a long quotation avowedly from the 'Historia Aurea' of John of Tynemouth, we may probably be justified in placing its compilation at a date considerably nearer the close of the fourteenth century.

This Chronicle, as it seems to us, was originally intended by its industrious compiler as a framework for the Abbey Chartulary, which it includes; a kind of setting in which its terrars, privileges and charters (some of which, no doubt, were genuine, while some again have a rather spurious look) were intended to be inlaid. And, indeed, next after those portions of its contents in relation to the history of Saxon times, the information given in which is not to be found elsewhere, these charters form the most interesting feature in the Chronicle; partly from the insight which they afford us of the early topography of the localities in the possession and the vicinity of the Abbey; but even more so from the fact that each Saxon document is accompanied by an English translation—not at all times, however, very accurate—in our vernacular of the latter half of the fourteenth century; affording excellent and abundant examples for the philologist of the middle English of that date. Latin translations, not superior in accuracy, are also annexed to the English. The documents thus carefully treated by the enthusiastic compiler are,—the will of Alfred the Great, the numerous grants of Edward the Elder, the privilege of Athelstan, the grant of Alfred, himself a grantee of Athelstan, grants of Edmund the Elder, the will of Edred, grants of Edred and Edulf, grants of Edwy, grants of Ethelred, the will of Ethelwold, the forfeitures of Wulfbold, and the will of Ethelmere. Of all these there are careful translations given by way of Appendix, from the pen of Mr. Edwards himself.

The Appendix also contains a smaller Chronicle of Hyde, A.D. 1035—1121; evidently, from its comparative fullness of detail, of some historical value. The editor informs us that he has omitted a leaf accompanying this fragment, "which," he says, "contains a geographical description of England (Britain), with an enumeration of its episcopal Sees, and of the Shires respectively constituting its three great divisions of Westsexenlage, Danelage, and Mercenelage." The omission, to our thinking, is the less to be regretted, as in reality this sample of Anglo-Saxon geography is not of any great value; but such as it is, it has already made its appearance in this series, 'Liber Custumarum' (in the *Munimenta Gildhallæ Lond.*), pp. 624–6, from the Cotton MS. Claudius D. ii. Another Register of Hyde Abbey, which was formerly

in the library of the Dukes of Buckingham at Stowe Park, is now in the library of Lord Ashburnham in Sussex. Of this manuscript there is an elaborate description in the privately-printed 'Bibliotheca Manuscripta Stowensis,' of Dr. Charles O'Connor, to which, Mr. Edwards tells us, he is "the more indebted, as the facilities of access to the MS. itself are not now what they were at Stowe." We are sorry to read of such a fact as this; the very statement of it ensures the censure it deserves.

Mr. Edwards's volume concludes with a glossary of obsolete, corrupt and obscure words, a very useful index of places and of principal boundaries, and an elaborate general index. The errors that we have met with in turning over its pages are but of a trivial character and few in number. By an oversight in page xxxv, Emma, the widow of Ethelred the Unready and Cnut, is called the "queen of Edward the Confessor," whereas she was his mother; in page xxxiv, line 5, the date 955 is obviously an error for 995; and in page 112, line 11, for "virginoulam" read *virgunculam*, as the classical form, if we remember aright, is the normal rule in these publications.

From what we have already said, our readers, we think, will consider us justified in congratulating Mr. Edwards on having added to the Rolls Series a well-edited volume of considerable value, both in an historical and a philological point of view.

Thirty Years of Army Life on the Border: comprising Descriptions of the Indian Nomads of the Plains; Explorations of New Territory; a Trip across the Rocky Mountains in the Winter; Descriptions of the Habits of different Animals found in the West, and the Methods of Hunting them; with Incidents in the Life of different Frontier Men, &c. By Colonel R. B. Marcy, U.S.A. With Numerous Illustrations. (Low & Co.)

A gallant officer, who has known "more than thirty years of service in the United States Army," a considerable part of which period was spent "on the frontiers, on the prairies, or among the far western mountains," Colonel Marcy has already made good his title to a place amongst writers of ability by 'The Prairie Traveller,' a book favourably spoken of by a large circle of readers. His present volume will prove no less delightful to persons who have a taste for narratives of adventure. Some of its illustrations of life in Arkansas and Texas are exquisitely droll, as well as broadly comic. Speaking of the rules which govern the American usage of "liquoring," the Colonel says: "Among the characteristics of the people of the United States, I know of no custom which exhibits a more marked contrast in their habits and those of their cousins on the other side of the Atlantic than that of the interchange of civilities over the social glass. . . . An acquaintance of mine, living in the Cherokee country, once visited Little Rock, and stopped at the Anthony House. Feeling fatigued and thirsty after a hard ride, he, on entering the hotel, went to the bar and called for a glass of liquor, when, to his astonishment, he said, 'Fourteen men who were sitting around stepped up and "lowed they'd take sugar in thar'n!" He paid for the fifteen drinks, as it was in strict conformity with the customs of the country, but he did not visit the bar again.' On his return from the plains after exploring the Brazos river to its sources in 1854, he encountered, near a remote frontier house, a lovely American girl, whom he places before the reader as a model "prairie belle." Eighteen years in age, gracefully formed, possessing a musical voice,

and rarely endowed with respect to facial beauty, this young lady "wore a closely-fitting bloomer costume, with a jaunty little straw hat upon one side of her head, fastened under the chin with a pretty pink ribbon, and her luxurious natural hair curled in ringlets all over her shoulders. She was evidently the reigning belle of the neighbourhood, as well as the favourite spoiled child of her family; and she was just as wild, untamed, and free from the absurd, tyrannical conventionalities of society as the mustangs that roamed over the adjacent prairies. . . She inquired very particularly about our camping arrangements, and manifested a good deal of curiosity concerning the shape, material, and capacity of our tent. She had never seen one, it appeared, and I remarked to her that after ours was pitched, if she would honour us with a call, she would have a good opportunity of seeing how very comfortable we could make ourselves in camp. At this she turned around, facing me, applied her thumb to her nose with her fingers extended, closed one eye, and, with her countenance assuming a most ludicrously severe expression, observed, 'I'm afraid of wolves, ole hoss.' As I was quite unconscious of having intended any disrespect to the young lady, I was a good deal surprised at this exhibition of indignation." At the close of his book the author gives some interesting particulars concerning that superb shot and enthusiastic sportsman, Capt. Martin Scott, whose prowess with the rifle is known to popular fame in connexion with the racoon, who, on finding himself within range of the captain's weapon, exclaimed, "I am a gone 'coon; you need not fire; I'll come down and give no trouble." Col. Marcy records of this "dead shot"—

"Some of his performances in rifle-shooting I have witnessed myself, and for great accuracy I must acknowledge that they exceed anything of the kind I have ever known before. One of the many instances where I have been present at his shooting will, I presume, suffice to illustrate this. He proposed to me, upon one occasion, that we should take an old-fashioned United States yager that he had, and determine which could load and fire three shots in the shortest space of time, and make the best target. Accordingly, a playing card, with a spot or bull's eye in the centre about the size of a dime, was attached to a log of wood, and placed at seventy-five yards from where we proposed to stand. Capt. Scott then took the rifle uncharged, with the powder-flask at hand, and the balls and patches in his mouth, and he made three shots 'off-hand' in one minute and twenty seconds. I then myself went to the target, and found one round hole directly through the centre of the bull's-eye. I was surprised at the precision of the shot, but observed to the captain that the other two had entirely missed the target. He shook his head and called for an axe, when we split the log, and found the three balls in one mass, all having passed through the same round aperture directly in the centre of the card."

Clearly the 'coon had good cause for his despair.

OUR LIBRARY TABLE.

Harper's Pictorial History of the Great Rebellion. Part I.—*To the Close of the Peninsular Campaign in 1862.* (Low & Co.)

The only faults to be noticed in this well-written and profusely-illustrated history of the American War are, the size of its page and the weight of the volume. Large quarto is an inconvenient size for a volume that is addressed to a numerous public, and is intended for popular study. The clerk hurrying at the same time to knowledge and his office, the mechanic snatching the "odd minutes" of a day for self-education, the studious boy who likes to carry a volume in his pocket, and other students of a humble sort, have reasonable objections to heavy quarto books that cannot be read without the help of a reading-desk, and even then cannot be perused with the same facility as a

handy octavo volume. To the work before us these remarks apply with especial force, as the volume is very ponderous, and much of its contents is in very small type. Otherwise, the 'Pictorial History of the Great Rebellion' merits cordial praise. Many of its illustrative pictures are the best that we have seen in such a work; and some of the numerous portraits of prominent actors in the war are admirable as likenesses and works of Art. The tone of the book is enthusiastically—some would say narrowly—loyal; but in all points where we have tested its statements, the writers may be commended for severe accuracy. In accordance with honesty which characterizes most Northern accounts of the late struggle, the editor not only gives due prominence to the panic of Bull Run, but has the hardihood to illustrate its humiliations with a picture of the retreat.

Types from the Hebrew and Greek Scriptures, as illustrated in the Colours of the Rainbow. By Mrs. Kelly. (Darton & Co.)

THE writer's subject is the covenant-bow, the witness, as is stated, of a life that St. John speaks of. God manifests himself in his mediatorial character as the bow in the clouds. The book exhibits a strange jargon and jumble, unintelligible, allegorizing, and absurd. Here is a specimen: "Our Lord is the Esau, having taken upon himself the nature of the dying child of Adam. Again, He is, as the uprooted child of the law, the lentil, or life-preserver; and, moreover, He is the Jacob, the supplanter, the hand that seethed the pottage and held it forth to his brother, that the birthright should be his, and his the beloved seed." Interspersed with such writing are various Hebrew and Greek words, which add to the grotesque incoherences and imaginings. Good sense is a quality which does not appear; and its absence is ill supplied by the farrago served up for the palate of such allegorizers as consent for the time to lay their reason aside.

Memorials of Worcester. By Mackenzie E. C. Walcott. (Birmingham, Wright.)

Mr. Mackenzie Walcott is perhaps best known as a topographical writer by his book on Westminster. He has, however, written in illustration of so many places in England that there are few in which he is not known. Here we meet with him at Worcester, with a guide-book that a baby might carry in its hand, and grown-up people, without end, profit by. In some three dozen pages he has cleverly contrived to pack a vast mass of historical and local incidents that are not only interesting themselves, but are likely to induce, in those who read, a desire to know more about them, in full detail. Mr. Walcott states that Worcester "has borne more names than any town in England," and that "Hwie-wara-ceaster"—the castle of the inhabitants of the county of the Huicci—was the original form and significance of its name. Its fighting period, as far as record tells, began in the seventh century, when King Eadwine of Northumberland drove the British King Ceadenalla through and out of the city. The period ended in the seventeenth century, when Charles the Second fled out of the county away from the pursuit of Cromwell. For nearly 1,200 years Worcester has been a cathedral city; and it is to be noted that its bishop, Wolstan, was the only prelate whom the Conqueror left in possession of his see. The principal portion of the book refers to the cathedral, which no traveller can visit with a better manual to help him than he will find in these 'Memorials.'

A cheap and convenient edition of the *Bacchæ* of Euripides (Parker) has been added to the "Oxford Pocket Classics." The notes give more assistance in the way of translation than those in other works of this series, long passages, and in one instance a whole chorus, being translated. The renderings are not always the best that could have been given, as, for example, "It is not wisdom to be wise; and more than mortal thought are shortness of days." This is neither good English nor a correct version of the Greek, which might be thus rendered: "Cleverness and sentiments unbecoming mortals are not wisdom; life is short." There is a curious misprint in the same note, $\phi\acute{\epsilon}\beta\omicron\nu$ for $\sigma\phi\omicron\nu$, which seems to show want of care in revising.

—There is no remarkable merit in *The Guide to the Latin Language*, by E. Tickner, B.A. (Clarke), and *A Latin Reader*, by E. Tickner, B.A. (Clarke). The former is a first book, comprising grammar, reading and exercise book, not well arranged. It is a strange thing to put irregular before regular verbs, and mix up nouns, adjectives and verbs together, instead of taking them in succession, as they occur in all grammars. The vocabularies in both are too often on the same page as the reading lessons. They should be at the end of the book. There is a want of careful graduation in the order of reading lessons.—The opposite of this may be said of *The Complete Reader; being a carefully-graduated System of Teaching to Read and Spell by Means of Attractive and Interesting Lessons*, by E. T. Stevens and C. Hole (Longmans), which is one of the best books for teaching reading and spelling that we have seen. We think some of the reading lessons, particularly the earlier ones, might as well have been shorter.—Another good first book is, *First Steps in Geography, for the Use of Beginners, corrected to the Present Year*, by D. F. T. (Nisbet), which conveys much correct information in simple language, and within moderate limits.—*The Little Scholar's First Step in the German Language*, by Mrs. F. Lebahn (Lockwood), may be useful for very young beginners in German, if there are any such.—We are surprised that M. J. Gaillard, B.A., should have thought it worth while to publish his *French Orthography; or, the Certain Guide to an Accurate French Pronunciation* (Philip & Son). It is a lengthy, elaborate, and pretentious attempt to teach pronunciation by the roundabout and necessarily imperfect method of written directions, which are rendered no clearer by a useless parade of anatomy, with drawings of men's heads. We cannot imagine any one having the patience to wade through the weary work, or if he did, gaining as much by it as he might pick up from half-an-hour's *vivid voce* instruction.—A far more practical book bears the title of *The Beginner's Comprehensive French Book*, by J. Delpech, B.A. (Trübner). It contains rules for pronunciation, the accidence of the grammar, reading lessons (some of which are closely translated, but not on the same page or opposite to it), exercises, and a dictionary. There are also a few useful grammatical questions. The Preface contains some sensible observations and directions as to the use of the book.—The two volumes entitled *History of Rome*, and *History of Greece*, by W. F. Collier, LL.D., (Nelson) are readable sketches, in which the biographical element is made to play a prominent part. While this undoubtedly increases the interest, it rather interrupts the continuity of the narration, and interferes with the unity and compactness of the historical representation. The reader's mind is so pre-occupied with persons that he is in danger of missing events and their mutual dependence. Occasional attempts at fine writing, and rather too rhetorical a style in general, do not add to the value of the books.

LIST OF NEW BOOKS.

Alford's (H. D.D.) *The Year of Prayer*, 12mo. 3/6 cl.
Bohn's Standard Library. Coleridge's *Biographia Literaria*, 2/6 cl.
Brook's (Mrs. U.) *My Father's Hand, and other Stories*, 16mo. 2/6 cl.
Copley Annals preserved in Proverbs, 8vo. 5/ cl.
Crichton's (A. W.) *Naturalist's Ramble to the Oracles*, 12mo. 4/ cl.
Crisp (E.) on Malignant Cholera, its Origin, &c., 8vo. 5/ swd.
Cumberland Conquest (The), 8vo. 3/6 cl.
Eise's (Rev. C.) *Arithmetic*, 12mo. 3/6 cl.
Eton First Greek Verse Reading Book, 12mo. 2/ cl. swd.
Flack (Capt.) *The Texan Ranger*, 12mo. 3/6 cl.
Foxe's Book of Martyrs (Cassell's Illust. Edit.), sup. roy. 8vo. 12/ Frankland's (E.) *Lecture Notes for Chemical Students*, 8vo. 12/ Gray's (A.) *Nettle's Mission, Stories on the Lord's Prayer*, 3/6 cl.
Halliday's (A.) *Town and Country Sketches*, post 8vo. 7/6 cl.
Herschel's (J. F. W.) *Familiar Lectures on Scientific Subjects*, 4/ Hood's (Thos.) *Serious Poems*, edited by Lucas, fcp. 8vo. 5/ cl.
Kingston's (W. H. G.) *Washed Ashore*, 16mo. 3/6 cl.
Macdonald's (Geo.) *Annals of a Quiet Neighbourhood*, 3 vols. 21/6 Macmillan's Magazine, Vol. 14, 8vo. 7/6 cl.
Murray's (W.) *Emotional Disorders of Sympathetic System*, 3/6 cl.
Mushet's (W. B.) *Practical Treatise on Apoplexy*, 8vo. 7/ cl.
Nimmo's Popular Tales, Vol. 5. 'Hunt of the Glenkens', &c., 1/ Old Merry's Annual, 1867, sq. 5/ cl.
Page's (G. E.) *Harvardian Oration*, 1866, 8vo. 8/ cl.
Phillips's (R.) *Bethel Flag, Sermons to Seamen*, 12mo. 2/ cl.
Phillips's (L. E.) *Autographic Album of Fac-similes*, 4to. 21/ cl.
Poessee's *Romance Specimina*, in usum Scholar. Rubenstein's, 4/6 cl.
Recollections of the East, by a Subaltern, oblong folio, 21/ cl.
Record of Zoological Literature, 1865, 8vo. 30/ cl.
Shakespeare, Handy Volume Edition, Vol. 6, 32mo. 1/ swd.
Snow's (Mrs. L.) *Practical Essays on Popular Subjects*, 2/6 cl.
Spirit of Praise, illust. sm. 4to. 21/ cl.
Statutes, Public General, &c., 30 Vict., royal 8vo. 14/ bds.
Stephens's (F. G.) *English Children as painted by Reynolds*, 21/ cl.
Stewart's (B.) *Elementary Treatise on Heat*, 12mo. 7/6 cl.
Sunday Afternoons with Mamma, sq. 3/ cl.
Theoretical Astronomy, Examined & Exposed, by Common Sense, 5/ Venn's (J.) *The Logic of Chance*, 12mo. 7/6 cl.
Whately's (Abp.) *Life and Correspondence*, by Miss Whately, 25/ cl.

LITERARY ANNOUNCEMENTS.

In Messrs. Macmillan & Co.'s list there is an announcement of the completion of 'The Cambridge Shakespeare,' edited by Messrs. Clark and W. Aldis Wright. Among other works of interest are 'The Iliad of Homer,' translated into English accentuated Hexameters by Sir John Herschel, 'Legendary Fictions of the Irish Celts,' collected by Patrick Kennedy, and 'The Poetical Works of John Milton,' edited by Prof. Masson.

Messrs. Chapman & Hall announce for November Mr. Wornum's 'Life of Holbein,'—Mr. E. S. Dallas's 'The Gay Science,' meaning the science of criticism, 'Polynesian Reminiscences,' by W. T. Pritchard, '—Norway, its People and its Institutions,' by the Rev. John Bowden. Mr. Mark Lemon's 'Up and Down the London Streets' is in the press, as also is 'Nights in the Harem,' by Mrs. Emmeline Lott, the Governess to the Viceroy of Egypt, who startled our propriety a little by her first rough book on herself and her pupil.

Messrs. Routledge & Sons announce the following books for the new season:—'Wayside Poësies,' original poems of the country life, edited by Robert Buchanan, with illustrations, '—Griset's Grotesques, or Jokes drawn on Wood,' with rhymes by Tom Hood, jun., '—The Pictorial Shakspeare,' a new and revised edition in eight volumes, edited by Charles Knight, '—Little Lays for Little Folk,' '—Quotations from Shakespeare,' a new selection of extracts, '—Monstrelet's Chronicles,' a new edition, and '—Longfellow's Poems,' a new red-line edition.

Messrs. Sampson Low & Co.'s list includes 'The Two Centuries of Song; or, Melodies, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last Two Hundred Years, with Critical and Biographical Notes,' by W. Thornbury, '—An Illustrated Edition of Bishop Heber's Hymns,' '—A Selection of Sonnets; with an Essay on Sonnets and Sonneteers,' by the late Leigh Hunt; edited, from the original MS., by S. Adams Lee, '—Milton's Paradise Lost,' with the original Steel Engravings of John Martin, '—A Concordance to Milton's Poetical Works,' by C. D. Cleveland, '—The Masque at Ludlow,' by the author of 'Mary Powell,' '—A Summer in Leslie Goldthwaite's Life,' by the author of 'The Gay-worthys,' '—Celebrated Letters, selected and arranged, with Critical and Biographical Notes,' by Moy Thomas, '—Life in the Pyrenees,' by H. Blackburn, Esq., with upwards of 100 Illustrations by Gustave Doré, '—The Mission of Great Sufferings,' by Elihu Burrit, '—A Dictionary of Photography,' by Prof. Dawson, '—Richmond and its Inhabitants, from the Olden Time,' by R. Crisp, '—and 'A Second Cruise of the Rob Roy Canoe on the Rivers and Lakes of Norway, Sweden, Denmark, and the Baltic and North Seas,' with numerous illustrations.

In Messrs. Strahan's announcements we find, 'Christ and Christendom,' the Boyle Lectures for 1866, by E. H. Plumptre, M.A., '—Our Father's Business,' and 'Out of Harness,' by T. Guthrie, D.D., '—Voices of the Prophets, on Faith, Prayer and Holy Living,' by C. J. Vaughan, D.D., '—Unspoken Sermons,' by G. Macdonald, M.A., '—How to Study the New Testament,' '—The Year of Prayer; being Family Prayers for the Christian Year,' and 'The Year of Praise; being Hymns, with Tunes,' edited by Henry Alford, D.D., '—Reminiscences of a Highland Parish,' by Norman Macleod, D.D., '—Familiar Lectures on Scientific Subjects,' by Sir J. F. W. Herschel, Bart., '—Travels in the Slavonic Provinces of Turkey in Europe,' by G. M. Mackenzie and A. P. Irby, '—Lives of Indian Officers,' by J. W. Kaye, '—The Reign of Law,' by the Duke of Argyll, '—and a Christmas-book, 'Touches of Nature,' by eminent artists and authors.

Messrs. Saunders, Otley & Co.'s new publications include 'The Universities' Mission to East Central Africa,' by the Rev. H. Rowley, '—A History of the Jewish Church, from a Christian Point of View,' by the Rev. S. C. Malan, M.A., '—Sermons by Gabriel, Bishop of Imereth,' translated and edited from the Georgian, by the Rev. S. C. Malan, M.A. Among new novels are, 'Philo: a Romance of Life in the First Century,'

—and 'A Wife and not a Wife,' by the veteran writer, Cyrus Redding.

Messrs. Lovell Reeve & Co. have in the press a work by the Author of 'Episodes of Insect Life,' entitled 'Live Coals, or Faces from the Fire'; also 'The Reasoning Power in Animals,' by the Rev. J. S. Watson, '—Meteors, Aerolites and Falling Stars,' by Dr. Phipson, '—The Edible Mollusks of Britain,' by Mr. S. Lovell, '—British Butterflies and Moths,' by H. T. Stainton, '—British Sea-weeds,' by S. V. Gray, and 'British Grasses,' by M. Plues.

In Mr. Newby's announcements we note:—'Narrative of a Journey to Morocco in 1863 and 1864,' by the late Dr. T. Hodgkin, '—Some Work of Noble Notes,' by W. D. Adams, '—The Spas of Germany, France, Italy, Bavaria, &c.,' by Dr. T. M. Madden, and 'Landmarks of a Life,' a novel, by Miss Austin.

THE IRISH CHURCH.

Dr. Maziere Brady, writing from Navan, Ireland, says:—

"You seem to have judged me on wrong grounds (*Athenæum*, Sept. 29). For (1.) if you had read my pamphlet 'On Irish Church Temporalities' you would have seen that the plan I there proposed would have strengthened the church and maintained its ministers in comfort, only removing the temporal ascendancy. (2.) Next, I have not taken up any new views since I ceased to be a chaplain to the Irish Lords Lieutenant. But some say that I was deprived of my chaplaincy because of these views. (3.) I have not assailed in the least the apostolical succession, only that from St. Patrick—see Froude, vol. 10, p. 481, for the same statements of the conversion of the bishops. (4.) Archdeacon Martin has not answered me, except you consider his *Billinggate* to be an answer. (5.) I shall be very glad if you or any one will point out a single instance of misquotation or inaccuracy of any kind in my pamphlet. I shall receive any such information with thankfulness, and if I have been wrong will confess it. W. MAZIERE BRADY."

We may add to Dr. M. Brady's letter some intelligence forwarded to us from Ireland, which is not without interest. When Archbishop Whately, about thirty years ago, was urging the Government to purchase the temporalities and abolish the territorial and parochial systems, the Protestant papers refused to insert the letters, written on the subject, by his chaplain, the Rev. Mr. Dickenson, who was therefore compelled to have recourse to the Roman Catholic papers, where, naturally, they were readily admitted. We are assured, on good authority, that Dr. Brady is being subjected to a similar system, and that nothing he has to advance on his side of the question can find insertion in the Irish Protestant papers.

DERIVATION AND MEANING OF "BONFIRE."

Llandaff, Sept. 29, 1866.

CAN you assist me in deciding upon the correct etymology of the word "bonfire"? The following passages contain the two earliest instances of the use of the word amongst the materials prepared for the Philological Society's English Dictionary:—

"I have heard of a custom that is practised in some parts of Lincolnshire, where, on some peculiar nights, they make great fires in the public streets of their towns, with bones of oxen, sheep, &c., which are heaped together before. I am apt to believe that this custom was continued in memory of burning their dead, and that from hence came the original of *Bonfires*."—About 1550. Leland's Collectanea, Bagford's Letter, vol. i. p. xxvi.

"Item, the xxij day of May was the Assencion day, and at nyght was made grete *bone-fyers* thrower all London, and grete chere in every parych at every *bone fyer*, and grete melody with dyvers instrements."—1556. Chr. of Gr. Fr. of L., p. 47 (Camden Soc., 1852).

In Fox's 'Book of Martyrs,' v. iii. pp. 96, 624 (1562-76), the word is spelt according to modern usage. Holinshed ('Chronicles,' v. iii. p. 884, col. i., 1577-87) writes "bounfire." Spenser ('Epithalamion,' l. 275, Wks. 1842, v. V. p. 374)

"bonseffer"; and Shakspeare (1 Hen. IV., act iii., sc. 3, ed. 1623) "bonfire." T. Fuller ('Church History,' Book ix., p. 52, 1655) jestingly speaks of burning an "unhappy bone of contention" "in a *bonfire* of general joy"; but a few years later he writes: "I meet with two etymologies of *bonfires*. Some deduce it from fires of bones, relating it to the burning of martyrs. But others derive the word (more truly in my mind) from *boon* (that is, good), and *fires*, whether good be taken here for great, or for merry and cheerful, such fires being always made on welcome occasions."—1660. 'Mixed Contemplations in these Times.'

The old spelling, "bonefire," occurs in Hudibras, Pt. iii., canto 2, p. 165 (ed. 1694), the *Spectator*, v. viii. p. 237 (Nov. 5, 1714), and North's 'Examen,' Pt. 3, c. 6, par. 92, p. 492 (1740).

In Cotgrave's French and English Dictionary (1611) we find "Feu de behourdis, a bone-fire," and Minshew's Spanish-English Dictionary (1623), and Howell's English-French Dictionary (1660), both give "A bonefire, Feu de joye."

Todd, in his edition of Johnson's Dictionary (quoting the derivation preferred by Fuller, and followed by Skinner and Johnson, and another by Lyne from *boon-fire*, i.e. a fire made of materials obtained by begging) says, "Our old literature will confirm, I think, the orthography of bone-fire, and show that its primitive meaning is a *fire made of bones*," and cites the following passage (which is evidently mutilated, though I have no means of comparing it with the original): "In worship of St. John, the people waked at home and made three manner of fires: One was of clean bones, and no wood: and that is called a *bonfire*. Another is clean wood and no bones; and that is called a wood-fire, for people to sit and wake thereby. The third is made of wood and bones, and is called St. John's fire."—Quatuor Sermones, 1499 fol. c. i.

Mr. Wedgwood suggests another derivation, treating the prefix "bon" as equivalent to the Danish word "baun," a beacon, a word of which we have traces in several English names, as Banbury, Banstead (Dictionary *sub voce*). Dr. Latham, without discussion, appears to accept this theory. Webster is undecided between this, and that adopted by Dr. Johnson; but for the former he gives the only kind of authority which I can find, namely, the Welsh word *banffagl*, a lofty blaze, bonfire. Worcester follows Johnson without any remark.

ROBERT W. GRIFFITH, B.A.

MODERN BIOGRAPHY.

Capetown, August 20, 1866.

UNLESS I have been anticipated, as I probably may be, by some one nearer home, let me call your attention to a most ridiculous blunder, or rather a piece of absurd gullibility, on the part of the author of 'Modern Eccentrics,' published in the July number of a monthly periodical.

Years ago, to wit, in 1825, Charles Lamb contributed to the *London Magazine* an apocryphal 'Biographical Memoir of Mr. Liston.' The article is in Lamb's most amusing style, brimful of grave humour and ludicrous contrasts, bristling at every point with the raciest irony, and was, as I need scarcely add, as true of Liston as it would be if now published of Thomas Carlyle or Ruskin.

The pedigree of the popular actor was to be traced, according to the genealogical Elia, to "Johan de L'Estonne (for which we are referred to Doomsday Book), who came in with the Conqueror, and had lands awarded him in Lupton Magna, in Kent." Johan de L'Estonne was standard-bearer to "Hugo de Agmondeesham, a powerful Norman baron, who was slain by the hand of Harold himself at the fatal battle of Hastings." From the standard-bearer we come to "John Delliston, Knight, who was high-sheriff for Kent, according to Fabian, *quinto Henrici Sexti*," and from him skip again to "Aminadab Liston," who flourished in the reign of James the First, and "was of the strictest order of Puritans," and the author, moreover, of an, unhappily, rare tract bearing the inviting title of 'The Grinning Glass, or Actor's Mirror; wherein the vituperative Visions of Vicious Players for the Scene is as virtuously reflected back upon their mimetic Mon-

strenuities as it has viciously (hitherto) vitiated with its vile Vanities her Votarists'!

From Aminadab the Puritan we come (the family becoming more sophisticated as it recedes from the knightly stock) to Habakkuk Liston, an Anabaptist minister, and father of the player.

We next have the history of Liston himself, as ludicrous and voracious as his pedigree. In his early youth he was afflicted with the measles, and was only cured, "under heaven," by a copious diet of *Sauer-Kraut*, the taste for which savoury and wholesome dish stuck so thoroughly to the son of Habakkuk from thence forward and for ever, that "when any of Mr. Liston's intimates invite him to supper, he never fails of finding, nearest to his knife and fork, a dish of *Sauer-Kraut*." "At the age of nine we find our subject under the tuition of the Rev. Mr. Goodenough," whose tragic demise (in an old shaft, sunk "by Sir Ralph Shepperton, Knight and member for the county") is too harrowing to be repeated, and "the joint death of both his parents" following not many months afterwards, the orphan is thrown "on the protection of his maternal great-aunt, Mrs. Sittingbourn," whose estate of Charnwood was, like Lupton Magna, situated in *Kent*, and not in Leicestershire. In the venerable solitudes of Charnwood, Liston "cultivated those contemplative habits which have never entirely deserted him in after years. Here he was commonly in the summer months to be met with, with a book in his hand—not a play-book—meditating. Boyle's 'Reflections' was at one time the darling volume; which in its turn was superseded by Young's 'Night Thoughts,' which has continued its hold upon him through life. He carries it always about him; and it is no uncommon thing for him to be seen, in the refreshing intervals of his occupation, leaning against a side-scene, in a sort of Herbert-of-Cherbury posture, turning over a pocket edition of his favourite author!"

But death followed where Liston trod—a pot of charcoal terminated the venerated life of his maternal grand-aunt, "at the premature age of seventy," and the future comedian makes his exit from Charnwood, where "water was his habitual drink, and his food little beyond the mast and beech-nuts of his favourite grove"—"arid beech-nuts," which, "distilled by a complexion naturally adust, mounted into an occiput already prepared to kindle by long seclusion and the fervour of strict Calvinistic notions," and produced, "in the glooms of Charnwood," "illusions similar in kind to those which are related of the famous Anthony of Padua," which said illusions, in short, ultimately "influenced his future destiny," and made Liston the most grotesque actor of the day.

I need not quote more (and would not have quoted so much, but for the fact that this facetious memoir is singularly omitted from the collective edition of Lamb's works) to show that the 'Biographical Memoir of Mr. Liston' is a transparent jest, a broad grin, an Elian Flan, scintillating with humour. Will it then be believed that the compiler of the 'Modern Eccentrics' has actually, and in most sober sadness, "condensed" Elia's quiz into a memoir for the benefit of the readers of the periodical to which I have alluded!

It seems incredible that obtuseness could go so far; but what completely establishes it (and I must confess tickles me especially) is the simple astonishment of the innocent compiler that the above "details" "are not referred to in the sketch of Liston's career, written a few days after his death, March 22, 1840, by his son-in-law, George Herbert Rodwell, the musical composer, and published in the *Illustrated London News*, March 28th." I have often heard the silly story of Liston's queer faces being made in imitation of visionary aspects which haunted him at all hours; but I little thought of seeing the nonsense dished up afresh. In compassion to the writer of 'Modern Eccentrics,' let me warn him that there is a companion-memoir of Munden, also by Lamb, which he had as well eschew as a trustworthy authority.

HOTENTOT.

AMERICAN BIBLIOGRAPHY.

Cecy est un livre de bonne foy.

4, Trafalgar Square, Charing Cross, Oct. 4, 1866.

I had the good fortune a few days ago to secure in the Row a large-paper copy, in 4to., price 8*l.*, and a small-paper one, in royal 8vo., price 4*l.*, of a portly volume of nearly 600 pages, sumptuously printed, at the Bradstreet Press, in New York, and entitled 'Bibliotheca Americana Vetusissima; a Description of Works relating to America published between the years 1492 and 1551. New York, Geo. P. Philas, 1866.' The author's name is Henry Harrisse, and it will not take an indifferent reader long to see that he has worked hard to give the world a manual much needed. How well he has succeeded, the same world will in due time, no doubt, find out.

Under ordinary circumstances, I should not trouble you or your readers; but as M. Harrisse has gone out of his way repeatedly in his book to befoul me and my friends, and to endeavour to snuff out our lights, I venture reluctantly to ask a corner in the *Athenæum* for explanation and defence. I have no wish to pulverize him now, but simply to bring him to with a blank-cartridge, and examine his papers. A monitor sinner is preparing for him to be ready whenever occasion requires hereafter. My credentials are twenty-five years' hard service in the study of the bibliography of American history and literature, never unmindful of early-printed and rare books in general. Having undertaken this branch of study, and judging that London was the best centre of operations, I came to Europe as soon as I had taken my Master's degree, in 1845, and from that time to this have not hesitated to do what every one must do who wishes to reach the bottom of this subject. I pulled off my gloves and coat and descended into trade, and if buying and selling the books and manuscripts that I required to investigate can entitle me to the appellation of bookseller, I am not unwilling to adopt it. Why I make these observations, the readers of M. Harrisse's book will understand. It ought also, perhaps, to be mentioned here, that having recently gone over the copies of my invoices since 1845, I find that probably nine-tenths of the rare books in the three best libraries described by M. Harrisse were collected, described and supplied to their present possessors by me, to say nothing of the vast number of other rare books gathered from all parts of Europe, and exported. Experience and loyalty to my chosen pursuit seem to call me out. M. Harrisse opens with:—"The abnegation practised by true scholars in every branch of knowledge is one of the most interesting and striking features of the age in which we live. With the recognition—daily more and more absolute—of the inter-dependence of the sciences, this abnegation has come to be the test of scholastic worth and loyalty."—(p. i.)

And closes with:—

"As we cast a parting glance over the long array of dissertations, notes and descriptions which precede this concluding page, and notice the numerous errors it has behoved us to correct in the works of others, the relief we experience in the completion of our undertaking is mingled with feelings of doubt and apprehension. The consciousness, however, of having performed the task honestly is our consolation and reward. Let those who may feel disposed to follow in our wake treat us as we have treated our predecessors; and if they can inscribe on the title of their work Montaigne's epigraph, *Cecy est un livre de bonne foy*, we will cheerfully abide by the result."—(p. 458.)

M. Harrisse's idea of *abnegation* seems to be, judging from his whole book, an inordinate assertion of M. Harrisse and Macenas, and a total denial of any merit in his predecessors or fellow-labourers, especially if they be booksellers.

The mischievous part of the Introduction is more than thirty pages devoted to an account of some forty authors and booksellers who have written on books relating to America. M. Harrisse has scarcely a good word for any one of them, and his biographical and historical statements are for the most part wild and erroneous. After enumerating and punishing all he desired to name, he concludes:—

"We know of several other catalogues, some of which are exclusively composed of American books, while a certain number, although covering the entire field of history and literature, contain many valuable titles; but they are chiefly lists prepared by booksellers." And then in a note,—"The following from a New England bookseller settled in London, is printed with remarkable accuracy:—*Historical Nuggets: Bibliotheca Americana or a Descriptive Account of my Collection of rare Books relating to America* Henry Stevens GMB FSA. Lond. 1862, &c."—(p. xli.)

As this "certain American bookseller" can mean nobody but me, in the two following paragraphs I readily own service, and gladly avail myself of this opportunity to respond and explain:—

"It is the 'Examen Critique' of Humboldt We regret to say that the manuscript additions which were to complete the work are, owing to the culpable remissness of a certain American bookseller in London, probably lost. If so, it is the greatest misfortune which could befall the student of American history."—(p. xlii.)

"That third section [of de la Com's Chart] never was published; but after Humboldt's death, his library (which was composed of presentation copies of modern works) was found to contain a set of the five volumes of the first issue of the 'Examen,' which the compiler of the Catalogue (*The Humboldt Library*; Lond. 1863, 8vo. 11, 164 pages, No. 4658) describes as 'having numerous manuscript additions in the autograph of the author, who evidently contemplated a supplementary volume.' This assertion is confirmed by the following note in the *Cosmos* (Bohn's edit. vol. ii. p. 631), 'I here give the principal results which are contained in the sixth (still unpublished) volume of my 'Examen Critique.' Steps were immediately taken to purchase this valuable set, with the view of translating the work into English, and of adding biographical and bibliographical annotations, which are now embodied in the present 'Bibliotheca Americana Vetusissima.' The order came too late, as the set had already been bought by a gentleman of this city. Unfortunately, the work was not delivered at the time of the purchase. Three years have now elapsed, and Humboldt's supplementary volume to the 'Examen Critique' is still missing. It is not even known what has become of those precious additions, which no work, as yet written, could possibly replace, and without which the early history of America can be only imperfectly studied and analyzed. We sometimes hear the name of that bookseller praised; but let the reader imagine the bibliopoles employed by Peiraseo, for instance, guilty of such gross negligence, what calamities would the historian of Science and Literature have to record!"—(p. xliii.)

The simple answer to all these charges is, that the sixth or supplementary volume of the 'Examen Critique' never came to London, and never belonged to me. When I bought Humboldt's library, of some 17,000 volumes, I did it long after it had been hawked all over Europe and America, for many months. It was large and valuable, but nobody wanted it all. I bought only the books, and not his unpublished manuscripts. The 'Examen Critique,' described in No. 4658 of the Catalogue, was, no doubt, an interesting relic of the great philosopher, and contained, in his own hand, some five or six pages of small notes, corrections, and additions. They were, doubtless, intended to be used in a subsequent edition. The volumes, with no fault of mine, were injured or destroyed in the great fire in Wellington Street, in June, 1865. M. Harrisse may have taken steps; but I never heard of any order from him for the book, and the purchase was never effected by anybody else. The whole story is, no doubt, a pure invention by M. Harrisse. He wanted an excuse for shooting his rubbish into his 'Bibliotheca Americana Vetusissima.' We now know what are the notes, &c., he said he had prepared for a new edition of the 'Examen Critique,' and can only congratulate the memory of Humboldt on the fortunate escape.

Speaking of Mr. Rich, who died in 1850, he says,—

"He was much regretted. A gentleman by birth and education, Rich was a very different man from

several of those who now attempt to follow in his wake. Entirely reliable, he scorned to resort to the dextrous artifices now so much in vogue to enhance the price of a book; and modest, because he was really learned, he never thrust himself before the public, or worried reading communities with loud and egotistical appeals, from which a true bibliophile would turn with disgust."—(p. xxxi.)

"His (Mr. Rich's) means being limited, he visited London at intervals, for the purpose of disposing, by private sale or by auction, of the rare works which he was continually collecting in Spain. It is to this circumstance that we owe the formation of the four greatest collections of books in America, as well as the American portion of the *Bibliotheca Grenvilliana*, which contains gems not to be found in any other library. These four American collections are located as follows: one in Providence, Rhode Island; one in Washington city; and two in New York, the Aspinwall collection having been removed hither from Boston in 1863."—(p. xxix.)

As an old and intimate friend of Mr. Rich, and one who holds his memory dear, I must pronounce these statements simply untrue. He supplied very few books to Mr. Grenville, I am informed. The honour and credit belong to others. And to the three private libraries in Providence, Washington, and New York, to my certain knowledge, he supplied very few books, the owners having other correspondents in London.

Speaking of A. Asher's Bibliographical Essay on the Collection of Voyages and Travels by Levinus Hulsius and his successors, M. Harrisse says:—

"Although full of interest, and a praiseworthy effort in the proper direction, this description is not as reliable as hypercritical collectors would desire." Then in a note—"For instance, the 1st edit. of part v is not 1601, but 1599; it is the second which is dated 1601, instead of 1603. The 1st edit. of part x is not 1613, but 1608. The 2nd edit. of part xiii is 1617 (like the 1st, with variations only in the title and prel. ll.), instead of 1627. The earliest issue of the 3d edit. of part v is 1603, instead of 1612. There is no dedication to *Anders Schiffahrt's* 2d voyage (Nuremb., 1602); the text in Raleigh's *Guiana* (Part v, 1601) is in 18 pp. instead of 17. In part iv, 1599, there are fifteen plates, including Schmidel's portrait, instead of sixteen besides the portrait, &c."... "It is therefore necessary to add to Asher's *Memoir* the collations published by Quaritch, the London bookseller; although these covers [sic] only the first editions of Hulsius [sic]."—(p. xxvii.)

If poor *Anders Schiffahrt* has no dedication to his second voyage, he certainly has now a good introduction, which will no doubt compensate him, and make him welcome to all the libraries of Europe. He appears, we are happy to say, as large as life in M. Harrisse's Index. The words simply signify "Another," or "Second Voyage."

How M. Harrisse attempts biography:—"Anoine de la Sale, one of the wittiest of French writers, lived between the years 1398 and 1461. The present work [*La Salade*, Paris, 1527], which was composed for his pupil, John of Anjou, Duke of Calabria, seems to have been written between 1438 and 1447, and places its facetious author side by side with Adam of Bremen, Ordericus Vitalis, Torfi [*i.e.* Torfaeus], Rafn and Karl Wilhelm."—(p. 261.)

All this learning, which will require the aid of several biographical dictionaries to appreciate, is expended on a book which has nothing whatever to do with America, the subject in hand. Two whole pages, including what is unsaid in the *errata*, are thus thrown away.

How M. Harrisse attempts history:—

"The startling discoveries of Columbus, Cabral, Vasco da Gama, Magellan and others, gave a new impetus to the geographical science, which, so far as we are concerned, culminated in the present edition of Ptolemy [Rome, 1508], which contains the first engraved map representing the newly discovered isles and hemisphere."—(p. 108.)

How the discoveries of Magellan, in 1519—1521, can be made to "culminate" in the Ptolemy of 1508 puzzles me at present.

How M. Harrisse names and stands godfather to a printed Codex:—

"The next collection of the four voyages [Lettera di Amerigo vespucii, &c.] is in Italian, and seems to have been printed at Florence about the year 1516. We call the latter the 'Grenville Codex' from its last possessor, Mr. Thomas Grenville."—(p. 62.)

This little printed tract of sixteen pages is probably the only 'Codex' of the kind in Europe. There are five references to it in M. Harrisse's Index.

In describing a well-known monograph of Mr. Squier (whose name he persists in spelling Squiers) he informs us that:—"The biographical notices are extracted from the *Biblioteca* of Beristain, while many of the titles are derived not from an examination of the works themselves, but from the notices in Ramesal [he means Remesal] Vasquez, Cogolludo, Villagutierre, De Souza, and similar sources."—(p. xl.)

After having referred to the distinguished Mexican bibliographer J. M. Beristain de Souza's name under seven different forms, he here divides it and makes two authors of him.

After having taken leave, on page 458, as quoted above, M. Harrisse adds "Additions," "Appendix," "Index," and finally eleven pages of "*Emendanda et Corrigenda*," and concludes with—

"These are the errors and omissions which, up to the present date [May 15, 1866], have come to our knowledge. Should some of those which have doubtless escaped our notice be discovered in time, a supplement will be issued. Meanwhile, it may prove interesting to the reader to be informed that the proof-sheets of the present work have been read by four careful proof-readers. . . *Iterum vale*."

Very interesting, certainly. The four proof-readers had, no doubt, taken leave before "*Iterum vale*" made its appearance. Hence it stands out boldly as a fitting monument to the accurate scholarship of M. Harrisse. It ought, perhaps, to be mentioned that the possessors of the large-paper copies are not favoured with this monument; for in that edition the parting words are the tame old *Iterum vale*.

The book at bottom is not a bad one; but the author has made it a mere fact-bag, and crammed it with no end of extraneous matter. Like the jackdaw he does not appear to be able to resist anything bright, but picks it up regardless of its use or relevancy. The style of printing the titles in *apparent* facsimile misleads, and is a mistake. The collations are often obscure and not precise enough. There is a distressing want of uniformity in the orthography of names of places and persons. The mis-spelling of names is astounding. It is no exaggeration to say that the *errata* of names alone will make a list of 500. Two persons are made of one; one is made of two. Some are created altogether, witness *Anders Schiffahrt*. Chronology is set at defiance. Geography is obscured. History is in a muddle. Grammar and the Queen's English tortured, if not murdered. Acknowledgments are generally wanting where most required, and often given where not deserved. The index, though extremely full, is not trustworthy, names being left out of it purposely, or certainly not by accident. Evidences of bad temper are abundant, and flippant flings which can always be parried are plenty. M. Harrisse quotes largely at second-hand, and omits to mention the books most used. His general and particular scholarship is lamentably deficient, his pedantry and plagiarism manifest, his want of courtesy to predecessors and fellow labourers, his spite and obscure vision as to the merits of others, are apparent throughout. These are some of the faults which should be looked to in a future edition.

I hear with feeling akin to national pride that the author of the '*Bibliotheca Americana Vetusissima*' is not an American, and that therefore this book cannot fairly be charged to American scholarship. I am glad to hear that the edition is already sold off and the book at a premium in New York, especially the large-paper copies.

Least the above remarks may be ascribed to the jealousy or pique of the English press, I take the whole responsibility; and thanking you for the space afforded me, remain yours,

HENRY STEVENS, of Vermont.

OUR WEEKLY GOSSIP.

A new edition of the works and letters of Charles Lamb is in preparation by Mr. W. Carew Hazlitt, to be published by Messrs. Moxon & Co. The existing text of the letters and some of the essays is known to be inaccurate; and Mr. Hazlitt hopes that the possessors of even scraps of Lamb's handwriting will aid in making the forthcoming edition perfect, by allowing him to inspect the autographs.

Dr. Beke is preparing a new and enlarged edition of his account of the British Captives in Abyssinia, and of his unsuccessful mission for their liberation.

A new edition of Dr. Lardner's work on the Electric Telegraph is announced for publication, revised and re-written by Mr. E. B. Bright, Secretary of the British and Irish Magnetic Telegraph Company. It will contain new chapters on the Atlantic Telegraph and the Telegraph to India, with descriptions of the cables and the apparatus employed in laying, testing and working them; also of the means adopted in raising the Atlantic Cable of 1865.

Among the gay and glittering Christmas books, the coming of which begins now to be heralded, is a fairy tale, of an original character, by Mrs. S. C. Hall. The text will be accompanied by numerous illustrations, two of which will be from designs by Mr. and Mrs. E. M. Ward. The title of the book is '*The Prince of the Fair Family*.'

Mrs. Dallas, better known to the general public as Miss Glyn, will, in the course of November, give six Shakspearean Readings, at the Hanover Square Rooms. It is hardly necessary to say that one of them will be '*Antony and Cleopatra*.'

Mr. and Mrs. German Reed, with Mr. John Parry, will re-open the Royal Gallery of Illustration on Monday evening, the 15th instant, with the old excellent entertainment, '*The Yachting Cruise*' and '*The Wedding Breakfast*.'

Some persons, in reference to the "two Dromios" now acting at Drury Lane, affirm that no two individuals can be so alike as not to be readily distinguishable. Not very many years ago, however, the twin sons of one of the eminent medical men named Babington were, the one at Charter-House, the other at St. Paul's School. The respective schoolfellows of the young Babingtons were constantly mistaking the one for the other, however often they met.

Many an anecdote has been recorded of the pilfering habits of certain lovers of old books, to which a pendant has been contributed in recent years by autograph-collectors. A flagrant instance of legerdemain in the autographic line may be seen, as perhaps not a few tourists will remember, in the *Livre des Voyageurs* of the Hôtel du Dome, at Randa, in the Val St.-Nicolas. In June, 1865, Lord Francis Douglas wrote his name on the first leaf of that book while on his way "from Visp to Zermatt." The name has been cut out by some keen autograph-collector, and an unsightly gap now remains as a memorial of the hapless young nobleman, and of a disgraceful theft. A + has been inscribed at each end of the gap, and on the opposite page some traveller has written—"The name of Lord Francis Douglas, who was killed on the Matterhorn, has been stolen from the opposite page by some autograph-hunter. Stranger! I pray you pity the bad taste and the weak conscience, and wish better manners to the no doubt amiable thief." To this, some other traveller has appended a note—"Tuft-hunter, who will frame it, and put it over his mantelpiece." Whoever the culprit may have been, we trust he was not an Englishman. With that signature the book at Randa had a touching interest, which it has now lost, and which would have given it a permanent value among the archives of the village. On the other hand, will the stealer ever dare to exhibit his prize? Will it not, by its form and appearance, always testify against him?

Mr. Frank Buckland has published what he calls a "valuable hint" for oestroculturists, and shows them how to prevent the growth of the green weed, which, if left unchecked, favours the accumulation of mud on oyster-beds. Dredging and hoeing have been tried, but still the weed grows

between high and low water-mark, and the quality of the oysters deteriorates. Mr. Buckland's hint is, Strew the weedy ground with periwinkles. In those little creatures Nature supplies the check. See how soon they will clear a weedy aquarium. Taking advantage of the hint, some of the Whittable proprietors have thrown thousands of periwinkles on their foreshores, and had the satisfaction to see that the weed was all eaten clean off from the oyster-beds in a surprisingly short space of time.

A member of the family of Monk, Duke of Albemarle, Mr. Blayney Cole, the grandson of the Earl and Countess of Rathdown, made his first appearance on the stage, last week, at the Limerick theatre, as *Hamlet*. The *Limerick Chronicle* believes he has relinquished "more tempting advantages for pure devotion to the drama." Mr. Cole's powers are highly praised by the local papers, and the praise may be well founded; but when we see some of the Glasgow papers speaking of Mr. and Mrs. Charles Kean in terms which imply that, when they withdrew from the stage, the sun of England will have set for ever, we distrust local criticism.

We have to record the decease of Mr. S. Stone, who, although known but to a very limited circle, pursued the practical study of British natural history and archaeology to a great extent, as testified by the various donations made by him to the British Museum, the Ashmolean Museum, and the Oxford New Museum, as well as his numerous communications to the Society of Antiquaries and the Entomological Society, and many others in the *Naturalist*, *Zoologist*, &c. From early life up, he resided in the secluded hamlet of Brighthampton, near Standlake, Oxon, where, led by the accidental discovery of a few Anglo-Saxon beads, with a skeleton dug up in the village, he was so fortunate as to find an Anglo-Saxon cemetery, which was subsequently excavated very successfully under the superintendence of J. Y. Akerman, Esq., the then Secretary of the Society of Antiquaries. The numerous relics here discovered are deposited in the Ashmolean Museum, where, in conjunction with the Douglas Collection (figured in the 'Nænia') and the "Fairford Graves" Collection, presented by W. M. Wylie, Esq., they form one of the most extensive Anglo-Saxon collections in existence. Mr. Stone also succeeded in discovering the remains of a British village, consisting of a number of circular sunk pits, on Standlake Common. These he also caused to be excavated with great care, a detailed account of which is given in 'Archæologia,' vol. xxxvii. The whole of the urns found during these excavations are also preserved in the Ashmolean Museum, together with a model of the dwelling, as cleared out, made and presented by Mr. Stone. Mr. Stone was also a very close observer of the habits of insects, especially bees, wasps and hornets, respecting which he made several remarkable physiological discoveries, as, for instance, the fact that worker wasps born in the early part of the summer, and long before the appearance of the males, are able to produce fertile eggs, which are capable of being developed, not into males, but into other workers. The dexterity which he acquired in the management of wasps, in making them, as it were, work to his will, was extremely interesting, of which an enormous nest in the Oxford New Museum, built by several colonies working in concert, and a series of curiously-formed nests in the Nest Room of the British Museum, are examples. Mr. Stone died on the 10th of September last, in the 55th year of his age.

A word may be allowed to note the shifting of the standard of respectability. A witness at the trial of Thurtell, some forty years since, testified to the murderer's respectability, on the ground of his keeping a gig. Last week a woman, whose daughter had been married and deserted by a Frenchman, who had a first wife living, excused herself (before a magistrate) for not inquiring into the Frenchman's character by saying that he had a Crystal Palace Season Ticket!

A very noteworthy article, from the pen of Mr. W. R. S. Ralston, in a recent number of *The Fortnightly Review*, draws attention to the Russian Burns, Alexis Vasilievich Koltoof, a poet whose works have hitherto been unknown to the majority

of lettered Englishmen, as the language in which they are written. Under a burden of accumulated sorrows that had their origin in disappointed love, feeble health, narrow means, and sordid circumstances, Koltoof made a brave fight in the battle of life until his physical powers, too weak for the long endurance and continuous exertion by which strong men sometimes triumph over malignant fortune, succumbed to death before he had completed his thirty-fourth year. Having rendered homage to the heroism and poetic truth of this brief and mournful career, Mr. Ralston gives some very musical translations of Koltoof's verse. It was thus that the poet sang of his first love and first great woe:—

FIRST LOVE.

Her whom I loved in early years
So well, so tenderly—who filled
With a first passion's hopes and fears
A heart which time has not yet stilled—
Can I forget her? Day by day I strive
Her well-loved image from my mind to drive;
To find new dreams my old dreams to efface,
And let another love my early love replace.
But all in vain. I strive and strive, and yet
What'er I do I never can forget.
When in the silent hours of night I sleep,
She comes in dreams: once more I see her stand
Beside my couch; once more her accents steep
My suffering soul in bliss: once more her hand
In mine so gently, mournfully, she lays,
While her dark eyes on mine in sadness gaze.
Speed, kindly Time, my thoughts from her to sever,
Or set me free with her to live for ever.

The great bridge at Runcorn, to which we have repeatedly referred as among the most gigantic modern works of its class, is now nearly finished. Progress in the same direction, and to a like extent, has been made with the buildings for the new Exchange at Liverpool.

In old times the English in Paris found endless amusement in going to see 'Les Anglaises pour Rire.' In later days they found similar amusement in reading the anti-English speeches of the Marquis de Boissy. This source of enjoyment has also passed away. The crazy Breton gentleman has recently died; and the official jester of the French House of Peers has left no successor.

We referred last week to the report that Mr. W. Harrison was to play *Faust* at Drury Lane, and we also stated that the character had been assigned to Mr. E. Phelps. The latter gentleman will sustain the part, Mr. W. Harrison playing *Valentine*.

An Association, the object of which is to obtain legal power to compel water companies to afford a continuous instead of an intermittent supply of water,—of water that shall be purer in quality and cheaper in rate than that now supplied,—has been started, with the good wishes of the entire public. The medical men on the Committee are Drs. Clark, Horace Jeaffreson, and C. Murchison.

European opinion (including much of Germany) is unanimous in censuring the bad taste and ungenerous feeling of the Prussian authorities in encouraging dramatic pieces and caricatures full of offensive vulgarity against the Emperor of Austria and his family.

M. Barrière has in his possession a series of letters written by Madame Du Barry after the death of Louis the Fifteenth. They contain a love story, of which the Countess and a foreign nobleman of the highest rank are the only characters. The rise, progress, crisis and dénouement are to be traced, according to M. Barrière, as "through a thick veil." This gentleman adds: "We often find expressions quoted as said to be uttered by Madame Du Barry which belong to the worst days of her youth. There is nothing of the sort in the letters of which I speak. They show that the lady was strictly on her guard when writing them; and we contemplate her altogether in a new point of view." The tone, manner and language of the letters are described as those of Versailles; but we are not sure that this says much for them, and it is not clear to us whether, under the title of autograph letters of Madame Du Barry, we may not be having one of those clever French love stories which are so pleasant to read and so little to be relied on as history. On this point, however, judgment must be reserved till the letters are fairly before the public.

In M. Sainte-Beuve's last work, 'Nouveaux Lundis,' one of the critical and descriptive sketches is so disparaging to its subject, the late Alfred de Vigny (author of 'Cinq Mars,' &c.), that M. Louis Ratisbonne has announced a work in defence of their common friend. The position of M. Sainte-Beuve and the late Alfred de Vigny may be guessed at by a *mot* of M. Patin, delivered at a private sitting of the "Académie,"—at De Vigny's reception by which body he was almost immolated by M. de Molé. "Sainte-Beuve," said M. Patin, "est impatient, mais Vigny est impatientant."

A young French lady has been authorized by the French Minister of Public Instruction to go through what the *Lancet* calls "a preparatory course of medicine at Algiers," in order that "through her the boon of medical science might penetrate the tent and harem of the Arab, where no male doctor would ever be admitted." Surely male doctors have not been prohibited from entering the Arab tents, and it is not there that Mademoiselle should look for patients.

While horse-flesh butchers are selling horse joints, and the *charcutiers* are vending horse-meat sausages legally in France, the vegetarians are feebly asserting their existence in the British Isles. A meeting of those who eat no meat was held last week in Dublin. As fast as the vegetarians quoted Scripture for, the audience cited Scripture against them. The assertion that, as the poorer Irish live principally on vegetables, they are better fed than the English or the Scotch, excited derisive laughter. As the chairman stuck to his text, some one asked him, "What he would do if duty called him to the North Pole, where there were no vegetables?" The chairman, not being quite as brisk as a pea, with an answer, as he might have been, was nonplused by the query; and the meeting broke up, with neither side convinced.

Balzac, Frédéric Soulié, Eugène Sue, Roger de Beauvoir, Chauxdesaignes, Léon Gozlan, are among the French authors whose position was earned by an excessive exercise of imagination and of mental industry generally. Of them and of similar workers in France men say lightly, "Well, they live by it!" Jules Janin, in advertising to the nature of the deaths of the above writers, in a notice on Léon Gozlan, replies, "Yes; and they die of it!"

Two Continental newspapers, one of which has had the longest life and the other the longest name, have ceased to appear. The first is the *Frankfort Post-Zeitung*, founded, in 1616, by the Prince of Tour and Taxis, and continued by the princes of that house till Taxis and Hapsburg and the Postal Confederation broke up. The second defunct is the *Rousselschneeweedigingsblad*, a Flemish paper, whose very readers must have been out of breath in pronouncing its name.

MR. MORREY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Arts Gallery, 34, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Brown—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersill, R.A.—Caldron, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, Esq.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frith—Bulwer—Liddell—George Smith—Davrag—Peter Graham, &c.—Admission on presentation of address card.

SCIENCE

GEOLOGICAL MIRACLE ASSUMERS.

7, Mornington Road, Sept. 29, 1866.

A notion seems to be entertained that the fashionable geological theorists not only account for the chief phenomena, but that they do so without invoking miracles, or even any agencies not known to us in extant nature. The *Fortnightly Review* having lately suggested a parallel between the miracles thought necessary to account for facts of religious history and the assumptions made for geologic theory, another writer therein exclaims that "Sir Charles Lyell and Mr. Darwin would be greatly astonished to be told that their theories involved any agencies not known to exist in the present course of nature." He forgets that the question is not whether they would be astonished, but whether the charge would be true. Now, sup-

posing these writers had shown, as Mr. Fiske assumes they have, but which I totally deny, that all past changes of the Earth, or even their most conspicuous and common effects,—common low-land valleys, for instance,—were “to be explained from the continuous action of causes like those now in operation.”—I undertake to prove that, even then, the very continuity, or non-interruption, thus assumed by Sir Charles Lyell as a first postulate, would involve what is contradictory to the visible course of present nature.

In 1840 the late King of Denmark instituted a prize for the observation of comets, a part of visible nature. We know of no course of nature without them; and now observe the statistics elicited. In the quarter-century 1840–64 inclusive, being the only one in which this motive to their discovery existed, the number of cometary visits observed was ninety-nine. Of these only nine were of comets either already known or found in those years to be periodic; and these nine are certainly known to have paid us, in that period, nine other visits. Humboldt's estimate, then, that half the perihelion passages occurring escape our observation, is fully confirmed, even in the case of visits expected and partly watched for. But we plainly cannot assume a greater proportion of the unexpected visitors to be observed than of the expected ones. Therefore, in estimating the probable number of visits in the quarter-century, having certainly to double the nine, we must, at the very least, double the ninety also; and thus the estimate can by no means be brought below 198 per quarter, or 792 per century.

We have next to seek any evidence as to this frequency being variable with time. As the telescope has not been thus applied even two centuries, we can only turn for this to the non-telescopic ones as a sample of all. From Arago's table of those observed by the naked eye, in Europe or China, during each of eighteen centuries, I take these numbers: first nine centuries, 237; last nine, 234; first six, 157; second six, 168; last six, 146; first two, 45; last two, 33. In the two-thirds of our own century Europe has seen twelve. These figures then, on the whole, rather indicate decrease than increase. Most certainly they will not allow us to assume at any past time fewer cometary visits than at present.

But in the following argument we are concerned with only those whose perihelion distance is less than the Earth's. According to Arago and Hind, the perihelion passages at approximately known distances, that were either observed or certified to have taken place (by the observation of both earlier and later ones of the same body) up to the end of 1840, were these:—

| | | | | |
|--|----|----------|----|------------|
| 228 visits of 228 comets, whereof 56 exterior, 172 interior. | | | | |
| 7 | .. | Halley | .. | 0 .. 7 .. |
| 24 | .. | Encke | .. | 0 .. 24 .. |
| 14 | .. | Biela | .. | 0 .. 14 .. |
| 3 | .. | Faye | .. | 3 .. 0 .. |
| 4 | .. | Di Vico | .. | 4 .. 0 .. |
| 4 | .. | Brorsen | .. | 0 .. 4 .. |
| 3 | .. | D'Arrest | .. | 3 .. 0 .. |
| 6 | .. | Méchain | .. | 6 .. 0 .. |
| 8 | .. | Winnecke | .. | 0 .. 8 .. |

301 .. 72 .. 229

Of 301 observable passages, then, more than three-fourths are interior; and this ratio, applied to the 792 of an average century, shows that fully 600 must be reckoned as dipping into a sphere whose diameter is that of the Earth's orbit. Now, please to imagine such a sphere, or spherical surface, materially existent as a film, and that anything passing through this film carries away a bit of it, and leaves a hole. This dome-like film, then, is pelted with 600 comets per century, each of which makes a hole at its entry, and a similar hole at its exit. By “comets” I mean, throughout this letter, their spherical and ponderant heads alone. The reader will further please to suppose every hole thus made is repaired with new film before the next comet's arrival. Now, without being learned in the calculus of chances, he probably understands the way Peter Simple deduced the figure expressing his chance of being shot in the head during a given engagement, taking the number of balls received by the ship, the area of holes thus made, and the whole area of her broadside

section as his data. Well, as Peter's head, or, to simplify it, his nose tip, regarded as a mathematical point, was always somewhere in that sectional area, so is the Earth, or her centre, always in the surface of our said spherical film. If we knew, then, the joint area of all the holes made therein during a given time, this area, compared with that of the whole film, would express the chance the Earth runs, or rather that her centre runs, of entering during that time one comet's head. Of course, there is a certain time in which the holes made will equal the whole surface, but without having covered it, because many holes will have overlapped; and no longer than this will be the average time to be reckoned upon between comet-fall and cometfall, regarding what they fall on as a mere point. Or, for a better average, if we could ascertain how many times the film's whole area is exceeded by that of the holes made in a given long period, as a million years or centuries, this would be the average number of comets picked up by the Earth in each million years or centuries, supposing none to fall that do not more than half envelop her in their heads.

It will now be clear, too, that if we would extend this reckoning to lesser immersions, but still omitting all effect of the Earth's attraction in promoting them, we have only to enlarge our supposed holes to the dimensions they would have if each were made by a ball whose radius was that of the comet plus that of the Earth. These enlarged holes I will call ellipses of danger. As no comet meets the film perpendicularly, the holes will all be ovals, whose average lengths and areas we will presently consider; but meanwhile their breadths will depend only on the comets' sizes, which is the next element whose statistics we have to seek.

Arago and Hind give many measures of nuclei or the brightest condensed parts, but few of the whole transparent heads. These are known to vary in size as they go to or from the Sun; and I find only the following diameters taken at about our distance from him:—

| | English Miles. | Earth Diameters. |
|--------------------------|----------------|------------------|
| Lexel's Comet I. 1770 .. | 204,000 | or say 25 |
| Comet I. 1780 .. | 269,000 | .. 33 |
| Comet of 1807 .. | 156,000 | .. 19 |
| Comet I. 1811 .. | 1,125,000 | .. 140 |
| Encke's in 1828 .. | 312,000 | .. 39 |
| Halley's in 1835 .. | 357,000 | .. 44 |
| Comet I. 1846 .. | 248,000 | .. 31 |
| Brorsen's in 1846 .. | 180,000 | .. 16 |

This last, a telescopic one in all positions, can by no means be held the eighth largest of the past century, nor even Halley's the second largest. But, as Mr. Hind says, “the great majority of comets are under 100,000 miles diameter, and very few over 200,000,” let us, in making this minimum estimate, take the extreme supposition that, out of the 550 bodies which pay us the 600 visits of a century, only eight equal the above measures, and all the rest average but half the size (the face) of Brorsen's. Then the widths of the ellipses of danger, and their areas if they were only circles, or not elongated by any obliquity of the passages through the film, would stand thus:—

| Comets Passing. | Width of Ellipse in Earth-Diameters. | Area of Circles in Earth-Sections. |
|-------------------------------|--------------------------------------|------------------------------------|
| 1 equal to No. I. 1811 .. | 141 .. | 19,880 |
| 1 equal to Halley's .. | 45 .. | 2,025 |
| 1 equal to Encke's .. | 40 .. | 1,600 |
| 23 returns of the same .. | — .. | 44,800 |
| 1 equal to No. I. 1780 .. | 34 .. | 1,156 |
| 1 equal to No. I. 1846 .. | 32 .. | 1,024 |
| 1 equal to Lexel's .. | 26 .. | 776 |
| 1 return of the same .. | — .. | 776 |
| 1 equal to that of 1807 .. | 20 .. | 400 |
| 1 equal to Brorsen's .. | 17 .. | 289 |
| 16 returns of the same .. | — .. | 4,624 |
| 540 averaging half thereof .. | — .. | 75,400 |

508 visits. 152,750

2

Areas of circles made, going and returning 305,500

This total must now be increased in the ratio that the length of the elliptic holes, on an average, exceeds their breadth. This elongation will, in all cases, be as the secant of the angle at which the comet's path cuts the film; and this will, in the common case of a sensibly parabolic path, depend solely on the perihelion distance. I will suppose

all the paths parabolic, and this will give, observe, in all the cases of elliptic ones, too small an obliquity and elongation of the holes; for a comet of elliptic path will enter and leave the film more obliquely than one in a parabolic path of the same perihelion distance.

We have measures of 180 interior perihelia, which may be classed according to their distances from the Sun as follows; and I add the mean secant or elongation of the holes for each class:—

| Number of Comets. | Perihelion Distances. | Mean Secant. | Sum of the Secants. |
|--|-----------------------|--------------|---------------------|
| 20 | under 2 | 1.05 | 20.1 |
| 26 | 2 to 4 | 1.20 | 30.0 |
| 41 | 4 to 6 | 1.43 | 58.6 |
| 17 | 6 to 7 | 1.70 | 28.9 |
| 22 | 7 to 8 | 2.03 | 44.6 |
| 23 | 8 to 9 | 2.70 | 62.1 |
| 11 | 9 to 95 | 3.81 | 41.9 |
| 6 | 95 to 96 | 4.78 | 23.6 |
| 4 | 96 to 97 | 5.33 | 21.3 |
| 3 | 97 to 982 | 7.07 | 21.2 |
| 1 | at 999 | 81.62 | 31.6 |
| 8 doubtful whether interior, say | 20.00 | 160.0 | |

180

General mean

3.02
The sum we obtained then for the areas of danger supposed circular, must be fully tripled for their ellipticity, making it equal 916,500 sections or great circles of the earth. Now, for the surface of our entire film, the Sun's distance being now fixed at about 11,500 earth-diameters, we have $4 \times 23000^2 = 2,116,000,000$ of the same units of area. Dividing this number by 916,500, we find the chance in one century, of running into one comet's head, is fully one in 2,308; or, in other words, comets are now falling on us at the rate of at least one every 2,308 centuries, or between 4 and 5 per million years. But, bear in mind, as we have no means of approximating to a real average, how essentially a minimum estimate this is, and how many and extreme our assumptions in that direction alone; as (1) that no greater proportion of unexpected comets pass unseen than of expected ones; (2) that only one of the 1811 class visits us in a century, though it is pretty certain there have been others comparable to it, even one of those of 1864, according to the South American observations; (3) that no larger one ever passes, even in a period of 2,000 times our whole experience; (4) that only one other in a century reaches a thirtieth of its bulk, though the one which does so is known to return every 75 years, and Encke's, which is not much smaller, every $3\frac{1}{2}$ years; (5) that all the 600 passing in a century, except the largest one, barely amount to the volume thereof, though it is plainly more natural and likely that (if more than eight had been measured) we should find the largest to contain, say, a quarter of the bulk of all the 600 than half; (6), and lastly, that we have left out all effect of the Earth's attraction, though it is certain there are comets which undeflected could not touch her, yet, in a near approach, would, by this cause alone, be infallibly attached to and collapse upon her; as any of but slightly inclined orbit, eastward motion (which all of low inclination have) and a perihelion distance, even if exterior, as near our own as those of 1684, 1723, IV. 1851, II. and III. 1862, &c., almost grazing our orbit in our own direction.

But to give an idea what trifling discoveries might any day immensely raise this estimate, while none can lower it, let us suppose, not a comet of the 1811 class to appear, nor any addition whatever to the above centennial estimate of the amount of cometary matter passing, but simply that the 1811 monster, instead of holding eight times the aggregate bulk of the 550 others, were reduced to half its measured diameter, and the material thus removed were shared among the 550 in the ratios of their above-supposed sizes, which would still not raise the largest to a third the bulk of “1811” thus despoiled. This slight change of mere distribution, a sober guess, I think, at what might be a more average 550 than the particular 550 above considered, will be found to nearly quadruple the chances of encounter, or raise the frequency of falls to nearer twenty than five per million years.

You will now appreciate the first great assumption of miracle which I charge the Lyell school with making, and which is fundamental to their

geology. They constantly ask for a trifle of some "million years," or (as Mr. Darwin prefers) "centuries," of geological continuity. Now, the "present course of nature" affords nothing of the sort. In the present course, comets are falling on the earth at a rate of several per million years. In fact, if, as I believe, they are right in inferring from the thirteen miles of sedimentary strata, that our earth *has* revolved a million years, to say this is to say that she has picked up sundry comets; or, in other words, that our present ocean and atmosphere, one or both, consist wholly or partly of the material of comets that have collapsed upon her. To deny this is to assume some agency unknown and inconceivable, by which either the Earth is made to avoid all the comets, or they to avoid the Earth; and this, with Mr. Fiske's leave, is assuming agencies "not known to exist in the present course of nature." Doubtless, the shorter demands may be no more physical impossibilities than it would be to suppose the clouds and showers happening to leave a spot of England a whole year unwatered. But this would be decried as assuming "a miracle." If none then are to be assumed at all, I have shown you how the stars in their courses fight against Lyell, and allow not his first fundamental demand of "continuity without cataclysms." For a comet, being undeniably *ponderant*, cannot fall on earth without occasioning a cataclysm. Grant it to be as light, in the very nucleus, as the best vacuum in Geiseler's tubes, yet the suddenly added pressure of such an atmosphere, extending half-way to the moon, will greatly exceed those loads by the shifting of which—by the sediment, for instance, carried down from Alps to sea,—Sir Charles has lately learnt to account for the most sudden elevatory earthquakes. And as you may bring a pair of unbalanced scales ever so nearly to a level by sufficiently large equal additions, this would also be the *first* tendency of such sudden and equitable addition of pressure on continents and sea-beds alike.

EDWARD L. GARBETT.

STAR SHOWERS.

Sept. 29, 1866.

ALLOW me to bring under notice, through your columns, the following fact, which may be deemed of some interest. My attention was drawn to it in consequence of reading Mr. Alexander Herschel's lecture at the Royal Institution, 'On the Shooting-Stars of the Years 1865-6.' In Cicero's third Oration against Catiline, occur these words,—*"Vixas nocturno tempore ad occidentes faces, ardoremque colli."* The phenomena here referred to must have occurred some time during November, since the first Catiline Oration was delivered on the 8th of that month. Is it not therefore probable that this was one of the "November showers of meteors"? Further, the date assigned to the Catiline conspiracy is B.C. 63, that is, the 38th year of the century. Now Mr. Herschel states that, "between the 13th of October and the 13th of November, during the years from A.D. 903 to 1833, not less than thirteen great star-showers have been recorded. They are separated from each other by the third part of a century, or by some multiple of this period, and are periodical re-appearances of one grand meteoric shower, viz., that seen by Humboldt in 1799, and by Olmsted in 1833, the star-shower expected to return in the present year, and known by the name of the great November shower." The thirty-eighth year of the century is not very far from the thirty-third, in fact is sufficiently near to connect Cicero's prodigy with Humboldt's great November shower of meteors. There is, I am aware, some little room for doubt in this identification, afforded by the various alterations to which the Calendar has been submitted; but this will be found, I believe, to be capable of explanation; and I would ask those who are students of such matters to give an opinion on the question. I venture to make these few remarks simply as an inquirer, and in order to draw attention to the possibility of identifying some of the more accurately-described "prodigies" of the ancients.

FINE ARTS

Scripture Prints from the Frescoes of Raphael in the Vatican. Edited by Lewis Gruner. (Houlston & Wright.)

THIS book is not intended for the artist or archaeological student. Thus much, without looking at the illustrations it embodies, we gather from the suavely-written and highly-pretending Preface which has been contributed to it by the Rev. Charles H. H. Wright, who, being British Chaplain at Dresden, modestly says that he has undertaken thus to introduce to the British public these "Scripture Prints" from frescoes by the most popular artist in the world, and has done so, says the reverend preface-writer, "not only because of the intrinsic value of the work itself, but also on account of the esteem in which I hold its talented editor." We do not know what the "talented editor"—who, be it noted, is not also the draughtsman of these transcripts, but simply the "director" of them, whatever that may be—may feel with regard to the obligation which has been imposed upon him by Mr. Wright's willingness to be Raphael's sponsor with the British public; but we are, by his own words, convinced that the sponsor is as ignorant of the public as of the art to which he refers, and that his affability to Herr Gruner and Raphael covers an unusual want of competence for the task he has undertaken, and, with the same soft veil of self-esteem, masks audacity in assertion so extraordinary as to be excusable only on account of the writer's obvious incapacity to judge what he was writing about.

Mr. Wright, in his introduction, avers: "The object for which this work was undertaken was to promote a feeling for the higher principles of Art in their application to the service of Religion." Parenthetically, it may be pointed out that the highest authority declares we must, before all things, serve God with truthfulness. With safety this time, the sponsor for Raphael says further,—*"The stories of Holy Writ are often remembered longer, and produce a greater effect, when they are not only related to the ear, but submitted to the eye; and this has been so universally felt that many works have been published with a view to meeting this requirement. It cannot be wondered at that engravings of such a nature, which, in order to effect their object, must be sold cheaply, should not in general be of the best quality; and therefore it is the more important that something really good should be placed within the reach of all those who may be desirous of raising their children's taste, as well as of improving their Scriptural knowledge. The Frescoes of Raphael are peculiarly suited to this purpose, but the copies of them usually published have done the originals little justice, and the peculiar fineness of Raphael's pencil is utterly lost sight of in them. The greatest care has been bestowed upon this work in order to save it from the faults of its predecessors, and to render it in every way worthy of general patronage."*

What the Rev. Mr. Wright may think he means by such a phrase as "the peculiar fineness of Raphael's pencil," as cited here, is beyond our powers of guessing. If he means, as is probable, that the aim of the painter was to produce a series of magnificent decorations, and to exemplify some of the most secondite principles of Art, upon the walls of the papal palace, he is so far correct. But putting the Rev. C. H. H. Wright aside altogether, it is to Herr Gruner that we turn, because he has a sort of professional reputation

to lose, and at the end of his name a string of official titles, "Professor of Engraving at the Academy of Arts, and Director of the Department of Engravings, Royal Museum, Dresden,"—being, withal, an experienced editor; we turn to this gentleman for an explanation of the countless blunders, the incomparable displays of ignorance that occur in this work, every plate of which bears his name as "Director."

It is not credible that several of the designs, which are so badly reproduced in the series before us, were the work of Raphael's hands. The quality of the mass of frescoes is broken throughout,—most unequal in every respect as concerns the art and genius that produced some, or the vapid, spiritless scholasticism which left others to be admired by the ignorant and lamented over by the thoughtful. Grandly simple are the designs of the 'Expulsion from Paradise,' 'Adam and Eve,' 'Abraham and the Angels,' 'The Flight from Sodom,' 'Joseph's Dream,' 'The Finding of Moses,' 'The Triumph of David,' and some others, of equal quality. These are, beyond a doubt, prime and entire results of the ability of the great master; noteworthy, even among his labours, for solid dignity, grace and simplicity of composition, suavity and wisdom of expression, perfect studying of their draperies, and, above all, the clear conception they evince as in their designer's mind when they were produced. On the other hand, it is hard indeed to accept even the design, as it might have stood originally, before it was reproduced on the walls of the Vatican, of such a picture as 'Noah's Sacrifice,' for the work of Raphael's intellect; commonplace as this is, it exhibits none of that penetration which, glowing through the much-ravaged "Cartoons," still shows where the master's hand was impressed, and, as here, by its absence where the help of an inferior had been invoked to aid in filling spaces that were impracticable to any single hand, or to deal with subjects that might not have attracted his spirit to exercise itself upon them. 'The Blessing of Esau' is another of these unfortunate compositions,—these weak, inept and scattered designs. It is curiously worth while to compare Raphael's treatment of that supremely difficult subject, 'The Vision of Jacob's Ladder,' with the version of the same by Rembrandt, as shown in the admirable sketch now in the Dulwich Gallery. Some of the designs to which we here refer seem to have attracted the master with extraordinary force: thus, 'The Return of Jacob' contains parts in its composition which even Raphael never surpassed, and exhibits a conception of the subject which, while rich in grace and suavity, recalls something of the qualities in which Mantegna shone at his highest. The affected mannerism which marked so many of the master's works, and was soon to be so fatal in its adoption by Raphael's unequal followers, appears at times to be strangely allied with that earnestness and simplicity of conception which distinguished the earlier schools of Art, in Italy or elsewhere. This is remarkably the case with 'Moses receiving the Tables,' where the principal incident of the theme is given in the most downright fashion,—an extraordinary contrast to that motive which urged Mr. Herbert to work out his somewhat demonstratively theatrical and highly artificial allied subject, not long since completed at Westminster. The angels, blowing trumpets, in this design of Raphael's, are not inadmissible, even now, to those who will place themselves in the line of thought that was prevalent with the composer. The figures of the Israelitish elders and others who occupy the space of rock-landscape that would, without them, be drearily vacant, immediately below the

great display, are trivial, and their presence in a design obviously Raphael's only to be accounted for by making allowance for the effect of those vicious conventionalisms which were the canker of true Art in the sixteenth and following centuries, and only too powerful in operating on the skill of the Urbinate, too effective in marring his conception, and often nothing less than ruinous.

As to the execution of the ambitious series of transcripts before us, copies the aims of which we have already stated on the authority of the Preface, it is right that we should point out on what sort of blunders, displays of ignorance and incompetence, our strictures are based. They are so vast in number as to refer to nearly every figure in the forty plates before us, not one of which is well drawn; some are but barely passable, the mass being worse than indifferent. In short, the general quality of the publication is so bad, that nothing but its lofty pretensions and the inexcusable manner in which they have been fulfilled, together with our disgust at the dishonour offered to the subject, would have led us to consider them in detail. As they are, however, it is our positive duty to expose the pretences of the Preface, by pointing out that here is Raphael travestied in the name of Art, and the cause of education made the vehicle for some of the most unworthy exhibitions we know.

The abject state of Art in the Eternal City is well enough known; it is felt and acknowledged that Rome contains nothing vital in design. Wealthy to profusion in treasures of that which is past, she is now the resort of those who mistake the schools of design for the fields of originality,—of men, like Gibson, who think all sculpture must be like the antique, confound archaeology with living Art, and are content to live out of themselves, so to say, indifferent to their own existences, so that they may enjoy the reflexion of that which can never live again. Thus much the world knew, and expected no good in Art to come from Rome as a place of study. Still, it was until now kept from the public knowledge that an educated gentleman, and an official of high technical standing in Dresden, which is considered one of the Art-centres of Europe,—such is Herr Gruner's status,—would permit such an unskilled sketcher as Signor Consoni appears, if these plates do not belie him, to be described as "one of the most distinguished draughtsmen in Rome." Either this statement is utterly false, or not only is knowledge of what is good drawing lost in Dresden, but even draughtsmanship—one of the least rare attainments in Art—is unknown in the city of St. Peter. For example, if Raphael drew such a dumpy, short-legged Noah as figures in 'The Building of the Ark,' so contorted a son of the Patriarch as the well-known sawing figure appears in the work before us, he would never have attained the laurel. 'The Dehugé' is rife with blunders of this sort: see the wofully misconstrued body of the man who, with an arm that has been dislocated by Signor Consoni, drags his wife out of the waters by her hair. Puerile is the execution of the youngest son of Noah in 'Leaving the Ark'; huge the patriarch's head, ludicrously obese his body. In 'Noah's Sacrifice,' the son who brings the ram has arms that defy anatomy to describe; another son, who brings water, a head that would have astounded Baccio Bandinelli himself by its bigness. 'Abraham and Melchisedek' shows the latter with forearms that palsy could not further ravage, scrofula more painfully twist. In 'The Blessing of Jacob,' the head and face, no less than the arms, of the moribund father, are bad beyond our conception. It is hard to find Raphael under the wretched disguise that has

been put upon him by Herr Gruner, and that wofully bad artist of whom he is very comically styled the "Director." Nothing but unfathomable ignorance could have permitted this publication to appear with the pretences of its preface-writer. As to its "promoting a feeling for the higher principles of Art," nothing of the sort will happen.

VINE-ART GOSSIP.

No publication of the season will surpass in artistic interest of the highest order that by Messrs. Bell & Daldy of the entire series of Flaxman's noble designs to the Divine Poem of Dante, the three sections of which comprise not fewer than 108 compositions in outline. The original plates, untouched, are used for this purpose. The comparatively small number of impressions that were in the first instance taken from these plates, no less than the severe and broad manner of their execution, admit of little question as to the perfect state of the re-issue.

The September number of Mr. A. W. Bennett's 'Photographic Portraits of Men of Eminence' describes Messrs. John Rae, A. S. Taylor, and J. R. Planché—three names the associations of which are more in contrast than is commonly the case with this publication. The likeness of Dr. Taylor is unusually good, simple in disposition, and spirited; the accompanying memoir is one of the briefer sort. The sitting portrait of the veteran dramatic writer and archaeologist is highly satisfactory.

Mr. F. Warne, Bedford Street, has published a series of children's toy-books, illustrated and highly coloured. These are entitled 'Aunt Louisa's London Toy-Books' and 'Aunt Louisa's Sunday Books.' The former is so well produced, especially with regard to one example, "John Gilpin," that it deserves honourable mention here. It is long since we have seen the immortal ballad so spiritedly treated by an artist, as in the case before us. The tableau where the admirable captain of a train-band appears to be declaring his unalterable attachment to Mrs. Gilpin, is, of its kind, first-rate, the faces being full of character, and wealthy in expression. There is much spirit of the same order in the succeeding designs; in that which shows us how Capt. Gilpin lost his wig we recognize, not without pleasure, the traditional treatment of the subject, which, on the whole, is to be preferred to any other. The least satisfactory of the designs is where the hero is finally addressing his steed. The 'Sunday Book' before us contains "The Story of King David," and is but indifferent,—in fact, worse than indifferent. "Sing a Song of Sixpence," of the former series, suggests to us that an opportunity has been thrown away upon an incompetent, or at least an unapt artist; there are, in that rich theme, openings for the exercise of humour, invention, and Art, such as the anonymous designer has failed to seize; his incidents are commonplace; his drawing is bad. "Edith and Milly's Housekeeping" is much better than the last. The best of these books is garish and crude in colouring; this might be obviated, we think, in other issues. The inferior examples are weak and poor in colour.

Messrs. Day & Son (Limited) are making a judicious and very satisfactory application of chromo-lithography to cheap book-illustration; this occurs in No. V. of a magazine styled 'Nature and Art.'

The Coach and Harness Makers' Company, whose very interesting Exhibition we noticed not long since, offer prizes of 3*l.* for excellence in free-hand drawing, and 2*l.* in practical mechanics, to the candidate who, being employed in the coach-making trade, obtains the greatest number of marks, with a certificate in those subjects respectively.

The "Alexandra Palace and Park," Muswell Hill, will be completed in a few months and opened to the public at the earliest possible day.

The wainscoting at the east end of the chapel of Winchester College is being removed, and Gothic stonework substituted for it.

The Nelson monument is to be removed from

its primary place before the Town Hall in Liverpool to a site a little nearer the edifice, so as to appear in the centre of the new buildings.

It should be known that all the five pictures engraved by Mr. Vernon, referred to in the *Athenæum* as "displaying a degree of learning and mastery that entitle him to high rank as an engraver," were engraved for the *Art Journal*.

In the course of works of restoration in the church of Conisborough, Yorkshire—a place famous for its very ancient castle—some distemper paintings have been discovered, which date from the fifteenth century, and comprise representations of 'The Expulsion,' and other subjects commonly found in churches of the period named. The usual bright red pigment appears here.

A School of Art has just been completed at Cape Town; at least the school there has lately acquired a fixed and suitable house.

MUSIC AND THE DRAMA

NEW PUBLICATIONS.

"The Shallows came in with the Conqueror." There are ridiculous people, following in the wake of bad Berlin spite, who talk of Judaism in composition; and, because of his ancestry, adduce as an example of the same Mendelssohn,—the composer of the stupendous Desert Scene in 'Elijah,' counting therein the Hymn of the three Angels, and the following chorus, the appearance of the Most High, after the mighty wind, the upheaved sea, and the fire, in the still small voice, and the closing "Holy, Holy" of Archangels and Angels—a glorious Hymn of Praise, one to match with Handel's 'Hallelujah.' These persons must be unfamiliar with his 'Lauda Sion,' with his 'Ave Maria,' with his *Motets for Female Voices* (Ewer & Co.), written for the nuns of the Convent of Trinità de Monti, Rome,—three works as instinct with the Roman spirit as was the English Cathedral Service, Mendelssohn's last work, with our more sober forms of prayer and praise. Why argue from known accidents of race to facts of artistic creation? Why harp on this or the other harmony as Egyptian, or Persian, or Indian, or (to quote Goldsmith) "on the principle of the pyramid"? The amount of rank pedantry on these subjects set forth by persons who have no real science, nor even imagination, and who conceive that abuse of all who dispute their dogmas is sterling criticism, grows importunate. They will not make Mendelssohn's Roman Catholic music Hebraic, let them rail never so loudly, let them force their theory never so tightly into fetters, let them know never so little of the wide world of Art, in which there is no cognizance of creeds, or races, or formulas, but in which the truth told, for a given purpose, proves the presence of the artist. The stupendous 'Crucifixus' of Sebastian Bach (perpetually cited as the prototype of Lutheran composers, and who, nevertheless, demeaned himself to contribute, musically, to Papistical service music), is not more "Hebraic" than Mendelssohn's *Motets*. But the words have been translated in an ungainly fashion. What are female voices to do who have to round a period on such a line as this,

Who in His ways are ever walking!

The consequence must be a resolution not to speak the words, and the result of such effort turns up ineffectively, as we have again and again to record.—"Man is Mortal": an Eight-Part Choral, Op. 23, No. 3; the English Version, by W. Bartholomew (same publishers), is one of Mendelssohn's dry works, for Mendelssohn was mortal; and so is his posthumous song (same publishers), *The Maiden's Lament*. The accompaniment is rich and brilliant; but the cantilena is subservient to the accompaniment. This should not be. The horse has its place, but not as bestriding the rider.

If any one required proof of Mendelssohn's superiority to the man whom the Germans, before Mendelssohn was cold in his grave, exalted as his superior, is it not here, in Schumann's Op. 29, *Gipsy Life*, the English Version by John Oxenford (Ewer & Co.)? More flabby gipsies than these we have not been accosted by. Signor Verdi's, in

'Il Trovatore,' have the true twang of the tribe. —Schumann's *Four Two-Part Songs*, the words by John Oxenford (same publishers), are more unpleasing than effective. Their writer knew nothing about the human voice. In the first of these two-part songs the second voice starts on the G below the line, a note to which English singers descend with deliberate preparation, and which German women (as we know them) do not command.

"Oh, the summer night," "Song should breathe of scents and flowers," Prize Glees, the words by Barry Cornwall, the music by Mr. W. H. Cummings (Lamborn Cock & Co.), are, as music, worthy of the prize awarded them. But something is to be said on the manner in which the poetry set is treated. The words are gratuitously broken in all the subordinate parts. The singers can have small interest in the music when they cannot independently understand and combine the words they have to sing.

DRURY LANE.—This week the tragedy of 'Macbeth' has been revived, with all that scenic splendour and those accessories which commended it last season to public approbation. Mr. Phelps and Mr. Barry Sullivan have sustained the part of the guilty Thane on alternate evenings, and Miss Sedgwick has played *Lady Macbeth* to each, as Mrs. Pritchard did, at wider intervals, to Garrick and Mossop. Of Miss Sedgwick and Mr. Sullivan it may be said, at starting, that they manifested original intention, and not a mere imitation of the stage-model. Miss Sedgwick is a comic actress in the higher walks of her art, and as the elegant heroine of drawing-room life has few competitors. But she lacks severity of style and intensity of purpose for tragic character. She is remarkable for steady delivery and considerable elocutionary power. These are, of course, not all-sufficient for an exponent of the ambitious woman who dared crime for the sake of a crown, and morally compelled her husband to the committal of it. Miss Sedgwick's sleep-walking soliloquy had been carefully studied, and was not deficient in a certain species of effect; but it was (particularly towards the end) rather marred by the substitution of comic for tragic gestures. Mr. Sullivan's performance of *Macbeth* was decidedly clever; perhaps it may deserve a still higher epithet. He took a new view of the character altogether, and avoided the ordinary stage-business. He gave his own reading to certain lines, such as "Tide and the hour run through the roughest day," and "Vaulting ambition that o'erleaps its scilicet." These readings we expected from him, because they abound in his *Hamlet* to a far larger extent. His soliloquies (in spite of transient hoarseness) were remarkable. Those in the first act were studiously different from the usual interpretations; but the greatest originality was displayed in the dagger-scene, which was effectively conceived and executed. In his interviews with the murderers of *Banquo* there was an intensity of intention, and a careful adaptation of attitudes which raised them into immense importance. The banquet and cauldron scenes, as also the tumultuous battle-scenes of the fifth act, had each some novelty demanding critical attention. Mr. Sullivan was perfectly successful with the house, and his *Macbeth* must take its place on the modern stage among the accepted portraits in the national repertory.

Let us add, that, from the time when Betterton played *Macbeth* (first from the Shakspeare text, and next as Davenant altered it), down to the present time, no tragedy of Shakspeare's has been so steadily popular as this. In one of the above two forms, from 1672 to 1738, it was the piece that always brought a house when others failed. From 1738, when Garrick discarded Davenant's adaptation, restored the text, kept Lock's music, and had the impertinence to add a dying speech for his own utterance, as the Thane,—from that period down to 1866, this popularity has continued. Neither Davenant nor Garrick is now followed; but the public will not forego the telling and intelligible music of Lock. It is not forty years ago since they ceased to call, at Bath, for the old dance of witches (decked not as witches, but seductive creatures, in clouds of fine muslin) with the shaking of brooms, with which "We shall

rejoice" used to conclude. With regard to the costume, although that of Mr. Sullivan as *Macbeth* was glittering and shapely, we suspect that it as little resembles that which the Thane really wore as the court-dress in which Garrick, or the drum-major's costume, in which Macklin used to play the wickedest of men and most complaisant of husbands.

HAYMARKET.—'The Heir-at-Law' is a comedy by the younger Colman, which belongs to the "old" or "little house in the Haymarket," as it was called, to distinguish it from Vanbrugh's larger Opera-house opposite. Its site was that now occupied by the two houses to the north of and adjoining the present theatre. The original building was erected in 1720. It lasted, with some rebuilding in 1767, till 1820, and was always a mean little place, with the most brilliant of actors. It was tolerated (sometimes not that) rather than licensed; all sorts of expedients were adopted to evade the law. Theophilus Cibber, for instance, sold minute packets of snuff at the various entrances, and the purchasers passed into the house without further payment. It was here that were acted Fielding's daring political burlesques, out of which sprang the licensing Act which is still in force, and which Chesterfield opposed with wit, reason and sarcasm. The old house was the scene of the "quart bottle hoax," invented by the Duke of Montagu, which attracted people to see (what they did not see) a conjuror get into a common wine-bottle. Some of the greatest of the old school of accomplished actors first appeared at the Haymarket, which, exactly a hundred years ago, in 1766, was in its last year as a merely tolerated house. In 1767 it was made a Royal Theatre, with a licence to Foote to keep it open from the 15th of May till the 15th of September. A reference to the original cast will show the quality of the company at the Haymarket nearly threescore years ago. Unctuous Suett played *Lord Duberly*; airy Palmer *Dick Douglas*; Munden was the *Zekiel Homespun*, and *Dr. Pangloss* was played by Fawcett. Irish Johnston played the poor part of *Kenrick*; the walking gentleman, *Henry Moreland*, was acted by Charles Kemble; his future wife, Miss Decamp, who had not long sprung up from the sawdust of the Royal Circus, playing *Caroline Dormer*. Mrs. Gibbs was the *Cecily Homespun*, and the inimitable Mrs. Davenport, *Lady Duberly*. A proof of the success of the comedy is seen in the fact of its being transplanted to Covent Garden when the Haymarket closed for the season. In 1808 Drury adopted it, with Bannister for *Dr. Pangloss*, Mathews for *Lord Duberly*, and Mrs. Jordan *Cecily Homespun*. In 1822 it was well acted at the old Haymarket, when Liston was the richest of *Lord Duberly*, Terry a capital *Dr. Pangloss*, and Jones a quicksilver *Dick Douglas*. In the following year Harley played *Dr. Pangloss*, and "little Knight" (father of the portrait-painter) *Zekiel Homespun*, Liston retaining *Lord Duberly*. We record these old casts to show that the present company acting this bustling comedy have had predecessors of the first quality, and that the work they had in hand was work for genuine actors, and not for mere players.

For the representation of such works as 'The Heir-at-Law,' the Haymarket company is well fitted, although it, in more than one instance, might be improved. We are not sure that Mr. Compton is as good in *Dr. Pangloss* as Fawcett or Bannister; but with a perfect recollection of Harley in the character, we can pronounce a verdict in favour of its present representative. Than Mr. Buckstone it would be difficult to conceive a better *Zekiel Homespun*; and the *Lord Duberly* of Mr. Chippendale has its strong points, though it is dry beyond all degree. In *Dick Douglas*, Mr. W. Farren gives evidence of improvement. He was always a conscientious actor, and has taken great pains with the part, both in regard to costume and manners. The man of fashion as accepted by the opinion of the eighteenth century passes in review before us, and we must confess does not contrast favourably with the gallant of the present day, though yet there is "ample room and verge enough" for important

improvement both in conduct and moral sentiment. Mr. Braid is the representative of Irishmen at this house, and embodies *Kenrick* to the satisfaction of the audience. The performances conclude with a *ballet divertissement*, and the farce of 'His First Champagne.' In the former, we have two sister dancers from the Royal Copenhagen Theatre, named Christine and Agnes Healy, whose grace of deportment secured the favour of the audience.

OLYMPIC.—It may seem a strange thing to say, but Prince William, who was afterwards William the Fourth, first went to sea in the old Olympic Theatre. At all events the ship in which he first sailed as a midshipman was the *Ville de Paris*, of which George the Third—when it was only fit for breaking up—made a present to old Astley, who, with the timbers erected the little theatre on the site of the old house of the Earl of Craven, which was burnt down in 1849. We mention this fact because sixty years have just elapsed since Astley opened the house. A worse-placed or a more fashionable theatre has not existed in London, but it had, at least the old house had, some seasons of great adversity. Its gayest times were when it was under the almost faultless Elliston, or when its fortunes were worthily intrusted to the most popular of managers, Madame Vestris. In Mr. Tom Taylor's new piece, 'The Whiteboy,' we seem to have gone back to the melo-drama of by-gone days. The piece runs smoothly now, and its success may be attributed chiefly to Mr. Dominick Murray and Miss Milly Palmer. Miss E. Farren acts a part described in the bills of last week as "a deaf and dumb boy," and she acts it well; we do not believe, however, clever as even deaf Irish boys are, that they hear everything that is addressed to them. The forthcoming new drama is founded on Mr. Wilkie Collins's 'Armada,' by the author of the novel.

ADELPHI.—We are only enabled to record that this house re-opened on Monday with three old pieces and an actress new to this stage. Miss Kate Terry appeared in 'A Sheep in Wolf's Clothing.'

STANDARD.—This theatre re-opened on Monday with a new play, founded on Sir Walter Scott's 'Quentin Durward,' written by Mr. James Anderson, and entitled 'The Great Worthies; or, the King, the Provost, and the Barber.' The first act frequently reminded us of M. Casimir Delavigne's tragedy, both in the language and the action, a resemblance much increased by its being evident that Mr. Anderson had built up his performance of the character of Louis the Eleventh on the model of Mr. Kean's. This act, which is long and elaborate, is, however, a kind of prologue introducing the characters designed to be prominent in the subsequent scenes. We have in it full-length portraits of the astute monarch himself; of *Tristan*, the Provost-Marshal; and of *Oliver le Doim*, the famous barber; besides that of *Sieur Coitier*, the King's physician. The story of the play is the danger incurred by Louis the Eleventh in the commission confided to Quentin Durward, and which ends in the recovery of the Countess de Jacqueline and her child from the hands of Count William de la Marck (the wild boar of the Ardennes). The third act is most effective, wherein Louis sends for his astrologer, Galeotti Martivale, in order to punish him for having promised success to an expedition which he finds full of peril; but when the cunning charlatan intimates that their lives are mysteriously connected, so that the King's death will occur within a year of his own, the monarch changes his mind and remits his sentence. Mr. Anderson suppresses his voice in this performance, which is accordingly free from rant and loud speaking, and we have not, therefore, in the acting of this part, to charge him with his usual faults. Miss Sarah Thorne, in the character of the Countess, acted with dignity and force. The new play was listened to with profound attention, and the curtain fell to great applause at the end of four hours and a half! This effort to inaugurate the practice of producing new and important dramas at the East End of the town will be probably successful.

MUSICAL AND DRAMATIC GOSSIP.

ONE measure for the improvement of discipline in the Royal Academy of Music, which has been persistently advocated here, has, we are told, been already carried out by the new officers. The list of professors, according to Rumour, has been swept with the besom of reform and selection. Such revised list cannot be too early made public, with a view to inspiring confidence in the world without. Yet the change will count for little if unaccompanied by assurance of liberal payment for the first-class professors retained, such as will bind them to steady fulfilment of their duties. The Academy will remain in its old Tenterden Street quarters till Christmas; after which we may look to hear of a repetition of the attempt to lure it down to South Kensington. This, we must repeat, in spite of all the ingenious pleas put forward in the evidence delivered before the Committee by the Chairman of said Committee, Mr. H. Cole (who made light of the remoteness of the site, declaring that he did not "know what is central in this vast metropolis except Smithfield"), might prove a costly mistake, alike inconvenient to teachers and pupils. Throughout the entire course of the strangely and lamely conducted inquiry before the Society of Arts, nothing has been more remarkable than the cut-and-dried determination to force musical instruction into the forms and conditions—these including an elect locality—which have fitted, or been fitted to, the Schools of Design. All who have studied the matter with reference to facts, and not to pretty or personal dreams, must have come to the conclusion, derived alike from tradition and experience, that the arts, in which genius manifests itself through the trained agency of eye and ear and mouth and finger,—howbeit closely related one to the other, yet not therefore contemporaneous,—demand, each from each, separate training and treatment. When the great schools of Italian painting were at their highest noon of excellence Music was rude, timid, pedantic, sectarian and incomplete. Her sun rose when the plastic and pictorial arts declined on the horizon. This demonstrable truth has been too much forgotten by those who fancy that the same smoothing trowel will prepare a good foundation for edifices utterly dissimilar in their quality, proportion and purpose.

The sin of indolence cannot be charged on Mr. Mellon's Concerts. At his later evenings he has brought forward Mendelssohn's Military Overture for Wind Instruments,—another prelude of the same kind (though with a difference), by the clever bandmaster of the 1st Life Guards, Mr. James Waterson,—and the suppressed orchestral overture to Meyerbeer's *Le Prophète*. This is a poor and patchy piece of business, like Meyerbeer's preludes to 'L'Étoile,' 'Le Pardon,' and 'Struensee,' making it clear that the element of symphonic fancy and construction was denied to, or had never been acquired by, him. He has been classed with his co-disciple under the empirical Abbé Vogler, Weber, as deficient, owing to false and feverish teaching; but Weber's overtures were not incoherent, not ill made-up bundles of scraps: witness his preludes to 'Der Freischütz,' 'Preciosa,' 'Euryanthe,' 'Oberon,' and (perhaps, finest of the five) that to 'The Ruler of the Spirits.' As an overture-writer Weber ranges next to Beethoven—Meyerbeer far in the rear of M. Auber (this their Exhibition music sufficiently displayed), and by the side of many a second-rate French composer who, on the strength of a few trite modulations and imitations, has fancied himself distinguished and scientific.

A repetition of the choral performances of the Tonic Sol-Fa Association took place at the Crystal Palace this-day week.

Handel's 'Israel' seems doomed to be performed, at the Norwich Festivals, under experiment. We have not forgotten how, many years ago, the oratorio was given there, with the arrogant and empirical omissions and insertions of Prof. Taylor. This time the instrumentation of the magnificent work has, we hear, been retouched by Mr. G. Macfarren. It is added that Mr. Macfarren has scored the recitatives. This seems to us a mistake in all cases of narrative, as distinct from declamation. As the oratorio was left by Handel, the unpara-

goned massiveness of the grand choral movements requires the relief of the utmost contrast in the links which connect them.

We are told of a new kind of pianoforte in projection by a London builder, to be called the "Arabella," by way of homage to our skilled pianist. We have as yet no keyed "Bach," "Mozart," or "Beethoven," or "Hummel," or "Moscheles," or "Mendelssohn," or "Thalberg," or "Chopin." Yet every one of these, in his distinct way, was not merely an executant, but an inventor, who added new developments to the powers of the spinet. Madame Goddard-Davison needs no such "bush" as this—a compliment inevitably exposing her to disadvantageous comparisons.

The last word of the story of the Pyne and Harrison Opera Company may be said to have been told by the advertisement of the sale of its wardrobe and properties, which, the other day, appeared in Messrs. Puttick & Simpson's list.

Mr. Coward has been appointed organist to the Sacred Harmonic Society, in place of Mr. Brown-smith.

Another rebuke to our somnolent Philharmonic managers: Beethoven's music to Kotzebue's 'Ruins of Athens' is in preparation at the "Oxford"!

Herr Wilhelmj has been playing at Manchester. It is announced that Mr. Adams, who is still engaged at the opera-house at Berlin, will sing in England from Christmas till Easter.

Il Trovatore states that Madame Vilda is engaged at La Scala during the coming season. *Il Teatro Fenice*, at Venice, which for years past has been closed, is again to be opened.—The Italian reporters on English musical and theatrical news are original in translation. We read of the revival at the Clerkenwell Theatre of 'La Madre dell' Oca'!

Two new operas by Maestro Zesewich, of Trieste, are mentioned in *Il Trovatore* as forthcoming.

'L'Africaine' has been produced at Melbourne, Australia, without any great success. This might have been expected. It may be apprehended that Meyerbeer's grand operas are "above the mark" of our colonial theatres, be they ever so enterprising.

That strangely erratic, clever, yet, to our thinking, unpleasing singer, Madame Ugalde, seems, at last, to have taken up her home at 'Les Bouffes Parisiennes,' which theatre opened for the season a few nights ago. A new three-act piece, 'Les Chevaliers de la Table Ronde,' with music by M. Hervé, is in preparation there.—M. Auber's coming opera, to a book by M.M. Dennery and Cormon, is to bear as title 'Le Premier Jout de Bonheur.'—It is said that there is a possibility of 'Le Domino Noir' and 'L'Étoile du Nord' being represented at the Italian Opera in Paris, with Mdlle. A. Patti as heroine.—Signora Romagnoli, the singer whose voice attracted so much attention among the frequenters of the Café Bignon on the evening of the Emperor's fête, has been engaged by M. Bagier.—M. Gounod's charming 'Le Médecin' has been revived at the Théâtre Lyrique.—Two operatic trifles, with music by M. Duprato, 'Sacripant' and 'Le Baron de Groschaminet,' have been produced at the Théâtre des Fantaiesies Parisiennes.

Madame Ristori has arrived in America. The *Era* announces the intended building of a new theatre at Douglas, Isle of Man.

The opening of the theatre in Holborn, with Mr. Boucicault's sporting drama, has been postponed till this evening.

'Un Gendre'—a four-act comedy, by M. Deslandes—is the most important novelty at the Théâtre Vaudeville.

Herr Anders—a German writer on music, among whose essays and biographical notices a monograph on Paganini and another on Beethoven are included—is dead.

The Correspondent of the *Times* told us on Wednesday that the new drama, 'Les Parisiens à Londres,' produced the other evening at the Théâtre Porte St.-Martin, after much elaborate preparation, proved a display of indecency and nudity, too abominable for the not very squeamish digestion of our neighbours, and signally failed.

It is a pity that our clever young countrywoman, Miss Maria Harris, should have been mixed up in such an affair.

MISCELLANEA

Church Furniture.—I find there is some misapprehension abroad in many quarters with regard to my book on 'English Church Furniture,' a review of which appeared in the *Athenæum* of Saturday last. It seems I am supposed to have stated that the records contained in the *Inventarium Monumentorum Superstitionis*, the date of which is the 8th of Elizabeth, are the oldest lists of church furniture that have come down to us. I never said any such thing, never for a moment thought such a thing, as I have read in MSS. or in print some scores of documents containing catalogues of this kind of a much earlier date. What I did say was, that the decrees of Walter Gray, Archbishop of York (1216-1255), and of Robert Wynchelse, Archbishop of Canterbury (1293-1313), *De Ornamentis*, &c., which form the first and second articles of the Appendix of my volume, were the "earliest known complete lists of church goods." This statement I believe to be strictly accurate.

EDWARD PEACOCK.

In connexion with one of the subjects noticed in Mr. Peacock's book a Correspondent writes as follows:—

"Clapham, October 2, 1866."

"In your review of Peacock's Church Furniture, &c. (p. 399), you quote the editor's account of the 'Holy Bread' as the Roman Catholic version of the subject. Therein he describes that it was ordinary leavened bread blessed by the priest after mass, cut up and 'given' to the people. I have before me an extract I made from the Assembly Books of the Corporation of Lynn of an order made in Hall, 2 Henry VI., whereby it is ordered that the occupier of every house in the town of 20s. annual value shall 'offer' holy bread, and that where a tenement is of less than 20s. yearly value, it shall be joined with others to make up 20s. yearly value; they together to offer holy bread. So that, although cut up in small pieces, and given by the priest, it was first of all given to him. In the third year of Edward the Sixth, it was ordered that, on the Sunday following, the Mayor should offer in recompense of the wine and bread for the Communion, and for the offering unto the curate of the Church, 8d., and that every inhabitant, one after the other, every Sunday, shall do likewise, as the turn shall come about, in manner as the holy bread loaf had been given. But if his house be not of 20s. annual value, then two or three of the next shall be joined, and pay portion-like to the same charges."

HENRY HARBOD.

Originators of the Atlantic Cable.—In your review of Dr. Field's 'History of the Atlantic Cable' (No. 2031), is found the origin of the Atlantic cable as far as America is concerned. The intelligence of this project reached England early in March, 1849, and was noticed in your issue of the 10th of that month. In January of that year I submitted to you a Plan for connecting the Electric Telegraph with America by means of wire covered with gutta serena, which will be found referred to in your notices to correspondents, 27th of January, 1849. Without any wish to deprive the American projectors of the great credit due to them, I should esteem it a favour if you would kindly refer to the fact of this independent and simultaneous proposition in England.

JOHN JOS. LAKES.

Bentling-Time.—Your Correspondent, "E. G.," asks for the context of a quotation from Dryden, illustrating the use of the word *bentling-time*. The expression occurs very near the end of his poem 'The Hind and the Panther,' in which the poet, after carrying out a long metaphorical invective against the clergy of the Church of England under the name of *Doves*, ends with a warning in the words of the quotation:—

Bare bentling-times, and moulting months may come,
When, lagging late, they cannot reach their home;
Or rent in schlam (for so their fate decrees)
Like the tumultuous college of the bees,
They fight their quarrel, by themselves oppressed,
The tyrant smiles below, and waits the falling feast.

—The only other use of the word which I have met with is in B. Bradley's 'Family Dictionary' (1725), vol. ii. sub voc. *Pigeon*: "Be sure to feed them in hard weather, and in *bentling-time*, which is when the corn is in the ear, and keep out the vermin, and you will never want stock." W. G.

Greenwood on Kames.—The *Athenæum* of Sept. 22 contains a letter from Col. Greenwood. I do not intend to enter into any geological controversy with him, but to correct him where he misrepresents me. He appears to have paid a visit lately to a part of Lanarkshire with which I am familiar from long residence in it, and to which there are more allusions than one in the work which he misquotes. He says that I turn "a certain pool in a bog, the Red Loch, into 'the crater of a volcano like one of those in the Eifel'"; and he goes on to show that the "crater" lies "in the trough of a long, boggy bottom." I wonder it did not occur to the Colonel, ere he sharpened his pen, that as my description is so unlike the real aspect of the Red Loch, perhaps it was not the Red Loch which was alluded to. I know the Red Loch very well; my reference, however, was not to it, but to another little tarn about a couple of miles or less to the south-west. It lies at the bottom of a deep cup-shaped cavity which has always recalled to me the inside of one of the craters of the Puy de Dome or the Eifel. If the Colonel's visit had not been made "at express pace" (to use his own words and italics), he would probably have come upon this loch and have recognized the truth of my description of it. As it is, he has seen a loch which is not at all like the one I describe; he concludes at once that it must needs be the same, and he rushes into print to laugh at me for turning "a certain pool in a bog into the 'crater of a volcano.'" In the same reckless way he charges me with stating what is "precisely the reverse" of true in what I have said about the Clyde at the valley of Biggar. That flat valley is formed of loose sandy deposits, and stretches across from the side of the Clyde to the side of the Tweed. The Clyde gnaws away at the western or upper end of the valley; and I have referred to the fact that were man not to interfere by repairing its banks, the river would in the end work its way over into Tweeddale. Col. Greenwood, however, does not see this. He finds that a drain has been cut along the valley, and that since the Clyde does not leave its channel to flow up through this drain, "what art has done would facilitate the junction of the streams, instead of preventing it!" The accuracy of the Colonel's geography as well as his powers of observation are further shown when he remarks that this drain runs "continuously over the water-parting from the side of the Clyde to the head of the Tweed." The italics are his own, and they suffice to prove him ignorant of the fact that the valley of Biggar runs from the side of the one river to the side of the other, and that in place of touching the head of the Tweed, it joins that stream at a point fully fifteen miles away from the source, and lower in level by somewhere about a thousand feet. The origin of our *kames* or *ekers* has been for many years a puzzling problem. I have stated that, "notwithstanding all that has been said and written about them, they are as complete a mystery as ever." Col. Greenwood laughs at the notion that they are in any way mysterious, and ridicules the idea of anything like good fortune or "luck" in scientific inquiries. Where geologists, who have been quietly studying the subject for years, find many difficulties to explain, the Colonel sees only "simplicity itself." This leads him on to his usual advertisement of "Rain and Rivers," and he then favours your readers with a rough-and-ready theory which would only be spoilt by any comment of mine, and which I therefore leave to the merciful consideration of those who know what the structure of a kame really is.

ARCHIBALD GEIKIE.

To CORRESPONDENTS.—S. S.—J. D. H.—S. A.—received.

SAMPSON LOW & CO'S NEW BOOKS.

THE JOURNAL of a WAITING

GENTLEWOMAN. Edited by BEATRICE A. JOURDAN. Post 8vo. price 8s.

"We have never read a more tender tale of woman's love, told by a woman, than the autobiographical record before us. The characters are all true to the life, and all well drawn, without exaggeration or affectation."—*London Review*.

"In this delicately-finished novelette, Miss Jourdan has got the true, quiet old-world manner, which gives the impression of conveying sentiments with as much womanly deliberation as if she was working them out on an old tapestry hanging. The antique manner is well kept up, but it is quite subordinate to nature. There is nothing to indicate that the story is chosen for the sake of the old-fashioned phrases and the old-fashioned ideas, as a romancesque might be chosen to set off the old china upon it. On the contrary, the old-world touches are singularly moderate; and the reader is made to feel how like the life then was to the life now, rather than how different. The story itself is natural, simple, and yet original, and very artistically worked out."—*Spectator*.

THE PRISON LIFE of JEFFERSON

DAVIS; embracing Details and Incidents in his Captivity, together with Conversations on Topics of General Interest. By JOHN J. CRAVEN, M.D., Physician of the Prisoners during his Confinement. 1 vol. post 8vo. price 8s.

"A book of great interest on many grounds. Taken altogether, this book is very valuable; and the impression it conveys, not only of the fallen Southern chief, but of the Northern officers to whose keeping he was consigned, is in a high degree favourable."—*Pall Mall Gazette*.

TOILERS of the SEA. By Victor

HUGO. Third Edition. 3 vols. post 8vo. price 54s.

"A fisherman encounters all the fury, and caprice, and treachery of outer nature in order to win a woman whom, on his return, he finds to have unconsciously, but irrevocably, lost her heart to another. But this plainest of stories is worked into genuine tragedy by an exercise of poetic power which, at least in some portions of its display, has very rarely been surpassed in literature."—*Saturday Review*.

A HISTORY of SAVINGS' BANKS:

with an Account of the Origin and Progress of the Government Financial Measures for Post-office Banks, Annuities, and Life Insurance. By WILLIAM LEWINS, Author of 'Her Majesty's Malis.' 8vo. 16s.

"All large employers of labour who take any interest in the social elevation of their work-people will find it particularly interesting. Such books should be diligently read and thoroughly digested."—*Daily News*.

FAMILIAR WORDS: an Index Ver-

borum, or Quotation Handbook. Affording an immediate Reference to Phrases and Sentences that have become embedded in the English Language. Crown 8vo. printed in Elzevir on toned paper, handsomely bound. Second and Enlarged Edition, greatly improved, with Copious Index, price 8s.

"This book—a work of patient literary labour—will add to the author's credit with all honest writers who are able to appreciate the trouble he has taken. It will certainly be as useful as it must be welcome to the considerate readers, who are glad to pause sometimes upon the wise or witty sequences of words that have become part of our common speech, and would know to whose genius they owe the coinage as of fine gold that has added its wealth to the poorer metal of familiar talk."—*Examiner*.

London: SAMPSON LOW, SON & MARSTON, Milton House, Ludgate-hill.

NEW AMERICAN WORKS.

The ELEMENTS of INTER-

NATIONAL LAW. By HENRY WHEATON, LL.D. An entirely New and Revised Edition, by R. H. DANA, Esq. Royal 8vo. cloth 8s.

SIX MONTHS at the WHITE

HOUSE with ABRAHAM LINCOLN. The Story of a Picture. By F. D. CARPENTER. Post 8vo. 7s. 6d.

A HISTORY of the ATLANTIC

TELEGRAPH. By HENRY M. FIELD, D.D. Post 8vo. cloth, 7s. 6d.

on the BORDER. Comprising Descriptions of the Indian Nomads of the Plains; Explorations of New Territory; A Trip across the Rocky Mountains in the Winter; Descriptions of the Habits of different Animals found in the West, and the Methods of Hunting them; with Incidents in the Life of Different Frontier Men, &c. By Colonel R. B. MARCY, U.S.A., Author of 'The Prairie Traveller.' With numerous Illustrations. 8vo. price 12s.

The LIFE and CORRESPONDENCE

of BENJAMIN SILLIMAN, M.D. LL.D., late Professor of Chemistry, Mineralogy, and Geology in Yale College, U.S.A. Chiefly from his own MSS. and Diary. By GEORGE FISHER. With Portrait. 3 vols. post 8vo. price 34s.

LIFE of the late Dr. MOUNTAIN,

Bishop of Quebec. 8vo. cloth, price 10s. 6d.

London: SAMPSON LOW, SON & MARSTON, English, American, and Colonial Booksellers, 59, Ludgate-hill.

NEW BOOKS.

In preparation, with Maps and Plans.

The SEVEN WEEKS' WAR: its Antecedents and its Incidents. By H. M. HOXIER, Military Correspondent of the Times with the Prussian Army during the German Campaign of 1866.

The FOUNTAIN of YOUTH. Translated from the Danish of FREDERIK PALUDAN MILLER, by HUMPHRY WILLIAM FRIELAND, late M.P. for Chichester. With numerous Illustrations, designed by Walter J. Allen, and engraved by J. D. Cooper. Crown 8vo. [Nearly ready.]

LEGENDARY FICTIONS of the IRISH CELTS. Collected and Arranged by PATRICK KENNEDY. With Vignette Title and Frontispiece. Crown 8vo. cloth, price 7s. 6d. [Ready.]

The ALBERT N'YANZA, GREAT

BASIN of the NILE, and EXPLORATIONS of the NILE SOURCES. By Sir SAMUEL WHITE BAKER, M.A. F.R.G.S., Gold Medallist of the Royal Geographical Society. With Maps, numerous Illustrations, and a Chromo-lithograph Frontispiece of the Great Lake from which the Nile flows, and Portraits of Sir Samuel and Lady Baker. 2 vols. 8vo. cloth, 8s.

"It would be difficult to overstate the importance and the great and varied interest of this work."—*Times*.

The Completion of the CAMBRIDGE SHAKESPEARE

WORKS of WILLIAM SHAKESPEARE. Edited by WILLIAM GEORGE CLARK, M.A. Fellow and Tutor of Trinity College, and Public Orator in the University of Cambridge, and WILLIAM ALDIS WRIGHT, M.A., Librarian of Trinity College, Cambridge. Vol. IX., completing the Work.

Contents:—*Antony and Cleopatra*—*Cymbeline*—*Pericles*—and the Poems. 8vo. cloth, 10s. 6d. [Ready.]

THE CAMBRIDGE SHAKESPEARE

WORKS of WILLIAM SHAKESPEARE. Edited by WM. G. CLARK, M.A., and WM. ALDIS WRIGHT, M.A. Nine Vols. 8vo. cloth, 4. 10s. 6d. [Ready.]

A New and Cheaper Edition of

The HILLYARS and the BURTONS:

a Story of Two Families. By HENRY KINGSLEY. 1 vol. crown 8vo. cloth, price 8s.

By the same Author,

GEOFFREY HAMLYN. Crown 8vo. cloth, price 8s.

RAVENSHOE. Crown 8vo. cloth, price 8s.

AUSTIN ELLIOT. Crown 8vo. cloth, price 8s.

(Forming Part of Macmillan's Six-Shilling Series of Popular Works.)

MACMILLAN & CO. London.

CLARENDON PRESS SERIES.

This day is published,

An ELEMENTARY TREATISE on

HEAT. With numerous Woodcuts and Diagrams. By BALFOUR STEWART, LL.D. F.R.S., Director of the Observatory at Kew. Crown 8vo. cloth, price 7s. 6d.

BOOKS NOW READY IN THIS SERIES.

1. CHEMISTRY for STUDENTS. By

A. W. WILLIAMSON, Phil. Doc. F.R.S., Professor of Chemistry, University College, London. Crown 8vo. cloth, price 7s. 6d.

Also: SOLUTIONS of PROBLEMS in 'CHEMISTRY for STUDENTS.' By the same Author. Crown 8vo. sewed, price 6d.

2. GREEK VERBS, IRREGULAR

and DEFECTIVE; their Forms, Meaning, and Quantity; embracing all the Tenses used by Greek Writers, with References to the Passages in which they are found. By F. VEITCH. New and Revised Edition. Crown 8vo. cloth, 616 pages, price 8s. 6d.

Books in Preparation in this Series, IN CLASSICS, MATHEMATICS, HISTORY, LAW, PHYSICAL SCIENCE, ENGLISH LANGUAGE and LITERATURE, MODERN LANGUAGES, &c.

Also, a Series of English Classics.

Designed to meet the wants of Students in English Literature: under the Superintendence of the Rev. J. S. BREWSTER, M.A. of Queen's College, Oxford, and Professor of English Literature at King's College, London.

Oxford: Printed at the Clarendon Press; and Published for the University by MACMILLAN & CO. London.

The New Edition of Burnet's 'History of the Reformation.'

7 vols. 8vo. cloth, price 44s.

BURNET'S HISTORY of the REFOR-

MATION of the CHURCH of ENGLAND. A New Edition, carefully revised, and the Records collated with the Originals. By the Rev. N. POCOCK, M.A., late Michel Fellow of Queen's College.

"The edition of Burnet's History which has just come from the Clarendon Press of the University of Oxford is a book which deserves an early and special attention. The research and the talent, the patient labour, which have been expended in the production of this work, in its present form, by Nicholas Pocock, M.A., late Michel Fellow of Queen's College, are deserving of all admiration and praise; and we may be grateful indeed for such a monument of original care and erudition. Never before has this work of Burnet obtained such attention, or been sifted so clear of its errors and crudities; nor has any one succeeded, as Mr. Pocock has now, in making its merits and defects so simply and impartially plain by his appropriate commentary and his exhaustive annotations."

Oxford: Printed at the Clarendon Press; and Published by MACMILLAN & CO. London, Publishers to the University.

MISS BRADDON'S NEW ILLUSTRATED MONTHLY MAGAZINE.

MISS BRADDON'S FIRST NOVEL.

This day, at all Libraries, in 1 vol. price 6s., thoroughly revised and in parts re-written, with Frontispiece and Vignette Title-page, worked in Tint on toned paper, crown 8vo. cloth gilt, lettered, THE

TRAIL OF THE SERPENT

“Poor race of Men!” said the pitying Spirit,
“Dearly ye pay for your primal Fall,—
Some flow’rets of Eden ye still inherit,
But the TRAIL OF THE SERPENT is over them all!”—MOORE.

CHEAP EDITION OF ‘JOHN MARCHMONT’S LEGACY.’

This day, price 2s. complete, uniform with the Cheap Edition of ‘Lady Audley’s Secret,’ ‘Aurora Floyd,’ ‘Eleanor’s Victory,’ and ‘Henry Dunbar,’

JOHN MARCHMONT’S LEGACY

Opinion of The Times on ‘JOHN MARCHMONT’S LEGACY.’

“Miss Braddon writes frankly for amusement; and in each succeeding novel she rises above herself. ‘Lady Audley’s Secret’ was good, ‘Aurora Floyd’ better, ‘Eleanor’s Victory’ still better, and now ‘John Marchmont’s Legacy’ may be pronounced the best of all.”—*See The Times*, Jan. 2, 1864.

LIBRARY EDITION OF MISS BRADDON'S NOVELS.

Just ready, with Frontispieces and Vignette Title-pages, handsomely printed in Tint on toned paper, and strongly bound in cloth gilt, crown 8vo. price 6s. each,

London: ROBERT HARDWICKE, 192, Piccadilly.

MR. DIXON'S NEW WORK.

"A REMARKABLE and VERY ORIGINAL BOOK."—*Saturday Review.*

"BRILLIANT, LIFE-LIKE PICTURES."—*British Quarterly Review.*

Now ready, a SECOND EDITION of

THE HOLY LAND.

By WILLIAM HEPWORTH DIXON.

With Illustrations from Original Drawings and Photographs on Steel and Wood.

2 vols. demy 8vo. 24s.

"Mr. Dixon has written a singularly able book. His genius is essentially conservative. He contrives while sipping his coffee or smoking his cigarette to throw off sketches, with the careless boldness of a hand sure of its own accuracy, which challenge the closest criticism, and whilst professing only to give rough-and-ready pictures of places and scenes as they were in the day when Christ stood amidst them, the centre figure of the whole, he is really bringing the most subtle analysis to bear on the thought which after four thousand years of various development was found in a concrete form, stripped of its vitality and crystallised into the creeds of Pharisee and Sadducee. The sharp points of contact and antagonism, the manners, habits, and scenes of the strange race among whom Christ walked, are all graphically described in the work before us, and we think few would rise from a careful perusal of its pages without a deeper insight into the sacred story, possibly a wider understanding of the words of One who taught as having authority, and not as the scribes."—*Spectator.*

CHAPMAN & HALL, 193, Piccadilly.

THE SECOND EDITION OF THE HOME LIFE IN THE LIGHT OF ITS DIVINE IDEA,

BY
The Rev. J. BALDWIN BROWN,
IS NOW READY, Crown 8vo. 6s.
SMITH, ELDER & Co. 65, Cornhill.

THE NEW PLAY, "THE LONG STRIKE,"

is mainly derived from that celebrated Novel, Mrs. GASKELL'S 'MARY BARTON.' The Tenth Edition is now ready in the "Select Library of Fiction." 'RUTH: a Novel,' by the same Authoress, the Eighth Edition, is just ready. Price 2s. each.

London: CHAPMAN & HALL; sold by all Booksellers.

FRITH'S LARGE-SIZED PHOTOGRAPHS

OF

GREAT BRITAIN, SWITZERLAND, ITALY, NORMANDY, &c.

Size, 8½ by 6½ inches, on Mounts 14½ by 11½ inches.

The scale of prices is very low; whilst in artistic beauty, and as specimens of the Art, the series is certainly unequalled.

About 500 sample Subjects may be seen at 31, Cornhill—BECK & BECK; and 180, Strand—W. ROUGH & Co.; or, address the Publisher,

F. FRITH, Brightlands, Reigate, Surrey.

CHAPMAN & HALL'S NEW BOOKS.

Mr. CHAS. READE'S New Novel, GRIFFITH
GAUNT; or, Jealousy, 3 vols. post 8vo., will be published in October.

Mr. HENRY F. CHORLEY'S New Novel, A
PRODIGY: a Tale of Music, 3 vols. post 8vo., will be published next week.

The New Story.

AUNT MARGARET'S TROUBLE. By a
NEW WRITER.

"After wading through the ordinary novels of the season, after learning to what depths of dullness and folly the human intellect can descend, and wondering at the hideous picture of vice or inanity which men and women can paint as representations of human life, it is positive mental refreshment to come across such a book as 'Aunt Margaret's Trouble,' which for pathos and idyllic tenderness may compete with even the best novel of the day. It has nothing of the grandeur of high art about it; it has nothing of heroic tragedy nor of stately romance, still less of sensationalism; it is absolutely free from all deadly crimes, from all monstrous vices, from all maddening mysteries; being just a quiet story of selfishness on the one hand, and of love betrayed on the other, with the retribution sure to follow upon wrong as the moral justice done at the end. Yet it is a charming book, and worth half a hundred fictions of the more ambitious and elaborate kind.—In the first work of a new and young writer we have to consider, not only the ability it displays or more remotely indicates, but also the cast of mind shown in the work. Thus, if a new book is all about illicit love and the slangy talk of fast men,..... we know at once what manner of author we have to deal with. But if the book be sweet and modest, as this is, we know then that, whatever may be the strength or weakness of the future, we shall never be revolted by licentiousness, or shocked by coarseness;..... we shall at least have pure work and decent, and sorrow gently touched, and sinfulness dealt with as sinfulness should be dealt with in life—tenderly and yet abhorrently."

New Novel by the Author of 'Clara Vaughan.'
8 vols. post 8vo. at all Libraries,

CRADOCK NOWELL: a Tale of the New Forest.
By R. D. BLACKMORE.

"'Cradock Nowell' is a clever novel, decidedly original in style and mode of treatment; it is amusing too, and the reader who once fairly enters upon it will hardly fail to read it through. There are some excellent descriptions of forest scenery, and a storm at sea with the wreck of a ship, which are very powerfully given."—*Athenæum*.

Edited by Professor Morley.
Post 8vo. 8s.

SKETCHES of RUSSIAN LIFE before and
during the EMANCIPATION of the SERFS. Edited by HENRY MORLEY.

NEW VOLUME OF POEMS.
The QUADRILATERAL 1 vol.
10s. 6d. 16s. bevelled boards. [Ready.
"The Quadrilateral," with its quaint but telling title, and its
tried of as yet unknown author, deserves, and we are sure will
receive, a warm welcome from all thoughtful and appreciative
lovers of poetry."—*Chambers*.
"The poems are in good taste, and always graceful and
pleasing."—*John Bull*.

NEW NOVEL.
The ROMANCE of MARY CON-
STANT. Written by HERSELF. 1 vol. post 8vo. 10s. 6d.
bevelled boards. [Ready.

"A thoroughly healthy book like this, equally pure in thought
and diction, with ample interest, and with almost every character
drawn with a firm and accurate hand, is a great boon."
—*Church and State Review*.
"The story is well written from first to last."—*Reader*.
"We are treated to a great number of carefully-drawn sketches
of English and French domestic life. The French domestic life
work of an eye-witness, who has an artist's power of graphically
describing things as they actually exist; and the quiet, graceful
style of the diction adds to the charm of this very readable and
interesting volume."—*Public Opinion*.

PROVIDENT LIFE OFFICE,
 No. 50, REGENT-STREET, LONDON, W.
 Established 1808.
 INVESTED CAPITAL .. £1,663,919
 ANNUAL INCOME .. £203,438
 BONUSES DECLARED .. £1,451,187
CLAIMS PAID since the Establishment of the Office—£3,508,483
President—THE RIGHT HON. EARL GREY.
Managing Director—JOHN A. BEAUMONT, Esq.

The principle upon which the Surplus Profits are divided in the Provident Life Office between the Insured and the Shareholders gives to each interest a share proportionate to its respective contributions to the Society.
 The advantages which this principle of allotment gives to the Policy Holders is shown by the following statement:—
 Out of 363,194l., the amount of profit upon the recent division, 9,375l. only was apportioned to the Shareholders, the remaining sum of 353,819l. was allotted among the various Policies entitled to Bonus.

The parties insured thus enjoy the advantages of a mutual Society, and are relieved from any liability.

EXAMPLES OF BONUSES added to POLICIES issued by THE PROVIDENT LIFE OFFICE.

| No. of Policy. | Date of Policy. | Annual Premium. | Sum Insured. | Amount with Bonus additions. |
|----------------|-----------------|-----------------|--------------|------------------------------|
| 4,718 | 1823 | 194 15 10 | 5,000 | 10,432 14 8 |
| 3,242 | 1821 | 165 4 2 | 5,000 | 10,164 19 0 |
| 1,287 | 1824 | 205 12 4 | 4,000 | 9,257 3 8 |
| 2,027 | 1816 | 123 13 4 | 4,000 | 8,576 11 2 |
| 3,944 | 1821 | 40 15 10 | 1,000 | 3,496 7 6 |
| 738 | 1808 | 29 15 4 | 1,000 | 3,227 12 8 |

The Forms of Proposal for Insurance are prepared with a view of giving the life proposed the least possible trouble.

INSURANCES may be effected in any part of the Kingdom by a letter addressed to "THE SECRETARY," No. 50, Regent-street, London, W.

SUN FIRE OFFICE, LONDON.
 Established 1710.

Managers
CHARLES RICHARD POLE, Esq. Chairman and Treasurer.
 The Right Hon. W. Beresford, Philip Pleydell Bourville, Esq. Harry Chester, Esq. Charles M. Littledale, Esq. Alfred Montgomery, Esq. Frederick Henry Norman, Esq. Edward Hawley Palmer, Esq. Brice Hugh Pease, Esq. Lambert Pole, Esq. Sir Henry Rich, Bart. Oswald A. Smith, Esq. Henry R. Tomkinson, Esq.

All persons insured in this Office, the Premiums on whose Policies fall due at the Michaelmas Quarter, are hereby reminded to pay the said Premiums, either at the Offices in Threadneedle-street, or at the Agents in the Country, on or before the 13th day of OCTOBER, 1866, when the fifteen days allowed by this Office, over and above the time for which they are insured, will expire.

Insurances may be made for more years than one by a single payment, and in such cases there will be a discount allowed on the premium and duty for every year, except the first.

This Office insures Property in Foreign Countries, and the Rates are regulated by the nature of the risks.

The Duty paid to Government by the Sun Fire Office in 1865 amounted to 134,109l.

Special Announcement.

Great Reduction in the Terms for Policies of small amounts. No charge for Policy or Stamp.

Insurances now effected at the Reduced Rate of Duty, viz. 1s. 6d. per cent.

The Policies of this Company now extend to cover Losses occasioned by Explosion of Gas.

NATIONAL PROVIDENT INSTITUTION,
 GBAOCHURCH-STREET, LONDON, E.C.

 WESTMINSTER BRIDGE ROAD.

A BEAUTIFUL DESCRIPTIVE CATALOGUE, with Illustrative Sketches of Cabinet Furniture and Decorative Upholstery, sent free per post, or given on application. The Stock, corresponding to the List, is marked in Plain Figures, and comprises

DRAWING-ROOM FURNITURE.
 In new and elegant designs, covered in Rep, Terry Cloths, French and Silk Damasks, &c. This Department is also enriched with the latest Parisian Novelties, Gobelins, Waterfalls, Davenport, &c.

Good Solid Dining-room Sets, in Mahogany and Oak.
 Iron and Brass Bedsteads in great variety.
 The new patent Spring Mattress still stands alone for cheapness.
 The Bedding is all made on the Premises, and under personal inspection.
 Their famous polished Pine Bed-room Suits demand special attention.

Extract from the Builder.
 "We were shown a short time since a bed-room fitted up by an Earl for his own occasional occupation at the sea-side, in which every piece of furniture, save the iron bedstead, was made of the white wood in question. Dressing-table, washstand, drawers, towel-rails, and chairs, were as spotless as the crest of the waves beating on the shore, and the very height of cleanliness seemed attained."

THE STOCK OF CARPETS
 Is one of the choicest in London, embracing Turkey, Velvet Pile, Brussels, Kidder, Felts, &c.
 Floor-cloth, Kamsington, Linoleum, and Cork Carpet, cut, fitted, and laid down to any size and plan.
 Furnishing Drapery, and all kinds of Goods.
 Damask, Rep, and Flock Cloths, French and English Chintzes, &c.

THE STOCK OF HOUSEHOLD LINEN
 Is well worthy the attention of Clubs, Hotels, and large Companies, who will be treated with on most liberal terms.

CURES OF ASTHMA and COUGHS, by DR. LOCOCK'S PULMONO WAFERS.—From Mr. Leith, Chemist, 56, Baker-street, Sharncliffe:—"I find your Wafers give great satisfaction, and I can recommend them with greater faith than ever.—They give instant relief, and a rapid cure of asthma, consumption, colds, and all disorders of the throat and lungs. They have a pleasant taste. 1s. 12d., 2s. 6d., and 4s. 6d. per Box, by all Druggists."

ENGLISH MEDICINES are everywhere acceptable; and foremost among these is that favourite remedy of the British household, **PARR'S LIFE PILLS**,—within the reach of all who suffer from Indigestion, Disordered Liver and Bowels, Pains in the Back, Gout, Rheumatism, Dropsy, Nervousness, and all other ailments, and General Debility from any cause, especially tainted blood through long-standing disease.—May be had of any Chemist.

THE POPE'S HEALTH RESTORED, by DU BARRY'S FOOD.—Cure No. 4242.—"Rome, July 21st, 1862.—The health of the Holy Father is excellent, especially since abandoning all other remedies he has confined himself entirely to Du Barry's Ravenna Arabian Food, which has produced a surprisingly beneficial effect on his health, and his Holiness cannot praise this excellent food too highly."—From the *Gazette du Midi*, July 25th.

DU BARRY'S delicious, health-restoring REVALENTE ARABIC FOOD restores good appetite, perfect digestion, strong nerves, sound lungs and liver, refreshing sleep, functional vigour and energy to the most enfeebled or disordered system, without medicine, inconvenience, or expense, as it saves fifty times its cost in other remedies, curing dyspepsia, indigestion, constipation, flatulency, phlegm, debility, consumption, nervous, bilious, liver and stomach complaints, low spirits, as proved by 60,000 cases which had been considered hopeless.—In tin, at 1s. 12d.; 1-lb. tin, 2s. 6d.; 2-lb. tin, 4s. 6d.—**DU BARRY & CO. 77, REGENT-STREET, London; and all Grocers and Chemists.**

CONSUMPTION.—Dr. CHURCHILL'S Successful Treatment of Consumption, Diseases of the Chest, Chronic Cough, General Debility, Loss of Appetite, &c., by the Syrup of Hypophosphite of Lime, Soda, and Iron, and by the Pills of Hypophosphite of Quinine and of Manganese, prepared by H. H. Swan, of Paris. Price 4s. 6d. per bottle.

Wholesale and Retail Agents,
DINNEFORD & Co., Chemists, 172, New Bond-street, London.

DINNEFORD'S FLUID MAGNESIA.—The Medical Profession for thirty years have approved of this pure Solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout, and Indigestion; and as a mild aperient it is especially adapted for Ladies and Children. Prepared by

DINNEFORD & CO., Chemists, &c.,
 172, NEW BOND-STREET, LONDON, W.
 And sold throughout the World by all respectable Chemists.
 Caution.—See that "Dinneford & Co." is on each Bottle and red label over the cork.

ALEXANDER STRAHAN, 56, Ludgate-hill.

NEW BOOKS JUST PUBLISHED.

DAYS of YORE. By SARAH TYTLER,

Author of 'Citoyenne Jacqueline.' 2 vols. post 8vo. 21s. "The concentrated power which we admire in 'Citoyenne Jacqueline' is precisely the kind of power to ensure an equal success to the author in 'Days of Yore.' No story in the book disappoints us; each has 'the virtue of a full draught in a few drops'; and in each there is the quintessence of such a novel as Thackeray might have written."—*Pall Mall Gazette*.

"Every quality of merit which was conspicuous in 'Citoyenne Jacqueline' is apparent here also. The first tales in these volumes give us some of the finest descriptions of scenery we have ever read, while the meditative mood into which Miss Tytler frequently falls in these eighteenth-century reminiscences is very like that delightful chat with which Thackeray indulged his readers so often."—*Spectator*.

DOCTOR AUSTIN'S GUESTS. By

WILLIAM GILBERT, Author of 'Shirley Hall Asylum,' &c.

2 vols. post 8vo. 21s. "Mr. Gilbert is one of our best story-tellers, and we cannot give much higher praise to 'Dr. Austin's Guests' than to say that it is quite as clever a book as 'Shirley Hall.' It is individual. No other known writer could have written such a book so well. From the first page to the last nobody is in his senses. With all this the firm consistency to a right reason of unreason in every sketch is remarkable. This is one of the small number of current works of fiction that are not made only to be borrowed from a lending library, but are worth putting on one's book-shelves."—*Examiner*.

LONDON POEMS. By ROBERT

BUCHANAN, Author of 'Idylls and Legends of Inverburn,' &c. Small 8vo. 5s.

"No volume of poems has appeared for many years in London which so certainly announces a true poetic fame."—*Spectator*. "These 'London Poems' make good the promise of 'Under-tones.' They are true and genuine work; the result of real observation and personal emotion."—*Athenæum*.

VIEWS and OPINIONS. By MATTHEW

BROWNE. Crown 8vo. 6s.

"Mr. Matthew Browne's volume of essays is the work of a highly sensitive and cultivated mind. There is a rare and original vein of sportive humour which runs throughout its pages. These are rare qualities; and the book in which they are displayed is few, any reader equals in a claim to a place in the library of a happy country house."—*Westminster Review*.

COSAS DE ESPAÑA: Illustrative of

Spain and the Spaniards as they are. By Mrs. WM. PITT

BYRNE, Author of 'Flemish Interiors,' &c. With Illustrations. 2 vols. 8vo. 21s.

"Mrs. Byrne's is the best book we have yet seen on Spain. It is comprehensive and at the same time minute in its details, and written in a liberal philosophic style."—*Daily News*.

VIGNETTES: Twelve Biographical

Sketches. By BESSIE RAYNER PARKES, Author of

'Essays on Woman's Work.' Crown 8vo. 6s.

"This is a very charming volume. It will make many acquainted with persons and at the same time with the history of their names and nothing more."—*British Quarterly Review*.

ARNE: a Sketch of Norwegian Peasant

Life. By BJÖRNSTENNE BJÖRNSEN. Translated by AUGUSTA

PLESNER and SUSAN RUELEY POWERS. Post 8vo. 10s. 6d.

"The most charming love story of the year."—*Illustrated Times*. "Such fresh little bits of nature come to us rarely. They are green spots in the arid waste of fiction."—*Athenæum*.

"It is, in fact, a fairy book for men and women."—*Westminster Review*.

MASTER and SCHOLAR; and Other

Poems. By E. H. PLUMPTRE, M.A., Professor of Divinity,

and Chaplain, King's College. Small 8vo. 5s.

"The present volume will certainly add to Professor Plumptre's reputation. It is worthy to be put on the same shelf with Heber and his own favourite, Keble."—*Westminster Review*.

EASTWARD. By NORMAN MACLEOD,

D.D. One of Her Majesty's Chaplains. With 70 Illustrations.

Small 4to. 14s.

"It is the most enjoyable book on the Holy Land we have ever read."—*Nonconformist*.

STUDIES for STORIES from GIRLS'

LIVES. With Illustrations by J. E. Millais, R.A., and others.

Crown 8vo. 6s.

"Each of these studies is a drama in itself, illustrative of the operation of some particular passion—such as envy, misplaced ambition, sentimentalism, indolence, jealousy. In all of them the actors are young girls, and we cannot imagine a better book for young ladies."—*Pall Mall Gazette*.

WEALTH and WELFARE. By JERE-

MAH GOTTFELF. 2 vols. post 8vo. 21s.

"For a long time we have not read a book in which the style was at once so fresh and individual, without being forced. The two volumes are a perfect little mine of shrewd observation. There is, too, a good deal of quiet humour of a peculiar kind exhibited by the writer in the course of the two volumes, a something which reminds us of George Eliot in 'Adam Bede,' without for an instant suggesting imitation. Possibly 'Wealth and Welfare' may prove to be too delicate a dish to touch the general palate; we recommend it, however, to those who still preserve a taste for what is delicate in books of light reading."—*London Review*.

THE LIFE and LIGHT of MEN. By

JOHN YOUNG, LL.D. (Edin.), Author of 'The Christ of His-

tory.' Post 8vo. 7s. 6d.

"His idea is beautifully worked out in his volume, which, like all Dr. Young's writings, is characterized by deep thought and the keenest appreciation of spiritual things."—*Spectator*.

CITOYENNE JACQUELINE: a

Woman's Lot in the Great French Revolution. By SARAH

TYTLER. With Frontispiece and Vignette. Crown 8vo. 6s.

"'Citoyenne Jacqueline' is one of those rare books of which every sentence deserves to be read leisurely, and will repay the attention with pleasure."—*Guardian*. "We pronounce 'Citoyenne Jacqueline' superior to any except three or four of the novels of the age."—*Press*.

ALEXANDER STRAHAN, 56, Ludgate-hill.

STRAHAN & CO.'S MAGAZINES.

"WONDERS OF THE ANIMAL WORLD."

MR. KIDD'S NEW ENTERTAINMENT.

From the *Oxford Weekly News*.

"On Thursday evening, September 27, a very interesting anecdotal Entertainment was given, in the Corn Exchange, Witney, to the members of the Natural History Society and a numerous audience by William Kidd, Esq., the Naturalist, of Hammer-smith. The subject was a grand one—viz., 'THE WONDERS OF THE ANIMAL WORLD.' How such an inexhaustible theme would be handled by so close an observer of nature as Mr. Kidd, can be readily conceived. An hour is the worst time allotted to Witney lectures; but on this occasion Mr. Kidd took 'French leave' and extended his lecture to something more than an hour and a half. His auditory, however, showed no sign of uneasiness; on the contrary, they sat to the last, riveted by the intense interest they felt in so glorious a subject, and evidently delighted with the entertainment provided for them. A cordial vote of thanks to the lecturer brought this very pleasant evening to a close. We should add, that although it was a wet night, some 300 persons, including the *élite* of the neighbourhood, were present—a compliment that Mr. Kidd did not fail to acknowledge."

For printed Particulars of his NEW POPULAR ENTERTAINMENT, apply, by letter only, to Mr. William Kidd of Hammer-smith, 7, Great Castle-street, Regent-street, London, W.

AMERICAN BOOKS.—Trübner & Co., 60,
Paternoster-row, London, have always in Stock a large variety of the best AMERICAN LITERATURE, and are receiving Weekly Packages from all parts of the United States. Books not in Stock can be procured in about five weeks.

This interesting Catalogue sent by post on receipt of two stamps. Books (Old and New) Purchased, or Entire Libraries, full value given and immediate Cash, thus saving the ruinous sacrifice of property (see the Times) of Sales by Auction.

THOMAS BEET, 18, Conduit-street, Bond-street, London, W.

ROSS'S MICROSCOPE FOR SALE.—No. 1
Is a Ross's Binocular MICROSCOPE for SALE, with Object-glasses and other Apparatus. Nearly new, and in perfect condition. Can be seen at J. T. NORMAN, 176, City-road, E.C.

THE CHADBURN LANTERN, for projecting enlarged Images upon a Screen (similar to the Magic Lantern) from opaque objects. This instrument supplies a great want in scientific and amusing Illustrations: by it Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and truth, and thus render paintings on glass unnecessary.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

BOOKBINDING—in the MONASTIC, GROELER,
MAIOLI and ILLUMINATED styles—in the most superior manner, by English and Foreign workmen.

JOSEPH ZAKHNSDORF,

BOOKBINDER TO THE KING OF HANOVER.

English and Foreign Bookbinder.

30, BRIDGE-STREET, COVENT-GARDEN, W.C.

Sales by Auction

LITERARY SALE ROOMS,
115, CHANCERY-LANE, W.C.

MR. HODGSON begs to announce that his Season for SALES by AUCTION of LIBRARIES, Stocks of Books, and Literary Property of every Description, has commenced, and at the same time to assure his Friends and the Public that the best mode of Disposal of Libraries, and Books of all sorts, is sale by Auction. Mr. Hodgson's Sale Rooms were built expressly for the purpose, are very commodious, and their position extremely central. All Property entrusted to him may be considered as insured from loss by fire; and the same punctuality and regularity in the transaction of his business, in which it has been characterized during the last forty years, will still continue to be exercised.
October, 1866.

Modern Books of all Classes, Books in Quire, &c.

MR. HODGSON will SELL by AUCTION,
at his Rooms, 115, Chancery-lane, W.C., on MONDAY, October 16, and following day, at 1 o'clock, MANY THOUSAND VOLUMES OF MODERN BOOKS in Prose, Poetry, Biography, the Sciences, and Travels, Educational, Moral, and Miscellaneous Literature in the greatest possible variety, nearly all new, in cloth. Also, Books in Quire, a few Remainers, &c. &c.
To be viewed, and Catalogues had.

1,000 Reams of Printing and Writing Paper, Stock of Miscellaneous Stationery, &c.

MR. HODGSON will SELL by AUCTION,

AUSTIN ON JURISPRUDENCE.

Now ready, complete in 3 vols. 5s. 6s.

THE PROVINCE OF JURISPRUDENCE DETERMINED: a Series of Lectures on Jurisprudence; or, the Philosophy of Positive Law.

By the late JOHN AUSTIN, of the Inner Temple, Barrister-at-Law. "These Lectures possess a degree of value, and deserve a position in English literature, which it is difficult to rate too highly. With the single exception of Jeremy Bentham, the late Mr. Austin was the only Englishman of any considerable ability who ever made the study of Jurisprudence proper the object of his life."—Saturday Review.

John Murray, Albemarle-street.

In 8vo. price 7s. 6d.

THE COMPANY and the CROWN.

By the Hon. T. J. HOVELL-THURLOW.

"Those who wish to understand what our work actually is in India, and how it is being done, and an abundant store of information, both about persons and things, in Mr. Thurlow's interesting pages. Mr. Thurlow has drawn portraits of contemporary Anglo-Indians with a firm and bold hand; and while this circumstance will cause this book to be read with much additional interest in India, it will also greatly increase the difference of opinion respecting its merits. Chiefs and subordinates alike pass under searching and unflinching review, and, according to our belief, Mr. Thurlow is seldom guilty of injustice. There are a multitude of most interesting questions touched upon by Mr. Thurlow, and generally with ability and careful thought, to which we cannot make even a passing reference."—Times.

W. Blackwood & Sons, Edinburgh and London.

Just published, extra cloth, toned paper, price 3s. 6d.

PHYSICAL GEOGRAPHY.

INTRODUCTORY TEXT-BOOK OF PHYSICAL GEOGRAPHY. By DAVID PAGE, F.R.S.E. F.G.S. With Sketch-Maps and Illustrations. Second Edition.

"The author of this 'Introductory Text-Book' has produced a work which cannot fail to be useful to all who are entering on the study of Physical Geography. We believe, indeed, that many will be induced to enter on the study from a perusal of this little work. The divisions of the subject are so clearly defined, the explanations are so lucid, the relations of one portion of the subject to another are so satisfactorily shown, and, above all, the bearing of the Allied Sciences to Physical Geography are brought out with so much precision, that every reader will feel that difficulties have been removed, and the path of study smoothed before him. With those opinions it is our pleasant duty to recommend this 'Introductory Text-Book of Physical Geography' to all who are in any way interested in the external conditions of the globe which we inhabit."—Athenæum.

By the same Author,

ADVANCED TEXT-BOOK OF PHYSICAL GEOGRAPHY. With Engravings. 5s.

"A thoroughly good Text-Book of Physical Geography."—Saturday Review.

"A comprehensive outline of the science, well suited for private study, or for use in schools."—Examiner.

Price One Shilling.

A PLEA for TOLERANCE toward our Fellow-Subjects in Ireland who profess the Roman Catholic Religion. With a Prefatory Letter addressed to His Excellency the Earl of Kimberley, Lord Lieutenant of Ireland. By ORLANDO T. DOBBIN, LL.D., Vice-Minister of Berlin. Tolerance is a great good, and a good to be imitated, let it come from whom it will. If a sceptic is tolerant, it only shows that he is not foolish in practice, as well as erroneous in theory. If a religious man is tolerant, it evinces that he is religious from thought and inquiry, because he exhibits in his conduct one of the most beautiful and important consequences of a religious mind—an inviolable charity to all the honest varieties of human opinion."—Sydney Smith, Canon of St. Paul's. Longmans and Co.

P O E M S. By SOPHIA MAY ECKLEY. Authors of 'The Oldest of the Old World.' Price 5s.

"Quaint, delicate, mystical. We could quote several, indeed, that might have been written by Uland, so minute are they in expression, so fantastically subtle in idea."—Athenæum.

"These are Poems which come home to us men, and read as a person which we are too apt at forgetting. In his conduct one seems a contradiction in terms, and yet our authors come very near the right to claim such a title."—John Bull.

"These Poems give signs of a good deal of thought and feeling."—Chambers and Scott Review.

Bath: Peach. London: Longman and Co.

Second Edition, 3 vols. royal 8vo. half-bound calf, price Two Guineas.

HURST & BLACKETT'S
ANNOUNCEMENTS

FOR

OCTOBER AND NOVEMBER.

COMPLETION OF THE LIFE OF WEDGWOOD.

Vol. II. of the LIFE of WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Mayer, Esq. F.R.S. Francis Wedgwood, Esq., O. Darwin, Esq. F.R.S., Miss Wedgwood, and other authentic sources.

By ELIZA METEYARD.

Dedicated to the Right Hon. W. E. GLADSTONE.

8vo. price 21s. bound.

[Now ready.

* This volume (completing the work) is embellished with above 200 beautiful illustrations.

"The second volume of Miss Meteyard's 'Life of Wedgwood' is even better and handsomer than the first. Besides its steel frontispiece, it is furnished with choice woodcuts, all of them executed with unusual care and taste, and giving delightful illustrations of the wonderful talent brought by Wedgwood to his business. The two volumes form as handsome a work as has ever been published; and, if the thing that most delights us in first opening the book is its mechanical excellence, it has quite enough literary interest to repay careful reading, and to afford solid instruction to the reader."—*Examiner*.

LONDON, SATURDAY, OCTOBER 13, 1866.

LITERATURE

The Life of Josiah Wedgwood. By Eliza Meteyard. Vol. II. Illustrated. (Hurst & Blackett.)

Miss Meteyard resumes and completes her biography of the greatest of modern potters, and her history of his works. The latter is, in fact, a concise account of the revival of noble classic art in Europe, if that can be called a revival which, to all intents and purposes, aimed at absolute imitation of the most beautiful and purest order of design in ceramics. It was a wonderful thing to do this, and so admirably was it done that nothing of the sort in the way of imitation of styles and models has approached its success or desert; but we are bound to say, that if it be called by the title of a revival, we must add, that the thing did not live, and only now exists in the copies induced of itself, not in the life it imparted to our development of the oldest and only universal minor art. So close was the imitation of Greek models, so evident the parentages of the most worthy of the productions with which Wedgwood either indirectly or directly endowed the modern world, that it requires a sort of education in classics fairly to appreciate their extraordinary merits. This education being the inheritance of few, the efforts of the builder of "Etruria" were, for the world in general, as might be expected, limited in fortune to the lasting of a fashion, and, for the learned, to the placing of his productions in cabinets. It did not ally itself with English blood; that is to say, it did not enter into life, simply because there was too much of anachronistic character about it. It began, or sought to begin, with the artificially obtained "tastes" of the better classes. This would have been more effectual than it was if those tastes were not in themselves class distinctions, the property of the learned and the wealthy. No art has ever come to life when it was so entirely an importation to a country, as this was. On the other hand, we believe, that for an æsthetic development to live, it must come from the habits and ways of the people, and be purely derived from the time in which they are. Like Taurello Salinguerra's "Moorish lentisks," for the Greekish triumphs of Staffordshire a world of pains was taken to make them thrive; they flourished delightfully for a time, but are now "curiosities," fit to be put under glass in museums, and to be enjoyed by the few. If one goes into a china-shop, it is to see them side by side with the silliest pieces of *rococo* from Sèvres and Dresden, or in painful neighbourhood to some villanous imitation of these, which are baser than those because ever void of their sprightliness in folly.

It is not merely defect of education in the mass of purchasers amongst us that has led to this result, so that the most tawdry toy is allowed to stand near the ceramics of Wedgwood, and thereby testify to the modern want of that sense of Art which is detectable everywhere in the antique world, but now a matter of education,—and so evidently acquired that in common talk nothing is more frequent than assertions that differences of opinion in Art are "merely matters of taste," as if there could be any more doubt of the law as to right and wrong in design than there is in morals. In such a china-shop as we find Wedgwood's most beautiful models, they stand near things so ineffably debased, so astoundingly hideous, so completely void of beauty, and yet so full of pretence to loveliness, and so costly withal, that it is inconceivable that any nation since the

world began did worse than we. They have not taken root. Yet it is strange that they should not have had some influence on articles of common use; unless Art does this, it is next to naught. Miss Meteyard does not tell us how this happens, although she says her hero's works fetch more and more money at every sale.

Does the secret lie in those words of Wedgwood when writing to Flaxman about De Vere (Devere), the admirable modeller of the bas-relief of Proserpine, wherein he objects to the nakedness of the figures of a design of the "Orestes," and like subjects?

There are in this book not more than two things to which we positively object. One of these may be taken to confirm what was said about the non-acclimatization of Wedgwood's art in this country; it is the cover of the volume, which, in its three views, is most unfortunate. The other objectionable thing is Miss Meteyard's Preface, as she calls what is really a summing-up of her labours, and general distributing of thanks to those who have aided her. She has really produced a good book, and fairly finished a "long day's work," yet not such a thing as called for that almost comical self-complacency, or the almost heroic languor after toil, both of which are displayed in every line to which we refer. It is not usual with an author to write, "The success of this crowning work of my long public services," or to "feel" that her "long and self-denying labour has not been wholly barren of result, either as regards the improvement of public taste, or the culture necessary to a true advance in useful and ornamental Art." Probably the avatar of Miss Meteyard will be marked in the chronology of Art; we trust, for her sake, it may be so, although she need not have anticipated the event with such exquisite calmness, or, with so much affected graciousness, have bestowed laurel-leaves from her chaplet on those who are lucky enough to be designated by her as "my staff of artists," "my staff of printers," "my publisher."

Although Miss Meteyard has taken from our hands the privilege of laudation, and, like Napoleon, put the crown upon her own brow, we must not let her promptitude hinder the payment of admiration to those whom she calls her staff of artists. These have, indeed, done well everywhere but in delineating the human figure; here their failure is painful: see Fig. 17. If Fig. 18, an oviform vase, is indeed a fac-simile, the drawings upon it are wrong out of all reckoning; the contour of the vessel is belied by the outlines upon it, which are drawn as if on flat surfaces, hence the figure looks as though it were of glass, intersected by a flat plane with drawings on it. See the same defect in Fig. 12, which is from the object itself direct, and others. Portraits and representations of bas-reliefs, although both of these are far from being so good as they might be, are less open to challenge than the more difficult subjects thus noted. On the other hand, few things of the sort can be more worthy of praise than those which represent the various examples of the potter's art; many of these are exquisitely treated, and claim honour for Messrs. Pearson and Justyne.

Having thus disposed of the book-makers, their merits and errors, let us examine the volume with regard to the subject and its treatment. The text, as it is thus resumed by the author, deals with matters that are now nearly a century old. It was in 1768 that Wedgwood began to reap the fruits of his long and arduous labours. These labours Miss Meteyard's enthusiasm absurdly misrepresents when she writes that they exhibit "the highest

ideality in form, all the painter's magic touch in colouring and effect." The writer knows better than this preposterous statement would lead others to infer; we note it here as a specimen of what the intoxication of admiration may educe from the mind of an otherwise sensible person. Clay from South Carolina, furnished to Wedgwood through Mr. Vigor of Manchester, had, in 1766, put him in the way of successfully producing porcelain of a fine sort; the changes of the world are curiously shown even in this little fact. The place the clay came from was described as very remote, being in the country of the Cherokees, three hundred miles from Charlestown. Its name even was unknown to the potter, or, at least, incorrectly spelt, and its situation uncertain, until he examined the maps in the House of Commons in 1767. He had an idea of getting a monopoly, in the bad, old-fashioned way, but was checked by fears of certain M.P.s for towns that might suffer in their staples. A patent would not do, to ensure an exclusive right to deal with the Cherokees; so that, by Earl Gower's advice, he agreed to send an agent to deal with those interesting people, in place of seeking parliamentary aid to admit his materials duty-free, "or to lay a tax on all imported by others." Let the reader conceive a man in Wedgwood's position now-a-days seriously telling a dependent of a great lord (who, in this case, was no less noteworthy a person than Capability Brown, cautious old gardener as he was), that his life was devoted to the service of the "lady" of the Bridgewater family, as his (Brown's) was to that of the gentlemen! An agent was soon found to go to South Carolina, and into the Cherokee country, for a salary of 50*l.* a year and his maintenance. This was a respectable man; he seems to have done his duty. Clay arrived, but its importance was seriously affected by a greater thing of Wedgwood's doing, the discovery, or rather the perfected application, of another material, the *terra ponderosa*, to the body of pottery. This earth, for a time, answered the purpose in view. In this achievement were associated with the maker, in companionship if not in merit, many men of note, such as Darwin his great crony, Dr. Fothergill, Whitehurst, Bentley and Brindley. The discovery was of vast importance, and not without something of romance in connexion with it. Thus—

"A few years later we know very well that certain German porcelain-manufacturers obtained supplies of this fusible spar in a secret and even surreptitious manner from the *débris* lying round the neglected, yet once celebrated, lead-mines of Anglezark, in Lancashire. They employed a small farmer, who lived amongst the moorland wastes around the mines, to gather the spar which had been long before thrown out of the shafts as refuse, break it in pieces, pack it in boxes, convey it to Chorley, the nearest town, and thence despatch it to Liverpool to be shipped. In order to carry out their operations with the greatest secrecy, the farmer and his wife made their gatherings only on moonlight nights. But at length their movements raised the curiosity of persons passing across the waste; rumours got abroad and reached the ears of Sir Frank Standish, lord of the manor, and a stop was put to their proceedings. To inquiries the man remained silent; and it was only some years later, when upon his death-bed, he told a neighbour that, long prior to discovery, he had carried on the sale of this spar, that it was exported to some porcelain-works in Germany, and that he had sold it for five guineas a ton."

Wedgwood's experiments with this material were recorded in cipher, with the knowledge of his wife and one or two of those friends whom we have named. Bentley, of course, was the guide and director whenever his services were in need. It is noteworthy that the precious spar

thus employed was fetched for the potter out of Derbyshire, although it existed, unknown, at Skelton and at Stoke-upon-Trent, so much nearer his home at Burslem. Pott's queer old-fashioned book on stones was of some service to the inventor, although its Latin required the aid of the indefatigable Bentley as translator, and some of its records were not conformable to the experience of Wedgwood. Dr. Turner furnished colours and varnishes; Whitehurst, the active watchmaker and lead-mine worker of Derby, came with less effect to help, so that, on the whole, tolerably satisfactory progress was made towards the desired manufacture. Abundant failures, the results of which remain, attest at once the ingenuity and patience of our subject.

One thing cannot fail to strike the reader of these volumes in the fact that nearly all the men who were thus urgent and united to aid each other in perfecting a new and difficult manufacture, requiring, as it did, the greatest nicety and skill in manipulation, no less than the widest search for materials, were engaged in doing something else the connexion of which with their common purpose was anything but close. Two watchmakers, one of whom was also a miner, an engineer and coal-worker, a naturalist, two physicians, and a surgeon, acted as volunteers, besides a Carolinian landowner, and some half-a-dozen more who were, wholly or partly, paid for their labour, joined a potter—who had a large trade already, and was busy improving lathes, making tools for them, and in devising stamps and punches—in perfecting a series of experiments in a wholly new branch of ceramic craft. How Bentley, the busiest of all, Dr. Darwin (who devised a colour-grinding windmill for his friend), and Fothergill managed matters in aid of Wedgwood, may well excite Miss Meteyard's wonder. It is surprising that the thing came to any good; that it did so was due to the clear-headed persistency of the central personage of all these men who, dispersed over England as they were, acted upon him under disadvantages such as we can hardly conceive in these days of swift communications and carryings. The "return of post" was slow ninety-eight years ago. A question sent to two of his chemical advisers who lived in London, on the one hand, and in Liverpool, on the other,—orders despatched to a tool-maker at Derby, and in another direction to a miner for clay,—were of necessity tardy in execution and results. This the inventor found to his cost when the London house was set up.

The fortunate end was due—as, in confirmation of the above, one may see throughout this record—to the strong "business habits" of Wedgwood himself, who is frequently found averring that his "present business is too good to be neglected for uncertainties," and that while it remained so he must be content with shorter and easier steps in advance. It was the same in this respect all through the life of the potter. We find him not only packing his letters and sewing them in monthly lots, but regretting the turn of modern taste against nude figures as an objection to a certain design, and, in the most simple and clear-headed fashion, suggesting all sorts of details for labelling and packing goods that are to come to his hands, designing stamping tools and runners for the edges of his wares, and grumbling at the bad workmanship of some early specimens of the same, as well as showing his correspondent how the last would combine in many ornaments, and treating of so delicate a matter as the pressure to be put with these tools on clay, all in the same letter with a friendly declaration that he meant to

pay Bentley's expenses in a journey for consultation; to say nothing of referring to the "Antiquities" of the Count de Caylus for Art matters, and to a book on engine-turning. As to the last, it is curious to observe how the regulated tremulous motion, which is the soul of that exquisite process, was one of the potter's terrors, for the overcoming of which Bentley was applied to and gave valuable aid. In the same letter, which is thus diversely crammed, he invoked the assistance of Bentley's sister to order the interior of the new house at Etruria, and hints at a carpet-bag and a servant, while he promises the lady the best company of his own wife and sister. Evidently a man with the clearest of brains and a considerate temper was he who could foresee so many wants, enter into so many requirements for others. Over their pipes and ale, in the parlour of the village inn, these now world-famous worthies and thoroughly good men talked about their affairs which were not of the secret sort, or were recalcitrant enough to baffle the casual listener while they discussed the powers of many "mysteries" of the lathe,—rose and crown motions, counterpoises, mandarins, tudicles, ramping machines (eccentrics), and the like.

It is amusing to find such a man as this, whose crafty tradesmanship in dealing with Boulton is also noteworthy (this is the Boulton who would not go to, but waited to be sent for by King George himself), instructing such another as Bentley how they must proceed with the London show-room in order "to do the needful with the ladies in the neatest, gentlest and best method." That is, how the new wares must be shown on the tables so as to catch the female eye and fascinate the female brain. He craftily tells his partner that "the nobility and gentry" would not enter a show-room which, having once been used for auctions, would be a place for public resort too common for their exclusive notions and practices: "For you know they will not mix with the world any farther than their amusements or conveniences make it necessary." Here was sound reason for declining otherwise suitable premises at the Artists' Exhibition Room, in Pall Mall, which, we may add, stood near the site of the United Service Club-house. In the year but one after Wedgwood's rejection was thus made, these rooms were occupied for the first Exhibition of the Royal Academy. The potter found others in St. Martin's-lane, which, he says, were "within a 12d. ride from St. Paul's Ch. Yd." and considered desirable because the thoroughfare was not liable to stoppage by drays.

As if these occupations were not enough to tax the energies of a man, our potter now found it necessary to have his leg cut off. The operation was performed in Bentley's presence, when Wedgwood displayed the greatest fortitude under sufferings that must have been intensified and aggravated by the barbarous surgery of the day. This event was announced by a clerk to the London house with quaint equanimity, but by no means with the coldness Miss Meteyard supposes, in the middle of a letter about crates and crockery, orders, and carriage of goods. Worse still befell the brave potter, in the death of his son, "with a complaint in his bowels for some time past," so the clerk wrote of "poor Master Dicky." A valiant, unselfish wife and kind friends—many of whom were of the order, but not of the sort, of "the nobility and gentry" before alluded to—soothed his pains and watched for his recovery. This, if nothing else sufficed to the same end, showed that the man was well with the world and forward in his work.

With a general agreement in Miss Meteyard's

notions about design, and the Art-value of most of her subject's productions, or those which bear his name,—that is, of course, with reservation in regard to opinions which are formed by her through natural, but exaggerated, enthusiasm,—we are compelled to differ in respect to many minor points, as, for example, in what she says about a certain "fluted columnar" candlestick, engraved here as Fig. 4, from the Meyer collection, as possessed of "extreme beauty." It is a pleasant thing to look at, indeed, but solely so on account of the neatness and "sweetness" of its finish, as evidences of care and trained craft; but it is unbecomingly, in the true sense of the term, exactly because it is "columnar" and satisfactory to the educated sense only where its details depart from the quality and character of those of columns, as in the cavetto and panelled form of the base, and the pure contours of the nozzle. Not even the abstractly elegant proportions of the article can redeem the inherent vices of its adaptation from those of a thing which was designed for another use. Miss Meteyard knows this as well as we do, but allows her enthusiasm to carry off her judgment.

The successive introductions and fortunate adventures of Wedgwood with the famous cream, black, and red wares, the use of various patterns, from those of the quasi-idyllic styles which were so common at first, to the severer adaptation of antique and Etruscan designs, are treated of in order and with clearness by the writer. The employment of able artists was most serviceable; among them Bacon, then beginning his professional career, but already in good repute, although living in poor quarters, useful through his primary education as a porcelain-maker; and James Tassie, the modeller, whom Miss Meteyard does not seem to know as the winner of the Boydell Gallery in a lottery. Crofts and Coward were also among the men employed at this period; many of their works remain, and attest their ability. Soon it became needful to employ five or six modellers, in order to gratify "the epidemical madness that reigns for vases" of the Etruscan order, as to which good Mr. Cox went "as mad as a March hare," news of which evokes from Bentley, of all men in the world, some of the oddest advice, of the tradesman's sort, to Cox himself, who sold the "pots" in question.

As to what was the reception of these achievements by the "nobility and gentry," for whose special benefit they were designed, we may here quote a characteristic passage by Miss Meteyard, which will better serve to show the direction of her mind, and her critical judgment, than any summary could do:—

"We gather some idea of the fashionable tone of the day, relative to the social position of trade and gentility, from these somewhat patronizing remarks of Mrs. Delany on Wedgwood. To spend money instead of earning it, or, in other words, the difference between active mental and manual industry and luxurious idleness, made an almost impassable barrier between class and class. Nor as yet was the business of the potter, or the decoration of pottery, ranked as a fine art, or its masters placed in their true position. Wedgwood was the man who did essential service in this respect. Pottery in his hands became a noble art, worthy of the devotion of princes; and his energy it was, in conjunction with that of the other mighty industrial leaders of his time, which increased the productive powers of the nation to an extent before undreamt of, and saved it from some of the natural results of the very idleness which thus affected to praise and patronize."

What must the shade of Fanny Burney think of these remarks upon her "venerable, adored" friend? It is very amusing to find, a

little further on, that which must have gratified Miss Meteyard to quote, in another paragraph from a letter by Mrs. Delany, stating how she went to an auction at Christie's in April, 1771, and saw of the Wedgwood making such things as fairly took her breath away, and led to expressions of how she was "much pleased" with them, and was evidently moved with envy at the costliness of what our author has discovered were articles rejected by the Burslem folks, really things out of date and discredited by improvements.

It is not our affair to make an abstract of this very carefully compiled and well-written book; suffice it that the author has put together many particulars of the greatest interest as regards the state of art and society a century ago. Among the men most in modern esteem who are needfully brought before the reader is Flaxman, the greatest artist of his day, that is, if pure art is of the highest value. Of his connexion with the potter, and of the works produced by both, we have, for the first time, a complete account, including the amount paid for artistic work in those days to such a man by a liberal employer. Three guineas does not seem much for modelling a pair of vases—one with a satyr, and the other with a triton handle. "Four Bass Relieves of the Seasons" were not overpaid for with two guineas. Yet these are the highest prices in a long bill which descends so low as seven shillings for an "Ariadne." It was Bentley who brought the sculptor and the potter together, doing thereby what was infinitely the greatest service of his life-long aid to his friend. With these prices in view, no wonder Wedgwood, when a temporary job offered, wrote to Bentley, "I suppose Mr. Flaxman will be more moderate (i.e., expect smaller payment) than Mr. Smith"; and, a few days later, evinces anxiety to keep him to their own house. By means of these data many hitherto unscribed works, which go by the general name of "Wedgwood," may be given to their right authors. This applies to Flaxman as well as to others, and is as valuable with reference to that triumph of mere copying—the transcript from the "Portland Vase," the whole and true history of which is confidently affirmed by the author to be found in her book. This history is very curious, from where we learn how the old Duchess of Portland, by means of a maid of honour and the ubiquitous Mrs. Delany, who met in reconclite conclave, whispered, shrugged, made signs and notes such as must have alarmed their distinguished circle to the very heart, acquired the treasure from Sir W. Hamilton, and dared not show it to her family, who were wroth at the expenditure of enormous sums on countless follies in bad art. How this inestimable treasure was made seems to have been the cause of much apparently needless discussion by those who were perfectly familiar with the analogous process of cameo-cutting on shells; but how Wedgwood could ever venture to imagine that his opaque and dingy "jasper" would rival the deep lucidity of the glass body of the original, or that purely brilliant opacity of the enamel which overcoats it, to form the figures, is a mystery to us, and might well be included in the history of self-delusions. On the whole, beautiful as was Webber's copy for Wedgwood, it is almost a pity that a glass-maker instead of a potter did not employ him: we should then have had something entirely apt to that aim of complete imitation which was held in view throughout this very singular transaction.

Finally, there is one we must add to our previously-expressed objections to this otherwise admirable, honourably elaborate and most

interesting book; it is, that the writer enters at far too great length into the history and peculiarities of the mere manufacture of the simple fabrics—clays, glazes, and what not, which, while some are already superseded, are fitter for the pages of a chemical journal or trade circular than for such a work as hers, if intended, as is obviously the case, for general no less than artists' use. In short, the author fails to see that the history of the art Wedgwood employed is more valuable than that of the craft he perfected.

Icelandic Legends. (Collected by Jón. Arnason.)

Translated by George E. J. Powell and Eiríkr. Magnússon. Second Series. With Notes and Introductory Essay. (Longmans & Co.)

ONE series of these 'Icelandic Legends' was quite enough; the aroma of the stories is seldom agreeable, and it is not pleasant to contemplate too much the later and fouler period of Scandinavian superstition. Nor is this second volume at all equal in point of literary merit to its predecessor. The Introduction is rather material for an article than a finished essay; and the body of the work is full of matter which was scarcely worth the trouble of translating. The stories of 'God and the Evil One' and of 'Paradise and Hell' are the worst; the 'Stories of Outlaws' are the best. We quote the following:—

"UP! MY SIX, IN JESU'S NAME!

"One autumn, six men went on a search into the sheep-walks, with their leader, who was a strong man and dauntless withal. When they had reached the farthest point of their search, a storm came on with heavy snowfall, and the men lost their way, not knowing where they were. After a long walk, they found that their path led down hill, and soon they found themselves in a small valley, and having by chance come across a house, they knocked at the door. There came out an old fellow, ugly and mighty rascally-looking, and said that it was a new thing for strangers to come and pry about his dwellings, and looked with ungleeful eye on his guests. The leader spoke for them all, and told him how they had happened to come thither: and having told the old fellow this, he stepped inside the door with all his men, without waiting for the inhospitable man's leave or refusal. When they had sat for a while, meat was brought them on dishes, by a young damsel of downcast mien. She whispered to the guests, as she gave the meat to them: 'Eat only the meat at the edge of the dish farthest from you.' They looked and were soon sure that all at that edge was mutton, but all at the other, human flesh. When they had finished, the girl removed the meat from the table, and took the wet clothes of the strangers to dry them, and said, in a low voice: 'Be watchful; do not take off your underclothes, neither sleep!' It was a moonlight night, and the leader lay in a bed in the shadow, and told his comrades that they should not move or speak aught till he called them. Shortly they had gone to rest; the old man came in, and going to the bedside of one of his guests, touched his breast, and said: 'Lean breast and craven.' And in the same way he felt them all, muttering the like wellnigh at every one, till at last, when he came to the bed of the leader and had felt his breast, he said: 'Fat breast and mettlesome.' And, in the same moment, he turned to a nook in the room and seized an axe, and returned with it to the bed of the leader. But the latter, seeing what was to come, sprang nimbly down from the bed, wherein the old cannibal dealt him a blow, missing him, of course; but the leader now seized the axe, and wrung it from the wretch's hand, who roared out: 'Up, my twelve, in the devil's name!' Now the leader drove the axe into the old carl's pate, and it stood in the brain, and he fell dead on the spot. Then the leader said: 'Up, my six, in Jesu's name!' When he had thus called upon his followers, a trap-door was opened

in the floor, and there came up the head of a man. But the leader was not long in cutting it off, and thus he killed twelve of them in the open trap-door of a cellar which was under the floor. After this they found the girl who had waited on them in the evening. She turned out to be a farmer's daughter from Eyjafjörðr, whom the old man had stolen, and would force, against her will, to marry his eldest son. But she bore an untellable loathing towards them all, chiefly because they killed everyone that came to them who had lost his way, and then eat his flesh. Here the men found many precious things, and many sheep in the valley. They agreed that the leader should remain, and one man with him, to comfort the girl, and to watch the sheep during the winter, in order that they might not starve for want of care. But the others returned home. Next spring, the leader brought the girl home, and afterwards, with the consent of her father, married her, and moved everything that he found in the valley to the North: began farming, and lived a happy and lucky life with his wife to a high age."

We have not thought fit to dwell on the more morbid and horrible contents of the work. After 'Oiga-Glum's Saga' and the 'Story of Gislí' these legends taste sour and unwholesome. They fairly represent, however, the decadence of Icelandic folk-lore, and will be coveted, on that ground, for many libraries.

Fire Prevention and Fire Extinction. By James Braidwood. Including *Fire-Proof Structures, Fire-Proof Safes, Public Fire-Brigades, Private Means for suppressing Fires, Fire-Engines, Fire-Annihilators, Portable Fire-Escapes, Water Supply.* With Illustrations, Memoir, and Portrait of the Author. (Bell & Daldy.)

IF we were called upon to name a dozen prominent Englishmen who, in the course of the present century, have been notably fortunate in their lives, we are inclined to think that we should place high in the list a person who, born in an obscure station, failed to raise himself above the middle rank of life, and who, dying ere he had entered old age, left his widow and descendants no possession more valuable than his honourable reputation. Neither titles, nor social distinctions, nor riches, nor any of the other prizes that are most coveted by ordinary ambition, fell to the hand which never cared to snatch them; and up to the hour when he found the abrupt termination of his useful career it would have occasioned surprise at any West-End dinner-table if the person of whom we are thinking had been mentioned as an eminent or highly-successful character. And yet he had few contemporaries who were equally fortunate in life and death. The son of an Edinburgh tradesman, he had scarcely qualified himself to practise as a surveyor when a strong passion for a particular sport—a sport that is never followed save with the hottest enthusiasm—drew him from the vocation for which he had been educated, and made him resolve to seek his livelihood in the pursuit which most men in his position would have regarded merely as a pastime and source of occasional excitement. His one dominant passion was the desire of the fire-hunter, who catches the scent of conflagration from afar, and rushes to the scene of destruction with the eagerness of a soldier for the field of battle, straining every muscle till he has confronted his enemy and brought him to subjection. This not ungenerous impulse fitfully stirs the pulses of most Englishmen, alike in the highest and lowest ranks of life; but in the breast of young Braidwood it knew neither intermission nor abatement. At any hour of day or night his keenest delight was to be present at a great fire, fighting for its extinction with an heroic forgetfulness of personal danger and a corresponding indifference to the conse-

quences of long-continued toil. Compelled by circumstances to work for his livelihood, he would inevitably have been a discontented man had not fortune opportunely placed him in an exceptional position, where he was able, at the same time, to gratify his master passion and turn his energies to good account. Before the end of his twenty-fourth year he had under his control the fire-engines of Edinburgh, in which capital he displayed, throughout ten years of trying service, the same zeal and superb fitness for his perilous occupation which he uniformly exhibited on a larger arena after his appointment to the command of the London Fire-Engine Establishment, in January, 1833.

The occasion of his removal from the Scotch to the English capital was the establishment of the association for the protection of insured property from the ravages of conflagration, which, after thirty-three years of most beneficial though anomalous action, has, in accordance with the provisions of an Act of Parliament, recently made over its stock, staff, and responsibilities to the Metropolitan Board of Works, to which public department the task of guarding London from the incursions of fire has been appropriately assigned. The eight metropolitan insurance companies who were the original founders of the London Fire-Engine Establishment made a happy selection of a captain for their numerous brigade when they invited Mr. Braidwood to fix his abode at their principal station in Watling Street, and direct their new and hazardous undertaking. Nor was Mr. Braidwood less fortunate when he decided to quit the city of his birth and accept the post which placed before him a wider field of usefulness and congenial duty. The man who, in the thirty-fourth year of his age, wins the one post in London which he is specially qualified to fill and has been most desirous of obtaining, may be fairly said to have achieved no common success; and there is no need for biographic assurance that when he had thus gained the height of his ambition James Braidwood was a proud and happy man. As time wore on, his most sanguine expectations with respect to his metropolitan appointment were realized and exceeded. His intercourse with his employers was one of unbroken harmony; under his sagacious and energetic management the brigade, originally established to protect the interests of a few companies, acquired the magnitude, influence and dignity of a public institution; successive governments consulted him and acted on his advice in matters pertaining to his special art; the householders of the capital came to place such implicit confidence in the sufficiency of his arrangements for their security from fire that they left their hundreds of contemptible little parish-engines to rust and rot in their appointed closets; and in the course of years his person, as well as his official merit, became so familiar to the admiring populace that he could not walk the pavements of the town without encountering, in the looks and words of casual passers, flattering proofs of the affectionate pride with which he was regarded by a large number of his fellow-citizens. Men who are young now will recall, forty years hence, the tempestuous acclamations with which the multitude used to greet Braidwood when he drove up to take personal command at a fire of unusual magnitude, and how the mere arrival of the commander used to fill the crowds with an assurance that the flames would speedily be "got under." As a general's services are measured by the list of his battles, so the best record of our fire-captain's career is found in an enumeration of his great fires; and whole volumes of strangely terrible interest might be written concerning those grander fields and more important occasions when Braidwood met his pecu-

liar enemy with unruffled front, and stilled the crackling tempest of hungry flames by his perfect mastery of himself, his art, and all the means intrusted to his hands. He commanded at the fire which reduced the Houses of Parliament to ashes and black ruin; at the conflagration which consumed the Royal Exchange; and at the still more disastrous fire at the Tower. Amongst London theatres burnt to the ground in his presence, and almost as speedily restored, were Astley's, the Olympic, the Pavilion, and the Covent Garden Opera-house. But of all his fires the most appalling, obstinate and destructive was the Tooley Street conflagration, which raged for an entire night, smouldered for fourteen days, and was not extinguished until it had destroyed two millions' worth of property.

It was during the first night of this terrific outbreak that Braidwood met his end, whilst encouraging his firemen with his customary kindness, and directing their operations with characteristic firmness and placidity. He was facing some flames that hissed and roared near a warehouse, which was known to contain a large store of saltpetre, when a high wall in his rear fell with a fearful crash, and buried him at the same instant in which it killed him. His death was not less enviable than instantaneous. He died in action,—as such a man would wish to die. Falling when he was still no more than sixty-one years of age, he was preserved from the bitter experiences of men who, after years of honourable labour, are the reluctant witnesses of their own slow physical decay. Instead of lagging on the stage, he was struck down at a time when his arm had lost no jot of its strength, his nerves nothing of their firmness, his vision none of its clearness; but, on the other hand, the hour of his death was not far removed from the period when, had his life been extended, he would, in the natural course of things, have soon begun to find himself less competent for the discharge of duties which require the fullness of a strong man's strength. Moreover, by dying amidst the havoc of a fire, the extraordinary dimensions and destructiveness of which had roused the imaginations and sympathies of his fellow-countrymen in every class of society, he expired under circumstances which secured him the sweetest reward of heroes—a grave sanctified by the regretful admiration of an entire people. The universal sentiment of the country accorded with Miss Muloch's lines on the fireman's death:—

Death found him there, without
Grandeur or beauty,
Only an honest man
Doing his duty:

Just a God-fearing man,
Simple and lowly,
Constant at kirk and hearth,
Kindly and holy:

Death found—and touched him with
Finger in flying:—
So he rose up complete—
Hero undying.

So many a Hero walks
Dally beside us,
Till comes the supreme stroke
Sent to divide us.

Then the Lord calls His own,—
Like this man, even,
Carried, Elijah-like,
Fire-winged, to heaven.

The editors of the present volume have gathered the opinions of James Braidwood on matters connected with his calling from a treatise which he published in 1830, from certain papers which he read before learned Societies, and from his numerous official reports. As a memorial of an excellent man and public benefactor the book, of course, will meet with the respect due to every attempt to perpetuate an

honest fame; but notwithstanding our disposition to judge it favourably, we cannot do otherwise than think its publication needless and injudicious. Coming in the wake of Mr. Young's 'Fires, Fire-Engines, and Fire-Brigades,' it appears to singular disadvantage. As a contribution to the literature of an art of which James Braidwood was a consummate master, it is of no value whatever.

The Upper Ward of Lanarkshire Described and Delineated. The Archaeological Section, by G. V. Irving; the Statistical and Topographical Section, by Alexander Murray. 3 vols. (Glasgow, Murray & Son; London, J. R. Smith.)

Sussex Archaeological Collections, relating to the History and Antiquities of the County. Published by the Sussex Archaeological Society. Vol. XVIII. (Lewes, Bacon.)

PLEASANT names of persons and localities are connected with the old country of the Damii, the shire of Lanark as we now call it. The Clyde, the Falls of Clyde (Bonington and Corra Linne), and Clydesdale, all bring up memories of natural beauty. Canal and railway give ready access to the principal parts of the old county, in which Wallace struck his first blow against England by killing Sheriff Haselrig. Whether that celebrated personage was either of the position or character which have been assigned to him may still be considered a disputed question. Something of the poetry that hung about him is stripped away by our authors; but there is his portrait in Bonington House, to show you what he was not like, and "a very curious chair," as the guide-book has it, "in which he is said to have sat."

In the days of the patriot the natural beauties of the county were more numerous and less visited than they are now. Materialism has pitched its dusky tents within the region of poetic grandeur, and the heart of Wallace himself, if it could win back its mortal pulses, would beat with pride or with shame, according to his degree of common sense, if he could behold the cotton-spinning mills, the flax, woollen, worsted and silk factories, the foundries and the iron-smelting works which occupy ground where the poor and idle Scots did nothing and were proud of it. If they did anything it was chiefly deeds of violence such as were supposed to become gentlemen. But where murder once went forth in proud array of soldiery, and was called *glory*, or where it slunk by night through covert paths, there is now a wide, noisy, but profitable, camp of industry. Men, and for that matter, women, in even greater numbers, go up to labour, not to slaughter; steam and water supply motive power to ten thousand looms, and the music of a million of spindles accompanies the song of the sons and daughters of labour. The county town of Lanark is, however, but as a village compared with Glasgow, one of the wonders of the empire for work, wealth, hospitality, good deeds,—hard drinking, dirt, wretchedness and villany.

To the history of a portion of the county, described as the Upper Ward, three portly volumes are here devoted. They are chiefly addressed to natives and inhabitants; but are not without interest to readers curious in old lore, old ways, old history, modern results and the aspect of the Upper Ward from their own down to its present subjection to provosts, bailies, and the kirks, Free and Established. The Damii probably wore gold on their necks, and might have weighted their weapons with lead if they had only known how to have got at it. Some

of the districts were of better repute than others. Crawford was given (in the seventeenth century) to jollity and meanness. At bridals there were so many pipers and such crowds of rollicking guests, that paganism seemed to be returning, and the kirk prohibited marriage under such circumstances. The meanness is illustrated by the record of a Crawford kirk collection, when there was found in the plate, "two bad shillings, a thrie, and a babie."

Symington was not behind Crawford in unenviable distinction at the same period. In Symington Kirk there was no glass in the windows, no pulpit, no seat for the precentor. The school was as badly off as the church; there was "no encouragement for a school-master, except four bolls of meal." This was hardly enough to give the pedagogue sufficient strength wherewith to thrash the Symington students. Be this as it may, there were often loud and lively scenes to be witnessed in the kirks; to wit, in that of Wandell and Lamington, when Lord Douglas sent down his nominee, Mr. McGhie, as minister, and the Laird of Lamington disputed the nomination. The minister got access to the pulpit only by "shooting and ramforcing the doors" of the kirk; but when Mr. McGhie was about to preach "he was barred by the Lady of Lamington and some other women, who possessed themselves of the pulpit in a tumultuous and disorderly way; her ladyship declaring that no dog of the house of Douglas should ever bark there." The ladies of Scotland have ever been strong-minded women, given to stand on their rights. In many villages females have their *bonspiel*, or matches at curling, as well as the males.

In ancient days, when Scottish ladies of high degree thought it no disparagement to live with kings and yet not be their queens, it cannot be said that they were "tied up in godly laces." Lanark Ward records preserve the names of these light o' loves. Things, however, seem to have improved in modern times. Thus, in 1835, we find the minister of Biggar giving "his people credit for keeping well all the Commandments but the seventh"; but the minister is "proud" to inform the world that "the prevalence of the evil was among the poorer and more independent classes of the community." Such a minister would have been "proud" of that candid woman who said that if she had broken the most of the Decalogue, there was one part, at least, which she had preserved whole,—that in which it is said, "Thou shalt not covet thy neighbour's wife!"

To general readers the history of the stiff-necked Marquis of Douglas and his wife, a proud Huntley, will, perhaps, be as attractive as any portion of these volumes. They were staunch Romanists, and sadly they vexed the orthodox presbytery, who thought to bring them to a proper state of mind by condemning them and their family to listen to a brace of Calvinistic sermons daily, besides exhortations and exercises for their souls' health. How they went and would not go, listened and did not listen, were alternately meek and mocking, subdued or defiant, took the covenant and disregarded it, were heavily mulcted, bought themselves off by apparent submission, and sinned again on the earliest opportunity, is very well narrated in these volumes, though, indeed, the whole story was previously told in ample and amusing detail in 'Chambers's Annals of Scotland.' Again, those who are curious in witch literature may add something to their knowledge by studying the chronicling of witch doings, and of the fatuity of the cruel fools who delighted in punishing them, as may be found in the work before us.

Of family history, too, there is much scat-

tered through the book of a romantic nature. One incident refers to a "narrow escape." The bearded Lord of Covington lay in his open coffin ready for burial, waiting only the coming of friends and the usual jollification, when his great-grandchild, who was with the watchers, whispered in his mother's ear, "The beard's wagging!" And so it was, and the stout old gentleman was got up, and while he was dressing the funeral guests were shown into another room, into which the supposed dead lord walked, leaning on the arm of the minister of the parish. There was some consternation at first, but equanimity was restored, the laird sat down at the head of the table, and the roystering fellows made a night of it!

We have said enough to show something—very little however—of the quality of these volumes. The stories and anecdotes are but the garnish to very solid dishes, and these latter are for the digestion of those who are interested in the many *ologies*, sciences, statistics, &c. connected with the Wards of Lanark. We pass from them to the 'Sussex Archaeological Collections.'

Turning over the leaves of this pleasant volume is like passing from one pleasant Sussex locality to another. The Rev. Mr. Mitchell takes us to Bosham Church, and, uncovering a spot which for eight centuries and a half has been traditionally spoken of as the burial-place of Canute's little daughter, he shows us the skeleton of a child which may well have been that of the daughter of the great king. Then, Mr. Lower, after snubbing Mr. Llewellyn, introduces us to the old Sussex iron-works, which built up fortunes for modest men who embarked their little capital in them, and made Croesuses of land-owners who, possessing much, ventured for and obtained more. As we turn from the iron-works and their masters, Mr. Durrant Cooper has a few words to say about the participation of Sussex in Jack Cade's insurrection. The rising, in Sussex, Mr. Cooper tells us, partook very much of the character of a military and duly authorized levy and array. One trait of the times, when the affair was over, and the plunder made by the insurrectionists was in the hands of the Government, is worth recording. Government did not restore it to its owners, but set it up for sale, directing, however, that when a rightful owner made an offer, the official vendors "should make him be preferred in the buying thereof before any other person, and that they should sell it to him for more or less cash than it be worth, after their discretion." Paternal government, that knowingly received stolen goods and sold them to the lawful proprietors! Next, we encounter the Rev. Mr. Turner, and learn from him how the Sussex folks about Pevensey were taxed in Henry the Third's time, to keep up the walls and water-gates of the marsh against the sea. From the unquiet seaboard, we pass through the Hardham Priory of Canons of St. Augustine, led by Mr. Gordon Hills, and thence to the Museum in Lewes Castle, where Mr. Lower again meets us, and points out its contents. Down to the sea again, to Appledram, a name which antiquaries describe as meaning a town on an estuary, but which Mr. Lower more reasonably interprets as *Apple-tree-home*. Some persons may hesitate to approach Mr. Butter with only a Sussex topographical catalogue in his hand; but there is one strange matter, at least, in the mass. In 1752 Mrs. Whale and Mrs. Pledge were hanged at Horsham, for poisoning the husband of the first-named. "Mrs. Pledge first attempted to poison him by roasting spiders to put into his beer; but his wife relenting, some white arsenic was afterwards procured by Mrs. Pledge and Whale's wife, and, mixing it with hasty pudding,

while he was intently gazing on his child, he ate it, and died within a few hours!" The wife's relenting at roasting spiders and adopting arsenic, and the manner of the murder itself, are worthy of note. There is a whole history in it, as there is in a capital witch-story, where the bewitched seem to have been the bewitchers, destroying their own goods, burning their houses, and pelting themselves with horse-shoes. This, they appear, under confession, to have done "under the colour of Religion," but what colour is beyond conjecture. We are in healthier company riding, by favour of Mr. Evershed, with Charles the Second through Sussex, during his flight, in 1651,—a royal ride in which all went well, because the king *would* go forward, and not back, as Wilmot once proposed. They who would learn something of the celebrated Shirleys may sit down in Isfield Place, and listen to Mr. Turner. How the lid of the tomb of Gundrade, daughter of William the Conqueror, ever became the base of the tomb (in another church) of Edward Shirley, even Mr. Turner cannot account for. Later, in 'Notes on Sussex Castles,' by Messrs. Cooper and Lower, we meet with the Earl of Arundel, in 1382, complaining to the King of persons who broke the doors, gates, windows, &c. of the Castle of Lewes, broached two casks of his wine, wasted all they did not drink, burned his rolls, rentals, and muniments, and committed other enormities! This was the Earl whom Richard the Second knocked down in Westminster Abbey at the Queen's funeral, and who lost his head in Cheapside. He was born to bad luck. We come to happier people in the "Stapley Diary,"—a yeoman's record of the last century, who had such regard for "as good a horse as ever man was owner of," as to bury him with honours. "He was buried in his skin, as being a good old horse." We pass by the Kitchen Midden at Newhaven, as Mr. Lower remarks that the flint flakes with the conchoidal fracture are not the work of men but of fire. As Mr. Cooper opens the Passage-book of the Port of Rye, 1635-6, we follow his finger over many curious entries of persons going to or returning from the Continent, and smile at the fact of so many tutors of travelling young gentlemen being Scotchmen. With not more serious matter does Mr. Evershed deal in his legend of the dragon-slayer of Lymington, where a grave is pointed to as that of a slayer of dragons. Mr. Evershed slays the story itself by saying that "dragon" is British for a "chief" or "sovereign"; and such may have been the animal that the so-called slayer may have overcome in battle. Pen-dragon, we think, implies *sovereign*, being literally *head-chief*, or chiefest of those who are chief. In the Notes and Queries, at the end of the volume, there is enough to make the Society of Antiquaries lively for a month.

Egypt: from the Conquest of Alexander the Great to Napoleon Bonaparte. An Historical Sketch. By the Rev. George Trevor, M.A., Canon of York. (Religious Tract Society.)

THE period which Mr. Trevor has selected for his historical survey is one during which Egypt has been under many dynasties,—none of which sprang originally from her own soil. Indeed, to those who take pleasure in observing historical retribution, it must be a striking reflection that this country has been subject to foreign powers, or to dominant races unassimilated with the original stock, ever since the days of those mighty kings who were wont from time to time to oppress the children of Israel. It is true that subjection to a foreign race has become the normal condition of many eastern countries; but there is, perhaps, no region in

which ancient splendour and long-continued modern degradation are so harshly contrasted as in the land of the Pharaohs. Canon Trevor puts this in a striking manner in his introductory chapter:—

"It is hardly possible to imagine a greater contrast than is presented between the *Monuments* and the *History* of Egypt. The monuments tell of a native monarchy flourishing among the great empires of the East; its kings little less than demigods; its priesthood endowed with a sanctity revered in distant lands; its chariots and horses pouring out to battle under the banners of a thousand gods; the nations of the earth bringing tribute; and art and luxury carried to an extent only possible to a numerous population, with abundant material resources and a high mental development. On the date and duration of this splendid period the monuments are dumb. They witness what Ancient Egypt was; they know nothing of her rise, progress, or decay. Their testimony is confirmed by the position of Egypt in the Holy Scriptures, where her rulers are found showing hospitality to the father of the faithful, or reducing his descendants into bondage. Still, we only know that Egypt was a great power before Israel was a nation. It gleams out of a remote antiquity with a splendour that cannot be denied; but the splendour is a pre-historic memory, separated from authentic chronology by a gulf, which nothing but the Bible can span. All that we know of it is, that it existed before Moses, and perished about the close of the Old Testament. With the first page of secular history Ancient Egypt is already dead. The Pharaohs have become a tradition, the temples and altars are shrouded in mystery, the fleets and armies have disappeared, the people are reduced to inexorable servitude."

When the splendid empire of Alexander was divided among his generals, and Egypt fell to the lot of the Ptolemies, she became simply an offshoot of the Macedonian tree, and her people were, to all intents and purposes, a subject race. So, under Greek, Roman, or Moslem they have ever since remained. The glory of the Ptolemies, the fascinations of Cleopatra, the pride of the Alexandrian sages, were all Greek, and with them the native Egyptian had nothing to do. When the Cæsars carried the arms of Rome far beyond anything that an old republican senator could have anticipated, their conquests did not affect the original possessors of Egypt, except inasmuch as they exchanged Greek for Roman masters. The Saracen invasion, and the ultimate subjugation by the Turkish branch of the Mohammedan hordes, were equally indifferent to the son of the soil, who was a servant and a child of servants, and preserved no record of his powerful ancestors save the gigantic architectural remains whose history was as little known to himself as to his tyrants. If there have at times been symptoms of revival, they have only appeared in the temporary successes of the Mohammedan rulers. Japhet triumphed over Ham for a time, then Shem had his turn, and his descendants wrangled and fought for the only corner of Africa that is known to have ever been civilized and great. It gave little happiness to the poor native, despised both for his race and for his religion, that two Circassian rulers in succession should repulse the fiery Tamerlane, for the real Egyptian was not a free citizen, and had no share in the glory or profit of the triumph. In one respect, however, the native Christians would seem to have benefited by the fall of the Byzantine Empire and the success of the Ommiad dynasty: they were no longer subject to the worst of tyrannies, that of an arbitrary ecclesiastical head. The Mameluke rulers of Egypt were at that time independent of Constantinople, but their Christian subjects had been held in moral subjection by the patriarch. Now that the prestige of Constantinople was gone, the struggles of rival sects ceased to be fanned by

metropolitan intrigue, the patriarchs were chosen without Byzantine interference or political feeling, and the consequence, as Mr. Trevor remarks, was a marked accession of influence to the see and city of Alexandria.

How far the modern Coptic Christians partake of the old Egyptian blood it would be difficult to say, for it must be remembered that in the palmy days of the great Egyptian Church the country had for many centuries been subject to Greek and Roman rulers. There is reason, however, from an analysis of the characteristic features of the Copts, to suppose that they have much less admixture of foreign blood than might reasonably be expected. In power and position they have fallen very low, for the Moslem rulers have usually subjected them to severe disabilities, and have taken every opportunity to plunder them, whenever, by their superior industry and intelligence, they have made an effort to rise in the social scale. This has been the practice of Mohammedan conquerors in most countries, and it must be admitted that they have not been altogether singular, for the mediæval sovereigns and barons of Western Europe treated the Hebrew traders and their own subject populations pretty much in the same way. At present, the ancient Egyptian Church is represented by about a hundred and fifty thousand Copts, and the glory of its rich sees and innumerable shrines has departed for ever.

Yet there are, at the present time, symptoms of revival in Egypt, which may perhaps be a happy augury for the future. The dynasty of Mohammed Ali has succeeded in raising the country to a position which renders it practically independent of the Porte. It is, indeed, only by the influence of England that the Sultan of Turkey has retained even a nominal superiority. In the mean time, though compelled to send tribute to Stamboul, the Pasha of Egypt rules his own territory pretty much as he likes, and the superiority of his rising country to the fading Turkish Empire is every day becoming more clearly apparent. The scientific aid of Europe has been invoked, and railways have pierced the land of Goshen, while the canals of ancient times are being re-opened, and will once more convey the stores of Europe to the Eastern seas. It will be no easy task, no doubt, for the future Moslem rulers of Egypt to adjust the disputes which must arise between the heterogeneous races which occupy their dominions; but if an enlightened spirit guides their internal policy, the activity of their Christian subjects may at length be aroused, and Alexandria may again become what she has been before, one of the most thriving commercial ports of the civilized world.

Annales Monastici. Vol. III. Annales Prioratus de Dunstaplia (A.D. 1—1297). Annales Monasterii de Bermundeseia (A.D. 1042—1432). Edited by Henry Richards Luard, M.A. Published by the Authority of the Lords Commissioners of Her Majesty's Treasury, under the direction of the Master of the Rolls. (Longmans.)

ALTHOUGH the quiet country town of Dunstable is now known for little else than the excellence of its straw-plaits, and the superior delicacy of the larks from its neighbouring downs, time was when it was a place of some—perhaps we may even say, considerable—note. The broad downs on which it is situate, and from which, no doubt (whatever may be said about "Dunning the Robber," in legendary lore), it takes its name, "Market-on-the-Downs," were the scene of many a joust and tournament in the days of Henry the Third and Edward the First, and

probably down to a later date. It had, too, its Priory (dedicated to St. Peter) of Augustinian, or Black, Canons, a royal foundation of Henry the First; a group evidently of well-fed and not over-worked ecclesiastics, who, though comparatively few in number, were endowed with plenty of well-tilled acres, and were persons of no little importance in their own immediate vicinity; seeing that they were owners, by the munificence of their royal founder, of the township in its whole length and breadth. Their Priors were men of even high dignity and consequence; they had their own gaol, gallows, tumbrel, and pillory, with power of life and death within the limits of their jurisdiction; and at the Itor, or circuit, they took their seats by the side of the King's Justiciars, as brother-judges with them in Eyre.

All this is now of the long past: to say nothing of the former greatness of the Black Canons of Dunstable, we have absolutely no memorials to testify to their former existence even, beyond some occasional notices of their manifold writs, and suits, and plaints, in other chronicles and the legal records of the Plantagenet days; the crumbling, and daily diminishing, walls of their once stately dwelling-place; and the carefully-entered Annals of their home, between A.D. 1131 and 1297, still preserved—and only just preserved—in the diminutive, shrivelled, half-burnt, parchment volume belonging to the Cottonian collection, and known as MS. Tiberius A.x.

This manuscript meets us in such sad guise, from the fact that, after having tided safely over the great break-up of the Reformation, and passed through Puritan times uncondemned to the flames, it suffered very severely from that most careless of accidents, the fire in the Cotton Library, at Westminster, in 1731. Fortunately, however, previous to that date, a careful transcript of it had been made by the pen of Humphrey Wanley; and from this Thomas Hearne printed his edition of the 'Dunstaple Annals,' in 1733. The original manuscript was then supposed to be hopelessly injured by the fire, and Hearne made no attempt to examine it. Since then, however, at a comparatively recent date, by dint of pains and ingenuity, it has been stretched and mended; and from it, thus revived, aided by Wanley's transcript (MS. Harl. 4,886) in the case of some few words and passages which the fire has rendered illegible, Mr. Luard has produced his present elaborate edition of the work. It will never, of course, equal Hearne's edition (limited to 200 copies) in rarity; but in reference to accuracy and editorial painstaking, in the way of elucidation of difficulties, omissions, or obscurities in the text, Mr. Luard's edition entirely distances its predecessor, and leaves no reasonable desire of its readers unsatisfied.

Hearne, though replete with much learning of various kinds, was possessed of but little ingenious research, or power, by way of inference, of turning his acquirements to account; so we are not surprised that he failed to discover what Mr. Luard has very skillfully proved from internal evidence, that these Annals, from the beginning to the end of A.D. 1241, were compiled by Richard de Morins, formerly Canon of Merton, in Surrey, and fourth Prior of Dunstable, between A.D. 1210 and the year above mentioned. The portion between 1242 and 1297 is by various hands, now unknown; and upon the remaining blank leaves of the volume some miscellaneous entries are made, contemporary with the events there described, between A.D. 1302 and 1459.

Unlike many among the monastic Chronicles, which give little or nothing in reference to the

private history of the house in which they were penned, but enlarge solely upon the politics, whether national or continental, of the day, the "Annals of Dunstable" are replete with notices of the passing fortunes of the Convent; with accessions to its possessions, and ever-recurring proceedings at law, with the view of either securing or increasing them; disputes with the townspeople and tenants; admissions of fresh inmates, deaths, desertions, or secessions of others, and elections of Priors and other officials. "But," as Mr. Luard says (Preface, page xv), "the authors have by no means confined themselves to detailing the events immediately before them. Very few contemporary chroniclers throw so much light on the general history of the country, and what would scarcely be expected, on foreign affairs as well as those of England. Many historical facts are known solely from this Chronicle." These Annals, in fact, the moment that the chronicler ceases copying from Ralph de Diceto, about the year 1200 (p. 27), become of striking interest.

Taking a few of the passages in chronological order, as we ourselves run through the volume, we leave Mr. Luard's admirable Preface in its integrity, commending it to the notice of those who take an interest in our remote history, whether political or social.

A description like the following, of the first landing of Prince Louis in England in aid of the Barons against King John (A.D. 1214), is, probably, nowhere else to be found—(we translate from the Latin):—

In the mean time, Louis, with many counts, barons, castellans, and knights in arms, and the routiers of France, landed in England, on the Isle of Thanet (Thanet), in very bad weather; so much so, that his ships, from having been dispersed by the boisterousness of the waves, could hardly come up with him by the day but one after. When he was about to disembark from the ship, a priest met him with a crucifix; and in attempting to leap upon the land, he leapt into the water; and so, after kissing the crucifix, he entered the island. On the next day he passed across to Sangwiz (Sandwich), where he very kindly addressed the English who met him, inhabitants of that place. King John went to meet him with a strong force; but upon seeing him, by the advice of William Marshal, he withdrew, not having full confidence in his troops.

Eight years later we have this record:—

In the same year (1222), just after Easter, Stephen, Archbishop of Canterbury, in April held a Council at Oxford, where the decrees of Lateran were read aloud and ordered to be duly observed. On the same occasion, a certain deacon was condemned to the flames, after being degraded, who, through love for a certain Jewish woman, had been circumcised; and by the King's bailiffs, who were there present, he was taken out of the borough and burnt. Another deacon also was there degraded for theft. In addition to this, a certain woman who had made herself out to be Saint Mary, and a young man who had pretended to be Christ, and had pierced his own hands, and side, and feet, were walled up (alive) at Bannebire (Banbury).

We read of a singular thunderstorm in London, occurring in 1230:—

In this year, while Bishop Roger was celebrating solemn Mass at St. Paul's, London, on the day of the Conversion of St. Paul (25th January), just after the Gospel there fell a flash of lightning upon the tower of that church, and the fire proceeding from the lightning made its way on every side; so that, from fright and astonishment, the clergy fled from the choir; and in consequence of the multitude of people rushing out, some were crushed to death. The bishop alone, remaining there unmoved at the altar, pursued the duties of his office. As for the fire, it disappeared after a time, and then reduced a windmill to ashes, which was situate on the eastern side of the City.

The "Capella de Boisars," in which Hubert de Burgh took refuge (p. 129), and which Mr. Luard mentions as "Boisars Chapel" in the marginal note, was in reality the chapel of Brentwood in Essex, "De Bosco Arso" in some of the Chronicles.

In 1233 we read of trouble within the Priory walls:—

In this year Walter and John, Canons of Dunstable, the former a professed brother, the other not professed, took their departure without leave: getting out through a broken window, and then leaping over the monastery walls, they assumed the habit of the Friars Minors at Oxford; whereupon the Prior of Dunstable, both at Oxford and elsewhere, had them denounced as excommunicated. Upon this, Walter, with three Friars of the Minorite Order, returned, and in Chapter at Dunstable, humbly begged to be absolved, and made oath that he would obey the Prior in all things, saving his order. And so he was absolved by the Prior's order, in the way of corporal discipline, administered by three Canons; after which, he was verbally absolved by the whole Convent. Last of all, he received an injunction, first to restore the writings and clothes which he had taken away; and then he was to have a year to make up his mind whether, seeing that the Minorite Order is stricter than ours, he would remain there, or return to our Order, where he would find favour. As to John,—being found in London by the Prior, he received a similar absolution.

In the year 1254 we read of a "most cruel plague" among horses, which was known as the "Tongue disease" (*malum linguæ*). Numbers of horses died from it both in France and England, while many others were rendered "infirm and useless, and hardly possible to be cured."

In 1257 we find Queen Eleanor (of Provence) making her temporary abode at the Castle of Tutbury, having been obliged to leave Nottingham, whither the King had sent her, "because she could in no way endure the smoke of the sea coal." It was for a similar reason, if we recollect aright, that the consumption of sea coal within the walls of the city of London was prohibited at a much later date.

There was a singular scarcity of corn in the year 1258; and the Priory, which in most years was abundantly supplied, seems to have been reduced to considerable straits:—

At this time, through failure of the corn, we had to buy twelve quarters and a half of wheat; namely, three quarters at 8s. 6d. per quarter, and the rest at 6s. the quarter. From the Feast, too, of St. John the Baptist (24th of June) we had to purchase all our drink, at the rate of 6s. 8d. per quarter for common barley. In the meanwhile, too, we paid nine marks for two tuns of wine, with which we supplied the Convent; and greatly did it profit us. And be it known, that we expended 80l. and more this year in bread, drink, and provender.

The following narrative we do not remember having met with in any of the early Chronicles of London:—

In the same year (1259) the Dean and Chapter of London gave to Sir John de Crachale, Archdeacon of Bedford, and then Treasurer to the King, a prebend in the Church of St. Paul, which had before belonged to Master Rustand, but was then vacant, he having assumed the monastic garb. But after this, there came a certain Roman, with letters from our lord the Pope, expressed in marvellous form; and at last he gained his cause, and was installed on the first Thursday in Lent. But immediately after he had entered the churchyard, with two companions of his, they were met by three young men, quite unknown to them, and the one who had been so installed was murdered near the gate. One of the others fled as far as West Cheap (Cheapside), where he was slain before a multitude of people; while the third fled to the other side of the Bridge, and was there killed, and his head struck off. And this massacre took place about the hour of tierce (9 to 12 A.M.); nor was there any one to

oppose the said malefactors or raise the hue against them, or to lament the persons so put to death.

In A.D. 1263, as one of the preliminaries to the final outbreak between De Montfort and the royal family, Prince Edward thought proper to commit the following singular act of dishonesty and violence:—

About the Feast of St. Augustin, the Apostle of the English (26th May) in this year, the King and Queen went to the Tower of London, Sir Edward remaining at the Hospital of Clerkenwell. Now, when all of these were destitute of money in their coffers, and there was no one in London to lend them one halfpenny, Sir Edward, being unwilling to be thus disgraced, on the Feast of the Apostles Peter and Paul, taking with him Robert Waleran and many others, went to the New Temple, the doors of which were shut. The keys, however, being given up at his request, he said he would see the jewels belonging to the Queen, his mother, there; and so, after sending for the keeper, fraudulently entered the treasury of the Temple, with his people. Here, by means of iron hammers, which they had brought with them, they broke open certain of the chests, and taking much money from them, to the amount of 1,000l., the Prince had it carried off. Upon the perpetration of this crime, the citizens of London rose against him, and certain of the King's Council who were staying in the City, to such an extent that they attacked the hostel of John de Grey, without Ludgate, and carried off two-and-thirty of his horses, and whatever else they could find; John himself making his escape with the greatest difficulty across the river Flete.

The present Chronicle, we may here remark, is not, in general, very favourable to the character of Prince Edward; and it twice records the fact that at tilt and tourney, in some places abroad, he came to grief.

Under the year 1275 we meet with the following notice:—

In this year we took of the bent (*plicatis*) pennies of Saint Fremund to the weight of one hundred shillings, and bought oats with the same.

These pennies, it will be borne in mind, were of silver, one-twentieth of an ounce in weight: the whole expenditure, therefore, on oats on this occasion would be sixty ounces. It was a common usage in the Middle Ages for diseased persons to be brought by their friends to a shrine containing the relics of a saint; and then, after measuring the length or circumference of the shrine with a fillet, to pass it round the body of the patient, in hopes of a miraculous, or at least a speedy, cure. After this "measuring" had taken place, it was frequently the custom to bend a silver penny, in the Saint's name, over the diseased part of the body, with the same object, no doubt. The processes of both measuring and bending were occasionally performed at a distance from the shrine, if the patient was unable to travel so far. Sometimes, also, the patient would have this bent penny afterwards gilded; but the coin was not retained by the patient "for luck," but passed into the possession of the Church.

Servare assize (p. 267) we do not agree with Mr. Luard in rendering "to pay the assize." In our belief it means "to keep the assize" of measure; the fine being evidently inflicted on the vill because the alewives (not "brewers") had neglected to measure their malt in lawful bushels, and had consequently produced ale below the legal standard of goodness.

John Duraunt was an opulent inhabitant of Dunstable, whom we read of on another occasion (p. 313) as giving a grand entertainment on his two sons' inepting at Oxford in Arts. Whether the Prior was one of the party at that feast is not stated; but Duraunt was able to make sure of his presence in at least one instance:—

On the day of Saints Vedast and Amand (6th February, and not 26th, as given in Mr. Luard's

note) John Duraunt of Dunstable made a great feast at Dunstable for the lord of Cadendone, and certain great persons of the neighbourhood; where our Prior was present, against the usages however in our monastery approved. But the Prior was excusable in so doing, seeing that he was indebted to the said John in a great sum of money, and therefore did not dare give him any offence.

In the following passage, we see probably a cunning contrivance to defeat the then recent Statutes of Mortmain; the feoffment from Thomas the Porter being taken by the Convent in secret, no doubt:—

In this year (1286) for the purpose of impeding the machinations and evil designs of the Friars Preachers in Dunstable, we made Thomas our Porter buy the messuage which once belonged to Robert Franceys in Dunstable, close adjoining to the courtyard of the said Friars; and then from the said Thomas we took a feoffment of the messuage aforesaid; our purpose being, that the said Friars might not enlarge their boundaries against our will. And the deed that was executed between the said Thomas and the seller of that messuage is in the Court of our lord the King. But through this contract, what with yearly allowances and other things, we have been grievously charged.

In A.D. 1288, we meet with what would be a case of "plucking" in modern phrase, the refusal of admission to the House and Order:—

In this year we repulsed Walter de Sewelle from making profession, because he was not sufficiently well versed in letters; seeing too that there was levity in his behaviour, and he was a troublesome person in many ways. Brother Walter de Badesledene, Richard de Saint Alban's, and Roger de Dereby, who had stood with him as probationers, were admitted to make profession.

An interesting account is given of the night's repose at Dunstable of the corpse of Eleanor of Castile, on its way from Hardeby, in Lincolnshire, to its final resting-place. Contrary to the tenor of most of the contemporary Chronicles, not a word is said about the virtues of the deceased queen, but a hint rather is given of extreme rapacity on her part:—

In this year (1290) on the 5th of the Calends of December (27th November) died Eleanor, Queen of England, and the King's consort, a Spaniard by birth, who gained possession of many and the very best of manors. Her body passed through our place, and rested there one night; and there were given to us two precious pieces of cloth, namely, *baudekins*. Of wax, also, we had eighty pounds, and even more. At last, her body was buried in the tomb of King Henry, at Westminster, on the 16th of the Calends of January (17th December). And when the corpse of the said queen was passing away through Dunstable, the coffin stood still in the middle of the market-place, while the King's Chancellor, and the nobles then present, pointed out a suitable place, where afterwards they were to erect, at the King's expense, a Cross of wondrous size; our Prior, who was then present, sprinkling holy water on the spot.

This Cross was finally destroyed by our religious iconoclasts of the seventeenth century: one of the sad and numberless penalties that ecclesiastical Art had to pay when brought into contact with Puritan rule.

In 1294 the monastery received a visit from a not very welcome guest, to all appearances:—

In this year a certain Nuncio of Pope Celestine passed through our place, on his way to our lord the King, in Wales; and we gave him, in the way of procurations, twenty shillings for a single day. We also gave up to him the cellarer's palfrey, for him to ride upon; otherwise he would have put our monastery under Interdict. Also, on returning, he had another twenty shillings for the same.

In the same year, Dunstable, both Canons and townsmen, had to suffer from another, and a rather singular, inconvenience. Prince Edward of Caernarvon was a child, but ten years old at

this date; so he must have had of necessity some powerful coadjutors in the gastronomic art:—

In this year the market of Dunstable, as well as the other markets, and the country all round, was injured enormously by the long stay which Edward, the king's son, made at St. Alban's and at Langley, for not even 200 dishes per day were enough to suffice for his kitchen; and whatever was consumed either by himself or his people he took without paying for it. His servants carried off all food on its way to market, and even cheese and eggs; both whatever was for sale and what was concealed in the houses of the townspeople, and not for sale; and would hardly leave any one so much as a tally. They carried off bread and ale, too, from bakers and alewives, and compelled them to make bread and ale for them where they had none.

Another passage, also bearing reference to the dinner-table of a personage of high station,—Earl Edmund, first cousin to Edward the First,—and we close our extracts from this interesting Chronicle, valuable alike for its historical revelations and for its amusing details of what may be called the social-life gossip of those days:—

In the same year (1296) our bailiffs at Dunstable caused a certain cart to be stopped in the market for its amercement, or toll; in which there was placed after it was so stopped some fish bought at Dunstable for the dinner of the Earl of Cornwall, at Berkhamstead. Now when the earl came to know of this, he annoyed us and our bailiffs as much as he possibly could, so that we could not enter upon his fee without receiving great injury or insult. Of our swine, feeding upon our common at Chaltone, he seized seventeen, and in spite of all surety and pledge, detained them. He also charged the Prior and his bailiffs with having insulted him, and would not allow them in any way to excuse themselves in this respect.

The 'Annals of Bermondsey,' published now for the first time, from the single manuscript which contains them, MS. Harl. 231, in the British Museum, form a work of less magnitude and importance than the Dunstable Annals, but of almost commensurate interest, so far as they extend. The period embraced in them is A.D. 1042—1432, and Mr. Luard is of opinion that the manuscript was probably written—a compilation from older materials, of course—about the latter date.

Bermondsey Priory (converted into an Abbey in the latter part of the fourteenth century), the site of which is now covered with densely populated streets, manufactories, and tan-yards, was founded in the year 1082, by Alwin Child, a citizen of London, for Cluniac monks, from the monastery of La Charité de Dieu, on the Loire; which continued without interruption to supply its Priors until 1372, when, in consequence of the sequestration of the revenues of alien priories, all intercourse between Bermondsey and La Charité ceased.

Mr. Luard has omitted to notice, in his otherwise exhaustive Preface, the marvellously-rapid succession of these Priors, thus systematically transplanted from French to English soil. We find that the number was no less than sixty-eight between A.D. 1082 and 1372, nine of whom were promoted, and six resigned, leaving fifty-three to die while holding office; at times, two or three within a single year. The average life, in office, of the Priors of Dunstable, was about twenty-four years, whereas that of the Priors of Bermondsey, during 290 years, we find, on reckoning, was no more than four years, three months, and five days. We have to come, therefore, to the conclusion that the people of La Charité made it a rule to select their most aged, decrepit, and infirm members for this unenviable promotion; or else, that the unfortunate foreigners received anything but fair play at the hands of their

English obedientiaries and brethren; or that the locality itself must have been the cause of this marvellous fatality among them. The latter is at once the more charitable and the more probable solution. The Priory was built in what, in all probability, turned out to be neither more nor less than a pestilential swamp; miasma would do its fatal work, the oft-recurring deaths of these doomed Cluniacs being the necessary consequence.

The earlier part of these Annals is mainly borrowed from several of our best-known early Chroniclers, as Mr. Luard, with highly commendable industry, has pointed out in the inner margins of the text; while the latter portion, giving many particulars as to the private history of the monastery, is original, or at all events drawn from sources which are no longer known to exist. The work contains several passages as curious perhaps as any to be found in the Dunstable Annals; but, as we have already overstepped the limits which we had originally assigned ourselves for this notice, a merely passing mention must suffice for the dream (p. 432) which saved our first Henry from the lions; the fact of all London having been burnt (A.D. 1132), through a fire which began in the house of Gilbert Beket (father of the Archbishop); the inundation of the Thames in 1294, overflowing Bermondsey and the Tothill district, and endangering the booths of the merchants holding fair at Westminster; the error fallen into by the compiler in saying that Edward the Second created Piers Gaveston Duke (and not Earl) of Cornwall; and the dark and bitter cold April day (the 14th) passed by Edward the Third and his army at the gates of Paris, and which was known as "Le Blakmonday" long after. For further insight into the nature and merits of the Bermondsey Annals, we must of necessity refer our readers to the Editor's ably-written Preface.

The Admission Register of Manchester School; with some Notices of the more Distinguished Scholars. Edited by the Rev. J. Finch Smith. Vol. I., 1730-35. (Printed for the Chetham Society.)

This book would have been improved by some general history of Manchester School, which has sent a fair number of pupils to greatness, and one, at least, to the gallows. But Manchester seems to care very little for local or for family history. "It is remarkable how, in many instances, even families of long standing in this great metropolis of trade know very little of the personal history of their ancestors." This Register will supply them with no inconsiderable amount, though the editor seems to think that, in some cases, "a boy might, through ignorance or as a joke, give an erroneous description of his father." Had Manchester been an exclusive school, with a certain curling of the nose at *trade*, the erroneous description might have been seriously given. But where trade was wealth, and wealth was nobility, there could be no sniffing of the nose, nor haughty lowering of the eyelids at boys whose fathers were in business. At Westminster, when Horne Tooke entered, he described his father as being a "Turkey Merchant." Now, they who had ventures with Turkey in those days generally lived in an oriental luxury far beyond what mere nobility could accomplish; and if they had not noble blood in their veins, they had the "blood red gold"—though we never saw any—in their lockers; the one was accepted for the other, and young Horne was welcomed by his fellows. They little thought that his father was a poulterer.

Since the days when a Turkey merchant's

son might have been tolerated at Westminster, a change for the better has come over some, at least, of our public schools. Now and then, a city man's son finds himself ill at ease among proud lads, whom it would be flattery to call his fellows, for they are his inferiors. When such a boy is withdrawn and placed among more genial companions in a school supposed to be a little lower in rank, it is not the young aristocrats who are benefited, but the young gentleman whose sire sits in a counting-house who is saved. It is a curious fact, that in the old foundation schools, with some slight exception, the sons of a superior class of tradesmen are admitted without difficulty, while in most of the suburban proprietary schools they are refused admission altogether, on the ground, we believe, that such schools are intended for the education of sons of professional men. We believe this is still the case in the Kensington School. Not many years since an actor's son would have had no chance of being admitted; but he now ranks with the sons of professional men, while those of even first-class tradesmen are excluded. Considering that the purpose of such schools was to afford a good education to the middle classes, it would seem that the practice is not altogether in accordance with the purpose.

The rule of the Manchester School from the earliest period was different. Every class of scholar was admitted. On the register, sons of tailors, barbers, glaziers, of handicraftsmen, of retailers, of innkeepers, and the like, figure with sons of yeomen, gentlemen, barristers and squires whose homes were in the halls of the county. The very first name on the list is that of Thomas, son of John Coppock, of Manchester, tailor. The last is that of Robert Holt Leigh, afterwards Sir Robert Holt Leigh, Bart. The Leighs of Lancashire were of as good blood as any in the kingdom. The fortunes of the two pupils were different. The tailor's son came to be hanged; young Leigh not only became a baronet, but what the editor somewhat strangely describes as "a firm churchman, but strenuous protestant." The force of the *but* is not seen by us. Among other distinctions, we find this old Manchester boy described as "the greatest snuff-taker in England"; he "carried snuff in his waistcoat-pocket. He was also a great epicure, and generally tasted every dish on the dinner-table. He rebuilt Hindley Hall from his own designs, and forgot to include a staircase!" He forgot other things besides; he forgot to take a degree till he was seventy years of age, and then he took it only to enable him to have a vote. The delay was not through lack of learning, for Sir Robert Leigh was a profound scholar. This "firm churchman, but strenuous protestant," moreover, forgot to be even a gentleman at last. "Over the latter years of his life it is better that a veil should be drawn. It is very sad to record folly and profligacy in the mature years of a life in which, otherwise, there is much to admire." So writes Mr. Smith, and this is as remarkable a way of saving a man's reputation, by recording the wickedness which is professed to be left unmentioned, as we remember ever to have met with. We may add, that Sir Robert made, by will, his cousin, Mr. Pemberton Leigh, Q.C., tenant for life only of his estates; and Government made of the life tenant the present Baron Kingsdown.

If we compare the career of the poor tailor's son, in the early part of last century, with that of Sir Robert in the latter part of the last and the beginning of this, we shall find a different course and consequences. Poor Tom Coppock went up, an exhibitor of the school, to Brasenose College, Oxford, where he graduated B.A. in 1742. Three years later, the banner of

the Stuart was floating in Lancashire, the tap of his drum and the screech of his pipes were heard in the distance, and generous youth were solicited to "come and be killed." Young Coppock, then in orders, joined the Manchester regiment of Jacobites as chaplain. With his schoolfellows and fellow-townsmen, he did his best for the Stuart, till the bold attempt collapsed at the surrender of Carlisle. Soon after that catastrophe, young Coppock was swinging from Harrowby gallows, where other true gentlemen found the same fate.

While Coppock was swinging in a Hanover halter, there was an innkeeper's son at his desk in Manchester school, who afterwards achieved distinction; namely, John Whitaker, the historian and antiquary, the friend and opponent of Gibbon, and, according to the erring lights which deceived him and others, the vehement defender of Mary Stuart. Whitaker (or Whitaker, as his name is entered on the register) hated the new-fangled word "academy" for school, as much as Lord Auchinleck did when he spoke of Dr. Johnson as "an auld dominie, who kepit a schule and caud it an acadamy!"

Passionate Whitaker, the innkeeper's son, had by his side during a part of his school time, Reginald, son of Thomas Heber, Esq., of Martin Hall, in Craven, Yorkshire. Reginald Heber distinguished himself at college, wrote poetry with elegance, and was the father of Richard, the celebrated scholar and book-collector, and of Reginald, Bishop of Calcutta. He was present when the prize poem 'Palestine,' by the latter of the above-named sons, was publicly read at Oxford. His agitation on this occasion became so uncontrollable that he asked forgiveness of those who stood near him for being unable to suppress his emotion. All who heard him sympathized with him, as he said, with a joy that hardly left him utterance, "It is my son."

When the second volume of this work appears, we hope to resume a subject which, meanwhile, has been well treated by the editor, Mr. Finch Smith.

OUR LIBRARY TABLE.

Lois Weedon Lectures on the Altar and the Cross; being a Narrative of the Atonement from Genesis to Revelation. By S. Smith, M.A. (Longmans & Co.)

THERE is nothing original or striking in these Lectures. They are plain and intelligible. A pious spirit pervades them. They can scarcely be termed expository, though the author probably meant them to be so; and they are not erudite. They are a kind of sermonizing interpretation of parts of the Old and New Testament, showing little intellectual power and a want of acquaintance with the results of modern criticism. Readers, therefore, will not be much instructed by their perusal. Indeed, they may be often misled by trusting the author's statements, though the devotional elements of their nature may be partially excited and soothed. Mr. Smith appears to have read little calculated to teach him the true meaning of the Old Testament; and therefore he falls into the very common mistake of putting New Testament doctrines into the old dispensation. Any intelligent Jew will tell him that he has misapprehended many portions of the Hebrew Scriptures, that he has brought out of them ideas which the writers never meant to be there, that his Christian spectacles have highly coloured the facts and events described in the ancient books, and that he is not only ignorant of Hebrew, but has neglected to use the writings of men who would have led him into the right sense of the sacred books written in that tongue. We regret this, because the author is obviously a devout man, who has the opportunity of telling people what the purport of the Bible is. But he tells them doctrines to be believed rather than duties to be practised. We do

not find fault with such doctrines, provided they be fairly deduced from Scripture. In this volume, however, there is a good deal of misinterpretation of Scripture, arising in part from the principle of taking everything literally and infallibly as it is related. The object of the work is to show how the site of the Temple, with its altar of blood, sends the thoughts back to the origin of sacrifice; and how the place of the cross, with the sepulchre of Christ, points to the end of sacrifice. The author accordingly treats of the fall of Adam and the altar of Abel, the altar of Noah and of Abraham, the altar of Job, the blood of the Passover, the altar of the tabernacle, the altar of the Temple, and the cross. No light is thrown upon these important topics; but a good deal of false light is made to fall upon them. Thus he gives a wrong meaning of Job xix. 25-27, of "the sons of God" in Job i. 6-12, of Daniel ix., and of many other passages. In short, he is an unsafe guide in exposition—one who has learnt nothing from the best Bible critics whose works have shed a flood of light on the sacred books during the last twenty years. If the professional instructors of the people do not keep pace with the progress of knowledge, it is manifest that the people generally will be easily led away, falling into gross superstitions on the one hand, or supreme indifference to religion on the other; or they will listen to the wordy, inflated talk of uneducated and self-sufficient teachers, destitute of all good taste, and unfit to reason. Mr. Smith, without offending taste, is too commonplace to attract or instruct people who wish to get at the true sense of the Bible.

The Acts of the Deacons; being a Course of Lectures, Critical and Practical, on Acts vi., vii., viii., and xxi. 8-15. In Two Books. Book I. The Acts of St. Stephen, the Protomartyr. Book II. The Acts of St. Philip the Evangelist. By E. Meyrick Goulburn, D.D. (Rivingtons.)

THERE are few men who can so ably compose a popular single volume on a religious subject as Dr. Goulburn. He has the rare gift not only of being able to interest serious readers in serious subjects, but so to treat the subject itself as to win attention to it from any reader who may happen to open his pages. This gift was especially manifested in his 'Thoughts on Personal Religion,' which, indeed, was not originally in one volume, but which has since been extensively circulated in that form. In his account of the only two of the seven deacons whose memory the Word of God has embalmed, Dr. Goulburn maintains his high qualities of earnestness, clearness, simplicity, and, if we may so speak, of power of entertaining, in the best sense of that word.

The Bandolero; or, a Marriage among the Mountains. By Capt. Mayne Reid. (Bentley.)

ALTHOUGH Capt. Mayne Reid has written some good books for boys, and we of maturer age have been able to take interest in the stirring adventures which were not intended for us, we must confess that the present work, whether written for boys, men or women, is a lamentable failure. Plot and incidents are of the stalest description. The story consists of various attempts at murder and one or two attempts at marriage. There is a young American who sees a Mexican lady on her balcony and falls desperately in love with her. There is a young Mexican who is in love with a lady living in the same house, and appearing on the same balcony. The American is alternately jealous of the Mexican and his most devoted friend, while the attempts at murder alternate with much the same regularity as the swing of a pendulum. First the Mexican saves the American, then the American saves the Mexican; and then in the act of saving the American, the Mexican is saved by him. Similarly the American first mistakes his love's sister for his love, then he mistakes his love for her sister, and then he mistakes his love for herself, like the traditional Irishman who ended by finding it was neither of us. Capt. Mayne Reid's only excuse is that the reader is quite as much puzzled as the hero could have been. The reader can never make out why the young American should always mistake the two sisters just when it was the author's interest to prolong the story; and the conclusion is so abrupt that the reader does

not know whether the mystery is solved at last, and whether the American and Mexican get the right ladies. Capt. Mayne Reid reminds us of the clergyman who married several couples at once, and then finding he had not been so particular in sorting them as they could have wished, told them to make it all right among them. Yet we are doing injustice to Capt. Mayne Reid's wonderful powers of language in comparing him to an English clergyman. The quantity of Spanish phrases scattered over the volume would alone qualify the gallant Captain for a consulship in Spain, or a professorship at Oxford. No Civil Service Commissioner could resist the tide of *queridos*, and *ranchos*, and *bandoleros*, and *salteadores*, and *vamos*, and *pesos*, and *puentes*, and *pordios*, and *Vs.* Nor would the effect on Oxford be less striking. We feel confident that the Professor of Greek would throw his arms wide open to embrace a candidate who had been sored by meeting with a heartless flirt, and who proclaimed himself "almost a *gynothrope*." This astonishing effort of constructive philology is to be found at p. 88 of 'The Bandolero,' to which we refer any readers who may doubt our veracity. Capt. Mayne Reid almost deserves to be canonized for inventing such a word.

Winged Words: Treasury of Quotation for the German People—(Geftigelte Worte, &c.). By George Buchmann. (Berlin, Haude & Spener.) In a few pleasant and critical chapters selections of common quotations in eight languages are here given. They are phrases which are in ordinary course of citation in Germany, and in the German language; and the use of Mr. Buchmann's volume is, that it tells his countrymen whence the phrases come, and, in common quotations from German authors, where they often err and misquote. It is an agreeable and useful little book, the pleasure and advantages of which are by no means limited to those in whose language it is written.

We have to mention the following pamphlets:—*On Vitality*, by the Rev. H. H. Higgins, M.A. (Liverpool, Holden).—*Cholera: its Cause and Cure*, by Joseph Wallace (Belfast, Magill).—*The Human Blight and Cattle Blight; or, an Explanation of the Cholera and Cattle Plague* (Longmans).—*Do Small-Pox and Cow-Pox afford any Protection from Asiatic Cholera? with some Observations*, by Ambrose Blacklock (Lewis).—*On the Future Water Supply of London*, by George Willoughby Hemans, C.E., and Richard Hassard (Stanford).—*Waterworks, Borough of Liverpool: Report of the Proposed Supply of Water to Liverpool from Bala Lake, in North Wales*, by Robert Rawlinson, Esq. (Waterlow).—*Metropolitan Drinking Fountains Association: Seventh Annual Report, with a List of Subscribers and Donors, &c.; with a Sketch of the Origin and Progress of the Drinking Fountain Movement, and some Practical Suggestions respecting the Erection and Maintenance of Drinking Fountains.—Important Discoveries which have led to the Elucidation of the Deposit of Flint Implements in France and England*, by W. Whincopp (Woodbridge, Loder).—*Condition and Doings of the Boston Society of Natural History, as exhibited by the Annual Reports of the Custodian, Treasurer, Librarian, and Curators* (Boston, printed for the Society).—*A Journey to the Sun*, by Helio manes (Cornish).—*Addresses on the Occasion of presenting to John Ericsson the Rumford Medal of the American Academy*, by E. N. Horsford (New York, Hurd & Houghton).—*Inaugural Address, delivered at Tavistock, on Wednesday, August 8, 1866, at the Fifth Annual Meeting of the Devon Association for the Advancement of Literature, Science, and Art*, by Earl Russell, K.G. (Longmans).—*Remarks on the Inefficiency of the Steam Navy for General Service and the Purposes of War*, addressed to the Right Hon. Sir John Pakington, Bart., by John Cochrane Hesseon (Stanford).—*Description of the New Rob Roy Canoe, built for a Voyage through Norway, Sweden, and the Baltic, with Illustrations. Dedicated to the Canoe Club, by the Captain (Low),—Overend, Gurney & Co.; or, the Saddle on the Right Horse, in a Letter to the Shareholders, from One of 'Themselves* (Effingham Wilson).—*Joint-Stock Banks: Proposal to secure Deposits placed at Interest*, by William Ray (London, Nephews),

—*The Continental Crisis: its Probable Causes and Effects*, with Coloured Map of Central Europe, by James Ward (Houlston & Wright).—*La Crise Financière de l'Angleterre*, par M. L. Wolowski (Paris, Claye).

LIST OF NEW BOOKS.

Adams's John Hartley, a Tale, fcap. 8vo. 2/6.
Bowman's Tom and the Crocodiles, fcap. 8vo. 3/6 cl.
Children's Hour, The, 18 songs set to Music, 3d. 1/2 swd.
Christian's Mistake, by Author of 'John Halifax,' cr. 8vo. 5/6 cl.
Cotton's Typographical Gaceteer, 2nd series, 8vo. 12/6 cl.
Cousen's 150 Pictures and Stories of New Testament, 12mo. 3/6 cl.
De Porquet's Fables Paraphrasées, New Edition, 12mo. 3/6 cl.
Doré's 100 Illustrated Sketches, in Colours and Gouaches, 7/6 cl.
Dr. Goethe's Courtship, a Tale, 2/6 cl.
Eiloart's Ernle Elton at Home and at School, fcap. 8vo. 2/6 cl.

Eloin and a Guide to Elin Cathedral, cr. 8vo. 7/6 cl.
Gee's Our Sermons, 12mo. 6/6 cl.
Godson's Daily Prayers for Private and Family Use, 12mo. 1/6 cl.
Goulburn's The Acts of the Deacons, ac. 12mo. 6/6 cl.
Gray's Young Clerk's Instructor, sq. 1/6 cl.
Habershon's Diseases of the Stomach, cr. 8vo. 5/6 cl.
Happy Charlie, and other Stories, 12mo. 1/6 cl.
Heber (Bishop), Hymns, illus. sm. 4to. 10/6 cl. gt.
Homer's Iliad, in English Hexameters, by Sir J. H. Henshel, 15/6 cl.
Homer and the Iliad, in 3 parts, by J. Stuart Blackie, 4 v. 8vo. 42/6 cl.
Hoskyns's Occasional Essays, 12mo. 5/6 cl.
How Paul's Penny became a Pound, sm. 4to. 1/6 bds.
How Peter's Pound became a Penny, sm. 4to. 1/6 bds.
Jones's Priest and Parish, sq. 6/6 cl.
Lake of the Woods, The, by A. L. O. E., 12mo. 2/6 cl.
Little Lay for Little Elton, Edited by Watts, illus. sm. 4to. 7/6 cl.
Love and Duty, a Story of an English Home Life, 8vo. 12/6 cl.
Marsh's Robin Hood and his Merry Men, 12mo. 2/6 cl.
Maxwell's Nights, Smiles, and Sketches, 2nd series, cr. 8vo. 5/6 cl.
Neighbourly Love Exemplified, edit. by Lady Pepya, 12mo. 1/6 cl.
Norton's Osteology, with Atlas of Plates, 8vo. 7/6 cl.
Parley (Peter), Heroism of Boyhood, 12mo. 3/6 cl.
Peacock's English Church Furniture, 8vo. 15/6 cl.
Pelle's Sermons, Doctrinal and Didactic, 12mo. 6/6 cl.
Pinchard's Max Frere, 18mo. 1/6 cl.
Popular Science Review, Vol. 5, 8vo. 12/6 cl.
Prodigy (The), a Tale of Music, 3 vols. post. 8vo. 31/6 cl.
Rainbows in Springtide, by Sadie, fo. 8vo. 1/6 cl.
Report on Cultivation of Cotton in South America, 8vo. 1/6 swd.
Round's Distinctive Peculiarities of the Four Evangelists, 8vo. 9/6 cl.
Safford and Morris's History of Human Commerce, 8vo. 1/6 swd.
Sessional Papers, Nat. Assoc. for Promotion of Social Science, 7/6 cl.
Short Steps for Little Feet, sm. 4to. 1/6 bds.
Smith's Winter in Spitzbergen, 12mo. 2/6 cl.
Todd's Sketches and Incidents, or Summer Gleanings, 12mo. 3/6 cl.
Turner's Conventions of Human Commerce, 8vo. 1/6 swd.
Walkden (Rev. Peter), Extracts from Diary of, 12mo. 1/6 swd.
Wordsworth's Synodal Address delivered at Perth, 8vo. 2/6 swd.

MEMORABILLIA OF THE SOCIAL SCIENCE CONGRESS.

THE philosophers of both sexes who have been sitting for a week in Manchester, disagreeing as to the means by which society is to be improved, have uttered many opinions from which something may be collected worth the remembering. Lord Shaftesbury, taking a sublime view of the members, and their motives, and the honours accruing to the former, said: "Latent science, latent zeal, latent energy, latent intellect, latent through diffidence, want of opportunity, or subject-matter, are brought to the light of day before your assembled Congress. Each one who has contributed an essay, or taken part in the deliberations, returns to his home, and becomes recognized as a centre of influence and practical knowledge."—Lord Brougham, on Thursday, without thus flattering the speakers, addressed himself to shortcomings in the world at large. In reference to the late Election Bribery cases, he recommended that the rich who bribe the poor, and who would be as ready to take a bribe as offer it, should, on conviction, be subject (with the persons bribed) to the degrading punishment of the treadmill. In contrasting the recent sanguinary war with common murder, Lord Brougham remarked: "Mankind will never be free from the scourge of war until they learn to call things by their proper names, to give crimes the same epithets, whatever outward form they may assume, and to regard with equal abhorrence the conqueror who slakes his thirst of dominion with the blood of his fellow-creatures, and the more vulgar criminal who is executed for taking the life of a way-faring man that he may seize upon his purse. While men will fight, and slay their tens of thousands, the crime of murder on the largest scale must go on, unpunished and unrepented. Yes, unpunished in this world. But our Heavenly Father, bestowing freewill on His creatures, hath declared them accountable for its abuse; and, administering justice in mercy towards the numbers deceived or compelled into blood-guiltiness, He condemns those that have betrayed or forced them to their accomplices or their instruments to the unspeakable and enduring torments of hell."

This reminds one of the old theory that kings and governments who put men into livery suits to commit murder, which their employers called "glory," were saddled with the sins of every man

who fell in battles provoked by them, and who had no time for repentance.

With respect to crimes for which individuals are responsible, the Common Serjeant denounced the recommendation that sentences of imprisonment for life should be carried out (in place of capital punishment) without hope of remission, as another barbarity. He added: "It might be that it is actually necessary to keep prisoners in goal of their lives, without hope of remission; but there was no ground really to assume that the state of crime in this country was an absolute disgrace to us in the civilized world. He did not believe that there was an atom of truth in the assumption."

When the discussion on the duties of England to inferior races in her colonies was in progress, on Friday, Mr. James Heywood, the banker, said the whites of Jamaica were not competent to have the management of the island; and nothing in the way of improvement would be done until whites and blacks were on an equality. His own observation was that there was great difficulty in getting the blacks to work. This seems a curious ground for the assertion of equality.—On the same day, Dr. Lankester asserted that there were not less than 1,000 cases of child-murder, annually, in England, and that one-sixth of the unhappy women led to commit the crime lost their own lives by concealment of their previous condition. Whereupon Dr. Mary Walker, of New York, a female physician of eleven years' experience, thought that one great cause of infanticide was that virtuous women did not sympathize sufficiently with their fallen sisters. Instead of debarring women who had sinned from honourable society, the men who had caused them to sin should be shut out from the company of virtuous and respectable women. By all the speakers, except Mr. T. Chambers, M.P., it was agreed that the fathers of such children should be punished as felons for their crime; but Mr. Chambers thought the mothers should bear all the sin and suffering, and that infanticide should be punished with greater stringency than is now the case.

When the question of the pollution of rivers and the consequences to health came to be discussed, Mr. Rawlinson remarked that, all the ills that flesh is heir to were said to spring from this pollution; but, although a foul river was an intolerable nuisance, yet it must be remembered that it was an advance in civilization, and that we must start from the point that had been reached, and advance further. When the rivers were pure in this country, there were no sanitary regulations in our towns, and the plague, sweating sickness and black death prevailed. Sanitary improvement had swept away that type of disease. Now we had cholera, typhus and other forms of fever; but it was unfair to contend that the pollution of rivers created these diseases. The discharge of effluvia matter into running water was a very great improvement on the ash-midden and the cesspool crowded in upon the cottage. Manchester had been searched, by men competent to arrive at a correct conclusion, with the view of ascertaining whether the most severe types of disease affecting the health of the population could be attributed to foul rivers, and they were bound to come to a contrary conclusion. Although rivers were very foul, they did not work all those evils that were laid to their charge. In 1859, when the Thames was so foul that Parliament sat with closed windows, the Registrar-General knew that the rate of mortality was small.

When Dr. Hawkesley proposed the substitution of earth-closets for water-closets in houses, Lord Robert Montagu observed that various schemes had been tried. The sewage had been sent into the air, but that did not do; water had been tried, but it did not succeed; land must now be tried, and that he felt certain would do. In regard to Dr. Hawkesley's plan for earth-closets, he wanted to know where the earth would come from? Mr. Bateman, the eminent engineer, had calculated that it would require to supply London with the necessary earth for these earth-closets every year 400 acres of ground six feet deep. Where was that amount of soil to be got? He thought that was a "stumper" to the whole plan.

We may remark here, that while the philosophers

Manchester were discussing these matters for benefit of the people at large, Sir John Pakington was dining with the Associated Schoolmasters' Dudes, to whom he said, after dinner, that profound conviction was, that if there was one more than another which at the present time harassed the council of statesmen, threw a stain upon their history, and impeded the progress of the country, it was the unsatisfactory condition which the education of the people of the country aimed. And we will add, that it is just upon question of education that no two denominations of Christians will come to an agreement. On following day, when the education question dealt with by the Hon. Austin Bruce, he said could retain what is good in the present system, why what is lacking, and levy an educational tax where it was necessary; but he "saw the great difficulty," and did not see others involved in his own remedial suggestions.

Then the "famine in India" was described and discussed. It was attributed to want, not of water, of which there is an ample supply, but of power of bringing it where it is needed, by means of tanks, reservoirs, canals and conduits. These the country possessed under its native rulers; but we have let the aqueducts go into ruin, and the water sinks unproductively into the sands. Money which might have restored them has been squandered in building barrack-fortresses and constructing railroads for military, not for commercial purposes.

During the session reference was made to the new Bankrupt Laws, the effect of which is that when a man is insolvent the creditors have to look to the Bankruptcy Court and its officials to allow the insolvent's estate. Some remedies were suggested, but will hardly go further than suggestion. The whole matter is a mystery and fraud; the poor creditors are generally the losers, and while they go meekly a-foot, the bankrupts proudly sweep by them on blood horses in well-hung carriages. Then came the question of the poor, the sick in hospitals, and prisoners. Everything that has been asserted on the one side denied on the other was reiterated, to the usual pose; and the matter was then left till next year.

Among subjects of historical and social interest, most interesting was a paper by Mr. H. Ashurst, entitled 'Historical Data chiefly relating to Lancashire and the Cotton Manufacture,' which said that the year 1760 introduced a century of commerce the most wonderful the world has known. In that year the Society of Arts offered a premium for the greatest improvement in the common spinning-wheel, and afterwards offered £100 for the construction of a machine that would spin six threads of wool, cotton, flax, or silk at the same time. This led to Wyatt's impracticable invention. But when the efforts of the Society of Arts appeared to be hopeless (in 1767), James Hargreaves, of Blackburn, without the stimulus of monetary reward, invented the spinning jenny, which he could spin from sixteen to thirty threads at once, and without the use of rollers. In 1769 Arkwright invented the water-frame, which used a great many spindles; and in 1775 Samuel Crompton, of Bolton, combined the two inventions, and designated his invention "the mule." Some idea of the value of this last invention may be formed by the fact that, while the water-frame is capable of spinning a pound of cotton to the length of nineteen miles, or forty hanks, the mule has not only met with any limit short of 950 miles to the pound of cotton, or 2,000 hanks, and these inventions have been extended to the spinning of other fibres. At first the various operations were household operations, but they led to the building of factories, and this to the regulation of wages and the attraction of labour from all parts of the country; and the population of Lancashire, which was £73,000 in 1801, increased in 1861 to 2,428,744. In the year 1760 the cotton trade of Great Britain did not return for materials and labour more than £5,000; in 1860 the returns were estimated at £5,000,000. We now employ 36,000,000 spindles; in one minute we can spin a length of cotton which would wind four times round the earth, while every

day 10,000,000 yards of cotton fabrics come out of our looms. The price, at the same time, has been greatly reduced. It does not cost as many pence per yard as it used to cost shillings. The effect of manufactures upon the value of land in Lancashire, between 1802 and 1865, was an increase of value of 11,000 per cent.

After all, to literary men and to readers interested in literature, there was no paper read at the Congress of greater interest than Mr. Anthony Trollope's 'On International Copyright.' The salient points of this paper we proceed to lay before our readers.—"All those who are here present, no doubt, know full well that a law of copyright exists in this country by which an author's property in his own work is ensured to him and his heirs for a term of years. This law of copyright protects equally the author, the painter, and the composer of music; but, in speaking to you now of copyright and of international copyright, I shall confine myself to remarks on the copyright of books—partly because I am myself a writer of books, and not a painter of pictures or a composer of music. This law of home copyright originated not in a desire to extend protection to authors, but with a view of limiting that protection, which was presumed to belong to them as a matter of course. In 1709 an Act was passed limiting copyright in England to fourteen years. I mention this as showing that, till the law interfered, the ordinary sense and feeling of men presumed that an author's property in his work was the same as that in his house or in his land. Then there came up the idea that, for the sake of literature in general, with the view of protecting readers, not against the authors, but against the booksellers, this right of property should be curtailed as to duration of time, and it was cut down, as I have said, to fourteen years. In 1814 the period was extended to twenty-eight years; in 1842 to forty-two years, and to the term of the author's life, should the author outlive the forty-two years. That is the law which now defends copyright in England, and it may be acknowledged that justice to the author can demand no more. There have been men who have held that all copyright was pernicious. Lord Camden said, in giving judgment from the bench against a claim for copyright, that 'Glory is the reward of science, and that those who deserve it scorn all meaner views,' meaning thereby that an author should care nothing for his hire, only for his fame. But Lord Camden, who himself achieved much glory, would hardly have been satisfied had no other payment been made to him from his country's exchequer. There are two living men, great in literature, who think that all copyright should be abrogated by law, arguing that the welfare of the country in cheap literature is of more concern than the material prosperity of the author. I myself think that for all good work done the labourer is worthy of his hire; and taking the world at large—the world of authors as well as the world of ploughmen—without that hire the labourer cannot live. If there be any one here who will dispute the propriety of copyright altogether; with him an argument may be held; but I make bold to say that no man admitting the propriety of home copyright can bring forward reasons that shall be even plausible against international copyright. The only argument that I have ever heard as between two countries is this,—between countries, let us say, which we will call A and B,—that we, the men of A, finding ourselves in a condition to get more by pilfering from you, the men of B, than you can get by pilfering from us, we, of A, will not consent to any law that shall impose a penalty upon us for such pilfering. Our opponents to international copyright are not the publishers or the booksellers of another nation; but the legislators. Most of you are aware that the principle of copyright as regards the works of English authors has been extended beyond our own shores. International copyright does exist,—very much to the profit of many English authors. In 1838 an Act was passed for securing to Englishmen international copyright wherever conventions could be made; and, in conformity with this Act, conventions have been made with France and North Germany. A convention with Saxony has been especially valua-

ble to English authors, for it has enabled them to deal on fair terms with that energetic publisher, Baron Tauchnitz. Under his auspices during the last twenty-five years some 700 volumes of English literature have been republished in Leipzig, the majority of which were republished during the lifetime of the authors. But there is no such international copyright with the United States of America. As regards literature, America and England are one. We read the same language. We think the same thoughts. Our minds run in the same currents. Our literary tastes are formed on the same models. Many popular works of the present day might have been written either by English or by American authors. Who would have known the 'Skeleton in Armour' came from an American poet, or the romance of the Monte Beni from an American novelist, by the simple act of reading? Prescott and Motley might have been English as far as style and mode of thought and historic manner are concerned; and very proud England would have been to acknowledge them. There are probably above 12,000,000 readers of English in the United States—men and women, lads and lasses, who can sit down to their book as you and I can, with true enjoyment of its luxury—and yet there is no international copyright between us and the United States. It is exactly as though there were none between Middlesex and Yorkshire. The United States are of the two the richer in readers, whereas England, including, of course, Scotland and Ireland, is as yet the richer in writers. That such a difference exists is indisputable, and it is the natural result of the condition of the countries. The United States, beginning, as it were, afresh, with the experience of all other countries before them, and weighed down, when so beginning, with no existing burden of rooted ignorance, have been able to teach their children—I may almost say to teach all their children—to read and write. By reading, I mean, as I said before, the faculty of finding positive enjoyment in a book. I am afraid we must own that we fall very far short of this as regards our millions. But among us that leisure which comes from long prosperity and established wealth has been favourable to literary production, as it has been favourable to all intellectual employment. The United States count their authors in quickly increasing numbers, but they have not, as yet, increased with them as they have with us; and therefore it is that the Americans consume while the English produce. And, added to this, there is, I think, on the part of Americans, a prejudice in favour of the literature of England over their own. Their most popular authors are more popular with us than they are in their own country; whereas the works of Dickens and Tennyson are sold in numbers of which we here know nothing. I maintain that the assumption is altogether wrong which presumes that America gains in literature by the absence of international copyright. America loses fully as much as England can lose. Indeed, whenever protection is named as the principle under which rights shall be defended—protection by Acts of Parliament, or of Congress, or of Government—we may be quite sure that each party concerned will be the loser. It may be thought that certain booksellers in the United States may gain by the protection to them of property which is not their own, though they, the booksellers, do not themselves so believe; but no one can think that the readers of the country, that is, literature itself in the States, can gain by it. And now I will ask you to let me explain what is the present system of republication of modern books in the two countries; for, as there is no international copyright, the system is the same in each—equally dishonest in the one as in the other. I will speak of the republication in America of English books. Mr. Smith shall be an English author, gradually becoming so popular that a reprint of some one of his books in the United States is considered desirable. The reprint is made by some firm there, probably without any question asked—or if asked, it is asked of Mr. Smith's English publisher, and not of Mr. Smith. Mr. Smith, when he hears of it, is not a whit displeased. Lord Camden's theory holds good for the nonce, and Mr. Smith is satisfied with his American glory; but things progress, and Mr.

Smith begins to find that he has an American public at his disposal. He is read in the United States, and tidings come to him of editions very wonderful in number which are printed and sold, and for which he receives no further payment than that which comes to him from his American glory. Then he arouses himself, and becomes dissatisfied. 'What! copies by the thousand, by five thousands, by ten thousands, and no return to me, Smith, for all that I have done for this ungrateful people!' Upon this he inquires and learns that the American publisher who has reprinted him to this extent beyond all his aspirations, is very willing to deal with him, though there is no law of international copyright. Perhaps he goes to New York and sees the American publisher. The result is this—the American publisher will deal with him. The generous publisher, although he undoubtedly has Mr. Smith in his grasp, scorns to republish Mr. Smith's works without paying for them. He will pay for the receipt of early sheets, which will enable him, the American publisher, to bring out the work on the same day as that on which it appears in England. Mr. Smith is delighted, and thinks of his price. But the American publisher has also thought of his price, and knows more about it than Mr. Smith knows. He will pay a price for Mr. Smith's great and favourite work on receipt of the early sheets, which will, perhaps, nearly defray the cost of Mr. Smith's journey to America. Mr. Smith demurs, thinking that if there is to be a matter of bargaining, each party to the bargain should have a veto. But here the American publisher closes upon the English author, and demolishes him at once. 'No, Mr. Smith, I have taken you up at a great outlay of capital, and must go on with you. I will deal with you willingly at so many dollars, or on such and such terms; but if that does not suit you, I fear that I must go on without the payment to you of any dollars at all, and on no terms as between you and me. I can afford nothing else. How can I pay you a high price for your work when my neighbour in the next street can reprint it from the first copy he gets?' And in truth this argument is not to be answered. That absence of international copyright which militates against the English author—which militates equally against the American author—acts with far greater strength against the American or the English publisher. The publisher can, in fact, buy nothing beyond that almost supposititious value of early possession. The moment that Messrs. A & B in Broadway have brought forth an English work, Messrs. C & D, in One Hundred and Nine Street can reprint it from the reprint of their Broadway neighbour. I have fought—I should rather say have attempted to fight—this battle with American publishers, and have retired from the contest wounded and sore discomfited. It may be that I have had my own peculiar little quarrels. But I am firmly convinced, first, by the arguments and operations of certain American publishers, in whom I have great faith, and, secondly, by conclusions drawn from my own experience, that the publishers of the United States would, as a body, be willing that a law of international copyright should be passed, so as to prevail between the two countries. For them the certainty in their property would be more valuable than the catching, dodging, disreputable mode of business which they are now driven to adopt. That for the authors of both countries an international copyright would be desirable, no one, I think, can doubt. I may, perhaps, be allowed to mention that Longfellow, when he showed me, with an honest, cheery pride, copies of the exceedingly numerous English editions of his works which have appeared, simply shrugged his shoulders when I asked him as to the pecuniary results from England. I discussed the question of international copyright with him, and it was his opinion that no American who knew aught of literature common to the two countries would doubt as to the expediency of an international copyright. I have never met an American publisher who has not professed himself to be in favour of international copyright; but I have met American legislators of both Houses who have shaken their heads when I have ventured to suggest that the mutual interests of the two countries

demand such reciprocal justice. It was their duty, they thought, to protect the American reader. There is the American Congress to be overcome. By insisting we shall carry our point—not in opposition to our brethren in America, but in full accord with them."

THE OLD CHURCH AT RECVLVER.

Canterbury, Oct. 8, 1866.

THE hand of man is now adding to the changes which tide and time are constantly effecting in the condition of this ruin, and in the appearance of the locality where it stands. The workmen of the Trinity Board are sloping down the cliff immediately north of the church, for the purpose of making a wall or basement upwards from the shore beneath. The process lays open the interments of past centuries,—the remains of which are wheeled away in barrows, and somewhat superficially buried within the precincts of the ancient church. As a strong wooden fence is about to be erected on the cliff above the wall, visitors from London and elsewhere will in future be deprived of the pleasure, so frequently indulged in, of carrying away a relic in the shape of a bit of a skull, or a portion of a human leg-bone; not but that more valuable remains of mediæval times have occasionally been found. As an example, I may adduce the gold ring, exhibited to the Society of Antiquaries in April last, inscribed with a motto, conjectured to be, "I wish to thee, all joy may be." A portion of the stone-work within the church has also been levelled, not much certainly as yet; still the ancient characteristic features of the place are slowly passing away.

The old church, "The Reculvers," was once conspicuous for two pillars of Roman workmanship, or Anglo-Saxon imitation of Roman Art. These columns now stand, or rather stood (for one of them has lately fallen, and now lies a mass of ruins), near the Baptistry on the north side of the Cathedral at Canterbury. They were accidentally discovered two or three years since in an orchard near Canterbury, where they must have lain unnoticed for nearly half a century; the opportune finding of a missing capital in a farm-yard at Reculver authenticated the two pillars as those so long lost sight of. If further proof, however, were necessary, it was supplied a few days since by an aged inhabitant of the parish, who told me that he remembered the columns when they stood supporting the chancel arches of Reculver Church in the year 1809. The edifice was then partially dismantled, and a neighbouring farmer carried off the capital in question, as well as the ancient wooden doors which once stood under the now almost defaced Early English portal between the towers. The Trinity Board, however, obtained immediate restoration of these doors, although they subsequently disappeared. Mr. C. Roach Smith, in his valuable work, 'The Antiquities of Richborough, Reculver, &c.,' has given an engraving of these pillars, from a drawing by the late Joseph Gandy, A.R.A. It has proved to be correct, with the exception that the pattern of the cable mouldings, as given in the engraving, is less elaborate in the originals, and does not exist at all under the capitals of the pillars.

I might mention incidentally, that within a mile of "The Reculvers," towards Herne Bay, flint implements, artificially worked, have been found on the shore close to the cliff. They have probably fallen or been washed down from the drift-deposits above. The specimens found resemble those discovered at Hoxne, Amiens, and in the valley of the Somme, with an occasional exception. Mr. Evans, in the *Archæologia*, has already called attention to their existence in tertiary gravel-beds at Swalecliffe and Reculver, and noted that about twelve specimens had been found up to the period of the publication of his paper. Owing perhaps to an unusual fall of the cliff, more than forty specimens have been found this year, and have come under my inspection. One especially, a heart-shaped implement, a black flint, as shown by a few slight abrasions in its outer covering, is a beautiful specimen. It is of somewhat novel type, and since it was worked has become covered with a calcareous deposit of almost milky whiteness.

JOHN BRENT, Jun.

LIFE IN SPAIN.

Malaga.

CAPTAIN, mate, crew, cook's scullion, and every hand employed on board our good steam-ship *La Pepe*, is a "hijo de Catalonia," the best sailor, the best merchants, the most violent politicians—in fact, the most troublesome provincialists of Spain. A cross between a sharp Scotchman and a knowing Yorkshireman, difficult to persuade, but more difficult to coerce,—such is the historical Catalan. The voyage from Alicante to Malaga was a fine-weather trip, the accommodation excellent; but touching the Catalan cookery, it was as far removed from a success as north from south. Bad workmen proverbially complain of their tools; so bad sailors have a tendency to criticize unfavourably those amphibious animals, "sea-cooks." I think that it was Count d'Orsay who remarked that Englishmen abroad are always "bothering about their tea"; but the strongest digestion rebels against Catalan cookery, unless you are very hungry and can procure no better. We had on board an erratic Briton, whom the captain christened "el Gracioso." This comic Englishman, on his way from Barcelona to Cadiz (I think he was in the steam-engine business), gave us a most graphic account of how he helped our fellow-passengers, a merchant captain and his wife, out of a serious and annoying difficulty while at anchor in Barcelona harbour. It appeared that this jolly Spanish Jack had injudiciously promised to marry half the girls in Barcelona, and having selected one, and tied the knot, this fact became generally known. He and his bride were mobbed to the boat by a number of the jilted ones. Two of these ladies insisted upon their right to the heart and person of our captain, and appeared determined to accompany the newly-wedded pair to the world's end. The two boats came alongside one after the other, and the jilted damsels, evidently meaning mischief, in the last one. Our comic Englishman hearing the dispute, and soon divining the cause, sympathized with the damsels, and insisted upon their coming on board and partaking of luncheon. The ladies agreed, but whether our friend made them thirsty, laughing at his comic tales, or they were unused to the effects of champagne, I cannot say, but the result was that the two ladies were removed to their boat in a state "I blush to pen"; and before the effects could pass away, our Captain and his pretty bride were well on their way. Of course our comic friend was immensely popular, especially with the lady. A moonlight night on the Mediterranean, when you are not sea-sick, is simply delicious. In due and proper course we enter the harbour of Malaga. We are turned into a boat, and out of it into the custom-house. Baggage examined, we are free, and find ourselves on the Alameda. We forget, in later life, most of our school-day lessons, but never our nursery rhymes and riddles. Uppermost on my mind is that enigma which has always puzzled poets and statesmen at the age of six,—

The flour of England and the fruit of Spain.

So, this is Malaga, sacred to the growth of raisins and marvellously-modelled clay figures—small, but painted to the life. Malaga, *per se*, is not attractive. The Alameda is pretty; but the statuary adorning it artistically weak. There is a miniature Manchester suburb, with some splendid cotton-mills; and the daughters of Malaga work as industriously as their sisters of Lancashire. The old city is exceedingly interesting. Narrow, tortuous lanes, leading into an imposing square; irregularly-built houses, and shops dark and cool; handkerchiefs and gaudy "mantas" at the doors, fluttering in the wind, tempting the unwary Pedro with a dollar in his pocket, and "his heart in the highlands," among the vineyards in charge of Pepita. How can he withstand the little silver kickshaws so temptingly disposed in the silversmith's window! I am afraid that, before sundown, Pedro's dollar will be in the silversmith's till. But will he not be repaid by Pepita's smile and blush when he presses into her hand the kickshaws on her name-day! The old, old story; and a very good story too: he must be a genius to improvise a better.

The turmoil and bloodshed of the last thirty years remembered, is it wonderful that literature and art have sickened in this land of promise!

Still, warriors and quarrelsome politicians have not stamped out every spark. Patient scholars guard with tender care the treasures of the old masters of the "Gay Science." Don Pascual de Gayangos, the Arabic linguist, who speaks English like a native, and to whom Prescott and Ticknor owe so much for treasures patiently and laboriously collected, is a hijo of Malaga; so is the Marquis Salamanca, without whom Spain would have had no railroads. Within the space of twenty years fifty-six volumes of what may be termed careful reprints of Spain's old authors, edited by competent scholars, have issued from the press of Ribadeneira; so that when Spain's great coming poet shall arrive he will find the house swept and garnished for him. Taking the wondrous epic of the Cid as a starting-point, much oral ballad literature still remains lost to the printing-press, handed down from barber to barber throughout the length and breadth of Catholic Spain. But at last comes Hope, bringing in her train those pioneers of civilization, the telegraph and iron horse. "El Cid," in the form of a locomotive, wakes the Pyrenean echoes, and rushes with a ghastly shriek through the pass of Pancorvo. Porters call out unpronounceable names, and you are hurried from the station outside Burgos on to the city of Diego Porcelos, in a shaky omnibus, for five pence. Dolores carries the everlasting bandbox, and, as a rule, is not a Venus to look upon.

At Malaga, in the olden days, you occasionally fell in with return guides from Granada and Cordova; and, if you did not care about a knowledge of English, Perico was your man. His animals were excellent; and he could serve a "puchero" fit for the gods, if hungry, insinuating the garlic so cunningly that you would find that awful root like satire should—

Would with a touch that's scarcely felt or seen.

Perico was a *jongleur* to the backbone; and his repertoire was inexhaustible, and full of novelty and fun. Here is a specimen—a tale of love, hatred, and olive-oil—as Perico gave it. It was as lengthy as 'Chevy Chase'; but I will have mercy on your space, and give you only the heads.—

Three tailors in Granada dwelt, and they were shameless wights;
The world saw what they did by day, the winking stars by night.

One tailor was short and stout, another like Don Quixote, tall and thin.—

Now Larga was as tall and thin as the Manchegan knight,
And always knew the wine-shops where the wine was good and bright.

The real hero, "Pepe Chico," was an Andaluz, who sang and danced well, and, being a good cut and fit, was the Stultz of Granada. The oil-merchant is introduced as—

Don Sanchez in Granada dwelt, and traded much in oil;
Had reached a very sober age when caught in Cupid's toll.

And the lady—

La Morena had not seen sixteen; her eyes were liquid fire;
And when she went to morning mass had her mother always by her.

Morena objects to the oil-merchant, but mamma insists.—

"I'd rather be a nun," she sobbed, "than that old oilman's bride."

Was ever luckless maid like this in such a woful plight?
She stormed and pouted all the day, and cried through half the night.

It then appears that Chico was sauntering by the church one day, and his eyes and Morena's, raining tears, met. Poor Chico is but clay; so he follows and notes the dwelling, and at night he places his friends at each end of the street and serenades the lady, concluding the ditty thus:—

The bark with shattered, useless helm,
Is by the tempest tost;
The roaring billows lash the shore,
And the frail bark is lost.
"Sweet Zaida, ope the jealousie,
And glad my aching sight.
Oh, let me worship those twin stars!
Oh, bid them shine to-night!"

A small hand appears through the iron bars, and Chico, of course, does the gallant, and whispers, "To-morrow, when you kneel in church, drop your left-hand glove."—

I'll pick it up and hand it you; but inside you will find something, which read alone. Let no one see it, mind.

This goes on, apparently, for a time. One day the oil-merchant has arranged to dine with the Alcalde; and, as the Alcalde has a weakness for some bull-fight sherry of Chico's, he begs a few bottles. Poor Sanchez imbibes too freely, and, when he leaves the Alcalde's house, he staggers not a little. Chico and his friends are on the look-out; and the friends trip up the oil-merchant and run away. The watch come up, and Chico's offer to see his friend home is, of course, accepted. The oil-merchant insists upon calling to see his bride's mamma. Chico is only too glad to secure a few minutes' conversation with La Morena. They knock at the door.—

The welcome "Quien Es" meets the ear; 'tis Morena's voice so sweet.

Chico supports the tipsy Don to keep him on his feet.

"Ladies, Don Sanchez would insist on knocking at your gate."

Sanchez looks grave, and stammers out, "I fear, my love, I'm late."

Morena and her dear mamma are in an awful fright
To see a would-be son-in-law in such a fearful plight.

Chico arranges an elopement, which is carried out.

The lovers are married at Seville, and return to Granada.—

Another moon had scarcely shone o'er the ruined palace of the Moor.

When, as a wife, Morena knocks at that old familiar door.

Sanchez lived, a lone, miserable man, cursing loud and deep his unfortunate carouse. He grows thin, pale and wan.—

The Señoras say, "He pines away, from vigils at the shrine of Cupid";

The Señora, doubtless misinformed, say, "Tis vine-juice makes him stupid."

And so it ends with Sanchez leaving all his fortune to Chico and his wife.—

The Chicos now dwell at Madrid, and fête great dukes and lords;
And having cut all threads and tapes, now scatter Sanchez' boards.

F. W. C.

OUR WEEKLY GOSSIP.

Mr. Percy Fitzgerald promises, in January, a new and complete Life of David Garrick, in which his claims to recognition for social gifts, private worth, generosity and virtue, as well as for dramatic ability, will be put forward and insisted on. That there is an opening for such a work, a single glance at the meagre accounts of Murphy and Davies will show.

A History of the Spanish War of Succession in 1837-8, is in preparation by Mr. Gruneisen, who is now in the Basque provinces, gathering materials for the completion of his work. The author was correspondent of the *Morning Post* during that war, the turns of which he followed and described, till he fell into a troublesome captivity, from which, however, he was relieved by the intervention of Lord Palmerston.

On the occasion of the resignation by Mr. Panizzi of the office of Principal Librarian of the British Museum, it was resolved by the officers and assistants of that establishment that a testimonial should be presented to him. It has lately been settled that it should take the form of a portrait of himself, and we are informed that Mr. G. F. Watts, who is one of Mr. Panizzi's numerous friends, has agreed to paint it. All who remember Mr. Watts's magnificent picture of Sir John Lawrence will expect much from his treatment of his present subject, especially as we believe it is undertaken, to a certain extent, as a labour of love. We may take the present opportunity of remarking how much Mr. Panizzi, during his tenure of office, has done for the British Museum and for the students who frequent it. It is to his ability and energy that they are chiefly indebted for the noble room now devoted to readers, and it is he to whom the credit is mainly due of scheming and starting the gigantic Catalogue of the printed books, the completion of which may now be reckoned upon in a comparatively short space of time. Mr. Carlyle has justly remarked that one of the most painful sights imaginable is that of a great catalogueless library. Before long, the library of the British Museum will cease to inflict the slightest pain of that description on the most sensitive observer; for the new General Catalogue is finished almost to the end of the letter L, while the rest of

the alphabet is complete as regards all books which have been received since the year 1845. In addition to this, also, we believe, a special printed Catalogue of the rich collection of Hebrew books contained in the Museum has been compiled by Mr. Zedner, one of the first Hebraists of the day, and will shortly be published by the Trustees.

Honours have been tossed about lately in various strange ways, or with various strange consequences. The King of the Belgians has sent the Order of Leopold to the Lord Mayor, who will not have the permission of his own Government to wear it. Capt. Anderson, of the Atlantic Cable expedition, and one of the hardest and most successful workers in it, cannot be made a G.C.B. because the "rules of the service" are against it. Meanwhile, his able and scientific fellows are created knights and baronets, while Wheatstone, but for whose marvellous following in the track of his gifted predecessors, there would as yet have been no Electric Telegraph at all, is left out in the cold, without being named! Add to this, that Mr. Bright, in his speech at Leeds, conferred on his American friend, Mr. Cyrus Field, the honour of naming him as the sole person to whom the completion of the cable was due. Mr. Bright was as silent as to that excellent gentleman's English colleagues in the great work as if they had never existed.

Miss Herbert having revived at the St. James's Theatre Mrs. Cowley's comedy, produced at Covent Garden in 1780, 'The Belle's Stratagem,' we may state here, that the original *Dorickourt* was Lewis; Miss Younge (with Garrick's blessing still warm on her brow) was the *Letitia Hardy*. Mrs. Mattocks played *Mrs. Racket*. For nearly thirty years Lewis and Mrs. Mattocks retained their original characters, playing them in 1808 to the *Letitia* of Mrs. H. Johnston, the *Hardy* of Munden, and the *Flutter* of Jones. The most solemn of gay *Dorickourts* was John Kemble, who performed it in 1790, at Drury Lane, Mrs. Jordan acting *Letitia Hardy* with marvellous dash and spirit. The last is a character which was always a favourite with young *débütantes*. In 1817 two new and youthful actresses chose it for their first appearance on the London stage, Miss Smithson at Drury Lane, and Miss Brunton at Covent Garden. The latter-named actress (long subsequently known and highly esteemed as Mrs. Yates) achieved a success. She was better supported by Charles Kemble as *Dorickourt*, Jones as *Flutter*, and Miss Foote as *Lady Frances Touchwood* (a part originally played by the superb Mrs. Hartley), than Miss Smithson was at Drury Lane, with Stanley and Harley in the first-named characters; but in Mrs. Glover Drury had a *Mrs. Racket* such as the stage could never match.—Miss Smithson made an impression in France which she never did in England, and M. Berlioz took from the English company there for wife, the "first of the actresses of England." The part of *Letitia Hardy* continued to belong, as it were, to Miss Brunton, and it was one of the most attractive that she played in 1821, at the West London, to the *Dorickourt* of her father,—the latter being a fine bit of comedy of the sword-and-buckle period.

Holborn has not been so entirely unvisited by the players in old times as the chroniclers of to-day seem to think. In the reign of Edward the Sixth, the authorities ordered the removal of all the king's revels and masques from Warwick Inn, Holborn, to "the late dissolved house of Blackfriars, London." Warwick House stood very near to the present Holborn Theatre; its site is now occupied by Warwick Court; but the mansion of the Beauchamp Neville Warwicks, commonly called Warwick Inn, was further east, behind Newgate. The players who removed from Holborn to Blackfriars opened the latter theatre with scenery and machinery, long before the period at which those adjuncts are said to have been introduced by Davenant. When the Puritans closed the theatres, the ejected actors complained that they were not allowed to act at all, while the drama of 'Bel and the Dragon,' performed by puppets, was creating an uproar at the foot of Holborn Bridge. We may appropriately add, that exactly three hundred years ago (in 1586), a clas-

sical play was acted with applause in the Refectory of Gray's Inn. It was entitled 'Jocasta,' and was built up roughly, out of Euripides, by Frank Kinwelmersh and George Gascogne the poet, both of whom were Gray's Inn students.

Shell's tragedy, 'Evadne; or, the Statue,' is in preparation at Sadler's Wells, for Miss Marriott, who is to play the principal part. Evadne was one of the few original creations of Miss O'Neill, and she had rare play-fellows with her in the same piece,—Young, Macready and Charles Kemble.

A new tragedian challenges the applause of the town, this evening, at Drury Lane, Mr. H. Talbot, who makes his first appearance as *Macbeth*.

A Dumfriesshire Correspondent says:—"The dread of Mr. Grove's address and of the infidelity of the British Association, on the north side of the Tweed, is not so strong as your notice of the Brechin Town Council might lead some to believe. Of the three newspapers belonging to this county (Dumfries), only one has issued a mild protest against the doctrine of Continuity as applied to living organisms, and that protest expresses terror for religion should Mr. Grove's views be true;—as if truth and religion could ever inflict wounds on each other."

From Chagford, Devon, we have news of the shock of an earthquake, as noticed in the following communication:—"On the evening of Friday last, October the 5th, at six minutes before nine o'clock (Greenwich time), a shock of an earthquake was felt at this village. I was sitting by myself, writing, and heard a gentle rumbling noise, which was accompanied by a slight jerk, like the motion caused by the lurch of a boat, and this was followed in two or three minutes by a creaking of the door-frames; but I did not feel any motion after the first shock. The noise was heard by other persons in the village, by whom it was thought to be thunder, or the passing of a cart. Chagford is situate on the eastern escarpment of the granite of Dartmoor, and near the line of boundary between that rock and the carbonaceous beds. G. WAREING ORMEROD."

Street literature has again illustrated itself by 'A New Litany on Reform.' This parody on a portion of the Prayer-book, Scriptures and Church Service, is being publicly read, in the highways, with a mock solemnity, by a couple of ruffians in new college-caps who, of course, sell copies of the Litany. These copies come from a St. Giles's press.

In the six months ending June 30th, the British rainfall amounted to 17 inches, more than in the whole of the year 1865, and yet we look back on those six months as a period of fine weather. Since June, there has been a rapid increase in the quantity. In Gloucestershire, 10 inches fell in eight weeks; and in Dorsetshire, more than 7 inches in twenty-five days. The total fall, from January to September inclusive, was more than 30 inches. Excessive as this quantity may appear, it will not do more than restore the balance which had been disturbed by the unusual dryness of the three former years. Damage has been occasioned by floods in some of the northern counties, and much grain has been stacked in a damp condition, yet the general result of the abundant rainfall will be beneficial. Many springs which had dried up are now again flowing.

A question which has been often debated of late years, namely, the effect of woods and forests on climate, has been suddenly revived by the great floods in France. Forests, as is shown, promote and equalize the rainfall of a country, and are the natural countercheck to drought. The reverse of all this is produced by cutting down the forests. Then long terms of dry weather occur; the rain falls in short but furious storms, and running rapidly down from the unsheltered land, occasions the sudden floods so much complained of. It is now argued that the remedy for these disasters is the replanting of trees throughout the districts which have been stripped of wood, and the putting a stop to the reckless felling of timber which has prevailed of late years. Of this one example may suffice. A Birmingham contractor has in want of gunstocks to supply the demand for Crimean war, erected sawing-mill

menaced operations has cut down 100,000 walnut-trees, mostly in Piedmont.

A great reclamation of land on the Norfolk coast has recently been effected. The Norfolk Estuary Company has completed an embankment, one mile and a half in length, at Wolferty, on the Wash; this incloses a space of 300 acres, making a total of 500 acres recovered by the same means. The company proposes to secure 32,000 acres by like methods.

The Essex Reclamation Company, which proposes to dispose of metropolitan sewage on the Maplin Sands and elsewhere, and which is said to have done wonders on a once barren bed, has obtained authority to change the former disposition of portions of its enormous conduits and to complete them within ten years.

An important Act was passed in the last Session of Parliament, which is interesting to all suburban as well as all urban metropolitan residents. It is one of the results of the recent inquiries into the state of commons near London. It is to apply to any common, the whole or part of which is situated within the metropolitan police district; the Inclosure Commissioners are the executive, and they are to entertain no applications for inclosing except under this act.

M. Sardou, the author of 'La Famille Benoiton,' has had another triumph in his comedy 'Nos bons Villageois,' produced last week at the Gymnase. Of every actor and actress, Jules Janin speaks with enthusiasm, but especially when referring to the eloquence, talent and emotion of Lafont, that "old comedian filled with the passionate ardour of youth, and brilliant with the fire of his very best days!"

The first German weekly political newspaper is about to be started by the proprietors of the daily *Kölnische Zeitung*, and under the same name. It will contain the most important and interesting parts of the daily paper, with new matter supplied by some of the ablest German writers, at home and abroad. Of its success, not only in Germany, but in England and America, there can be no doubt.

Professor and Senator Matteucci, President of the Italian Society of Sciences, announces his intention of founding the annual presentation of a gold medal to the author (without distinction of nation) of the most important contemporary discovery in physical science.

An Austrian chemist (Leinelbrook) has discovered a method of inclosing a powerful charge of electricity in glass capsules, which will easily explode on sudden pressure. He has, it is stated, succeeded in inclosing these capsules in steel cones, which, fired from a gun, prove terribly destructive. Numerous experiments have been tried with these missiles on animals, and in every case they were killed instantaneously.

The Prussian Government, fully aware of the great national importance of chemistry, have given orders that two colossal chemical laboratories, furnished with the most complete apparatus, shall be erected at Berlin and Bonn, under the superintendence of Prof. Hofmann.

The mineral statistics of the United Kingdom have just been completed for the past year. According to these, the total quantity of coal produced in 1865 amounted to 98,150,587 tons. Of this quantity, North Wales produced 1,983,000 tons; South Wales, 7,911,507 tons; Scotland, 12,650,000 tons; and Ireland, 123,000 tons. Of the above total produce, 28,783,052 tons were consumed in making iron, leaving 59,197,058 tons for other purposes, which gives a consumption of 2 tons 9 cwt. 8lb. for each unit of population. The quantity of coal brought within the metropolitan district last year was 5,909,940 tons. The quantity of iron ore raised during 1865 was 9,910,045 tons, valued at 3,324,804*l*. This produced 4,819,254 tons of pig iron. The tin produced from the Cornwall mines during the past year exceeded the production of any previous year, and amounted to 15,686 tons, valued at 867,435*l*. The copper-mines of Great Britain and Ireland produced 198,298 tons of copper ore, valued at 927,938*l*. The total quantity

of lead ore raised was 90,452 tons, from which 723,856 ounces of silver were obtained. The Welsh gold-mines yielded 1,663 ounces of gold. The produce in 1864 was 2,336 ounces. 114,115 tons of iron pyrites were raised, the value of which is estimated at 71,744*l*. Of this quantity 81,993 tons were raised in the county of Wicklow. The total value of minerals raised during 1865 is 32,359,080*l*; and of metals, 15,773,287*l*.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES is ON VIEW at the Royal Exchange Fine Art Gallery, 24, Cornhill. This Collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holman Hunt—J. Phillip, R.A.—T. Faed, R.A.—Egg, R.A.—Fritch, R.A.—Ross Bonheur—Hornet, R.A.—Goodall, R.A.—Cox, R.A.—Crawick, R.A.—Pickersgill, R.A.—Calderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmith—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Kane—F. Hardy—Joh. Faed—Fries—Ruisper—Liddendale—George Smith—Dwyer—Peter Graham, &c.—Admission on presentation of address card.

ROYAL POLYTECHNIC.—Professor Pepper will shortly deliver a new Lecture on Professor Tyndall's Researches in Heat, and exhibit some remarkable Experiments, illustrating "Combustion by Invisible Rays," in addition to the present Exhibitions. Open from 12 till 5, and 7 till 10.—Admission, 1*s*.

MR. and MRS. GERMAN REED, with MR. JOHN PARRY, will re-appear on MONDAY, October 15, at 8 o'clock, in the YACHTING CRUISE, and the WEDDING BREAKFAST, Every Evening, except Saturday, at 8; Saturday only at 11. Royal Gallery of Illustration, 14, Regent Street.—Admission, 1*s*, 2*s*, 3*s*, and 5*s*. The Gallery is entirely re-decorated, and ventilated on an improved system.

SCIENCE

LUNAR RAINBOWS.

Inner Temple, Oct. 10, 1866.

LUNAR rainbows are so rarely seen, that it may be worth while noticing the occurrence of a long series of them one night about three weeks ago. I expected to see the papers full of accounts of them a day or two after their appearance, but I have not yet come across anything of the kind, so perhaps it is not too late for me to publish my reminiscences. I was travelling, on the evening of the 21st of last month, from Ambergate in Derbyshire to a station in Yorkshire, a few miles from Leeds. About an hour after sunset I was looking out of the carriage-window, when I saw, right ahead of the train, a pale arch of light in the sky. As the stars were shining in all directions, and not a trace of a cloud was in sight, I took it at first for an aurora; but after a time I saw it was a lunar rainbow. The train soon ran into a shower of very fine rain, clouds then rapidly formed in the sky, and after a few minutes the fine weather turned exceedingly wet and boisterous. A succession of violent squalls swept across the line of rails, each bringing with it a torrent of rain while it lasted, but clearing off each time as suddenly as it came. Every time that the clouds drifted away to leeward the almost full moon came out in all its splendour on the left hand side, while on the right appeared the perfect bow of a lunar rainbow, its pale silver light heightened by the blackness of the raincloud behind it; at first glistening like an arch cut out of white spar, then gradually fading away till it gleamed indistinctly in the distance like the mere ghost of a rainbow. As it vanished another squall would sweep across the line, bringing with it utter darkness and a fresh deluge, and then again the clouds would break and the moon shine out in the west, while in the east appeared once more the silver arch. For more than two hours I had the satisfaction of watching a series of phenomena which almost seemed as if they were intended for my especial gratification, for neither that evening, nor on any of the succeeding days, did I meet with any one who had seen what I saw. Perhaps, however, some of your readers may have witnessed the spectacle and enjoyed it as much as I did.

W. R. S. RALSTON.

ICE: DOES IT EXPAND OR CONTRACT BY COLD?
Kirkwall, Orkney, October, 1866.

I have recently conversed with persons who had attended the admirable course of lectures at the Royal Institution. They all seemed to be of opinion that ice continued to expand as its temperature was reduced; and one of the experiments of Prof. Tyndall—our greatest and best authority on such subjects—was quoted as a proof of this.

The experiment was as follows:—
A compact mass of ice, at or very little below

the freezing-point, was pressed tightly into a strong (metallic) vessel, which vessel being then placed in a strong freezing mixture was burst asunder, supposed to have been caused by the expansion of the ice inside.

My opinion is that the strong vessel was broken by its own greater and more sudden contraction (metal being a good conductor of caloric) on the solid unelastic ice inside, which, even if it did expand by the abstraction of heat, would, as a bad conductor, be much more slowly affected by the freezing mixture than the vessel inclosing it.

The wise law of nature by which water at a temperature of 39° begins and continues to expand as it cools down to the freezing-point of 32°, is so well known as to require no comment; but I believe that after ice is once formed, it is acted upon by reduction of temperature in the same manner as almost every other known substance, that is, it contracts.

In travelling over the large frozen lakes (Winnipeg, for instance) in America during winter, if a calm and cold night (say 30° below zero) follows a somewhat mild day, loud cracks like pistol shots and moaning sounds are heard on the lake continually; and next morning when travelling is resumed, large rents (occasionally several feet wide, which can be caused by contraction only), with open water in them, are seen in the ice, across which there is often both difficulty and danger in leaping.

These rents are soon firmly frozen over, and perhaps in a day or two the temperature rises some 20°, when there is a repetition of the noises on the lake ice, not to the same extent however, and arising from an opposite cause,—namely, the expansion of the ice, which is either forced up into ridges, or pushed up on the shore, as there is now more ice on the lake, by the amount formed in the rents spoken of, than will cover it at moderate temperature; therefore it has to be forced up somewhere.

These contractions and expansions go on during the winter, to a greater or less extent according to the greater or less number of changes of temperature that occur.

I believe glacier motion on a large extent of surface, such as Greenland, to be in a great measure caused by the contraction and expansion of the ice.

Thus, the ice contracts in winter, forming wide and deep cracks or crevasses. These are drifted full of snow, and when the ice expands again by the warmth of summer, these crevasses being filled up, the ice is pressed out at the edges, as it must expand somewhere.

There may be nothing new in the views I have ventured to express; but I have never heard them promulgated by any one, which is my only reason for troubling you with this long letter on a very cold but interesting subject. JOHN RAE.

MEETING FOR THE ENSUING WEEK.

MONDAY. Mathematical, 7½.—Special, for Revision of Rules.

FINE ARTS

Battle Abbey, with Notices of the Parish Church and Town. Illustrated. By M. E. C. Walcott. (Battle, Tioehurst.)

To-morrow, October the 14th, eight hundred years will have expired since William of Normandy defeated Harold of England in the "heathy" field that was anciently called Senlac, and the fortunes of the valiant son of the cow-driver sank under those of the happier tanner's grandchild. This so fatal or fortunate day was a Saturday, the feast of St. Calixtus, and, says Mr. Walcott, that of the nativities of both Harold and William. In commemoration of his good hap, the victor founded the monastery which has been very carefully and pleasantly illustrated and described in this very handy little book.

Mr. Walcott has had recourse to original authorities, compared them, embodied the results of his own researches on the subject, and produced what is, on the whole, a capital work,

which will be especially serviceable to visitors for a manual and to general readers for a book of reference.

The errors of preceding writers have been set forth with regard to their descriptions and the appropriation of parts of the ancient ground-plan to their proper uses. Thus, although Gough rightly indicated the dormitory, Browne Willis called the same structure a refectory; this is a blunder of the strangest kind, as will be apparent to any one who has but the slightest knowledge of plans of ancient monastic buildings. Walpole, probably without meaning anything in particular, styled the same place the "church." Other curious slips have been made, some of which are of the most recent date.

The Abbot of Battle held what was by no means an ignoble or uncomfortable office; so one would think from the splendour that attended him, and the extraordinary privileges he held. Thus, besides hard cash, goods in kind and lordly demesnes, the latter being, from the first, three miles in circumference, the abbots held seat and power free of interference by the bishop. A happy privilege this, dear to abbatial hearts, and much coveted of old. He was free, also, of the abbot of the mother-house at Marmontier, exempt from attendance on episcopal synods, with the rights of treasure trove, visitation, sanctuary, free warren and free toll; also, by way of an extraordinary endowment, King William gave to his nominee authority to liberate any criminal whom he might meet in custody on the highways. This power was exercised, if Walsingham is to be believed, so lately as the third quarter of the fourteenth century by Abbot Robert of Battle. So far as we know, but one other such authority existed in the domains of the Norman and Plantagenet kings. The Chapter of Rouen could redeem a criminal from death by the exercise of what was styled the "privilege," which was secured, so says tradition, to the cathedral of the Norman metropolis by the act of St. Romaine in delivering the city from the great dragon, Gargouille,—its peculiar horror. On several occasions the abbots of Battle proved themselves worthy of these extraordinary powers. Thus, Hamo of Offintun, immediate successor to the before-named Robert of Battle, delivered his neighbour, the Prior of Lewes, from the clutches of the French invaders of Winchelsea, 1377.

Such was the beginning of its stateliness. The end of the story of the Abbey of Battle contrasts strangely enough with this, as well as with the long lasting dignity of the place. In 1538 the dissolution was effected. The report of John Gage, the Commissioner, to Lord Cromwell, is curiously illustrative of what must have been done in preparation for the storm. This writer says that the "implements of the household are the worst that ever I see in Abbaye or Priore, the vestments so old and baseborne, ragged and torne as your Lordshippe would not thinke, so that very small money can be made of the vestrye." The household and church plate was not worth, he writes, more than 400 marks. "Thus of Lord continewe yowe in honour," adds this worthy to his patron, as well he might; for in August of the same year his son-in-law, Sir A. Browne, received a grant of the establishment, buildings, park, lands, and all, in capite, by the service of two knights' fees and a yearly rent of 12l. The property thus obtained has been twice sold and it now belongs to the Duke of Cleveland, by purchase in 1857. The Dean of Battle still retains traces of that extra-episcopal power which was granted by the Conqueror to the abbot of the monastery.

Mr. Walcott has likewise elaborately gathered

the history of the town and church of Battle, in addition to that of the abbey, which formed the nucleus of the whole; some minor points of interest appear with regard to the former. We are reminded by the author that John de Bello, mason, was the architect of the Eleanor Crosses at Northampton, Stony Stratford, St. Alban's, Woburn, and Dunstable; therefore, he was one of the ablest architects of the mediæval period. The church is one of the remaining few which contains a curfew bell, which is still used at eight o'clock in the evening. We must add, with our last note of approval, that the author has furnished a complete list of the Abbots of Battle. Such a list has never before been printed; and for such an addition to our knowledge students of ecclesiastical history will be thankful to Mr. Walcott.

FINE-ART GOSSIP.

Messrs. Bell & Daldy will shortly publish 'Memorials of Mulready,' by Mr. F. G. Stephens, with fifteen photographs from the painter's masterpieces, including 'Train up a Child, &c.,' 'Choosing the Wedding Gown,' 'The Whistonian Controversy,' 'The Butt,' &c.—Messrs. Seeley, Jackson & Halliday will soon issue 'English Children as painted by Reynolds: an Essay,' by the same author, with photographs, comprising 'The Strawberry Girl,' 'Simplicity,' 'The Infant Johnson,' 'Moses,' 'The Sleeping Child,' and eleven others. This work will contain a catalogue of the engraved pictures of children by Reynolds, with the names of their engravers, comprising many hundreds of examples.

Contributions of a portfolio of drawings have been made by some of the foremost English artists to enable Mr. W. M'Connell, the artist, to obtain a change of climate. His health has been so impaired that for the last two years he has been unable to work.

The Exhibition of Arts and Manufactures, which has been open during August and September, at Dudley, has been highly successful, the main attraction being the Earl of Dudley's collection of pictures, the bulk of which was exhibited at the Egyptian Hall, Piccadilly, a few years since. The receipts have been higher than was anticipated; there will be a handsome sum for distribution among the charities of the town.

The Loan Exhibition at Southampton will be closed on the 23rd of October, when the prizes will be distributed by the Earl of Carnarvon.

The upper wall arcade of the South Court, South Kensington Museum, has assumed an appearance of completeness in respect to its decorative pictures of great artists. The east and west sides of the line are now filled with figures on gold grounds, as intended for reproduction in mosaic. The effect of this gathering is extremely splendid. In an artistic sense, a great improvement has been made by adoption of that rule in architectural design which limits representation in such works to a single plane; this law has been, with one or two—let us hope temporary—exceptions, followed throughout the series. The majority of those designs which, in the first case, violated the law in question, have lately been made consonant to it. Two new figure portraits, not before noticed by us, have been placed here:—one, Donatello, by Mr. R. Redgrave, representing the great artist with the famous bronze patera of the Martelli family in his hand. The introduction of this admirable bronze is peculiarly apt at Kensington, the patera itself being one of the treasures of the Museum. The figure is one of the best of the series, capably drawn, standing well—a very difficult matter to attain in pictures placed as this is; the colour is excellent, and very well adapted for reproduction in mosaic, also for its decorative purpose. Mr. F. Barwell designed the second newly-placed figure. This is an admirably characteristic portrait of Mulready, in his proper costume, frock-coat, trousers and that waistcoat of cut velvet which was so familiar in the schools of Art. The painter stands holding a sheet of paper, exactly as he was

went to do when examining a drawing, that is, by the diagonally opposite corners. The reproduction of Mr. Leighton's figure of Cimabue, which is wrought in earthen mosaic, a perfectly satisfactory copy, has been erected by the side of its companion in glass mosaic. A second design, representing Torrel, by Mr. R. Burchett, has been set up in the arcade.

Mr. Slater has been directed to prepare designs for a Cathedral to be erected at Honolulu, and to put the same in hand as soon as practicable. This structure is intended to commemorate the late king of the Sandwich Islands. It will comprise a choir, with a semicircular apse and *chevet*, and a tower, to stand on the north-west of the choir. The style adopted for the building by the architect is English Decorated, of early date in that phase of Gothic. The cost of the part about to be begun is 5,000*l*.

MUSIC AND THE DRAMA

THE ROYAL ACADEMY OF MUSIC.

Chroniclers of what passes cannot possibly ignore the mistrust and dissatisfaction caused by certain of the new appointments made in the direction of the Royal Academy of Music; especially, we are bound to say, that of the Vice-President, on whom, it may be predicated, by all familiar with the past, the lion's share of enforcing discipline will fall. Every one is asking, and not without cause, on what grounds has Herr Otto Goldschmidt been promoted to a post requiring either brilliant natural gifts, or decision in administration, or experience. The question has nothing to do with private amiability or adventitious position. Considered *per se*, Herr Goldschmidt is known in England merely as a conductor of two or three works so familiar that they may be said almost to conduct themselves; as a pianist who cannot be rated above the second class of players; and as a composer whose originality has to be substantiated. On what ground, then, it may fairly be inquired, has more than one professor, foreign and native, of unimpeachable reputation and probity, and (we must say) greater and more widely-proved musical attainments, been passed over, or else placed in a position subordinate to one who, no matter how favoured by chance in fortune, has to "win his spurs" as regards Art? Without being unduly prophetic (which, as Sydney Smith wisely said, is waste of expenditure of mind), we cannot help feeling or foreboding that the decaying Royal Academy may have been helped on its way towards its long home by the very proceedings which have passed with some as signs and tokens of its revivification. We wait for some public notice on the part of its directors, as to what has been done in omission, commission, and revision, and by whose agency money is to be raised for "the patching of the very old coat."

HOLBORN.—The erection of a new theatre in London is an event rendered important by its rarity, if from no other cause. It is twenty-five years ago since such an occurrence took place, and then the building, now called the Princess's Theatre, met with every discouragement from the prejudice of the time. The unprecedented success of theatrical speculation in these latter days has given to every theatre a respectable management, and made it evident that new play-houses might not only be profitably erected, but were wanted. The new theatre in Holborn, accordingly, has started with advantages not permitted to the preceding experiment. The site on which it is built is not without dramatic associations; near it, at any rate, Lord Bacon busied himself in getting-up a play acted by the members of the Inns of Court. The site itself is that of the old Post-Office stable-yard by Jockey's Fields, where the old mail-carts used to congregate. Previous to Mr. Sefton Parry's selecting the spot for a theatre, it had become an object of interest to others having the same design, and an endeavour was made to form a company for the purpose. Mr. Parry, however, had the advantage of being an actor, who, out of the savings of his professional life, had the means of sustaining the exclusive ability, and was thus enabled

to appropriate the site to himself. He has built upon it a handsome and elegant theatre, with approaches and accommodations, for the convenience of the public, too little thought of in previous edifices. There are four rows of stalls, 3 ft. 6 in., and pit seats, 2 ft. 10 in., from back to back. The dress-circle has six rows of seats, 3 ft. apart, facing the stage; skirted on either hand by four private boxes; and on the tier above, are four slip-boxes on each side, with two rows of amphitheatre-stalls betwixt; behind which spreads a capacious gallery. There are no proscenium-boxes, the space being occupied by staircases for the convenience of exit by the audience in case of panic; and in the rear of the dress-circle are a saloon and ladies' cloak-room, as also a refreshment saloon behind the pit. Provision has been made for the ventilation of the building by perforations in the roof and walls for the admission of cold air, and by the introduction of a "sun" burner. The theatre is prettily decorated; the front of the boxes having projecting ornaments and shields with allegorical figures, and the ceiling being panelled out by projecting ribs, intersected with small pendants, while the proscenium rejoices in a diphra ground, surrounded with circular ribs. Salmon and white relieved with gold are the prevailing tints.

On Saturday evening this handsome new theatre opened for the first time, under the management of Mr. Sefton Parry, and with a new drama by Mr. Dion Boucicault, entitled 'The Flying Scud'; or, a Four-Legged Fortune, preceded by a farce by Mr. T. J. Williams, called 'Larkins' Love-Letters.' The latter is a riotous "piece-of-work," which, with good actors, was effective. After the farce Mr. Parry formally opened the theatre with a rather flippant address. Mr. Boucicault's new drama, which followed, is, like all his pieces, full of cleverness and talent, and in part, particularly in the delineation of character, indicating true dramatic genius. The first two acts are excellent in structure and dialogue, and remarkable for the individuality of the persons engaged in the action. The world of the turf is brought before us, and its worthiest member, the old jockey, *Nat Gosling*, admirably impersonated by Mr. Belmore. *Nat* sells "tips," and advertises in *Bell's Life*, under the name of "Old Boots." *Nat* has a granddaughter, *Katey Rideout* (Miss Bessie Foote), who is beloved by *Tom Meredith* (Mr. G. Blake), a young farmer, who has trained the "Flying Scud," a race-horse, the property of the Squire of Nobbley Hall, lately deceased. *Captain Grindley Goodge* (Mr. G. Neville), the nephew of the late squire and his heir, is on the spot to hear his will read, and as it is expected that he will have the estate, *Tom* applies to him at once, to allow him to continue in his house and office. But *Goodge* has seen *Katey*, and suspecting *Tom* for his rival, rejects his application. *Katey* undertakes to plead with him for *Tom*, and is imprudent enough to visit him at the stables, where *Goodge* locks her in, and there leaves her while he goes to hear the will read. *Tom* finds out what he has done, and becomes jealous, and in this state of mind attends the reading of the will. To his surprise, in consideration of his father having been the former proprietor of the Hall, and ruined himself on the turf, the estate is left to *Tom*, on condition that he shall undertake all the engagements affecting *Flying Scud*, as the principal chattel bequeathed by the will. *Nat* then congratulates him on his good fortune, connecting therewith the welfare of *Katey*; but *Tom* calls on *Goodge* to give up the key of the stable, that *Nat* may learn for himself why he can take no further interest in his grandchild. This makes an effective ending for the first act. The second act is one of stirring action, showing how *Goodge* and his three black-leg friends, *Colonel Mulligan* (Mr. E. Garden), *Mo Darris* (Mr. Vollaire), and *Chouser* (Mr. Westland), plot together to ruin the race-horse; how they cheat *Lord Woodbie* (Miss Fanny Josephs) out of two thousand pounds, to enable them to bribe old *Nat* to permit them to physic the animal; how he contrives that they shall physic the wrong horse; how then they hocus the jockey, who is rendered unfit to ride it; and how *Nat* himself supplies his place, and wins the race. Here we have the Derby Day, the Downs, the

crowds assembled, the groups of professional thimble-riggers, spectators, people in carriages and on foot, and in the distance the race-course, with horses and riders in competition. At length *Nat* enters, on *Flying Scud*, in triumph. This act is decidedly good throughout, and the interest and anxiety are well kept up to the last moment. The drop descended to great applause. The interest, perhaps, could not be maintained at the same height through the next two acts, and they have the fault of commencing with another action altogether, thereby destroying the unity of the plot. *Goodge* and *Tom*, one disappointed in love and the other in wealth, seek to ruin each other at cards; *Goodge's* party of blacklegs, called the *Quadruped*, however, play unfairly. *Lord Woodbie* exposes them, and a duel is the result. *Julia Latimer* (niece of *Mulligan*) personates the nobleman, and receives the shot, but is not dangerously wounded. This character is well acted by Miss J. Fiddes, and is of great interest in itself, though not readily falling into the outline of the story. The fourth and final act is dangerously brief. The confederates quarrel among themselves, and fight for the balance of their capital. They are interrupted by *Nat* Gosling and his party. The former bears the evidence of *Goodge's* having forged on *Lord Woodbie*, and uses it to compel *Goodge* to clear the good fame of *Katey* from the doubts that his base conduct had thrown on her reputation. Among the characters we have not mentioned is that of *Bob Buckskin*, a jockey too fat and heavy for his business, who is represented by Miss Charlotte Saunders in a manner that begs all commendation. Of the whole we may add that, with one exception, the play throughout was charmingly performed. With such an inauguration, the new theatre must speedily become for a time the most popular in the metropolis.

STRAND.—A new burlesque, by Mr. F. C. Burnand, was produced on Monday, on the basis of the *libretto* of 'Der Freischütz.' Of all his burlesques, this is perhaps the most *insane*; for in these productions the association of ideas is so thoroughly surrendered to fancy and caprice that reason and judgment are as completely ignored as if they had no existence. The characters of Weber's opera appear, indeed, on the stage, in their proper costumes, with occasional exaggerations: we recognize that they stand in similar relations to each other as they do in the original work; but when thus grouped and individualized, they say anything, sing anything, and do anything but tell the story or explain the plot of any drama, new or old. It is not only that the dialogue and the airs run wildly after pun and parody; but they madly take "the high priori road and quit sense" altogether, and in that way caricature the manifestations of the poetic afflatus. It is a pity that the poetic drama is not permitted in these days a place on the stage save in the burlesque form; nor is it surprising that in this form the poetic spirit should run riot, and seek to astonish where it may not teach. Mr. Burnand strives to make you wonder at the odd combinations of words and thoughts that he brings together, and cares not for the means that he employs so that he secures the effect which he desires. He is willing to "reign in the realms of nonsense absolute," and submit to be laughed at, where he cannot be laughed with; the requisite excitement in the audience being maintained, he fears not to excite the critical indignation of the more judicious. The company at this theatre are so well versed in the kind of acting required for this bizarre species of composition that they carry out with remarkable facility his most eccentric inventions. Accordingly, Mr. D. James, in *Rodolphe*, as an operatic tenor, indulges in indescribable tricks of voice as well as gesture, and handles his rifle rather as a goblin than a man. Mr. C. Fenton's *Caspar* is equally outrageous, and Mr. T. Thorne, as *Madame von Suckup*, is simply "prodigious." These pieces are also distinguished by the number of male characters represented by women, from whom the strangest of antics are expected. Miss E. Johnstone, as *Kilian*, the happy peasant, and Miss Raynham, as *Zamel*, thoroughly abandon themselves to the humour of the author, and aim

success regardless of appearance. Then there is the heroine, as represented by Miss Ada Swanborough, who always acts with determination, and without any reticence whatever. Her *Agnes*, on the present occasion, is distinguished by peculiar force, and illustrated by a variety of talents. Not only does she speak, sing, dance, but plays on a wind-instrument, the cornet, a grand *solo*, with variations, earning an *encore* at the loss of valuable breath, much needed immediately afterwards for vehement declamation. Her boldness, readiness, and general efficiency impart animation and vigour to every scene in which she appears. That such productions and such acting should command the reference of theatrical audiences is a characteristic that marks as much the age as the stage. The sacred and sublime had their era of existence, and had been so gloriously illustrated by our reater bards down to the middle of the nineteenth century, that their successors, in despair, found it as difficult to ridicule than to imitate. There is, however, no little probability that burlesque, urged by the demands upon it, may exceed all limits of discretion, and thus induce a reaction favourable to more legitimate efforts. Meanwhile we have only to record the success of Mr. Burnand's new venture.

HAYMARKET.—Mr. and Mrs. Charles Mathews have re-appeared at this house in Mr. Tom Taylor's *Overland Route* and in Sheridan's *Critic*. In the latter Mr. Mathews sustains the two parts of *Puff* and *Sir Prentiss Plagiary*, and interpolates the dialogue, as usual, with personal and occasional remarks. In the former, his *Tom Dexter* retains all its freshness; and Mrs. Mathews as *Mrs. Sebright* is as coquettish as ever.

ST. JAMES'S.—This theatre lying somewhat out of the way, has presented difficulties to the management which could not be overcome but by opposing to them some distinguishing speciality which might attract its peculiar public. Miss Herbert has seen her way to this desirable result, and devoted her stage for some time to the illustration of our old comedies. She has been accepted as the representative of their heroines, whom, indeed, she has shown in new lights, having the advantage of originality in her style of impersonation, and considerable intelligence and aptitude in support of her intention. The theatre re-opened on Saturday with *The Belle's Stratagem*, a comedy, by Mrs. Cowley. In this we have the manners of the eighteenth century set forth, manners which for the most part are well fitted for comic effect on the stage. Miss Herbert's company includes members who are specially fitted for their representation. Than Mr. and Mrs. Frank Matthews we have no better artists for such parts as *Mr. Hardy* and the *Widow Racket*. Mr. Gaston Murray's *Sir George Touchwood*, too, is a highly creditable performance, and Mr. Charles is a successful *Courtall*. Mr. H. Irving was the "fine gentleman" in *Doriot*; but he was more, for his mad scenes were truthfully conceived and most ably executed; while Mr. W. Lacy in *Plut* was in his element. The *Letitia Hardy* of Miss Herbert is marked with that refinement and delicacy which prevents her from ever falling into coarseness, even when representing characters that are comparatively or intentionally rude. The comedy was followed by a new farce, by Mr. John Drenford, called *'Professor of What?'* the hero being represented by Mr. Stoye, late of the Strand. The farce answers its immediate purpose of supplementing the main piece of the evening, and was favourably received.

MUSICAL AND DRAMATIC GOSSIP.

At last Saturday's *Crystal Palace Concert*, the best of the interesting winter series, Herr Manns conducted Beethoven's Symphony in B flat excellently. —M. Hartvigson, one of the best and most attractive of the new pianists who have settled in England, was more adventurous than well advised in selecting Schubert's Grand Fantasia, Op. 15, adapted for pianoforte and orchestra by the Abbé Muzart. As we have said of Herr Joachim's similar enhancement of one of Paganini's *solo* freaks,—as we

have always felt regarding the ingenious arrangement of Weber's *'Invitation to Waltz,'* by M. Berlioz, there is always risk, more or less, in changes of the kind. Among the happy exceptions may be mentioned Mozart's scoring of one of Handel's *'Musettes'* for his amplified version of *'Acis and Galatea,'* and (more recently) the arrangement of Mozart's *'Rondo alla Turca,'* as a curtain-tune, for the revised version of *'Il Serraglio,'* at the Théâtre Lyrique. Schubert's *fantasia*, with all its beauty, is disproportioned and tedious,—a work to bear no superadded weight. The above remarks are due to M. Hartvigson's real merit and (we repeat) attractiveness as a pianist. In place of a set of Waltzes by M. Gounod, Meyerbeer's *'Struensee'* Polonaise was performed; like all Meyerbeer's music in the same rhythm (his four Torch Dances not forgotten), originally rhythmical, but patchy and trite in point of melody. The best examples of his dance-music are in *'Le Prophète.'* Nothing of its kind more charming exists than the *'Pas de Redowa.'* The singers at Sydenham this day week were Mdlles. Enequist and Elvira Behrens: neither a bad nor an unpleasing pair of voices; but singers (if they will attempt such florid music as the tawdry *bravura* in *'La Traviata'*) should learn to finish their passages; and it is not a dream of Arcadia or Utopia to ask for some delivery of the words such as should assure "the listening throng" that the syrens who are enchanting them are Swedish, or German, or Italian, or French, or English, as may be, and not Chinese. The neglect, among vocalists, of honest and intelligible articulation is becoming a nuisance.

The *Popular Concerts*, a series of twenty-three in number, including many morning performances, are to begin on the 5th of November. Signor Piatti is retained for the entire season. Herren Straus and Wilhelmj will appear before Christmas; in February, Herr Joachim (who, we believe, will play in the interim in Switzerland and France). Madame Arabella Goddard will play at the first three concerts; Mr. Halle at the fourth, fifth, and sixth.

Prof. Moscheles, who has passed the long vacation from the Leipzig Conservatory in this country, has not passed it in idleness. A *suite* of Pianoforte Duets by him may be shortly expected. We are informed that they are in his best manner.

It has been said that Signor Verdi has some idea of entrusting one of the parts in his coming *'Don Carlos'* to Mdlle. Artôt. As the stage stands, he could not do better.

The Italian opera season in Paris has commenced. The first pieces performed were *'La Sonnambula,'* with Mdlle. A. Patti, and *'Norma,'* with Mdlle. Lagras, in the principal parts. The latter lady is said to have made a great impression in the part of the Druid priestess.

The *Gazette Musicale* asserts that Signor Rossini's *'Little Solemn Mass'* (the one, we presume, with the fantastic and familiar dedication), which has been an object of great curiosity in Paris, will be produced at the Birmingham Festival of 1867.

The Winter Concerts at the Gürzenich Hall, Cologne, conducted by Herr Hiller, which are now among the first meetings of their kind in Germany, will commence on the 23rd.

Mdlle. Irma Marie is among the numerous new engagements made by M. Carvalho for his theatre.

Signora Bendazzi, says *Il Trovatore*, is to be *prima donna* during the coming season at the Teatro San Carlo, Naples. Fancy a first-class theatre relying on, in principal parts, such a tenor as Signor Stigelli,—a singer who, years ago, was hardly endurable, one displaying no trace of promise in voice or method. They are beating about, it would seem, as those who hope against hope, in search of something better; and the Italian authority referred to states that overtures have been made to "Harvin" (is not this name furiously mis-spelt?), who has also been in treaty with M. Bagier, the manager of the Paris Italian Opera. "The celebrated tenor Malvezzi" makes part of the St. Petersburg company this year.—*Il Trovatore* further calls attention to a Signor Perozzi, who has appeared at Florence, at the Teatro Nuovo, in Signor Petrella's *'Marco Visconti.'* "He has a voice of extensive compass (says the journal),—a

treasure of a voice." Opera-goers on this side of the Alps may not impudently ask whether, and where, he has learnt to sing!

A new drama, *'La Marianna,'* by Signor Paolo Ferrari, has been produced at the Teatro Rê, Milan.

'Le Musicien des Rues,' another novelty, in five acts, by MM. Brièbarre and Nus, which is given at the Théâtre Beaumarchais, is well spoken of.

Herr Pogner, a bass singer, whose place of abode was Leipzig, is dead.

The Brighton Theatre, which has been almost entirely re-built by Mr. Phipps, and decorated by Messrs. Green & King, the decorators to Her Majesty's Theatre, is advertised to re-open for the season on Monday next.

MISCELLANEA

Geological Miracle Assumers.—I beg to correct three slips in my discussion of the cometary statistics:—I. Page 437, before the first table, for "up to the end of 1840," read "up to the end of 1864." II. Last table, top of last column, for "20.1," read "21," making the column add up 544.8. III. P. 438, last sentence, for "the first tendency," read "the first geological tendency." I should have remembered that, even restricting the term "comets" to masses considerable enough to produce, on falling to the earth, a cataclysmal remoulding of her crust, it may yet be true that before such remoulding has well begun, considerable changes in organic nature, or at least in the Fauna, would take place if the material of the comet were any known to chemists, except azote, oxygen or steam; and thus, indeed, the quaternary, and even tertiary fossils, yield perfect demonstration that any comet which has fallen since them—the last that fell, if not the two last—can have consisted of no other material than those, or rather than steam only. Of course, masses of other chemical constitution might, even if too light to make a cataclysm, effect strange things in more than the mere Fauna. Thus, if we extend the term "comet" to a body of so little mass as a twenty-seven millionth of the earth—probably less than any that telescope has ever revealed—or such that, when wholly collapsed, it should only augment our present atmosphere by one-thirtieth, and raise our barometers one inch; but suppose that body to be hydrogen, it is curious to consider what its fall would resemble. If a physicist be at any loss for a clear description, I would beg to suggest, as curiously exact, two sentences in an old writing, once attributed, for some centuries, to the chief predecessor of His Holiness Pío Nono (Epist. 2. c. III. 10-12); to which I will add that, if the inhabitants of Mars have spectroscopes, and one of them should happen just then to turn his instrument on our planet, he would obtain an observation not unlike that unique stellar one of Mr. Huggins and Dr. Miller in May last.

EDWARD L. GABBETT.

Pose, Murre.—Plut. Mor., tr. by Philemon Holland (London, 1603), De Plac. Philos. iv. 17.—"Like as we observe in them who are troubled with the pose, murre, and such like rheumes"—ἐν τῇ τῶν ρευμάτων φύσει. H. N.

The Word Bonfire.—In answer to your Correspondent, Mr. Griffith, I send another authority for the word *bonfire*, from Horn & Rowbotham's *'Gate of Languages Unlocked,'* (1643) where, in § 961, "Exanimus corpus sepelitur: nos humamus; prisci, exstructâ pyrà, rogo ustulabant,....." is translated, "The dead corps is buried: we inter it; they of old made a *bone-fire*....." The rest of the passage unfortunately I cannot supply, having cut up the book in reading for the P. S. E. Dictionary; the Latin succeeding is "unde sepulchra sunt Busta dicta." Query, has the word any connexion with the Anglo-Saxon *banau*, or *bonnau*, to summon, *proclaim*, so that it might mean a *summoning-fire*. Mr. Griffith has already hinted at its possible connexion with the Welsh *ban*, lofty, conspicuous. S. J. W. S.

Resemblances.—Your observation about the resemblance to each other of two brothers—Babington—reminds me of the great resemblance that

existed between the late Capt. Hayes, R.N. and the late Capt. George Smith, R.N., who were not related to each other. I have seen an old and intimate friend of both officers, after half-an-hour's conversation with Capt. Smith at the Admiralty, Whitehall, leave him with the ordinary "How did you leave Mrs. Hayes?" And Capt. Hayes himself has told me, that he and Capt. Smith have been walking together in Portsmouth Dockyard, when the man of Capt. Hayes's ship have addressed Capt. Smith as their commanding officer, and the men of Capt. Smith's ship have made a like mistake in addressing Capt. Hayes. A CONSTANT READER.

A second Correspondent gives another instance:—"During the last few years," he says, "the *corps dramatique* of the Liverpool Amphitheatre contained two sister-twins, so exactly alike that persons meeting them daily were constantly mistaking one for the other, and I myself have been deceived by their wonderful resemblance to each other over and over again.

"J. H. NIGHTINGALE."

Distraint for Rent.—The reviewer of Peter Walkden's Diary finds a difficulty in understanding why Thomas Parkinson, who seems to have been a lawyer or a bailiff, was unable to gratify Mr. Walkden by distraint for rent "afore May Day." The explanation is simple. The custom of the country, no doubt, was the same as it is here in Lincolnshire. Land is let from Lady Day to Lady Day, houses from May Day to May Day. If that were the case, Henry and Mary Richmond's rent would not become due until the latter period, and no distraint could be levied until that term was passed. Probably Walkden wished to have his rent before it was due, that he might be safe against "a moonlight flit"; that is, the departure of the tenants with their goods under shadow of night, a wrong that the owners of cottage property frequently suffer under.

A LINCOLNSHIRE FARMER.

Wordsworth and Southey: their Sale Catalogues.—Wordsworth's catalogue, compiled by a country auctioneer, displays the auctioneer more than the poet: as in "Rydal Mount Catalogue of the... Library of the late venerated Post-Laureate, William Wordsworth, Esquire, D.C.L., last, not least, of the line of Lake Minstrels... will be sold... at that haunt of hallowed memories, Rydal Mount..." The statements of the lots tell us nothing about the poet: but many recommendations are drawn from all kinds of sources by the auctioneer himself. It is far otherwise with the catalogue which the London auctioneer, who is as uniform in his proceedings as Calcraft himself, made for Southey's remains. We may infer several things about the late possessor; of which we shall note one. The number of uncut books is remarkably great. Southey, somebody has said, could tear the heart out of a book while he ran it over on the sofa: he must, one would think, have been able to do it by help of the parts which are accessible without a paper-knife. But the most noteworthy circumstance is the very large number of books substantive enough to make separate lots, which are marked

Presentation copies, uncut.

Oh! sight to meet an author's eye!

Of these there are 102, a little more than three per cent. of the general library (excluding the Spanish and Portuguese). And we may suspect a larger number, for many others are marked as uncut which we must be pretty sure were presentations, though not inscribed as such, and there are various lots of several presentations each, which are not distinguished. Among the uncut presentations are to be found some which we should not expect: as Coleridge's 'Aids to Reflection,' with a long presentation note; Sir H. Davy's 'Consolations in Travel'; Dibdin's Bibliographical Tour; D'Israeli's 'Calamities of Authors'; Franklin's First Polar Voyage; Charles Lamb's Specimens of the Dramatists; Landon's Imaginary Conversations; Gifford's Massinger; Robert Montgomery's Poems; Sharon Turner's Sacred History of the World; and Chr. Wordsworth's Eikon Basilike.

To CORRESPONDENTS.—B. G. J.—J. A.—received.

MILTON HOUSE, Oct. 10, 1866.

SAMPSON LOW & CO.'S LIST OF ANNOUNCEMENTS.

A PRACTICAL GUIDE to the MANUFACTURE OF PAPER and BOARDS. By A. PROTEAUX. With Additions by L. S. DE NORMAND. Translated from the French. With Illustrations, 8vo. [Next week.]

A DICTIONARY OF PHOTOGRAPHY, on the basis of Sutton's Dictionary. Re-written by Professor DAWSON, of King's College, Editor of the 'British Journal of Photography,' and THOMAS SUTTON, B.A., Editor of 'Photographic Notes.' With numerous Illustrations, 8vo.

RICHMOND and ITS INHABITANTS, from the Olden Time. With Memoirs and Notes by RICHARD CRISP. With Illustrations, post 8vo.

THE NEW VOLUME of Mr. BANCROFT'S HISTORY OF AMERICA, comprising the Period from the Declaration of the Independence of the Thirteen United States to the End of the Campaign of 1778. 8vo.

THE SECOND VOYAGE of the ROB ROY CANOE, on the Lakes and Rivers of Sweden, Denmark, Norway, and on the Baltic and North Seas. By JOHN MAC-GREGOR, Trin. Coll. Cambridge. With numerous Illustrations.

LIFE in the PYRENEES. By HENRY BLACKBURN, Esq. Author of 'Travelling in Spain in the Present Day.' With upwards of 100 Illustrations by Gustave Doré. Post 8vo.

DOCTOR JOHNS: a Novel. By I. K. MARVEL, Author of 'Reveries of a Bachelor.' 2 vols. post 8vo.

HOBBSON'S CHOICE: a Story. By DUTTON COOK. Reprinted from 'Once a Week.' Post 8vo.

THE CHIMNEY CORNER. By Mrs. H. B. STOWE. Uniform with 'The Little Foxes.' Cheap and Library Editions.

VARIA: Rare Readings from Scarce Books. By the Author of 'The Gentle Life,' reprinted by permission from the 'Saturday Review,' 'Spectator,' &c. Crown 8vo.

CELEBRATED LETTERS, based on W. Holcombe's 'Literature in Letters.' Selected and arranged, with Critical and Biographical Notes, by WILLIAM MOY THOMAS. Crown 8vo.

THE COUNTESS OF PEMBROKE'S ARCADIA. By Sir PHILIP SIDNEY. Edited, with Notes, by the Author of 'The Gentle Life.' Crown 8vo.

THE CONSPIRACY of GIANLUIGI FIESCHI. An Episode in Italian History. By M. DE CELESIA. Translated by D. H. WHEELER, United States Consul at Genoa. With a Frontispiece Portrait. Demy 8vo. cloth.

THE MISSION of GREAT SUFFERINGS. By ELIHU BURRITT. Crown 8vo.

FAITH'S WORK PERFECTED.—The Rise and Progress of the Orphan Houses of Halle. From the German of FRÄNCKE. By WILLIAM L. GAGE. Fcap.

LOW'S HANDBOOK to the CHARITIES of LONDON. A New Edition. Fcap.

NEW ILLUSTRATED BOOKS.

TWO CENTURIES of SONG, comprising Melodies, Madrigals, Sonnets, and other Occasional Verse of the English Poets of the last 200 Years. With Critical and Biographical Notes by WALTER THORNBURY. Illustrated by Original Pictures of Eminent Artists, drawn and engraved especially for this work. Printed on toned paper, with coloured Borders, designed by Henry Shaw, F.S.A. Very handsomely bound with clasp, price 21s.

AN ILLUSTRATED EDITION of BISHOP HEBER'S HYMNS, with upwards of One Hundred Designs. Engraved, in the first style of Art, under the superintendence of J. D. Cooper. Small 4to. handsomely bound, price 10s. 6d.

ELEGANT SONNETS, being Selections, with an Essay on Sonnets and Sonnetteers, by the late LEIGH HUNT. Edited from the Original MS., with Additions, by S. ADAMS LEE. 2 vols.

MILTON'S PARADISE LOST, with the Original Steel Engravings of John Martin. Printed on large paper, royal 4to. handsomely bound.

A CONCORDANCE to MILTON'S POETICAL WORKS. By CHARLES D. CLEVELAND, Author of 'The Compendium of English, American, and Classical Literature.' Crown 8vo.

THE MASQUE at LUDLOW, and other Romanesques. By the Author of 'Mary Powell.' Crown 8vo.

A SUMMER in LESLIE GOLDTHWAITE'S LIFE. By the Author of 'The Gayworthys.' With Illustrations. Fcap. 8vo.

TOILERS of the SEA. By VICTOR HUGO. With a Frontispiece by Gustave Doré. Crown 8vo.

THE TRUE HISTORY of DAME PERKINS and HER GREY MARE. Told for the Countryside and the Fireside. By LINDON MEADOWS. With Eight Coloured Illustrations by Philz. Small 4to. cloth.

GREAT FUN. Stories told by THOMAS ARCHER and THOMAS HOOD to Edward Wehnert's Pictures. Printed in Colours, 4to. cloth, gilt edges.

CHILD'S PLAY. Illustrated by E. V. B. A New Edition.

London: SAMPSON LOW, SON & MARSTON, Ludgate-hill.

CASSELL, PETTER & GALPIN'S NEW VOLUMES.

MILTON'S PARADISE LOST

Illustrated with Large Designs by GUSTAVE DORÉ. Edited, with Notes and a Life of Milton, by ROBERT VAUGHAN, D.D. In One Large Folio Volume, bound in cloth, 11s.; bound in best polished morocco, gilt, 10s.

THE HOLY BIBLE

Illustrated by GUSTAVE DORÉ. DIVISIONAL VOLUME I. Folio, cloth, 11s.

DON QUIXOTE. By Cervantes.

With about 400 Illustrations by GUSTAVE DORÉ. In One Handsome Quarto Volume, bound in cloth, 11s. 10s.; in half morocco, 21s. 5s.; in best morocco lines, 21s.

THE HISTORY OF CROQUEMITAINE

AND THE CHIVALRIC TIMES OF CHARLEMAGNE. Illustrated throughout by GUSTAVE DORÉ. The Text freely rendered from the French by TOM HOOD. 4to. cloth, printed on toned paper, 11s.

THE LEGEND OF THE WANDERING JEW.

With Twelve Large Designs by GUSTAVE DORÉ. Large folio, cloth, 15s.

IDYLIC PICTURES.

Drawn by PINWELL, HOUGHTON, PAUL GRAY, BARNES, &c. Royal 8vo. cloth gilt, 10s. 6d.

THE CHILD'S GARLAND OF LITTLE POEMS.

London: WARD, LOCK & TYLER, Publishers, Warwick House, Paternoster-row, E.C.

BOOKS OF POETRY.

THE POEMS OF ARTHUR HUGH
CLOUGH, sometime Fellow of Oriel College, Oxford. Second Edition. With a Memoir by F. T. PALGRAVE. Fcap. 8vo. cloth, 6s.

"Few, if any, literary men of larger, deeper, and more massive mind have lived in this generation than the author of these few poems; and of this the volume before us bears ample evidence. There is nothing in it that is not in some sense rich either in thought or beauty, or both."—*Spectator*.

MY BEAUTIFUL LADY. By Thomas WOOLNER. With a Vignette Title by Arthur Hughes, engraved by Jeana. Third Edition. Fcap. 8vo. cloth, price 6s.

BROTHER FABIAN'S MANUSCRIPT; and other Poems. By SEBASTIAN EVANS. Fcap. 8vo. cloth, price 6s.

"What the Greeks meant by a poet, and what our forefathers called a poet,—he is a maker. He gives something that has life of its own, and something we never had before."—*Daily Review*.
"Remarkably clever and full of kindly humour."—*Globe*.

THE PRINCE'S PROGRESS, and other POEMS. By CHRISTINA G. ROSSETTI. With Two Illustrations, from Designs by D. G. Rossetti. Fcap. 8vo. cloth, price 6s.

GOBLIN MARKET, and other Poems. By CHRISTINA G. ROSSETTI. With Two Illustrations, from Designs by D. G. Rossetti. Second Edition. Fcap. 8vo. cloth, price 6s.

THE ANGEL in the HOUSE. By COVENTRY PATMORE. A New and Cheap Edition. In 1 vol. 18mo. beautifully printed on toned paper, price 3s. 6d. Also an Edition, 2 vols. fcap. 8vo. cloth, price 12s.

POEMS. By Richard Chenevix Trench, D.D., Archbishop of Dublin. Collected and arranged anew. Fcap. 8vo. cloth, price 7s. 6d.

SHADOWS OF THE PAST. In Verse. By Viscount STRATFORD DE REDCLIFFE. Crown 8vo. cloth, price 10s. 6d.

"The vigorous words of one who has acted vigorously, and combine the fervour of politician and poet."—*Guardian*.

THE PROMETHEUS BOUND of ÆSCHYLUS. Literally translated into English Verse, by AUGUSTA WEBSTER. Edited by THOMAS WEBSTER, M.A., late Fellow of Trinity College, Cambridge. Extra fcap. 8vo. cloth, price 3s. 6d.

DRAMATIC STUDIES. By Augusta WEBSTER. Extra fcap. 8vo. cloth, price 5s.
"Powerful, original, and full of deep and sometimes passionate earnestness. They possess many of the highest attributes of poetry."—*Reader*.

By the same Author,

BLANCHE LISLE, and other Poems. By CECIL HOME. Fcap. 8vo. cloth, 4s. 6d.

DUKE ERNEST, a Tragedy; and other POEMS. By ROSAMOND HERVEY. Fcap. 8vo. cloth, price 6s.

"Conceived in pure taste and true historic feeling, and is presented with much dramatic force....Thoroughly original."—*British Quarterly*.

LEONORE: a Tale. By Georgiana Lady CHATTERTON. A New Edition. Beautifully printed on thick toned paper, with Frontispiece and Vignette Title engraved by Jeana. Crown 8vo. cloth, 7s. 6d.

"Her style is graceful and forcible;...happily combines freshness with experience, fancy with truth."—*Art Journal*.

ROMANCES, and MINOR POEMS. By HENRY GLASSFORD BELL. Fcap. 8vo. cloth.

CITY POEMS. By Alexander Smith. Cloth, price 5s.

By the same Author,

1. **A Life Drama; and other Poems.** Fourth Edition. Cloth, 3s. 6d.

2. **Edwin of Deira.** Second Edition. Fcap. 8vo. cloth, 5s.

BALLADS and SONGS OF BRITANNY. By TOM TAYLOR. Translated from the 'Barnas-Breis' of Voltaire, and from the 'Barnas-Breis' of the Original Melodies harmonised by Mrs. Tom Taylor. With Illustrations by J. Tisot, J. E. Millais, R.A., J. Tenniel, C. Keene, E. Corbould, and H. K. Browne. Small 4to. cloth, 12s.

"A work which will be equally acceptable to the student and the general reader, which is brimful of good and suggestive things, and which will introduce many English people for the first time to a delightful region of romantic poetry."—*Athenæum*.

MACMILLAN & Co. London.

THE NEW NOVELS,
AT ALL THE LIBRARIES.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MACDONALD, M.A., Author of 'Alec Forbes,' 'David Elginbrod,' &c. 3 vols.

RACHEL'S SECRET. By the Author of 'THE MASTER OF MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*.
"A novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Star*.

NORA'S TRIAL. 3 vols.
Ah! let not aught amiss within dispose
A noble mind to practise on herself."—*Wordsworth*.

"There is much to interest and entertain in the history of 'Nora's Trial.'"—*Star*.
"This story is touching and well written."—*Star*.

LORDS and LADIES. By the Author of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.

"Lords and Ladies' is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

A NOBLE LIFE. By the Author of 'JOHN HALIFAX,' 'CHRISTIAN'S MISTAKE,' &c. 3 vols.

"A story of powerful and pathetic interest."—*Daily News*.

THE WILD FLOWER of RAVENSWORTH. By the AUTHOR of 'JOHN and I,' &c. 3 vols.

"A beautiful tale, written with deep feeling. It charms by its elegance, and moves by its pathos."—*Illustrated Review*.
"A charming story, of great originality, full of pathos and grand nobility of thought and action."—*Observer*.

THE MOTHER'S FAVOURITE. By S. RUSSELL WHITNEY. 3 vols.

"This story is interesting and well sustained. The character of Margaret Wendell is an exquisite creation."—*Post*.
"Mr. Whitney has worked out an ingenious, complicated, and clever plot with much accuracy and justness of proportion."—*Star*.

KINGSFORD. By the Author of 'SON and HEIR.' 3 vols. [Next week.]

HURST & BLACKETT, Publishers, 13, Great Marlborough-street.

Shortly,

THE SCIENCE OF MODERATION. By W. CAVE THOMAS, Member of the Victoria Institute, Author of 'The Conformation of the Material by the Spiritual,' &c.

at 30 miles, Jupiter's moons, &c.—The MASKIN or CARMARTHEN:
"The Reconnoiterer is very good."—EARL OF BRADSLAW:
"I find it all you say, and wonderfully powerful for so very small
a glass."—EARL OF CAITHNESS: "It is a beautiful glass."—Rev.
Lord SCARSDALE "approves of it."—Lord GIFFORD: "Most use-
ful."—Lord GAVAGHAN: "Remarkably good."—Sir BRYCE CAVEY:
"It gives me the greatest satisfaction, and is wonderfully good."
Capt. SEIDER, Royal Small Arms Factory, Enfield: "I have
found it effective at the 1,000-yards range."—F. H. HAWKES,
of Farnley, Esq.: "I never before met an article that so completely
answered the recommendation of its maker, nor, although I
have tried many, a Glass combining so much power for its size
with so much clearness."—"The Field": "We have carefully tried
it at an 800-yard rifle range against all the Glasses possessed by
members of the Corps, and found it fully equal to any of those
present, although they had cost more than four times its price."
—Notes and Queries: "What intending tourist will now start
without such an indispensable companion to a pleasure trip?"
The celebrated "HYTHE" GLASS shows bullet-marks at
1,500 yards, and men at 34 miles, price 31s. 6d. All the above
Glasses, respectively bearing the registered trade-marks, "Sa-
lom," "Reconnoiterer," and "Hythe," are only to be had direct
from SALOM & CO. 36, Prince-street, EDINBURGH, and 137,
Regent-street, LONDON.

 FURNISHING DRAPERS, and HOUSE-AGENTS,
 WESTMINSTER BRIDGE ROAD.

A BEAUTIFUL DESCRIPTIVE CATALOGUE, with Illustrative Sketches of Cabinet Furniture and Decorative Upholstery, sent free per post, or given on application. The Stock, corresponding to the List, is marked in Plain Figures, and comprises:

DRAWING-ROOM FURNITURE.
 New and elegant designs, covered in Rep. Terry Cloth, French Silk, Damask, &c. This Department is also enriched with a latest Parisian Novelties, Cabinets, Whatnots, Davenport, &c.

Good Solid Dining-room Sets, in Mahogany and Oak.
 Iron and Brass Bedsteads in great variety.
 The new patent Spring Mattress still stands alone for cheapness and comfort.
 Bedding is all made on the Premises, and under personal inspection.
 The famous polished Pine Bed-room Suits demand special attention.

Extract from the Builder.
 "We were shown a short time since a bed-room fitted up by an ad for his own occasional occupation at the sea-side, in which every piece of furniture, save the iron bedstead, was made of the bit wood in question. Dressing-table, washstand, drawers, wardrobes, and chairs, were as spotless as the crest of the waves along the shore, and the very height of cleanliness seemed attained."

The STOCK of CARPETS
 one of the choicest in London, embracing Turkey, Velvet Pile, Brussels, Kidder, Fells, &c.
 Wor-cloth, Kamsauloon, Lileam, and Cor's Carpet, cut, fitted, and laid down to any size and plan.
 Furnishing Drapery of every description.
 Blank, Rep, and Pekin Cloths, French and English Chintzes, &c.

The STOCK of HOUSEHOLD LINEN
 well worthy the attention of Clubs, Hotels, and large Consumers, who will be treated with on most liberal terms.

 ONE PENNY per Square Foot.
CROGON & CO. MANUFACTURERS,
 { 60, New East-street, } London, E.C.
 { 24, Broad-street, }
 5, George-square, GLASGOW; 2, Gorse Pinnas, LIVERPOOL.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION of ARTIFICIAL TEETH, fixed without springs, wires, or ligatures. They so perfectly resemble the natural teeth, as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and is guaranteed to restore articulation and mastication. Destroyed teeth stopped and rendered sound and useful in mastication.—52, Fleet-street.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL,
 Invariably pure, palatable, and easily taken.
 Prescribed as the safest and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS and DEBILITY of ADULTS and CHILDREN.
 Pronounced by the highest Medical Authorities to be INCOMPARABLY SUPERIOR TO EVERY OTHER KIND. Sold only in capuled Imperial Half-Pints, 2s. 6d.; Pints, 4s. 9d. Quarts, 9s.; by respectable Chemists throughout the world.

Sole Consignments:
ANSAR, HALFORD & CO. 77, Strand, London, W.C.

CURES OF COUGHS and COLDS by DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Wilcox, 7, Prospect-row, Birmingham:—"A customer to-day informed me that he had taken them very frequently during the last four years, and also recommended them to others, and had never known them to fail."—They give instant relief to asthma, consumption, coughs, and all disorders of the breath and lungs. To Singers and Public Speakers they are invaluable for the voice. Price 1s. 10d. per Box. By all Druggists.

The WORKS of SHAKESPEARE. A New Edition, to be completed in 9 vols. demy 8vo. Edited by the Rev. ALEXANDER DYCE.

NOTICE.—In consequence of the length to which the Glossary has run, it has been judged expedient to issue it as a separate Volume; so that the Edition will now consist of Nine Volumes, instead of Eight, as originally proposed.

"The best text of Shakespeare which has yet appeared..... Mr. Dyce's Edition is a great work, worthy of his reputation, and for the present it contains the standard text."—*Times*.

"We have no space for more than a word of welcome to Mr. Dyce's new and beautifully-printed edition of the Works of Shakespeare. As a critic of Shakespeare, Mr. Dyce combines qualifications which have never before met in one man; and, fearlessly following his own judgment, he is giving us an edition worthy of both editor and poet."—*Quarterly Review*.

CERISE. By WHYTE MELVILLE. 1 vol. crown 8vo.

By order of the Rector,
ALEX. SMITH, Sec. to the University.

THE KEBLE MEMORIAL.

SUBSCRIPTIONS FOR THE PROPOSED COLLEGE AT OXFORD, IN MEMORY OF THE AUTHOR OF 'THE CHRISTIAN YEAR.'

It is proposed to give public and permanent expression to the love and reverence entertained for the Author of 'The Christian Year,' by building and endowing a College or Hall, at Oxford, worthy to take its place among the stately foundations of ancient days, and to call it by his name.
Here young men, whom want of means would otherwise deprive of a University education, may, at a very small cost, be trained as Christian gentlemen, many of them, it is hoped, as Pastors of the Church he so much loved.
The Committee earnestly invite all who have been taught, comforted, and strengthened by the sweet Singer of the Church to join in this tribute to his memory.

Names of Committee.
(Those marked * are also Trustees.)
* His Grace the ARCHBISHOP of CANTERBURY, President.
* Earl Nelson.
* Lord Beauchamp.
* Lord Richard Cavendish.
* Bishop of Oxford.
* Bishop of Salisbury.
* Bishop of Gloucester & Bristol.
* Lord Lytton.
* Sir Roundell Palmer, Q.C. M.P.
* Sir William Heathcote, Bart. M.P.
* Rt. Hon. Sir John T. Coleridge.
Hon. Treasurer.
J. A. Shaw Stewart, Esq., 13, Queen's-gate, W., London.
Hon. Secretary.
Henry E. Pellew, Esq., 22, Bolton, S.W., London.
Office — 3, WATERLOO-PLACE, S.W., London.

Clergymen and Laymen in any part of the United Kingdom, in the Colonies, or in Foreign Countries, who are willing to aid in carrying out the objects of the KEBLE MEMORIAL, are invited to communicate immediately with the Hon. Secretary, to arrange plans for collecting and remitting contributions to the Fund.
Subscriptions may be spread over five years without becoming a claim on the estate in case of death, and should be paid to the Hon. Treasurer, or to the account of the Trustees, at Messrs. Herries, Farquhar & Co., 16, St. James's-street, S.W., London; the Bank of England, Western Branch, Burlington-gardens, W.; Messrs. Parsons & Co., Oxford; or Messrs. Mortlock & Co., Cambridge.
HENRY E. PELLEW, Hon. Sec.
N.B. — Cheques sent to the Hon. Secretary should be crossed 'Herries & Co.'; and Post-office Orders made payable in St. James's-street.

MESSESS. SOUTHGATE & CO., Auctioneers of Libraries and Works connected with the Fine Arts, 143, STRAND, eight doors west of Somerset House (late of 22, Fleet-street), beg to call the attention of Noblemen, Gentlemen, Executors, the Trade, and others connected with Literature and the Fine Arts (either as Purchasers or Sellers) to the fact of their having REMOVED their old-established Business from their late Rooms, 22, Fleet-street, to far more eligible Premises, situate in one of the leading thoroughfares (143, STRAND) of this vast and intellectually increasing City, thus offering to their numerous and influential connexion greater facilities than they possibly could have done in their old premises. With these obvious advantages, Messrs. SOUTHGATE & CO. respectfully solicit a continuance of the patronage of their friends, the Trade, and the public.

Large and small Collections of Books, Pictures, Water-Colour Drawings, Coins, Old China, &c., most carefully catalogued, valued, and arranged for purposes of Sale by Auction or private disposal.

Gentlemen favouring Messrs. Southgate & Co. with large or small consignments can have them advantageously introduced into any of the forthcoming Sales announced below.

Valuations made for Probate and other purposes.

SALE OF BOOKS, 143, STRAND (late 22, Fleet-street), eight doors west of Somerset House.

 before the world this simple record of a simple chronicler in
 bygone days."—*Athenæum*.
 London: Simpkin, Marshall & Co.

Third Edition, corrected, with the Appendix incorporated,
 8vo. 21s.

A COPIOUS PHRASEOLOGICAL ENG-
 LISH-GREEK LEXICON, founded on a Work prepared
 by J. W. Friderdorff, Ph. Dr., of the Taylor-Institution, Oxford.
 Revised, Enlarged, and Improved by HENRY BROWNE, M.A.,
 Vicar of Pevensey, and Prebendary of Chichester.

In this Lexicon it has been endeavoured to give the equivalent
 Greek for all English words, with their various meanings. The
 grammatical construction is duly indicated, poetry discriminated
 from prose, synonyms distinguished, and the usage and idioms of
 both languages exemplified by copious phrases, from named
 authors. It claims to be a *Lexicon* in the proper sense of the word,
 such that a foreigner being a good Greek scholar, could acquire
 from it a knowledge of English almost as complete (except for
 what is essentially modern) as would be furnished by a good Eng-
 lish dictionary in his own language; in which, therefore, the
 student may expect to find the right words and the suitable mode
 of expression for the thought which he wishes to render into
 Greek.
 Rivingtons; London, Oxford; Cambridge.

MESSRS. BELL & DALDY'S ANNOUNCEMENTS.

HIPPOPOTAMUS and ONOPHAGY.

A REQUIEM.

RICHARD BENTLEY, New Burlington-street.

NEW AND POPULAR WORKS,

At all Libraries and Booksellers'.

THIRD EDITION of UP THE

COUNTRY. By the Hon. EMILY EDEN, Author of 'The Semi-Detached House' and 'The Semi-Attached Couple.' 2 vols. crown 8vo. 21s.

"In cabinet pictures of domestic life in India Miss Eden's book is scarcely equalled. To those who have never seen the country they will be as full of interest and amusement as to the old Indian, for of all the letters here reprinted there is not one which is not full of life and humour. They contain by far the most picturesque and vivid descriptions of life in India which have been laid before the public for many years, and are as fresh and vivacious as if they had only come by the last overland mail."—*Times*.

FOR EVER and EVER: a Novel.

By FLORENCE MARRYAT, Author of 'Love's Conflict' and 'Too Good for Him.' 3 vols. post 8vo.

"A remarkably bright and well-written tale, full of interest and incident, almost verging on the sensational, yet free from everything objectionable. The whole story is well conceived and skilfully worked out."—*Leader*.

"Miss Maryat has made a long step in advance since her last production. Her characters are well rendered, full of life and action, and her style is spirited. It is a feverishly-exciting book, and few will lay it down unfinished."—*Athenæum*.

The NATURALIST in VANCOUVER

ISLAND and BRITISH COLUMBIA. By JOHN KEAST LORD, F.Z.S., late Naturalist to the British North American Boundary Commission. 2 vols. crown 8vo. with many beautiful Illustrations. 21s.

From the *Times*.—"This book may be considered a model book to all sportsmen and naturalists on their travels. They will find in it very many instructive and valuable hints. To the general reader these volumes will prove a rich store, from which both amusement and instruction can be readily gleaned; and the scientific naturalist will add much to his stock of knowledge by perusing them."

WHICH SHALL IT BE? a Novel.

In 3 vols. post 8vo.

"No one can read this book without being struck by the more than ordinary ability it displays. The character of Madeline throughout is of a psychological power, and the way in which she trembles on the confines of terrible faults shows a rare power of discrimination."—*Saturday Review*.

"The story is full of incident and well-drawn character. The portrait of the O'Keefe, for example—a rollicking Irishman of the O'Leary school—is evidently painted from life. The events of the tale are varied by some brilliant passages, indicating the author's depth of thought and originality of imagination."—*Morning Post*.

AFTER the STORM; or, Brother

Jonathan and his Neighbours in 1845-66. By J. E. HILARY SKINNER, Barrister-at-Law. Author of 'The Tale of Danish Heroism.' 2 vols. post 8vo. 21s.

"A readable and entertaining book about American life and politics as any we have read for some time past. Mr. Skinner deserves emphatic praise for his sagacity in reading character, and the lightness and skill with which he tells a good story."—*Athenæum*.

"Mr. Skinner is the brightest and pleasantest of writers, shrewd, sensible, closely observant, with a keen and ready sense of humour. He is undoubtedly one of the pleasantest and most skilful raconteurs who ever crossed the Atlantic."—*Morning Post*.

THRICE HIS: a Novel. In 2 vols.

post 8vo.

"The production of a dashing, clever woman."

Saturday Review.

Also, in a few days,

LETTERS from HELL. By a Lost

SOUL. From the Danish. In 2 vols. post 8vo.

CHARLES TOWNSHEND, Wit and

Statesman. By PERCY FITZGERALD, Esq., M.A., Author of 'The Life of Laurence Sterne.' Post 8vo.

RICHARD BENTLEY, New Burlington-street, W.,
Publisher in London to Her Majesty.

**HURST & BLACKETT'S
ANNOUNCEMENTS**

FOR
OCTOBER AND NOVEMBER.

COMPLETION of the LIFE of WEDGWOOD.
Vol. II. of the LIFE of WEDGWOOD.

From his Private Correspondence and Family Papers in the possession of Joseph Slater, Esq., F.R.S., Francis Wedgwood, Esq., C. Darwin, Esq., F.R.S., Miss Wedgwood, and other authentic sources.

By ELIZA METEYARD.

Dedicated to the Right Hon. W. E. GLADSTONE.

8vo. price 21s. bound. [Now ready.]

.. This volume (completing the work) is embellished with above 200 beautiful illustrations.

"We have to congratulate the authoress on the publication of her second volume of the 'Life of Wedgwood.' We can award her the praise due to the most painstaking and conscientious application. She has devoted her whole mind and energy to her subject, and has achieved a work not less creditable to herself than it is indispensable to all who wish to know anything about English ceramic art and its great inventor. The two volumes before us are in themselves marvels of decorative and typographical skill. More beautifully printed pages, more creamy paper, and more dainty woodcuts have seldom met our eyes. It is seldom that an author is so well seconded by his coadjutors as Miss Meteyard has been by her publishers, printer, and the staff of draughtsmen and engravers who have contributed the numerous illustrations which adorn this sumptuous book."—*Saturday Review*.

"An admirable, well-written, honourably elaborate, and most interesting book."—*Athenæum*.

"A very beautiful, accurate, and valuable book. The second volume is even better and handsomer than the first."—*Examiner*.

Also, a Series of English Classics.

Designed to meet the wants of Students in English Literature: under the Superintendence of the Rev. J. S. BREWSTER, M.A. of Queen's College, Oxford, and Professor of English Literature at King's College, London.

Oxford: Printed at the Clarendon Press; and Published for the University by MACMILLAN & CO. London.

LONDON, SATURDAY, OCTOBER 20, 1866.

LITERATURE

Return to Two Orders of the Honourable the House of Commons—for Copies "of the Correspondence subsequent to the 1st day of October, 1864, between the Civil Service Commissioners and the Principal Librarian of the British Museum, respecting the Examination of Candidates for Situations in that Department:" "and of all Communications from the Officers of the British Museum to the Trustees thereof, on the same subject."—(Mr. Locke.) And for a "Copy of any Communications between the Civil Service Commissioners and their Secretary, on the Subject of the Examination of Candidates for Situations in the British Museum."—(Mr. Hunt.) Ordered by the House of Commons to be printed.

THIS is a remarkable Parliamentary Paper. It consists of two parts: one signed by the Principal Librarian of the British Museum, and containing "correspondence" and "communications" from that "department"; the other unsigned, but evidently furnished by the Secretary of the Civil Service Commissioners. There is this striking difference between the two portions of the Return, that whereas the former consists of a regular official correspondence and the documents connected therewith, many of them communicated to the parties concerned, the latter consists merely of *ex parte* statements, to which it does not appear that the Museum authorities have had an opportunity of replying. Why these documents were withheld during the progress of the correspondence requires explanation. Were the Commissioners dissatisfied with their officer's observations? or were they unwilling to protract a controversy in which they felt they were coming off second best? Moreover, who is responsible for the statements in a Return which bears neither signature nor date, and no one document in which is both signed and fully dated? One of the most important papers in the second part of the Return is dated "February, 1865," the day of the month being left out, which is a noteworthy omission, for on the 23rd of that month the Principal Librarian of the British Museum had sent to the Civil Service Commissioners a copy of a Report containing the following passage: "The Principal Librarian begs of the Principal Trustees to observe that, although made under unparalleled difficulties, owing to the secrecy of the proceedings of the Civil Service Commissioners, every one of the statements which he has made to the Principal Trustees is either admitted to be correct, or not denied, in the two letters; the Principal Trustees have, therefore, a right to assume that their officer has laid before them incontrovertible facts. It cannot be supposed that the Civil Service Commissioners, after 'a careful review of all the papers,' would leave the Principal Trustees in the dark, and allow them to labour under false impressions, instead of rectifying statements, of which, if wrong, the Commissioners, and they alone, could at once and without any trouble (after the 'careful review of all the papers') prove the incorrectness." It now appears, however, that the Commissioners did what the Principal Librarian said it could not be supposed they would do, and that there was a kind of answer to some of his statements; but why was that answer kept secret? and why is it dated so ambiguously as to leave open the question whether it was prepared before or after the receipt of the Report above cited? Above all, why does it now appear in such a way that

it is impossible to discover whether the Commissioners themselves adopt it?

The correspondence which this Return makes accessible, and which had previously been several times alluded to in the House of Commons and elsewhere, was commenced by the Secretary of the Civil Service Commissioners in October, 1864, in consequence of "circumstances which 'had been' brought to the notice of the Commissioners connected with the recent resignation of Mr. G——,"—a candidate who, in the course of that year, had obtained a certificate of qualification, declaring him possessed of "the requisite knowledge and ability for the proper discharge of his official duties," as well as several extra certificates, but who, according to the Principal Librarian, "ludicrously broke down as soon as he was put to the test of actual work." After his resignation, this gentleman circulated a printed statement, which he called a Memorial to the Trustees of the British Museum, and which is reprinted as an appendix to the first part of this Return. This document would of itself go very far towards throwing doubt upon the value of any certificate of the writer's fitness for official employment. In some "Remarks" upon this "Memorial," the Principal Librarian gives a "few specimens of Mr. G——'s ignorance," which, he says, "are so conclusive that it is superfluous to increase their number, as might easily be done." Here are some of them. In a Latin MS. respecting the Asp (aspis), the following passage occurs: "*Sed naturaliter cautus est contra incantationem, nam aurem terræ affigit, alteram cauda obturat.*" Mr. G—— reads *sed as si*, and *nam as nasonem*, and renders the sentence, "*If it has been caught in its wild state, it plants its nose and ear in the earth, and stops up the other ear with its tail!*" In Jerome's Epistle to Desiderius, after meeting with the expression "*ad desiderium episcopum*," Mr. G—— translates "*nunc te deprecor, desiderii karissime*," "Now I entreat thee, dearest desire (brother)." A letter in which Alfonso Trotti apologizes for the insignificant character of a present which he offers to Henry the Eighth, contains the following passage: "*Nam et Cœlites ipsi vel granum thuris et cereum oblatum integro et sincero animo libentissime admittunt*,"—which is happily rendered by Mr. G——, "For even the Celites themselves most freely accept in single and earnest spirit the grain of frankincense and the waxen sacrifice (offering)."

In French Mr. G—— is, if possible, even more original than in Latin. Respecting a pestilence at Amsterdam, the writer of a letter fears "*que le mal se communiquera dans ces jours caniculères par toutes ces villes*," Mr. G—— makes him fear "*lest by means of the canals the contagion should spread*." The same writer's request respecting the disinfecting of letters, "*Je vous supplie de les faire passer . . . au travers d'une cane sur la fumée*," is metamorphosed by Mr. G—— into "*such letters being sent open and passed through a cane*." Of some money which had been brought for one of the bankers of the town, and which had to be disinfected, Mr. G—— writes, "Their money was taken to a banker to be placed in a cauldron,"—an idea which was suggested to him by the words, "*L'argent . . . pour un de nos banquiers a esté mis dans un chauderon*." In another letter, a writer expressing thanks for kindness which he had received, says, "*Que l'on ne peut estre plus sensible que je le suis*." What would he have thought of Mr. G——'s complimentary rendering of this observation—"That his nephew is more sensible than he is?"

Mr. G——'s English is about on a par

with his Latin and French. Here is a sentence from a letter in which he complains to the Speaker of the House of Commons of the injustice which had been done in calling upon him to resign, on the ground of incompetency, a situation for which he was certified to be more than sufficiently qualified: "To prove ignorance of subjects not prescribed is irrelevant and childish, as any one holding in their hands a certificate of the whole knowledge of any one else can find out what he is ignorant of."

These specimens—and they are only some of the "few" which the Principal Librarian thought it necessary to bring forward—prove clearly enough that Mr. G——'s ignorance of Latin, French and English was equalled by his want of common sense, care, and thoughtfulness. The inference drawn by the Commissioners from Mr. G——'s failure is that in candidates for Museum places "it may be desired to secure higher qualifications in Latin (or Greek) than are generally required." But unless the obtaining of a certificate is altogether a matter of luck, ought Mr. G——, whatever might have been the standard of qualification, to have obtained a certificate of fitness for employment which required a knowledge, however limited, of Latin or French? Can any confidence be placed in a system which pronounces such a scholar to be competent? According to a document now first made known, and which must have been prepared for their own exclusive use, for no one else would appear to have seen it, "The Civil Service Commissioners have never questioned the justice of the Principal Librarian's opinion as to Mr. G——'s incompetence for the discharge of his duties"; but will they explain how it came to pass that they guaranteed his competence?

The question raised by this extraordinary case is not whether examinations for public appointments are desirable, but whether the system of examinations is at present properly conducted, and whether confidence can be placed in the Commissioners' decisions. The Principal Librarian of the British Museum says, "The system of Civil Service Examinations as at present conducted certainly works very ill for the Museum, and appears to have done much more harm than good;" and he frequently urges "that it seems absolutely necessary to find some means for securing more satisfactory results." Elsewhere he writes, "As the certificates are now given, it is quite impossible to feel any confidence in them or in the statements they contain." And he bases this last opinion not merely on the issue of a certificate of qualification to an utterly incompetent person, but also on his discovery of what he describes as "inaccuracies" with respect to matters of fact discovered in the certificates and ordinary correspondence, and even in the papers of the controversy now published, where, if anywhere, correctness, the most exact and perfect, might have been looked for.

The Principal Librarian repeatedly complains of the secrecy with which the Commissioners' proceedings are conducted, and asks for the production of the papers which, though necessary for the full understanding of the cases in which the soundness of the Commissioners' decisions has been questioned, are at present inaccessible except to the Commissioners themselves. This demand the Commissioners resist, though they greatly strengthen its force by quoting, and sometimes misquoting, such parts of the examination papers as they deem calculated to justify their proceedings. It is difficult to understand on what principle they can refuse to produce all the examination papers

of a certain candidate, whose rejection was much complained of at the Museum, and the worst parts of whose answers are published in this Return, having been separated by the Commissioners from his better work, and brought forward in order to justify his rejection, especially when it is borne in mind that in doing this they so far altered one of his answers as to make it appear an absurdity when it was really but a venial exaggeration of an historical fact.

In another case, the Principal Librarian having expressed an opinion that a certificate granted for French should have been higher than it was, and higher than the certificate given to the same candidate for German, a list of the candidate's alleged blunders in French is now published. Is this just? And what purpose can it serve so long as the other papers with which it ought to be compared remain locked up at Dean's Yard? Will the Commissioners, who, in some instances, so willingly produce partial testimony, allow Mr. G——'s papers in Latin and French translation to be published? If not, how will they defend their production of parts of papers relating to cases which have certainly been not more severely criticized? The Principal Librarian writes: "The Commissioners hold a candidate up to ridicule by giving, and carelessly and incorrectly giving, extracts from portions of his examination papers, whilst they refuse to those who question the propriety of his rejection the opportunity of seeing the whole. If I have been able to discover such mistakes as those I have given above, made under such circumstances, how many mistakes may it be assumed would be found on a perusal of all the papers?" And again: "As this imperfect evidence, which they so readily produced on the supposition that it *was* all in their own favour, was afterwards found by *themselves* to be against them in one important particular, what inference must be drawn if they withhold the rest?" The Commissioners can scarcely remain silent under such a challenge.

One of the most serious complaints against the Commissioners is that they have neglected the instructions of the Principal Trustees, to whom the patronage of the Museum belongs, and with it the right of controlling, so far as the heads of a department can control, the examination of candidates.

It appears that instructions had been given by the Museum authorities, and acknowledged by the Commissioners, that in any case in which a candidate might be sent up for examination with a view to his promotion, the examination should be modified, because the intended promotion was to be a reward for special merit in consequence of proved fitness for the higher post. This seems judicious, and a candidate was accordingly sent up for examination, the attention of the Commissioners being specially called to the case as one in which the promotion was well deserved and calculated to be advantageous to the Museum. It appears, however, that the fact of the candidate's being already employed at the Museum was never communicated to the examiners; that in some subjects the same papers were given to him as to a new candidate nominated about the same time in the usual way; and that Prof. Owen and Dr. Gray, under whom he was working and was still to work, say of the papers given him in the most important, that is to say, in the special and technical part of his examination, "they have no bearing on his work here" (at the British Museum); and the Principal Librarian remarks, "The very unfortunate result of all this was that the candidate was rejected." The Commissioners, if the second

part of the Return expresses their views, contend that they "cannot be supposed" to have "pledged themselves in such a case to inform their assistant examiners as to the age and antecedents of the candidate, or to instruct them to put questions to him on the work which he had been performing." It is difficult to understand what they did pledge themselves to, if it did not involve a communication to the examiners of the fact that the candidate was to be tested according to the circumstances, that being the only object of the proposed modification. In the particular case, the candidate's rejection was attributed to the withholding of the necessary information from the examiners; whether this withholding was from carelessness or on principle, the Museum authorities were so dissatisfied with the rejection that they withdrew promotions wholly from the control of the Commissioners.

In April, 1865, the examination in arithmetic of candidates for attendants' places was reduced from the first *four* rules to the first *two*. Yet it seems that the Commissioners continued for some time to examine candidates in *four* rules, and that in several cases they issued certificates showing that they had done so, though they amended the form of their certificate before they rectified their practice. This would indicate that the instructions of the Museum authorities are disregarded, and also that the certificates cannot be relied on as criteria of the nature of the examinations. The difference between *two* rules of arithmetic and *four* may appear trifling; the Commissioners may even be quite right in preferring *four*: but are the Commissioners or the heads of Departments to decide on the qualifications to be required in candidates for places in the various Departments? Above all, are the Commissioners to issue certificates conveying a wrong idea of the examination to which candidates have been subjected? There is a quite recent instance of similar bungling. In June last an attendant was examined, and failed. According to the letter announcing his failure, he had been examined in the first *two* rules of arithmetic; but a few days after his rejection the Commissioners' Secretary wrote to the Principal Librarian, that an "irregularity" having occurred in the examination of the candidate, the Commissioners were willing, in accordance with the wishes of the Principal Trustees, to give him a "second trial." He was examined again, and passed, and the Principal Librarian reported to the Trustees that this immediate re-examination was quite contrary to the usual practice, and that the "irregularity" was the examination of the candidate in *four* rules of arithmetic, though the Commissioners' letter had said that his examination had been in *two* rules, summing up the case thus: "By their repeated neglect of the instructions of the Principal Trustees, . . . the Commissioners have rejected a man whom they themselves find, on proper examination, to be fit for the place he was intended for." It is scarcely surprising that under such circumstances the Commissioners' certificates should be lightly esteemed at the British Museum. How this man got his "second trial" does not appear; the Principal Librarian says that it was not at his suggestion; and the Commissioners volunteered to give him "a second trial," not on the simple ground that they had made a mistake in his first, but because they understood it to be "the wish of the Principal Trustees." We can only wonder how it happened that the Principal Trustees knew so much about the examination, and that the Commissioners were so well acquainted with, and so suddenly desirous to meet, the wishes of the Principal Trustees. It is, perhaps, a

more important question how many good candidates have been finally rejected in consequence of similar irregularities.

Another equally grave charge is, that incompetent examiners are sometimes, and it is impossible to say how often, employed. We will give the Principal Librarian's own words: A candidate "was examined in German conversation by an English gentleman, who said that he was unable to speak German, but that if 'the candidate' would speak slowly, he (the examiner) would be able to understand him, and give him a certificate. In the conversation that ensued, the examiner spoke English and 'the candidate' spoke German." Moreover, the candidate "was examined in French conversation by two gentlemen, one of whom (the gentleman who had previously examined him in German) addressed him in French; but the other said, 'I think we shall get on better if we speak English, and allow Mr. — to answer us in French'; and thus the trio (examiners and examined) proceeded in their conversation." The candidate "got a certificate (which he, no doubt, well deserved) for *very creditable proficiency* in German conversation, and for *fair proficiency* in French conversation, on the report of examiners who did not possess, in either of the subjects, either of the degrees of proficiency which they guaranteed in him."

This charge, serious as it is, and circumstantially as it is made, the Commissioners, for some unexplained reason, thought proper to leave unnoticed in their communications to the Museum authorities; but as an appendix to the "Remarks by the Secretary to the Civil Service Commission" on the document containing the passages above cited, which "Remarks" we have already alluded to as dated "February, 1865," is now printed an undated "Memorandum," signed "E. Poste," and beginning thus: "The conversation related by the Principal Librarian, in which the examiner is made to ask the candidate to speak slowly in the German oral conversation, is a pure fiction. As fluency and rapidity are so important an element of proficiency in speaking a foreign language, the examiner is confident that he has never desired any candidate to speak more slowly than he showed himself inclined." Whatever may be Mr. Poste's ability in German and French, we cannot bring ourselves to admire his English; we doubt whether "fluency and rapidity" can be "an element" of anything; and "more slowly than he showed himself inclined" may, as used by Mr. Poste, relate to Mr. Poste himself as easily as to the candidate, in which case the explanation would not be worth much. But taking Mr. Poste's reply at its utmost value, what does it amount to? Simply a denial that he asked a candidate to speak slowly in "the German oral conversation." It does not deny that he spoke English when testing the candidate's powers in German conversation, in which the ability to understand spoken German is as important as the ability to utter German words, and it makes no allusion to the French "oral examination," which is said to have been conducted by two gentlemen, Mr. Poste being one of them. Here, again, an *ex parte* document is produced, but it leaves open the important questions—was the candidate examined by gentlemen capable of speaking French or German?—and did they speak in those languages, or in either of them? The statement that the conversation related by the Principal Librarian "is a pure fiction" will not, we imagine, be left unnoticed. It is, of course, inconceivable that he should have made these statements without some foundation for them; he must have had some grounds for what he said, and those grounds ought to be made

known. Why was he not allowed an opportunity of replying to a charge of "fiction" before that charge was made public? When was Mr. Poste's "memorandum" written, and why has it been kept secret till now? An undated answer, which appears to have been carefully restricted to the least important point in one part of a twofold charge, which is not heard of for more than a year and a half after that charge has been preferred, which begins by describing as "pure fiction" the official statements of a well-known public officer, and which is put forth without a word of support or concurrence on the part of the Commissioners, is not a satisfactory reply to such a charge as that made by the Principal Librarian.

It is somewhat strange that whereas the late Principal Librarian, Mr. Panizzi, who conducted the Museum part of this correspondence, declares himself quite willing to accept fully the responsibility of his statements and arguments, no one at Dean's Yard seems inclined to do likewise. Not only, as we have already said, is the second part of the Return unsigned and quite free from any expression of concurrence on the part of the Commissioners, but throughout there is the appearance of a general shrinking from responsibility. The report of one examiner, whose name is given, is quoted *in extenso* because the Commissioners were blamed for rejecting a certain candidate; another examiner has to write and sign, but not date, a "memorandum" to show why the Commissioners gave a particular certificate to another candidate; and, errors having been pointed out in a document prepared for the use of the Commissioners by their Secretary, and sent by their order to the Museum, the Commissioners actually give to their officer and representative "permission to admit and correct certain mistakes" as having been made by himself in his own communication. We hope he was gratified with the praise bestowed upon him by Mr. Panizzi for his acceptance of this responsibility; but we cannot think that the proceeding was in accordance with official etiquette. If, however, the secretary and examiners are to be made the scapegoats whenever error is detected or suspected, it would be desirable to ascertain what the Commissioners deem their own duties and responsibilities.

The question which this Return opens is not whether there ought to be examinations for public appointments—that may be considered as permanently settled—but how those examinations ought to be conducted. The Principal Librarian says that at the Museum the examination system has been worse than useless. "It failed to keep out a G—, and since the consideration of that failure, to which the Commissioners themselves first called attention, its sole effect has been to perpetuate vacancies." The complaints are varied as well as numerous. It has admitted extreme incompetence; it has excluded really good and specially qualified candidates; the examination papers are injudiciously and carelessly, even ungrammatically, prepared; the Commissioners, under the present system, cannot know well the various requirements for the different places, and do not properly avail themselves of the knowledge which they actually possess: these and other charges are brought forward, and suggestions made to secure more beneficial results; but the one complaint which pervades the whole is, no confidence can be placed in the official statements of the Commissioners. In effect, Mr. Panizzi says, errors as to matters of fact are to be found in your ordinary correspondence, in your certificates, even in your statements in a controversy like this,—errors which not even

the secrecy of your proceedings can conceal,—how can your decisions be relied on? When the Commissioners complained of his "general expression of mistrust in" their "good faith," he replied, "I must strongly and respectfully disclaim any expression of mistrust in the 'good faith' of the Commissioners. If any expression be pointed out in what I have written, fairly bearing that construction, I am prepared to withdraw it. I never mistrusted their 'good faith'; I did and do mistrust the correctness of many statements made in their name; but I never meant to imply that those inaccuracies were intentional; I merely said, and I now repeat, that they were inaccuracies." Such statements made officially by a responsible public officer demand investigation. If the Commissioners know the charges brought against them are in the main unfounded, they will not resist inquiry; but why have they so long refused to produce the papers asked for? Mr. Panizzi calls for inquiry; and there ought to be one. Let him have it—not merely because he asks for it, but also because it is due to the Commissioners themselves. Let him have an opportunity to substantiate his charges; and if he fail to do so, let him withdraw them. Such an inquiry need not, perhaps, be a public one; it might be conducted by a gentleman of standing and ability to enable him to undertake such an investigation, chosen by Government, and bent, not on giving a triumph to one side or the other, but on arriving at the truth. But if no other means can be found for setting the matter at rest, then there ought to be a public inquiry into all the questions raised, including this: should such duties as are now intrusted to the Commissioners, such powers over important public and private interests, be vested in an irresponsible Board, which resembles other Courts in that it has to form its judgment upon evidence, some of which is described by its chief officer as being of a "doubtful character," and respecting which, therefore, error is extremely easy, whilst it differs from other Courts in that its decisions can neither be properly sifted nor appealed against? The Commission has evidently been unfortunate in its dealings with the Museum, and in the present controversy there can be no doubt that the Museum has the advantage; but we feel convinced that a thorough investigation would prove that for the most unlucky of the Commissioners' decisions there was more to be said than is shown in the Return. At the same time, it would probably establish the soundness of some, at least, of Mr. Panizzi's criticisms, show that due caution had not always prevailed at the Commission, and make evident the wisdom or the unwisdom of some or all of the proposed modifications of the present system.

The Return is instructive, and more amusing than Parliamentary Papers generally are; it throws much light on the working of the examination system and on the relations existing between the Commission and the various public offices; and it gives an idea of the value to be attached to the annual publication of the Commissioners' correspondence, of which so much has been made, but in which we need scarcely say that this unusually piquant official controversy has not been included; it can, however, be little more than a prelude to something else, because to many of the documents which it contains those most concerned have as yet had no opportunity of replying, and because when one public department says of another that it does "more harm than good," and is answered that its statements are "pure fiction," the country has a right to look for impartial and searching inquiry into the merits

of the dispute, and for prompt and energetic action when those merits are ascertained.

NEW POETRY.

THE rains of poetical mediocrity have of late fallen upon us with such dreary perseverance, that a genial, picturesque, thoughtful book, like *Ten Miles from Town, with Poems*, by William Sawyer (Freeman), is welcome as one of the bright days this autumn, which, after a long interregnum of weeping skies, remind us that soft sunlight and a blue heaven are, after all, verities in the system of Nature. It is not too much to say of the short Poems here collected, that each of them is pervaded by a poetic idea and shaped into a poetic picture. The Prelude, describing the poet's whereabouts "ten miles from town," thus presents, in warm yet true colours, a village at sunset:—

The city streets are full of light,
Through waves of flame the sun goes down,
I droop my eyelids, and it sinks—
Ten miles from Town.

The village street is full of light,
And black against a sky of fire,
The church upon the hill-top rears
Its quivering spire.

Brighter and brighter grows the West,
Till common things its glory share,
And round about them as I gaze
A halo bear.

Onward with rosy flush and gleam,
Thro' sedgy rifts the mill-stream flows:
The coppice, purple to the heart,
Transfigured glows.

The cottage roofs are thatched with gold,
Blood-red each ruby casement turns,
The road-side pond beneath the elms
A sapphire burns.

The wasted faces of the old,
Bright with the momentary glow,
Regain the loveliness of youth
Lost long ago.

—And one face, dear to the poet in that long ago, and then veiled, shines again upon him from the firmament of thought to which the treasures of Affection, lost here, are borne for constellations:—

A memory that is my life,
And lights with its Auroral crown,
The village straggling up the hill—
Ten miles from Town.

'City Longings,' the first poem of the series, with much happiness of expression inculcates the truth that the charms of Nature herself are not meant merely to minister to poetic luxury, —that even Beauty must turn to spiritual use in the mind of the poet, unless he would forfeit in sloth the vision that apprehends Beauty. The third poem, 'Up at the Church,' is a subtle study of character. A peasant, whose early life has been a story of poverty and bereavement, has learnt to question the justice of Providence, but his doubts are dispelled in the churchyard. In the common doom that awaits rich and poor, the favourites and the victims of Fortune, he reads the equity of the Almighty, and desecrates it in the future, where the hardships of the present shall be compensated and its wrongs (as he believes them) avenged. Thus, he habitually wanders—

Up to where the village spire
Warns its grays—its cross of fire,
Flaming gold, till all below
Grows the colour of the crows.

The interlocutors who meet him in the churchyard strive to win him to a more loving faith and to a purer hope; but no gospel is welcome to the old man unless it promises retaliation. To him no soft light bathes the green sward round the church; but the picture as he leaves it is finely symbolic of his fierce faith:—

— Still o'erhead
Glowed the spire-point flaming red;
But the hill and all below
Lay the colour of the crows.

'The Painted Window,' again, is richly coloured, and only pales beside the fresh hues

of Nature with which it is contrasted. In 'The Squire' we have the sharp effective type of a class,—which certainly does not include all squires,—and the doctrine, forcibly inculcated, of human responsibility.

The series entitled 'Ten Miles from Town' is followed by some miscellaneous poems. 'At the Opera—Faust' brings us from the country into town; and the ideal vision of the poet is no less true to him in the gas-lit dominions of Mr. Gye or Mr. Mapleson than in the fresh air and sunlight "ten miles" away. Partly won by its beauty and partly by its moral health, we choose for our next extract 'Victory in Defeat,' passing by many examples of the writer that have a warmer glow of description, and that do more justice to his powers of characterization and narrative:—

VICTORY IN DEFEAT.

Wreaths to him who from the glorious
Strife of forces comes victorious,
Pæan and triumphal greeting—
This the measure of man's meteering.

All for triumph: nothing heeding,
Valour fallen, trampled, bleeding,
Battle's hottest brunt sustaining,
Only short of victory gaining.

But, O Brother! crushed, defeated,
Thus God's measure is not meted;
Strictly just, the Father ever
Sees the end in the endeavour.

And between earth's pure and sainted,
And her outcast, foul and tainted,
All the gulf in mortal seeming,
May be bridged in His esteeming.

This little volume, it should be remembered, embraces only brief sketches or moods of thought; but it is seldom that we find in such short pieces so much poetical suggestion, attractive picture, and careful finish.

A word of commendation is due to *The Clouds: a Poem, in Ten Cantos* (Freeman). The various aspects of the sky form the writer's theme, and he has ingeniously striven, by occasional episodes, to guard against the monotony which such a subject would otherwise produce. To some extent he has laboured successfully. His faculty as a poet-painter, if not absolutely striking, is pleasing and truthful. Here is an example from the beginning of canto V:—

Up to the crest of this white cloud I soar,
The scene below, far stretching, to explore.
But what a sight is here! Above my head
Another roof of broken clouds is spread,
And through its rents I see another still
In distance lie, serenely beautiful.

Through slit and gap the acle sunlight shoots,
And on its way each passing cloud salutes,—
A triple world by wide horizons spanned,
With air for sea, and cloud for solid land.

Around my feet a glorious prospect spreads,—
There stretch the plains, and yonder soar the heads
Of snowy peaks, and lights and shadows go
Across their breasts, as on the earth below;
Here touch'd with streaks of violet and blue,
There ting'd with patches of vermilion hue,
As if the artist-angels turn'd aside,
And on the virgin clouds their colours tried.

Passing from the somewhat unmanageable design of this writer, we come to one still more so—that of *Art-Land: a Poem*, by Thomas Baldwin Wood (Hardwicke), in which the author seems to intend (we speak hesitatingly, for we see through a mist) an allegorical presentation of the various arts—Poetry, Sculpture, Music, &c. We are under the impression that, amongst the lyrics here, there is an invocation to the Ideal, and a Hymn on the Birth of the Universe; and that the summing up of the whole matter is the old doctrine repeated, that the great artist, of whatever kind, must needs be a good man. But Mr. Wood's subject, in itself rather abstract, is treated so vaguely, that we dare not commit ourselves to any positive statement respecting it. His opening description (though it has too much of the poetic catalogue about it) is not wanting in imaginative feeling or in just observation:—

The purple noon is warm with love;
The lusty Sun-God glows above.

Life elements soft Zephyrs shower
On Earth and Ocean's bridal hour;
Young Nature's firstlings birthday keep;
The lambskins frisk, the kittlets leap,
And dance the fish along the deep:
The bees about their mistress swarm;
Lifts up its head the conscious worm;
And, giddy in the golden glow,
The gossip ants run to and fro.
In lazy orchards fat herds doze,
And comfortable flocks repose;
Free horses rollock o'er the mead,
Or skittish sprawl, or quiet feed;
Whilst, peering thro' the russet fern,
Far off the stags their consorts warn;
In hedge and tree are nestling broods,
And am'rous songs thro' all the woods.
From sylvan rocks rich waters fall;
Grotesque ravines love's echoes call.
Caressing vines the hills embrace;
The groves reveal, with furtive grace,
The fauns' and dryads' trysting place:
The od'rous air aspires with bliss;
The valleys saucy runnels kiss;
The trees are trembling thro' their leaves,
The corn is bursting from its sheaves,
Impregnate flowers perfume the ground,
Fruit pouting sweets ripe lips hath found,
With new-mown hay love's couch is crown'd;
For 'tis the prime of buxom June,
Dear Summer's jovial honeymoon!

—Such qualifications, however, as our extract displays are in a large measure wasted in the dreamy treatment of a difficult theme.

The Preface to *The Atonement; a Sacred Poem*, by John Brion (Brighton, Moorecroft), contains the pathetic statement that its writer, amidst circumstances of much difficulty, has meditated upon his present poem for the space of thirty years. We call this a pathetic statement, because Mr. Brion writes with great correctness and pains, which are necessarily thrown away on a subject which, by its plan, invites comparison with 'Paradise Lost.' Here Satan is again stricken to the earth,—once more he calls a Council of his Peers, and delivers a manifesto, which is once more followed by the harangues of Belial, Beelzebub, Mammon, and Moloch. The imitation of Milton is obvious in every point but that of inspiration. When the Chief of Rebel Angels speaks in this fashion,—

Accursed hope!—delusive as the voice
Of fabled syrens!—wherefore have I been
Seduced by thee?—As first in power and hate
'Gainst the Omnipotent, it argues ill
In me to suffer this inglorious fall.
To be subverted by our own designs,
When victory seems waiting on our steps,
Is shame indeed, and leaves the fondest mind
Small source of consolation or excuse,—

the reader, though not without respect for the author, is tempted to close the book, thinking that the old wine is better than the new.

In the large class of verse (far larger, now-a-days, than that of utter and absurd failure) which shows moral propriety, mental culture, no slight acquaintance with the technicalities of song, but, unfortunately, no originality of idea or manner, we must include *The Song of Rest, and Minor Poems*, by Alexander Winton Buchan (Whittaker & Co.),—*Poems, Songs, and Ballads*, by Henry M'D. Flecher (Belfast, Reed),—and *Poems, Descriptive and Lyrical*, by Thomas Cox, Second Series (Hall & Co.). There is nothing in them to condemn, while their vein of kindly feeling makes us regret that we can only give them this negative praise.

A Winter in Paris: being a Few Experiences and Observations of French Medical and Sanitary Matters gained during the Season of 1865-6. By Frederick Simms, M.B. (Churchill & Sons.)

'A Winter in Paris' is a title suggestive of enjoyments of which Mr. Simms says not a word in this record of observations made in the brightest capital of the world during its gayest season. Concerning the boulevards and their recreations, the theatres and their diversions, the cafés and their characteristics, he is silent; but still he contrives to tell a story which offers points of interest for mere pleasure-

seekers, whilst it presents some of the sterner and more repulsive aspects of Parisian life. To students of our London hospitals who are about to pass a few months in the medical schools of France, he may be recommended as a useful guide to the means by which an English medical student may make the most of a short time on the banks of the Seine; but his ability to render practical service to the members of his own profession is by no means limited to those who have the power and inclination to prosecute their scientific studies at the Hôtel Dieu and the Hôpital des Cliniques.

At the first glance, the hospital accommodation of Paris seems to be inferior to that of London, for to our imposing number of general hospitals, special hospitals and workhouse infirmaries, the French metropolis shows no more than seven general and eight special hospitals,—the hospitals Hôtel Dieu, Lariboisière, La Charité, Necker, La Pitié, Beaujon, and St. Antoine, making up the roll of her general establishments; whilst her special hospitals are St. Louis, Des Cliniques, Ste. Eugénie, Des Enfants Malades, Du Midi, De Lourcine, De la Maternité, and La Maison Nationale de Santé. The revenue annually expended on these homes for the sick is about 200,000*l.* of our money,—an amount which, notwithstanding its actual importance, would appear trivial if it were compared with the entire sum yearly disbursed by the authorities of those London general hospitals that possess opulent endowments, those other London general hospitals which draw the princely incomes requisite for their maintenance from the voluntary contributions of public benevolence, those almost countless special hospitals of our great town which annually consume a vast amount of money, and those constantly-crowded and much-abused infirmaries which, in compliance with the provisions of the Poor Law, are supported by compulsory payments in our metropolitan parishes. But though Paris is less lavish in her hospital expenditure, her characteristic genius for organization and economical administration enables her to produce far larger results, with her comparatively narrow means, than the unconnected, and too often antagonistic, hospital committees of the English capital could achieve with the same measure of wealth. With her 200,000*l.*, Paris provides 2,000,000 indigent sick inhabitants with 20,000 beds. In the presence of these figures, it is difficult to argue that our wasteful method of ministering to the sick poor—wasteful in its sensational appeals by public advertisement, its costly dinners, its expensive machinery for collecting donations, and its various forms of prodigal expenditure that might be avoided by centralization and co-operation—is the best possible system that could be devised for the achievement of the special end. But though Paris has exercised sound discretion in placing her different hospitals under the control of a Government department, *i. e.* the Department of Public Assistance, no observant visitor can pass through the wards of her various institutions for the sick without coming to a conclusion that in respect to surgical art, medical treatment and hygienic arrangements, she has much to learn from the people who would do well to imitate her excellent mode of dealing with pecuniary resources. Of course, the Hôtel Dieu of to-day is a very different place from the Hôtel Dieu of the eighteenth century, when patients used to be crammed into fetid beds—four, five, and even nine patients to the same couch; when the living were often required to repose at night by the side of the dead; when the most painful operations of surgery were performed in the sight

of dying patients, whose last moments were thus disturbed by the cries elicited by knives and pincers; when the riot from the wards assigned to mad patients terrified the occupants of adjacent galleries; when women suffered the pangs of labour, lying three or four at a time on the same narrow bed, "exposed to want of sleep, to the contagion of the unwholesomeness around, and the constant danger of injuring their children"; when, in fact, the institution, according with the political condition of society beyond its walls, was a prodigy of bestial uncleanness, wanton cruelty, and unalleviated wretchedness. But notwithstanding all that philanthropy and enlightenment have effected for the better in its internal arrangements, the establishment is still so unsatisfactory a place, that Mr. Simms looks forward eagerly to the time when it will be pulled down to make way for a more suitable structure, the plans for which have obtained the Imperial approval. "That the old house," says the author of this little book, "is to fall one cannot regret, for its arrangements are anything but perfect. It is divided into two parts by the Seine, has a connecting passage bridged over that river, and is not handsome either externally or internally. Its wards are on the upper stories, lower than they should be, and more crowded than can ever be good for the health of its inmates; and in one set of them we find a ward for the lying-in women adjoining and opening freely into that for general cases of illness, such as fevers and inflammatory complaints. Its lower wards, more large, if not more lofty, remind one curiously of the lower deck of an hospital ship, with their thick, transverse beams, their central pillars of support, and their port-like windows; but they are terribly overcrowded; the beds are not only arranged along the sides of the wards so closely that it is with difficulty a double file of students can pass between them, but are also placed in the centre of the wards; and the effect of all this is heightened by the large French stoves employed to heat the place, so that the air is often close and stuffy, and oppressive in the highest degree. Who can regret, then, that all this is doomed?" Want of efficient ventilation is a defect frequently observable in Paris hospitals. Their wards have a more cheery and ornamental appearance than the wards of our London hospitals, in which too little care is, perhaps, expended on pictorial effect, but they are too often overcrowded and oppressively close. Even in the Hôpital Lariboisière—a newly-built hospital, with lofty wards, in the vicinity of the Northern Railway station—the system of ventilation has so far disappointed the expectations of those who recommended it, that Mr. Simms attributes the high mortality of its galleries to want of pure air. So also of the Hôpital des Enfants Malades—one of the two Parisian hospitals for sick children which have been extolled in this country as models of hygienic contrivance—he observes, "About this hospital I have frequently noticed very bad smells, and therefore fear that its drainage must be very defective; the practice, moreover, of emptying refuse matter into pipes which lead from the upper stories to drains surrounding the house must be most pernicious." After this information, the reader is not surprised on learning that phthisis, pneumonia, and eruptive fevers, aided by impure atmosphere, keep the mortality of the institution up to one in six. Ste.-Eugénie—the children's hospital founded by the Empress—has fewer defects than the Hôpital des Enfants Malades; but M. Bourchardat has called attention to the imperfections of its ventilation and internal arrangements.

Observations made with no want of fairness and liberality induce Mr. Simms to rate French medicine much more highly than French surgery,—a judgment which is the more noteworthy because English medical students far more frequently visit Paris for surgical than for medical instruction. Even on arriving in Paris our students seldom display any great eagerness for the counsels of her most eminent physicians. "Men seem to forget," says Mr. Simms, "that Paris has a medical as well as a surgical side, the former decidedly the better of the two, as the French themselves well know; and whilst they crowd in such numbers after Nélaton and Velpeau that no one can well see the cases, they neglect Bouchut and Roger, Hardy, Bazin, Cazenave, and the physicians of many of the larger hospitals. Trousseau has, I believe, of all the physicians, the most certain and steady following—a fact not a little due to the central position of the Hôtel Dieu." So far as surgery is concerned, the author, in no uncertain terms, gives his opinion that students had better work in London than Paris, where operators of the highest class can no longer be found. "Partly from what I have myself seen," he remarks on this point, "as well as from all that others more attentive to this branch of practice than myself have told me, I am led to the belief that the high reputation Paris once had for surgery no longer belongs to it. . . . I do not find the great capital operations attempted here, or, if done, brought to a satisfactory conclusion as in London; but this may be, as the French say, from want of stamina in the people, who, however, as a rule, are brave enough to endure any amount of pain. . . . In minor matters of surgery the same perfection is not arrived at as in England." But though Paris is no longer the first European school of surgery, Mr. Simms recommends the English student to spend a year in medical study "at the Hôtel Dieu, at the Charité, at the Hôpital des Cliniques, and most especially at the hospitals for sick children and at that of St.-Louis." For students who desire to take this advice, "A Winter in Paris" has an abundance of information as to the cost and details of French medical education. The expenses are slight—"Every expense connected with the acquisition of the degree of Doctor of Medicine, with the exception of payments to be made at the anatomical schools of Clamart and the École Pratique, and of such private classes as the students may choose to attend, being 1,200 francs, or not quite fifty guineas, that is, about one-third of the cost of the entrance fees of a good London school." Some particulars are also given by Mr. Simms with respect to certain inferior grades of the French medical profession. Between the physicians and surgeons of France on the one hand and the druggists on the other, are the "officiers de santé"—medical practitioners of an inferior and cheaper education than that which gives the qualifications for an M.D. degree, "who have the right to practise only in that department in which they pass their examinations, and may supply medicines, but may not keep a shop, or interfere with the *pharmacien* or druggist." Below the "officiers de santé" are the *herboristes*, whose status is thus defined:—"They are required to pass three examinations after having produced various certificates, either of hospital experience or private teaching: they are allowed to sell poisons only on the order of a medical man, and have to answer to the police for any impurities in their drugs." Lastly, we have to notice a class of female practitioners whom it is proposed in some quarters to bring again into the English system.

"Midwives," says Mr. Simms, "undergo an examination before the faculty, and pay 130 francs for their privileges; by law they are never allowed to use instruments, except in the presence of a physician or surgeon; but it is not likely that such women as Madame de La Chapelle often trouble them for their assistance." Having thus sketched the medical profession of France, Mr. Simms concludes his volume with a chapter on the Sanitary Arrangements of Paris.

NEW NOVELS.

Which shall it Be? a Novel. 3 vols. (Bentley.)

If we call this a remarkable novel, it is less for what it performs than for what it promises. In itself it is rather a series of studies than a finished work of art; and the reader will find it a curious study rather than an interesting novel. There is, indeed, nothing singular in its being evidently the first work of a young authoress, whose hand is not yet certain, and who begins by reproducing what has impressed her, in life as well as in literature. As in Raphael's early sketches, the pencil seems almost to wander over the paper till it is arrested by an idea: the author begins undecidedly, reminds us at first of a great many writers who have drawn their inspiration more or less directly from Mr. Dickens, and shows throughout the book a partiality for the types discovered by F. G. Trafford. But in this there is nothing strange. What is peculiar to the book is the skill with which some characters are drawn, while a great many others have neither outline nor individuality, neither novelty nor nature. Remarkable, too, is the incisive cleverness of some sentences, and the rarity of its appearance. We have marked down some epigrams that would do credit to a practised writer; yet they are followed by careless grammatical blunders, by slips of the pen and slips of the memory which bear the surest witness to inexperience. It is plain to us that the author has drawn for her characters on knowledge limited in range, but sure within its own province, and has supplied the want which she cannot fail to notice by deductions from the premises found in other novelists. If in future she will observe for herself, and not make experiments where her own powers fail her, she may not have the same ease in filling up her canvas, but she will produce a more harmonious picture.

As an instance of the singular contrast between her two classes of characters, we would put old Mrs. Redman by the side of Madame de Fontarce. Nothing can be weaker, more tedious, or more hackneyed than the first, and nothing could produce a worse impression than the opening chapter. The reader who stumbles on this old hag is not at all unlikely to close the book at once and for ever. Yet if he perseveres a little, he finds an entire change. Madame de Fontarce, *née* Blake de Ballyshanan, is not only a new character, but is drawn with consummate art. Her outward appearance and her *ménage* are not new to us; but her religious principles, her cheap charity, her way of living on others and dying for them, are sketched to perfection. When she writes to Mrs. Redman that she is willing to take charge of the heroine, Madeline Digby, how prettily she adds that Mrs. Redman is to assist in the matter of outfit. And, as Mrs. Redman is a stingy old person, she hints, "I append this slight stipulation, knowing the noble pride of an Englishwoman who would not devolve all the natural responsibilities on another." What delicacy there is in her artless suggestions

about Madeline Digby's religion to her own director, and to the good sisters with whom she places her young kinswoman. But the best touch of all is where she is trying to arrange a match for Madeline, and the affair is aided by the young man seeing his intended. "I acknowledge," says Madame de Fontarce, "the inconvenience of having a husband absolutely in love with you. It is, of course, a restraint, and delays that settling down to an everyday condition which is so desirable; but, of course, it would not last long, and it might throw a good deal of power into your hands." How the author, who could draw such a character as this, can condescend to repeat worn-out types such as Mrs. Redman and Mrs. John, and The O'Keefe,—how she can transplant Hugh Elliott from Mrs. Riddell's novels, and Dudley Ashurst from all the romances that have ever been written,—would be a mystery to us but for the explanation we find in her youth and newness. Even the introduction of Madame de Fontarce shows artistic inexperience. There is a poverty in devising links of connexion. A French teacher tells Madeline Digby that she met a lady in France whose eyes resembled Madeline's, and that she presumed on this resemblance to ask if the owners of the eyes were not related. Then, again, Madeline meets an old gentleman in an omnibus who asks her name, starts, and leaves her 60,000*l.* in the third volume. She meets another old gentleman in an omnibus, who pays her fare, and marries her at the end of the third volume. The example set in this way is taken almost too readily by the other characters, who are "polished off" in two pages. But although a "mature writer" would hardly fall into this mistake, the repetition of such simple incidents as meetings in an omnibus is still more significant.

The male personages for whom no original can be assigned are marked by very strong external peculiarities, and an utter want of corresponding mental characteristics. Indeed, men do not come out well in the novel. They are either heroes of romance, or sheer vulgarities. One sentence in the book might be taken as typical of the general run of its characters. Madeline says of Lady Rawson and Mrs. John Redman that there is a slight likeness, "a look, a sort of physical resemblance, only Lady Rawson is furnished with one or two items omitted in Mrs. John—brains and a heart, for instance." The comparison is not very good as to the two ladies, but it describes the method with which the author constructs the characters with which she is not personally familiar. One block serves for a great many; but the dresses are different, and to one she gives a modicum of heart, to another the same modicum of brains, to another gifts of singing, to another fashionable connexions. We do not like to linger on these failings when the success of other parts is so decided; but it is easy to feel the success, and the author will be more benefited by knowing the faults into which she has fallen. She has bestowed most pains on the character of Madeline Digby, and her labour has not been wasted. Yet the result is that we have two or three living women in a world of obnoxious lay figures. The girl at school who boasts of her Pa being rich,—“Why, I've seen ‘Buy your umbrellas at Summer's’ written on the dead walls all round Stoke Newington,”—the young lady who plays a piece with no particular tune, but full of sharps and flats and shakes,—the humble companion with her preparation of herbs, “ninepence a packet, and it makes a bottleful, which lasts a fortnight, much cheaper than a doctor, and highly recommended in the advertisement,”—Madeline Digby's own remark on being advised to marry

a curate, “You spoke exactly as the people at Shoolbred's do when you ask for French merino and they assure you they have Coburg at 20*s.* less that will answer the purpose just as well,”—are good specimens of the clever conversationalism for which we have given the author credit. The carelessness with which much of the book is written lends an additional grace to these smarter sayings, for it leaves us to infer that the author might be really brilliant if she took the trouble. The same pains that would avoid such phrases as “a venial bar,”—that would not marry off a Jessie Moorcroft at p. 21 of the second volume, and marry her again at p. 59,—that would not turn out simple sentences without either head or tail,—would give more polish to writing that is even now commendable, and would intensify liveliness into epigram.

Annals of a Quiet Neighbourhood. By George M'Donald, M.A. 3 vols. (Hurst & Blackett.)

THESE ‘Annals of a Quiet Neighbourhood’ are very quietly told; so quietly that the recital becomes at times monotonous. The author's reflections are those of an amiable, unworldly, and piously disposed thinker; but they are often obscurely and ambiguously expressed. The writer lacks the condensing power of our old and quaint writers, who, in a few words, could give utterance to sentiments for which Mr. M'Donald requires many pages. The experiences of a clergyman in a quiet country parish must sometimes be of a more exciting character than can be found in lengthy colloquies with parishioners or spiritual disquisitions on natural objects. The author's first walk in his new “quiet neighbourhood” suggests to him an incessant flow of analogies drawn from everything on which his eye rests. For instance, he comes upon a bank bordered by pollards. “Now,” he complains, “pollards always make me miserable. In the first place, they look ill used; in the next place, they look tame; in the third place, they look very ugly. I had not learnt then to honour them on the ground that they yield not a jot to the adversity of their circumstances; that if they must be pollards, they still will be trees, and what they may not do with grace they will yet do with bounty; that, in short, their life bursts forth, despite of all that is done to repress and destroy their individuality. When you have once learnt to honour anything, love is not far off; at least, that has always been my experience. But as I said before, I had not yet learnt to honour pollards, and therefore they made me miserable.” Fortunately, at this juncture an old countryman comes past who requests leave to look on the new parson's face; and the parson overhears a little child say he should like to be a painter, to help God paint the sky. Both these remarks give rise to a renewal of moral reflections; but, happily, they are of a more cheerful tendency than before. The good man works very hard, and doubtless does an infinite amount of good, particularly to the poorer part of his congregation; but he is most anxious his readers should know all his good qualities, and, being a very transparent character, every feeling of his mind is so visible that he might have spared himself and his readers the long explanations he so constantly gives of his actions and motives. Really he is, however, indefatigable in his attentions to his poor; and we are quite glad for his own sake to hear what comfortable luncheons he finds in the vicarage between the services on Sundays, and how careful he is to have the church well warmed where he preaches such long sermons. One of these discourses is given at full length, and it is not a particularly original specimen of its kind. Some of the worthy incumbent's ideas are certainly peculiar.

He considers it a great mistake to teach children that they have souls!—the consequence being “that they think of their souls as of something which is not themselves. For what a man has cannot be himself. Hence, when they are told that their *souls* go to heaven, they think of their *selves* as lying in the grave. They ought to be taught that they have bodies, and that their bodies die while they themselves live on. Then they will not think that they will be laid in the grave. It is making altogether too much of the body, and is indicative of an evil tendency to materialism that we talk as if we *possessed* souls instead of *being* souls.” No doubt this is very good in the abstract; but Sunday-school teachers would, we think, hesitate before adopting it without qualification.

The story which carries the author's sentiments is a very slight one. It is the mere connecting link of the thoughts and facts that present themselves to the author's mind. It is not well sustained; it is disjointed, and is perpetually falling to the ground. There is an air of feebleness about it, and a seeming want of practice is discernible in the recital that is somewhat surprising considering that the author has already exercised his pen in several previous works. The ‘Annals of a Quiet Neighbourhood,’ moreover, can scarcely be called a novel, the story is so subservient to the religious conversations; but as it was written originally for a Sunday publication, this was to be expected. There are two or three incidents that, if well worked up, might have risen to the level of the “romantic,” and even of the “sensational.” The characters are numerous. Among them is a decidedly disagreeable—some may think even a wicked—old lady, whose ill-used and, of course, beautiful daughter seeks a change from her magnificent but uncomfortable home by giving herself, and ultimately her money, to the worthy but prosy vicar. Then we have a pedantic and precocious child of twelve years of age, who flings herself into a pond during the clergyman's first visit, to see if he will jump in after her, and who talks bitterly of other people's matrimonial prospects in a very unjuvenile manner. These are the principals; but they have numerous supernumeraries in the shape of old people who have prosy chat with their pastor, and young ones who ask for his advice and do not take it. The solemn pastor unbends occasionally; once to the extent of giving a Christmas party to his congregation, in which are conspicuous, country-dances, carols, plenty of tea and supper, and Wordsworth's ballads.

This kind of book will probably find admittance into many a family circle where works of fiction do not generally meet with a cordial reception. The intention of the writer is good, but the execution falls short of the intent.

Registrum, sive Liber Irrotularius et Consuetudinarium Prioratus B. M. Wigorniensis. With an Introduction, Notes, and Illustrations, by W. Hale Hale, Archdeacon of London. (Camden Society.)

THIS publication is one of the most valuable of the many boons by the Camden Society to Archaeology in respect to our knowledge of the history, condition and customs of monastic establishments in the Middle Ages. The manuscript from which it is taken was probably finished in the year 1285, the work of a single hand. It formerly belonged to Astle, and had by some means found its way to Italy, where it received a fine binding and a table of contents. Of the subject to which the volume was directly dedicated, it may suffice to say that the Priory of St. Mary, Worcester, was wealthy and powerful beyond most of its fellows in the

western counties; its annual income on the Dis-solution being 14,000*l.* modern, derived from twenty-five manors, salt-works, house-rents in Worcester and elsewhere. The influence thus indicated was increased by the possession of thirteen benefices, shares in benefices, pensions from churches, at least sixty-three in all, and situated in the neighbouring counties. The Register gives the rental and other charges upon the estates of the monastery, the manner and nature of the payments, sets forth with extreme minuteness the kind of bargains that were made in the thirteenth century between landlords and tenants, the sorts of food in vogue, and an infinity of curious customs and allowances made between one and the other, and has almost an incomparable interest of local as well as general character in reference to the condition of the district at a time which is twice as far removed from us as that of the 'Valor Ecclesiasticus' of 1534. The Register, with the unchallengeable accuracy of a merchant's or land-steward's ledger, sets forth and amplifies the contents of the Exchequer Doomsday, and is so elaborate that one rubs one's eyes and is not a little abashed at being so closely admitted to the affairs, not only of the revenues of St. Mary's, but to those of their tenants, freemen or villani. Thus, shortly after the Exchequer Doomsday was made, Bishop Wulstan the Second, that sturdy old vegetarian and fish-eater, who "improved" so remarkably upon the smell of roast goose, granted the mill of Tapenhall to the monastery; in 1240 it was held in socage by two tenants doing homage, and paying annually to the prior, the one 10*s.*, the other 13*s.* 4*d.* The prior had the privilege of grinding, paying only half the toll; but the miller was liable to make good any loss of corn or meal while under his charge, and to find grass for the horse that brought the corn to the mill. A very good and businesslike arrangement on the part of his reverence the Prior. Great light is thrown upon the condition of the people in the thirteenth century,—a period from which the veils of ignorance and prejudice are being fast removed, displaying, to the great amazement of some, the view of a country very far advanced from barbarism. The proportions of classes at the date of the Exchequer Doomsday are curiously illustrated by the following summation of the persons attached to the estates of St. Mary's monastery. On eighteen manors, comprising 175 hides, were 600 persons, in seven orders: Villani, 216,—these held lands and were bound to weekly personal services; Bordarii, 131,—probably these differed little in condition from the last; Presbyters, 9; Slaves, bound in person and property, 141; Liber, 1; Prepositus, 1; Radchenista, 1. The last was the prior's riding attendant; the penultimate, the elected headman of the village. Doubtless, other freemen were on the land; the author elaborately shows that such was, beyond reasonable doubt, the case. From the Register, it is clear that the villani had commuted for money many of the services due by them, and were not bound to personal labour for their hereditary holdings; however, they paid high rents. The intricate state of society in those days is curiously displayed by the shallow grades of its divisions in the cases of the Villani, Cottarii, Cotmanni, men who held, by money payments wholly, the forelands of the monastic estates. Besides these there were the Freemen and Socmen. In 1240 there were freemen on every manor of St. Mary's estate except one, Fepsinton. Thirty-nine freemen held on an average fifty-eight acres each. The light cast by this remarkably interesting manuscript is cleared and rendered far more brilliant than it would otherwise

be by the very erudite and singularly acute exposition of Archdeacon Hale. It is available for information upon the ecclesiastical, personal, legal, commercial, and agricultural condition of the people of England during one of the most interesting periods of their internal history.

SCRAP-BOOKS.

Literary Pearls strung at Random. By R. A. M.; with an Introduction by Samuel, Lord Bishop of Oxford. (Liverpool, Howell; London, Routledge & Sons.)

WHEN a Lord Bishop—redoubtable, to boot, for his serene and suave eloquence—condescends to introduce a volume of literary scraps by a benevolent flourish of his pen, the Introduction and the book are thereby recommended to strict examination. S. Oxon (to give every dignitary his due style and title) could not, would not, should not—it might have been predicated—throw the protection of his ecclesiastical apron over a basketful of "whittings' eyes" for pearls, let the motive be ever so good—as that of assisting "the Hawaiian mission," and offering a "tribute of respect to Queen Emma" of the Sandwich Islands. Yet, sooth to say, the august garment has been here carelessly compromised. The following is the episcopal Introduction to the volume:—

"Courteous reader, you have here extracts which, gathered from every source, may well suit every reader. Here wit sparkles for those who delight in its coruscations; here history opens its stores; here biography presents before you in court dress and dishabille, in serious and in sportive humour, companions, whom you may be right glad to join, either to learn what is solid and useful, or to smile at what is innocently gay. If thou lovest verse, here are many of its tender, airy, witty, noble outpourings; and if thou hast no soul for poesy, turn only the page, and solemn prose shall soothe thee by its pathos, or teach thee by its wisdom. Look when and where thou wilt in the volume, and say whether one hath not been before thee, gathering for thy delight, the flowers as they burst into their beauty—violets whose fragrance thou mayest enjoy without groping on the banks on which they creep—glorious rosebuds gathered for thee without the guarding thorn wounding thy searching hand. Yes, examine this volume, and say if the fields have not indeed yielded to the reaping-hook their golden treasures, and if the sheaves do not stand ready for thy in-gathering in the open fields before thee. S. Oxon."

In the above the exchange from "you" to "thou"—howsoever warranted by Sir Walter Scott in the dialogue improvised almost for the dramatic novels written to feed the Ballantyne press—strikes us as a little loose in an Oxonian. But it will be seen that the Bishop's epithets are "tossed about" (as the country boy said of Serjeant Talfourd's fine language) with a yet more florid recklessness when the quality of these 'Literary Pearls' comes to be tested. Where is the "poesy" to be found among them? Here and there is a melody as well known as 'The Last Rose of Summer'; but everywhere paltry, inferior, conventional verses, not existing, we will venture to suggest, in any former known set of rhymes. Of these the following quatrain (the fourth line italicized) offers a fair specimen:—

Where, O where are the visions of morning,
Fresh as the dews of our prime?
Gone, like tenants that quit without warning,
Down the back entry of time.

If this be a specimen of the "tender, airy, witty, noble outpourings," after "the back entry of Time," so admirably prefaced here, we may look in any coming selection of 'Literary Pearls' to meet with "The Future's Area Bell." Lest we be thought severe without just cause, let us take a page of the "solemn prose" which "shall

soothe" us "by its pathos, or teach" us "by its wisdom."—

"A Tenant on all Fours.—I have a cottage at the end of my garden, which, having no special use for, I let recently to a little grey cat, who had taken a fancy to it, and would not be driven away, either by protest or persecution. Having ceded the point, I graciously knocked out a square of glass in the parlour window for her exits and entrances; and there she sits at this open pane, winter and summer, looking out upon the world. She is a quiet tenant enough in the daytime, but at night,—oh! at night she 'receives,' and gives *soirées* and musical parties, and there are solos, and duettes, and trios, and general choruses, and grand crashes, and all kinds of caterwauling. I have a notion she is a poetical cat, she falls into such fits of reverie, and that her friends are *chats de lettres*,—*feuilleton* cats, perhaps, with a medical student or two among them. Roaring blades they are, at all events, and never go home till morning under any consideration, or pay the least attention to the police, but rampage along the walls, and scuttle over the slates, making love with frightful emphasis outside garret windows, and settling affairs of honour on projecting parapets. I shake my fist now and then at the little grey cat after these social demonstrations, but she merely looks up in my face with a cucumber coolness, and a sort of innocent stare in her eye, which means, I suppose, that I must have been dreaming, for that she is a cat of retired habits, and never goes into society at all. Her real home is somewhere within the city walls; mine is only her country house (though she is seldom out of it), her box, her little place out of town, in which, withdrawn from the pressure of affairs and the strife of parties, she revolves the destinies of cats and things,—sighing, it may be, for new lights, after—dining on stale ones."

From what stale oyster was the above "Literary Pearl" drawn? There is no end of such in this casket, which would have been passed over in three lines had not a notable man flung, as we have said, his apron over it, and God-fathered it, with sprightly and sentimental condescension.

Scraps. By Henry Jenkins, Esq. (James Blackwood.)

HERE are seven hundred closely-printed pages, even more oddly made up than those of the volume just dismissed,—one-seventh of the book being devoted to cuttings from Shakespeare, Milton and Cowper. Other familiar poets have been also laid under contribution. There is a poem in Welsh. There are sixty-three charades. We have Mr. Lover's 'Angels' Whisper,' and 'The Banks of Allan Water,' and 'Sir John Moore's Burial,' and Johnsoniana, and pious musings (the last exceedingly weak), and bits from the Waverley novels, and paragraphs concerning bees and fleas, and a large draught from Henry and Scott's Commentaries on the Bible, and Goldsmith's 'Edwin and Angelina' and 'Haunch of Venison,' and verses from the Psalms, and snips out of sermons—a few receipts for dainty dishes and drinks being all that is wanted to make this book incongruous, indescribable and complete. The state of mind into which scrap-collector and publisher must have wrought themselves, ere the perils of printing were rushed upon by both, is not to be represented by any effort of imagination.

Life and Correspondence of Richard Whately, D.D., late Archbishop of Dublin. By E. Jane Whately. 2 vols. (Longmans & Co.)

SOMETHING more than two years have elapsed since Mr. Fitzpatrick's 'Memoirs of Archbishop Whately' received due notice in our columns (*Athen.* No. 1916). The present work, by Miss Whately, is more extensive and elaborate, contains many letters, documents, and other papers, to which Mr. Fitzpatrick had no

access, and corrects, without alluding to, various errors that have been committed by narrators of her father's life.

Miss Whately dates her father's birth a year later than that named by his previous biographer, namely, 1787. Richard Whately was the youngest of three brothers and five sisters. He was a ninth little stranger, whose arrival in the family at an interval of six years after his immediate predecessor, was not altogether calculated upon. "The family," says Miss Whately, "had been long supposed complete, and the 'nursery' in the house had ceased to exist." The stranger, it is true, arrived in a sort of apologetic form. There was very little of him; there was no promise of the stalwart individual he became, in the delicate dwarf who seemed only to have come to take a feeble glance at life but did not mean to stay. When he had loitered, hesitatingly, in the world for three or four years, he was weighed against a turkey, and he proved the lighter of the two. This is the less remarkable, when we remember that, as a child, he never had a healthy appetite, and was close upon his teens before he knew, as he then did to his great surprise, what it was to be hungry.

From first to last, Richard Whately was a shy man. This may seem strange to those who remember his off-hand abruptness of manner; but that abruptness was partly a consequence of his constitutional timidity. As to his lack of appetite, it only extended to creature comforts. He had a great appetite for everything belonging to nature, also for hard, deep, concentrated thought. No wonder that at six years old he could not eat. He was dissipating life in mental arithmetic, and at the age stated "he astonished his family by telling the celebrated Parkhurst, his father's near neighbour and intimate friend, and a man of past sixty, how many *minutes* he was old. His calculations were tested, and found to be perfectly correct." It is a strange circumstance that this faculty of mental calculation, in which young Whately took such delight that he would have been content to pass his life in its exercise, died out. When he came to learn arithmetic by rule, he was "slow," and he was never distinguished as a mathematician. On the other hand, he could always baffle first-class mathematicians by the readiness with which he could solve curious problems and arithmetical puzzles.

The boy was such a thinker, that people who did not understand thought, ventured to think, nevertheless, and to foretell that Richard Whately would never make his way in the world. At that very time he was making his way in, about, and through the world, by means of his penetrating thought. He himself called his speculations "castle-building," and he indulged in splendid edifications of that quality, to the end of his life. But even his boyish fancy dealt with abstract subjects, metaphysical, political, and ethical; and "he himself has related how, while still a child, it occurred to him that the consciousness of brutes must be analogous to that of human beings in a dream, when the power of abstraction at pleasure is gone."

To his own power of concentration of thought, Whately attributed much,—nay, as he himself rather says,—"everything in life to it." He "chopped logic," as the process is here called, by himself, or with his companions, and was not always the more popular with some of the latter on that account. If a thought with a character of usefulness came within his grasp, he seized it, would not let it go, turned it, examined it, wrestled with it, embraced it, moulded and shaped it, and perhaps out of the very agitation of it struck some spark of truth

of imperishable value to mankind. To boy and man with these mental and social, or anti-social, habits, common intercourse with ordinary society had no attractions. Indeed, with respect to himself, it presented difficulties and terrors. For many years, he was painfully shy. The picture which his friends drew of the consequences of the figure he cut, and the impression he produced, only increased his false shame. He is described as making stout resolution to overcome his sensitiveness at what might be thought of him by others, "and," to use his own words, "if he must be a bear, to be at least as unconscious as a bear." We are told that success crowned the effort, that the shyness ultimately passed away, and, says his daughter, "though his manners might still have a certain abruptness and peculiarity about them, the distressing consciousness which made life a misery was gone." How deeply the philosophic student felt the calamity of shyness was strikingly illustrated in later years, by a remark of the Archbishop, when his memories had been occupied with bygone things and times: "If there were no life but the present," he said, "the kindest thing that one could do for an intensely shy youth, would be to shoot him through the head." This manifests the intensity of his own feeling on the subject, but it does not exhibit the usual amount of strong common sense which distinguished most of the short sentences delivered by the speaker. This shy and yet abrupt man was, nevertheless, under abiding influences of gentleness and courtesy. There was a tender gallantry in some of his acts, that could not have been surpassed, if they could have been imitated, at Versailles, when gallantry was rather acted than practised there with sincerity. "He would be most touchingly gentle in his manners," says an old friend, "to those whom he liked." This hardly represents, however, a man who is courteous on principle, and who knows that one of the first duties of a gentleman is to avoid hurting the feelings of others. The tender side of Whately's gallantry was manifested, however, invariably to Mrs. Whately. "I recollect a lady saying that she would not for the world be his wife, from the way in which she had seen him put Mrs. Whately (the object, all his life, of his strongest affection) into a carriage!"

Before Dr. Whately was called, without solicitation on his own part, and at the earnest recommendation of Lord Brougham, to the archiepiscopal throne of Dublin, he had achieved a brilliant fame and a modest fortune. Oriel had possessed him as a Fellow; the general public had been delighted with his pleasant hit at German neology, in his 'Historic Doubts respecting Napoleon Bonaparte'; a particular theological public had welcomed his Bampton Lectures, and his Commentary on Archbishop King's 'Predestination.' The Suffolk people at Halesworth had looked on him with some awe, but much love, as their rector, and St. Alban's Hall with much pride as its President. When he left England, he had been one of the most brilliant of the Professors of Political Economy, and during his residence in the diocese of Dublin, a time of storm and struggle of hard-earned victory and honourable peace, he founded a chair of Political Economy, of which Mr. Isaac Butt was one of the earliest and most accomplished Professors. Those were the bright mornings of Mr. Butt's days, not the early dawn, but still the morning, full of a flashing promise of which Ireland, at least, hoped, but failed, to see the realization.

It is not necessary to do more than allude to the works of which Dr. Whately was the author when he passed over to Dublin. They include writings on every subject having connexion with

religion, treated with unusual clearness, and distinguished by unvarying liberality of spirit and utterance. They who accused him of error in his religious views were unable to deny the activity and abundance of his charity; but many of them who could not prove such error as they thought fit to lay to his charge were unable or unwilling to imitate his charity. In the hurricane of opposition which met him on his assuming the heavy duties of his responsible office in Dublin, he stood calm and unmoved. His purpose was fixed, his principles well defined; he held fast by the latter, and he never lost the former from view. In course of time, even the illogical persons who had entered into antagonism against the great master of logic acknowledged his honesty of purpose, his righteousness of principle; and though they may have winced a little at what they considered his shortcomings, and have been something fluttered by the persistent courage with which he maintained what he conscientiously believed to be the truth, they recognized in him the charity of a saintly scholar, and perhaps had their little fling at his temper as a man. It was not *temper* in an ungracious sense. It was boldness of spirit, in the very asserting of which he could assume the mildness of a lamb. In fact, he had it under control. Socrates bore the most humiliating indignities with meekness, simply because he was the most impatient of men.

Miss Whately has illustrated her father's life and character by aid of her own experiences, the Archbishop's letters, and the reminiscences of his friends. The result is, that we obtain a larger portrait of the man than Mr. Fitzpatrick was enabled to paint, a deeper insight into the mind than the former biographer had any chance of offering, and greater means for appreciations of the Archbishop's character. Mr. Fitzpatrick painted a small cabinet picture, a sketch dashed off in haste, not without spirit, and, we may add, not without fairness; although in this case we had a Roman Catholic biographer narrating the story of the life, with its lights and shadows, of a Protestant prelate. On the other hand, Miss Whately has executed a gallery picture of the largest dimensions, in the centre of which stands the noble figure of her father, of heroic size. The readers of the two books will probably discover that, though Miss Whately brings forth masses of fresh evidence as to her father's archiepiscopal course, and of illustrations of his way of life, the conclusions to be arrived at from perusal of the one work are not at all disturbed by those at which most persons will arrive on reading the other. In either case the judgment will be that, although not, perhaps, without a weakness or two, Archbishop Whately was, emphatically, a man,—that his life was well worth writing,—and that there is much to be learnt by those who will read it without bias or prejudice.

From the personal reminiscences of Mr. Dickinson, Vicar of St. Ann's, Dublin, the following passage, following on some account of the stormy commencement of the Archbishop's reign, is illustrative of the man and the times:—

"It would give needless pain to many to refer more particularly to those years of opposition. But no one can do full justice to the character of that period Archbishop who has not the records of that time before him. I well remember how the whole Irish press, day after day, month after month, year after year, continued to pour out invectives, accusations, and innuendoes, and how eagerly these were taken up and repeated from mouth to mouth. That the Archbishop was a 'Jesuit' was whispered here and there; acute physiognomists saw something suspicious in the look of his hall-porter; and when, at last, some one found out that in the words

'Ricardus Whately' might be spelt out the mystic number 666, the evidence against his Protestantism was felt to be conclusive. Things of this sort, of course, only amused him; but there was a determined opposition, and an obstinate distrust, which constantly put real difficulties in his way, and thwarted his efforts for the good of the diocese and of the Church in Ireland generally. A friend of his was one day making a journey on the top of a coach, and had for fellow-passenger a Roman Catholic gentleman. The conversation turned on the Archbishop, about whom Roman Catholic papers were then respectful or silent. 'But how is it that the members of your Church never abuse him?' it was asked.—'Oh, we leave that to you. You Protestants do it so well that you save us the trouble; not that we like him any better than you perhaps; but then, you see, you do our work very effectively yourselves.' Through all this storm of obloquy, which blew with hardly diminished violence for a quarter of a century, the Archbishop held on his way unswervingly. And judging from his conduct, some might have thought he did not feel it. But that he did, and very keenly.

In his grave shadow and gay light here are some pleasant touches of him, from the same hand:—

"It has been sometimes said of him that he liked only those who agreed with him or who seemed to do so. I can, however, testify that I have often heard him speak with sincere respect and regard of many who differed from him very much, and who spoke out their differences too. There was one clergyman who, whenever present at the monthly clerical dinner, used with especial boldness to enter into argument with the Archbishop, and firmly, though always with Christian and gentlemanly mildness, would hold his ground against him. And towards that man the Archbishop had, I know, the most kindly feeling. He liked him all the better for his quiet courage. But, in point of fact, there really never was an archbishop or bishop in whose presence his clergy felt less restraint. And though men too shy or too proud to risk encounter with so acute a dialectician as the Archbishop, held back and were silent on these occasions, they will remember that those who chose to take it had always full liberty of speech. There was, assuredly, no official stiffness at those gatherings of his clergy. Clergymen from other dioceses, who occasionally dined at the Palace, expressed surprise at the 'free-and-easy' friendliness of these social meetings. The Archbishop was anxious to make all feel at home. He did not even like men to stand upon the order of their going; but when the door into the other room was thrown open and dinner announced, he would sometimes call out, if he observed delay for such punctillios, 'Now then, bundle in, curates, rectors, archdeacons, deans, bundle in, bundle in!' He certainly 'held no man's person in admiration, because of advantage.'"

The prelate who could be thus jocosely familiar, had a chaplain, at one time, of a merrier spirit than himself:—

"Speaking one day of a newly risen sect of religionists who proscribed the use of animal food, the Archbishop said to Dr. Wilson, 'Do you know anything, Wilson, of this new sect?'—'Yes, my Lord; I have seen their confession of faith, which is a book of cookery.' On one occasion when Dr. W. was asked to subscribe his name to a testimonial in favour of some one whom he thought not very highly of, yet did not wish to refuse, and who had had his testimonial signed already by clergymen whose names carried small weight, he got out of his difficulty by writing, 'I know the value of the above signatures. Jas. Wilson.' But the Archbishop was too straightforward himself to approve of this *ruse*, and, though amused, blamed Dr. Wilson for it at the time."

Of a bit of the Archbishop's own grave comedy, the following is not a bad illustration:—

"At public meetings he showed himself possessed of one rare and very enviable gift, which is, indeed, of much convenience to a chairman. When-

ever he was obliged to listen to a speech delivered in his presence, of which he did not feel approval, and did not wish to express disapproval, he had the faculty of looking as if he did not hear a word. He fixed his eyes on vacancy, and banished all expression of every kind from his face, so that people who peeped forward, curious to see 'how the Archbishop was taking it,' could gather as little from his countenance as if it had been carved out of stone. I remember observing this with much amusement at a certain public meeting, in the course of which one speaker made an harangue which was pre-eminently injudicious. He appealed to the Archbishop, every now and then, as cognizant of circumstances which, with singular indiscretion, he was detailing to the meeting, saying, 'Your Grace is aware of so and so; your Grace will recollect what I refer to,' and so forth. But his Grace evidently recollected nothing, and looked as if he were stone-deaf. I congratulated him, after the meeting, on his success, and asked him how he managed it. I think it was a half-unconscious art with him; however, he seemed amused, and asked me in reply, if I had ever heard a story of the late Lord Melbourne? Lord Melbourne (he told me) was in the House one evening, when — stood up to speak on the Government side. The speech was a very indiscreet one; the speaker dashed into topics about which Ministers would rather have had nothing said, and in the course of his remarks turned towards the bench where Lord M. was sitting, saying, 'The noble Lord at the head of the Government is fully aware of the accuracy of what I state; the noble Lord, having been present at the interview of which I speak, will bear his testimony.' The only answer from the Treasury bench was a loud *snore*."

The Archbishop was, in a different sense from that applied to Sydney Smith, a "joker of jokes." His reputation in this way caused him some vexation, for in order to give currency to bad jokes, they were fathered on the prelate, who one day remarked that he ought to go about Dublin with "Rubbish shot here!" chalked on his back. With respect to his powers and manner as a wit, it is here said, by a friend:—

"Few, however, of his sparkling utterances could be preserved, for they were usually connected with circumstances of locality, or of individuals, which should be reproduced in order to see their full value. One I remember that amused us much at the time. A lady from China who was dining with the Archbishop told him that English flowers reared in that country lose their perfume in two or three years. 'Indeed!' was the immediate remark, 'I had no idea that the Chinese were such descenders.'"

In the examination of candidates for ordination, the Archbishop was strict, but not severe. It was the custom of the Irish bishops, when Dr. Whately first went among them, to exempt the candidates for the diaconate from being examined in the Epistles. They hoped that the new prelate would accede to this custom; but he simply inquired whether deacons were to be allowed to preach from the Epistles. The bishops had not the slightest objection. Whereupon, their chief quietly observed that it would be as well to see whether the would-be deacons knew anything about what they were permitted to preach from. Converts from Romanism he did not encourage, unless he had solid conviction of their sincerity, more especially if they had been priests. Of the latter, he occasionally had to encounter singular specimens:—

"My experience would have convinced me, had I doubted it, that some zealous Protestants are so eager for a convert, that they hastily take for granted a man's being a sincere Protestant if he does but echo all they say, and answer leading questions to their wish; when perhaps he is, as I have found in some cases, too ignorant (to waive all suspicions of deliberate falsehood) to be properly

called either Roman Catholic or Protestant, from his knowing, I may say, nothing of either the one religion or the other. Mr. —, for instance, I found more ignorant of the Bible than you would suppose any child of twelve years could be in a tolerable charity school. He set up, moreover, for a classical and mathematical tutor, and was believed on his bare word, till I found him unable to construe correctly a plain Latin sentence, barely knowing the Greek letters, and not knowing what a triangle is. To prevent mistakes, I gave him a bit of paper, and told him to draw one, which he did thus Y. Yet he had been engaged as tutor in a gentleman's family!"

One phase of the Archbishop's character is seen in its fullness and beauty in the following lines, found among his papers:—

"Mr. W. Palmer is quite right in recommending charity and courtesy of language, but it should be remembered that a most uncharitable and unjustifiable reproach to others may be conveyed by terms not applied to them, but to ourselves. For instance, a person was asked in Italy 'whether Christians are tolerated in our country.' The Spaniards and Italians limit that name to those of the Church of Rome; and in like manner the 'Unitarians' imply, by assuming that title, that we do not teach the Unity of the Deity. In like manner, when we are told that the Emancipation Act struck horror into all friends of 'religion,' this implies that those who had all along advocated the measure on religious grounds, were in reality men of no religion. This is just as strongly and clearly implied as if the abusive epithet had been directly applied to them. Again, when 'Church principles' is constantly applied to designate those who hold such and such opinions (perhaps very right ones) on the subject, this is equivalent to telling all who differ from these that they do not maintain 'Church principles,' which they (mistakenly perhaps, but sincerely) profess to do. It is in vain to recommend charity if we do not ourselves set the example of it."

The Archbishop's character will be all the better understood by a patient perusal of the documents in these volumes. So will the characters of some other persons. Lord Melbourne, for instance, makes but a poor figure in it. The most pleasing picture it affords is that of Dr. Whately and Dr. Murray, the Protestant and Roman Catholic Archbishops of Dublin acting in perfect harmony, with respect to national education, and with interchange of the greatest respect and cordial good will. Such a sight had never been seen before, and it ceased to be after Archbishop Murray's death, when the Pope, disregarding the recommendations of the Dublin Chapter, appointed to the post of Roman Catholic Archbishop, Dr. Cullen, a man Irish by name, but thoroughly Italian in everything else. National education has been a failure in Ireland from the time that the Ultramontane Cullen raised his crosier in the Irish Church.

For a reform in his own branch of the Irish Church, Archbishop Whately is understood to have supported the views put forth by his chaplain, Mr. Dickinson, afterwards Bishop of Meath. The ends recommended were the substitution of congregational for territorial or parochial system; the purchase by Government of all church property at sixteen years' purchase, the sum realized to be vested in Commissioners, who were "to distribute church income according to church work." It was considered that, by this plan, the church revenue would be unimpaired, and a surplus of about a quarter of a million accrue to the nation at large. Reconciliation and tranquillity of parties, it was said, would ensue; but the views were not adopted which were to lead to that prophesied, but perhaps not possible, conclusion.

OUR LIBRARY TABLE.

Knowledge is Power. By Charles Knight. A New Edition, corrected, enlarged, and adapted by the author for Elementary Instruction. (Bell & Daldy.)

We gladly welcome the re-appearance, in the garb of a new and enlarged edition, of one of the many useful books for which society is deeply indebted to Mr. Charles Knight. We only wish that we could speak "to parents and guardians" such words of power as would induce them to insist upon its being made a text-book in every school throughout England. Nor is it only to the rising generation that it is likely to do good; every man and woman amongst us would be the better for studying it. The information it contains is as interesting as it is important; and many an hour that is now being frittered away over trashy novels might be spent, not only with advantage, but also with real satisfaction, in its perusal. To the working classes it is especially valuable, for it can teach them lessons, each of which has a practical bearing on their moral and physical welfare, enlightening them on the subjects on which they are most grossly ignorant, and pointing out the simplest means for securing their rapid improvement. The various questions connected with the subjects of capital, labour and co-operation are answered in language that is clearly intelligible to all readers, and an immense amount is given in very few words of most attractive instruction on such topics as wages, machinery, friendly societies, and the like. The very name of political economy has been made repulsive by the dreary manner in which too many writers have discoursed upon that science; but Mr. Charles Knight has treated it as Dr. Johnson said Goldsmith would treat the subject of natural history, and made it "as interesting as a romance," far more interesting, indeed, than the majority of the impostors which now-a-days go about in three volumes and pretend to be romances. One of the great charms of Mr. Knight's book is the air of kindness which pervades it, of sympathy with every intellectual movement that is going on around us, and with every attempt that is being made to struggle upwards from among the lower forms of life towards a higher and nobler existence. One who has done much good in his time to his fellow men may well take a cheerful view of the world in the mellow autumn season of his life, and few men have been of greater benefit to their fellow workers than Mr. Charles Knight. In heartily recommending his 'Knowledge is Power' to all who care to improve themselves or others, we wish that they could be persuaded to use their knowledge or their power as well as he has done; and we envy any of them who may have acquired the knowledge of gaining, and the power of keeping, the hearts of their friends, as he has won and has kept the hearts of his.

Copsley Annals, preserved in Proverbs. By the Author of 'Village Missionaries,' &c. (Seeley & Co.)

THERE is a certain far-fetched subtlety in the framework of these five stories. But no one will reckon with this harshly who takes the trouble to recollect how difficult it is to find any new form of the kind having a semblance of probability. The five family histories here assembled are commendable in no common degree:—full of a sweet and gentle spirit, without sickliness,—religious in tone and the high morals inculcated, without a trace of such sectarianism as would exclude them from the fireside of church or chapel goer,—not without nice touches of humour, clear of exaggeration. Mrs. Blackett's story is the best, not a whit more prosy than the confessions and recollections of an old family servant and confidential friend should be; and we like it none the less because its close, without the slightest exaggeration, recalls to us one of the most delicately beautiful of Miss Procter's longer poems, 'A New Mother.' It must be a healthy pleasure to write—it is to read—such books for the young as the 'Copsley Annals.'

The Boy and the Constellations. By Julia Goddard. Illustrated by A. W. Cooper. (Warne & Co.)

Miss Goddard displays judgment and taste in the art with which she tells yet again some of the

most beautiful stories of classic mythology. Parents who wish to familiarize their children with the lovelier creations of the old Greek fancy should procure this little volume, which, so far as artistic embellishments, external gilding, tint of paper, and ornamental cover are concerned, is a book fitter for a drawing-room table, than for a shelf in a children's book-room.

The Grahams; or, Home Life. By Catherine D. Bell. With Illustrations. (Warne & Co.)

THE pleasant and salutary writer to whom children owe thanks for 'Hope Campbell,' 'The Huguenot Family,' and many other excellent stories, has found the end of her labours; and in future holidays little people will ask in vain for another tale from "Cousin Kate," by which title Miss Catherine Bell was known to her juvenile admirers. Rendering a proper tribute of respect to the author, and, at the same time, meeting a public demand, Miss Bell's present publishers are putting forth her series of moral narratives, of which they justly observe, "Their aim is to teach, in the attractive guise of fiction, the holiest and noblest truths, and to show how character is formed, faults cured, and virtues attained, by God's discipline of daily life."

Home Sunshine. By Catherine D. Bell. With Illustrations. (Warne & Co.)

'Home Sunshine,' another of the late Miss Bell's stories now offered to the public of little readers in the "Cousin Kate's Library" series, is a good specimen of the writer's power to lecture children without boring them, and to fill their hearts with good resolves whilst she seems to be bent only on amusing them in their hours of idleness.

Nettie's Mission: Stories illustrative of the Lord's Prayer. By Alice Gray. (Nisbet & Co.)

PRINTED upon toned paper, and embellished with pictures good enough to please children, the six stories of this volume will be an acceptable addition to the serious department of any children's book-room. Alice Gray has the story-teller's "knack," and her tone is wholesome and pleasant. It is almost needless to say that her views on matters pertaining to religion accord with the popular theology of our play-rooms and nurseries.

Articles and Letters about the Indian Land-Tax. Reprinted from 'The Bombay Saturday Review.'

By J. P. H. (Bombay Education Society's Press.)

"Quia non movere" is nowhere a better rule than in India, where men like things as they are, and would rather "bear the ills they have, than fly to others that they know not of." This being the case, we cannot anticipate much practical good from the discussion which J. P. H. so ably maintains in these articles. Whether the Indian land-tax be a tax or a rent, whether it is contrary to the sound principles of political economy to levy it at all or not, it is a fact that it forms more than a third of the whole revenue of India, and that, as yet, no one has been able to throw the faintest glimmer of light upon a feasible substitute. Nevertheless we incline much more to the opinion of the reviewer than to that of James Mill and the old Indian civilians as to the advantages or otherwise of the land-tax. "India," says the reviewer, and we in the main agree with him, "pays the price of her agriculture for the advantages to her Government of her land-tax." "We believe," he writes in another place, "that the assertion by the State of a right to the rent of the land in India has been in the past a principal cause of its arrested civilization." The Indian cultivator is content to extract a mere subsistence from the land he tills, fearing that the Government would exact from him the lion's share of any extra returns he might obtain by extraordinary exertions. So much is this the case that, at the present day, the beneficial effect of the great irrigation works in India is in part nullified by the unwillingness of the ryot to accept the great boon of water, lest he should be forced to pay more in proportion for his increased crop. "In Europe," says the reviewer, "it is adopted as a political maxim that the State must not be a holder of property. . . . It is useless for a government to be a landowner, a fundholder, or anything else besides a government. All it can

possibly want, so long as it does its duty, it has a right to ask for." This is true, and if the idea that the Government is proprietor of the land in India, has a right to a large part of the produce as rent, and a prospective right to raise its rent as production increases, were given up, a step would have been made in the way of right reasoning. But there remains the difficulty of substituting any tax as a substitute for one that pays nearly twenty millions. This is a *dignus vindice nodus*, and we do not find in these articles any attempt at a solution of it.

LIST OF NEW BOOKS.

- Adams's Judges of Israel, Tales, 8s. 2s. 2d.
Andersen's Old Church Bell, 12mo. 1s. 6d.
Andersen's Everything in its Right Place, 12mo. 1s. 6d.
Andersen's March King's Daughters, 12mo. 1s. 6d.
Anderson's Cumberland Ballads, 12mo. 2s. 6d.
Aunt Annie's stories, coloured illust. 5s. 6d.
Bible Stories for Children, 12mo. 1s. 6d.
Blair's Cecilia Rye, an Autobiography, 8s. 5s. 6d.
Blair's (Miss) Songs and Poems, 12mo. 2s. 6d.
Book of Common Prayer, Engraved Titles, &c., by Holmes, 18s.
Bowring's Translations from Alex. Petofi, 12mo. 5s. 6d.
Bunyan's Pilgrim's Progress, col. illust. (Book Soc. Edit.) 7s. 6d.
Bunyan's Law of Fire Insurance, 8vo. 16s. 6d.
Child's (The) Coloured Gift-Book, 5s. 6d.
Confirmation Class (The), by a Clergyman's Wife, 12mo. 1s. 6d.
Crisp's Richmond and its Inhabitants, post 8vo. 10s. 6d.
Dan's Treasure, or Labour and Love, 12mo. 2s. 6d.
Dar's Clinical Histories, with Comments, 8vo. 7s. 6d.

Grinstead's Last Hours of Deceased Genius, 12mo. 3s. 6d.
Hetty Gouldworth, by George Macaulay, 3s. 6d.
Hodson's Behold your God, &c., post 8vo. 5s. 6d.
Idyllic Pictures, drawn by Barnes, &c. (with Poems), sm. 4to. 10s. 6d.
Irvine's (Washington) Spanish Papers and other Miscellanies, 2s. 6d.
Lytton's Strange Story, Library Edit. 2 vols. 8vo. 21s. 6d.
Knights (The) of the Froren Sea, by author of 'Harry Taunton,' 5s.
Lanckester's The Memoirs of Wykeham, 12mo. 2s. 6d.
Legend of Croqueantime, trans. by Tom Hood, illust. by Doré, 2s. 6d.
Little Ladders to Learning, 750 Illustrations, cr. 8vo. 3s. 6d.
Lytton's Strange Story, Library Edit. 2 vols. 8vo. 21s. 6d.
Morrison's Exposition of 3rd Chap. of Paul's Epistle to Romans, 12s. 6d.
Motherless Lads (The), 12mo. 1s. 6d.
Nimmo's Popular Tales, Vol. 6, 'Tangled Web,' 12mo. 1s. 6d.
No Easy Task, by Mark Francis, 2 vols. post 8vo. 21s. 6d.
Parker's Architectural Antiquities of City of Wells, 8vo. 5s. 6d.
Paul Massie, a Romance, 3 vols. post 8vo. 21s. 6d.
Pratt's Poisonous Plants, coloured plates, royal 8vo. 1s. 6d.
Raleigh's Story of Jonah, 6s. 6d.
Reade's Griffith Gaunt, 3 vols. post 8vo. 31s. 6d.
Rosa Lindesay, by M. H., 12mo. 3s. 6d. gilt.
Rowley, Lecturer of the University Mission to Central Africa, 21s. 6d.
Shakespeare Quotations from, Selected by E. Routledge, 2s. 6d.
Shrimpton's Cholera, its Seat, Treatment, &c., 8vo. 4s. 6d.
Sketches in Town, Country and Home, Poems, by H. D., 2s. 6d.
Sera's Indian Ready Reckoner, 12mo. 2s. 6d.
Star's Commentary on the Gospel of St. Luke, 3 vols. 15s. 6d.
Taylor's Scenes in French Monasteries, illust. post 8vo. 10s. 6d.
Varia, Readings from Rare Books, small post 8vo. 6s. 6d.
Verdell's Enclit, trans. into English Verse by Cunningham, 9s. 6d.
Ward's Outline Facts of Chemistry, 12mo. 2s. 6d.
Watson's M. L. Life and Works of Thomas à Kempis, col. illust. 4to. 21s. 6d.
Wayside Poems, Original Poems of Country Life, illust. 4to. 21s. 6d.
Whitworth's Triffling Co-ordinations, 8vo. 16s. 6d.
Williams's Christianity among New Zealanders, cr. 8vo. 7s. 6d.
Zincke on the Duty of Extemporaneous Preaching, post 8vo. 8s. 6d.

LITERARY ANNOUNCEMENTS.

Mr. Bentley seems to share with Mr. Murray the monopoly of aristocrats and cooks. In the former publisher's list, Earl Russell promises the completion of his 'Life of Fox'; the Dean of Chichester, the fifth and sixth volumes of his 'Archbishops of Canterbury,' and Sir Henry Lytton Bulwer simply "a new work." We had already noted 'Impressions of Spain,' by Lady Herbert of Lea; that lady promises, in addition, 'Three Phases of Christian Love,' which will probably give serious folk something to talk about and think upon. Lady Llanover professes to obtain her 'Good Cookery' from "the recipes of the Hermit of St. Gover," who, it would seem, like St. Francis Borgia, kept a good kitchen. In culinary literature, Lady Llanover will have a rival in Mrs. Toogood, who is set down for a 'Treasury of French Cookery,' perhaps from traditions from Carême! Lady Georgiana Fullerton is to appear with a new novel, called 'Stormy Life,' whether original, or based upon a story by some foreign writer, as her 'Two Strange not to be true' was founded on the life of Zschokke, we are not informed. One of the most attractive titles in Mr. Bentley's list is 'The Life and Correspondence of William Hazlitt,' by his grandson, Mr. Carew Hazlitt, who has a subject out of which to carve a name for ever, if he be at once bold and discreet. The remaining works are 'Charles Townshend, Wit and Statesman,' by Mr. P. Fitzgerald, who may be fairly reminded of the proverb about having too many irons in the fire,—Fox Bourne's 'Lives of English Merchant Princes, from De la Pole to the Present Day,' is a book apropos to which we may remark that our merchant princes date earlier than the days of De la Pole, the Hull merchant, who laid the substructure

of the unhappy ducal house of Suffolk. The 'Curiosities of Clocks and Watches from the Early Times,' by Mr. Wood, should be a work of great interest. Finally, Dr. Mommsen's 'History of Rome to the Fall of the Republic,' will be completed by the publication of the 4th and 5th volumes.

Among Mr. Murray's list of forthcoming works are some of very great importance. 'The Correspondence of King George the Third with Lord North during the American War, 1769-82,' edited by W. Bodham Donne, will interest a wide world of readers. Of somewhat less widely spread interest is 'The Correspondence of the late Earl Grey with William the Fourth, from the beginning of his Administration, 1830, to the Passing of the Reform Act, 1832,' edited by Earl Grey. 'The Conquerors, Warriors, and Statesmen of India,' is the title of a narrative of important events, from the invasion of Mahmoud of Ghizni to that of Nadir Shah, by Sir E. Sullivan, Bart. Dean Stanley's 'Historical Memorials of Westminster Abbey' needs no further description; and the same may be said of the Rev. Dr. Barry's 'Memoir of the late Sir Charles Barry, R.A., Architect.' The other works comprise a new edition of Sir Charles Lyell's 'Principles of Geology,'—Mr. Gladstone's 'Speeches on Parliamentary Reform in 1866,' with a Preface and an Appendix, by the Ex-Chancellor of the Exchequer,—Prof. Fleming's 'Student's Manual of Moral Philosophy,'—'Madagascar Revisited under a new Reign and the Revolution which followed,' by the Rev. W. Ellis,—'Contributions towards the History of Old London: being the Papers read at the Meeting of the Archaeological Institute, July, 1866,'—'A Life of William Wilberforce, condensed from the larger Biography,' by the Bishop of Oxford,—The Rev. B. G. Johns's 'Blind People; their Works and Ways, with Sketches of the Lives of some famous Blind Men,'—an addition to the records of African travel, by Mr. Du Chailu, in his 'Journey to Ashango Land,'—the completion of the Hon. J. L. Motley's 'History of the United Netherlands,'—a work on 'Domesticated Animals and Cultivated Plants,' by Charles Darwin, author of the 'Origin of Species by Variation,'—Vol. III. of the Rev. Canon Robertson's 'History of the Christian Church; from the Concordat of Worms to the Death of Boniface VIII., A.D. 1122-1303,'—Mr. Chorley's 'Studies of Music of many Nations,'—the completion of Prof. Rawlinson's 'History, Geography, and Antiquities of Media and Persia,'—of Sir Edward Cust's 'Civil Wars of France and England,'—and also of Mr. Fergusson's 'History of Architecture in all Countries.' To these works brought to a conclusion must be added Dr. Percy's 'Lead, Silver, Gold, Platinum, Tin, Nickel, Cobalt, Antimony, Bismuth, Arsenic, and other Metals,' forming the Third and Concluding Volume of 'The Metallurgy of Iron and other Metals.' A noteworthy work presents itself in 'English Worthies: a New Biographia Britannica, containing Lives of the Worthies of Great Britain and Ireland,' by various Writers. To the above may be added, Prof. Von Sybel's 'History of the French Revolution,' translated by Walter C. Perry.

Mr. Hardwicke's list includes 'On Diseases of the Stomach,' by Dr. Habershon,—'Osteology for Students,' by Mr. A. T. Norton,—the second portion of 'Trousseau's Clinical Medicine,' by Dr. Bazire,—'On Malignant Cholera,' by Dr. Crisp,—'On Diseases of the Joints,' by Mr. Holmes Coote,—'The Prescriber's and Dispenser's Vade Mecum,' by Mr. A. J. Cooley,—'On Localized Electrification,' from the French of Duchenne, by Mr. J. N. Radcliffe,—'The Remains of the late Hugh Falconer,' edited by Dr. Murchison,—the sixth volume of 'English Botany,' edited by Mr. Syme,—'In the Plain and on the Mountain,' by Charles Boner,—'A Synopsis of Heraldry,' by C. N. Elvin,—'A Guide for Parents in the Choice of Schools and Colleges,' by Herbert Fry,—'The Book of Knots,'—and an illuminated work by the Author of 'The Changed Cross.'

Messrs. Jackson, Walford & Hodder's announcements include 'The Family Pen: Memorials, Literary and Biographical, of Jane Taylor, and other Members of the Ongar Family,' by the late

Isaac Taylor, edited by his Son, the Rev. Isaac Taylor, M.A.,—'Lamps, Pitchers, and Trumpets. Lectures delivered to Students for the Ministry, illustrated by Anecdotes elucidatory of every order of Pulpit Eloquence from the great Preachers of all Ages,' by the Rev. E. Paxton Hood,—'Ecclesiastical History, from the Opening of the Long Parliament to the Death of Oliver Cromwell,' by John Stoughton,—and 'Memorials of the Clayton Family,' by the Rev. T. W. B. Aveling, of Kingsland.

OBITUARY.

THE DEAN OF NORWICH.

"George Pellaw," honourable, reverend, a D.D., and for nearly forty years Dean of Norwich, third son of Admiral Lord Exmouth, who bombarded Algiers exactly half-a-century ago, has died at the age of seventy-three. It is nineteen years since the Dean connected himself with literature beyond that of the Church by writing the life of the first Viscount Sidmouth, the well-meaning but not very distinguished Minister whom Cobbett and the caricaturists used to assail on the ground of his father (Dr. Addington) being a physician! The late Dean of Norwich had married the first Lord Sidmouth's daughter, seven-and-twenty years before he had occasion to write his father-in-law's life. A few months over seven-and-twenty years after that marriage the daughter of the Dean married the eldest son of the second Viscount Sidmouth, the bride and bridegroom being first cousins.

Of the Dean of Norwich's Life of Lord Sidmouth we said, at the time of its publication (*Athen.* No. 1008), what we have no cause to qualify now—namely, that it gave us a higher opinion of the Minister who had the disadvantage of coming after Pitt than we had previously entertained. The Dean had the good sense and unbiassed feeling to see that Lord Sidmouth was not great in comparison with great men, but only first among the secondary class of statesmen. In the first Viscount's eventful time, "and amidst such a constellation of wonderful men as was then above the horizon, the character which may be most safely claimed for his Lordship is that of a faithful, wise, vigilant, and intrepid Minister." The Dean, whose words we have quoted, was not one of those biographers who can see no blemish or any lack of the heroic in his heroes. He allowed that in the Minister whose life he wrote there were no "sudden flashes of genius, by which contemporary applause is chiefly attracted." The Dean was an exceedingly truthful biographer; and his Life of Lord Sidmouth, however forgotten now, will probably be sought for by the curious when curiosity has ceased with respect to his Sermons.

DR. G. H. BARLOW.

This well-appreciated editor (for many years) of 'Guy's Hospital Medical Reports,' and a hard-working and eminent medical man in his busy day, has ceased to exist. A word of record and of regret is due to one who will long be affectionately remembered by the many who respected and the equally great number who profited by his talents.

THE BISHOP OF CALCUTTA.

On Sunday last, five hundred boys, their masters, and the families of the latter, were, at the usual chapel service at Marlborough College, all in deep mourning. Intelligence had previously arrived there of the death of one of the most esteemed and venerated of the old masters of the college, Dr. Cotton, Bishop of Calcutta. Nothing was known save that the Bishop was dead; that he had been drowned in the Ganges when stepping from shipboard into a boat; and that the body had not been recovered. Such knowledge, and of such facts, was sufficient to give additional solemnity to the occasion, and accordingly, we are told, that "the scene, when Heber's funeral hymn was sung, was deeply moving." Dr. Cotton was an old Westminster, a distinguished man at Cambridge, and an Assistant-Master at Rugby, before he went to Marlborough. It is fifty-two years since the Bishopric of Calcutta was founded (1814), in which time eight bishops have died. Six years and a half may thus be said to be the term for each prelate. The first (Middleton) and the eighth (Cotton) held the office eight years each. The terms of the remaining six bishops were

—Heber, 1822-27; James, 1827-9; Turner, 1829-32; Daniel Wilson, 1832-58,—in which last year Dr. Cotton was appointed. Dr. Wilson thus occupied this important post half the time since it was first created to the present moment.

LADY HORNBY.

We regret to have to record the death of Lady Hornby, wife of Sir Edmund G. Hornby, Judge of the Supreme Court of China and Japan. She died on the 30th of September, "at Dieppe, very suddenly," in the prime of life. By many who were in the East during the Crimean War her name will long be held in kindly remembrance, and it may not be altogether unknown to our readers. She was an excellent correspondent, and a number of her letters to Mrs. Austin and other friends were collected in a volume, entitled 'In and about Stamboul,' which was published in 1858, and of which an enlarged edition appeared in 1863, under the title of 'Constantinople during the Crimean War.' It gave a very readable account of the shifting scenes among which she lived, and abounded in picturesque descriptions and amusing anecdotes. But one of its greatest charms was the kindly spirit which pervaded its pages, bearing strong testimony to the sympathetic nature and the sterling benevolence of a writer who evidently possessed also a large share of humour and a keen eye for the ludicrous. She was a woman to make many friends, and very many will now deplore her early death.

UP AT SALT LAKE.

ONLY a few years have elapsed since men read with wonder of the march of the Mormons from flourishing Nauvoo to the desolate Salt Lake. That Hegira, as it has also been called, has been compared with the March of the Israelites, and one seemed almost as marvellous as the other. We may, perhaps, best understand what progress has been made since the weary feet of the survivors among the Latter Day Saints first trod the then arid ground which was to them as a Land of Promise down to the present time, by a glance at a Mormon newspaper. The *Salt Lake Daily Telegraph* (for September 12) is now before us, and in its advertisements, paragraphs, and general intelligence, it shows that the district is in no degree inferior to any locality where riches, civilization, and pleasant battles of life abound. In the advertisements, "Transportation Lines" rival each other in seducing travellers to trust themselves for a journey of a thousand miles or so, each line being superior to its rival, whether the first-class carriages run by rail or road. There is a little oddity in the Messrs. Browns' advertisement that they sell school-books, McGuffey's Readers, novels, history, tobacco, cigars, and Chewing Gum! Bankers, scoring not to be considered tradesmen, proclaim themselves as "dealers in coin and gold-dust." General merchants offer ready-made clothes and crockery. There is mischief in the numerous advertisements from "Attorneys," who are also "Counsellors-at-Law," and who engage to pay "particular attention to the collection of debts." Then, is a civil engineer wanted? One is to be found "five blocks north of the Tabernacle." The Mormon photographers must be in advance of others; at least, photographic artists among the Mormons undertake to "fill promptly all orders by mail." Toys of all kinds are on sale, from France, England, and Germany; and Messrs. Bowen advertise "Dice and Dice-cups," with "English, French, and Domestic china vases." The Southern Mail ends its advertisement with the intimation to another paper that "*Post* will please insert this advertisement for three months and send bill to this office." As in the days of our old theatres, when the announcements were communicated to one privileged paper, and copied (at their peril) by the rest, so here the copying is looked on, not as a favour, but a thing to be prohibited. "Patrons in the East," says the editor, "request us to state that advertisements taken from our columns, and published in other papers without their order, will not be paid for." "Other" papers had probably been trying it on. We learn from another advertisement that the *Montana Radiator* is the Phoenix of all the journals.

you want," &c., "then order the *Radiator*," and so on. Indeed, there is no want that cannot here be supplied, from a princely estate down to the last necessity, which is to be had at Henry Dinwoodey's, the aptly-named man who has "Coffins constantly on hand." Gold seems to abound, yet some advertisers offer to "take produce in exchange." Some things may puzzle ignorant Europeans. What can "thimble-skein Schuttler waggons" be? May they serve to convey parties to the theatre, where Mr. Phelps (not of Drury Lane) was only a month ago playing *Charles the Twelfth* and *Jeremy Diddler*, parts acted by him in California for hundreds of nights? Fancy our old friend asking, "You haven't got such a thing as tenpence about you?" in Great Salt Lake City! Then Mr. Findlay offers "a hundred cords of wood, for lime, greenbacks, or store pay." And we note that coal is four dollars per ton, and that at the *General Grant Saloon* wayfaring men "may have a single meal for one dollar," the price of a quarter of ton of coal. Further, royal and imperial titles are given to the best articles. "Queen's ware" is continually at the top, save in the case of Wests Bradley and Carey's "Empress Trail Crinoline." There are others called the "Pride of the World"; these are "duplex elliptic," double sprung, will neither bend nor break, and are "the standard skirts of the fashionable world." To put them on is to be decked with grace and beauty; not that any one at Salt Lake can be taken as lacking either. A man loses a "horn brand," and he advertises, as a matter of course, that "the handsome finder will be rewarded on leaving it at Barrow's." Again, a mill is advertised, with certain warrant that the miller may be as "jolly" as the one in the song, seeing that "it is safely protected from Indian depredations by a stone-wall fortification." One individual reminds us a little of the proud, decayed Irish lady who was reduced to call "Butter!" in Limerick market, and hoped to Heaven nobody would hear her. Mat White must be a member of her family, for he brings a large assortment of goods to Salt Lake City, not as a common tradesman, but, he being on a visit, "chiefly as a means of leisure employment . . . within the period of a brief tarry among his friends here." Such is the humour of it! and there is not much less in Hannah King's 'Lament to suffering Ireland,' and who quaintly avows, at the wind-up of the advertisements, as an announcement of her own feelings "to," and knowledge of, Ireland,—

I know nought of politics, matters of State,
But I weep o'er the fallen, I weep for thy fate!

Passing to the editorial article, we find the writer rather deploring that visitors to Utah have been mostly of a rough class, fellows who follow miners with gold dust, to gouge fortunes "out of them," fellows who withstand, perhaps because they practise, the "strychnine and cramming operations"; but these gold-dust-laden miners are encouraged by the assurance that "it is proverbial in the city, that if a stranger can escape the 'strychnine clique' for three days after arrival, he is for ever afterwards safe. Generally, the first twenty-four hours are sufficient to prostrate even the very robust." All that the gold-miners have to do is to partake of nothing they are not sure of during their first days of sojourn; though we do not see how that is to help them and their gold-dust, if the strychnine and cramming cliques, as the slang of the place runs, are determined to gouge their fortunes out of them. Saving all drawbacks, the editor speaks well of his fellow-citizens, somewhat after the tolerable and not-to-be-endured style. "Though," he remarks, "we do not say that the people of Utah have no faults; yet we do say that, taking their good faults and their bad faults together, we think they will pass muster with the people of any other territory or state of the Union, or with any other community elsewhere."

In one little "editorial," a mild complaint is made against persons who "are prepared to chew Mormons, and readily digest every dirty piece of falsehood about them." In a second, after announcing that a fellow editor, George West, Esq., is not about to abandon the editorship of the *Rocky Mountain News*, as reported, his colleague of the *Salt Lake Telegraph* exclaims, "That's right!

Keep at it, my boy! misery likes company!" We may add, that all Mormon editors are not of the same friendly disposition, but they may become so; the fact of the editors of the *Deseret News* and the *Daily Telegraph* being seen walking together is alluded to as a sign of the promised millennium! Then we come upon miscellaneous paragraphs, put in where advertisements seem to lack, and a description of a conspiracy to poison Louis Napoleon with Vichy water, and the suicide of the chief conspirator. One symbol of civilization is in the Divorce Court, but the parties are far ahead of European suitors. Here is a case of *Julia v. Arthur Haynes*. It had come on by adjournment from a previous term; but, meanwhile, the impatient Julia had married with another lord. Whereupon the editor justly remarks: "We are no lawyer, but the marriage with Mr. Cooper some months ago and the divorce now seem to make a rather mixed case. No doubt it is all right!"

In the few references made to church matters and parsons, there is still something of interest. Bishops are engaged in caring for the bodies as well as the souls of their people, and the editor praises Bishop Hunter for his "strenuous efforts to have the teams with the flour, salt, and other comforts for the in-coming immigrants started back," to meet and succour the approaching neophytes. Perhaps the strongest symptom of good sense on the part of the editor is his protest against long sermons, in connexion with services beginning at "early candlelight." "We may get a crack for this," writes the good reflecting man, "but we can't help it. We like variety; life and short meetings! . . . We know that the great mass of the people are just like us, and the best and most popular men among us are the short-sermon men—we all like to hear them!" Then, lest this should be taken for the voice of the scorner, the orthodox editor proceeds to say: "This is not '*steadying the ark*,' or '*directing Bishops*,'—it is but the expression of a popular desire." Excellent man! To the expression which here finds tongue, the sermon-oppressed of two hemispheres will say Amen!

THE REINDEER AGE ON THE LAKE OF CONSTANCE.

The Priory, Caerleon, Mon., Oct. 17, 1866.

THIS morning's post has brought me a letter from Dr. Ferdinand Keller, the excellent President of the Antiquarian Association of Zurich, and as it communicates facts of very great interest relating to the pre-historic age of Southern Europe, I venture to send you the following extract. There can be no doubt that it will interest the English antiquaries and geologists quite as much as those of "South Germany and Switzerland."

JOHN EDWD. LEE.

(Extract.)

"I am not aware whether there has been any notice in the English journals of a discovery made the end of last month between Friedrichshafen, on the Lake of Constance, and Ulm. It has created much interest amongst the antiquaries and geologists of South Germany and Switzerland. About half-an-hour's walk from the old Premonstratensian Abbey of Schussenried, in order to obtain a better supply of water, the inhabitants were deepening the spring-head of the brook Schussen. These springs lie in a hollow near the bed of a fish-pond, now dried up. In this excavation a layer of peat was first found, under which there was a bed of crumbly tufa (such as is deposited by streams containing carbonate of lime); then came a bed of loam about three feet thick, which may be considered as a veritable 'relic-bed'; for as the excavation proceeded, the following objects were found:—A number of small flint knives and other implements of silex and drovite, a great quantity of splendid reindeers' horns, many of which had been partially sawn. The smaller branches of these horns had been sawn off and made into awls and pointed instruments of various kinds. Without a single exception, all these horns belonged to the reindeer. All the bones are split like those of the lake-dwellings. Besides the reindeer, there were also found here the remains of the *Gulo borealis*; of bears of large size; of the wolf, the horse and the ox; and

also bones of birds. Masses of reindeer moss were met with, of which I send you a specimen inclosed. Of course there was not a trace of metal. The relic-bed lies immediately on ground like a moraine, in which there are blocks from two to two and a half feet in diameter, marked by glacial action. The nearest place where flint is found is thirty or forty 'Stunden' (nearly 100 miles) distant from Schussenried. Pieces of oak-wood were found in the relic-bed. The portion of this bed excavated is 30 feet long, 20 feet broad, and 3 feet thick."

SUPPLEMENT TO THE BUDGET OF PARADOXES. (No. VIII.)

THE paradox being the proposition of something which runs counter to what would generally be thought likely, may present itself in many ways. There is a *fly-leaf paradox*, which puzzled me for many years, until I found a probable solution. I frequently saw, in the blank leaves of old books, learned books, Bibles of a time when a Bible was very costly, &c., the name of an owner who, by the handwriting and spelling, must have been an illiterate person or a child, followed by the date of the book itself. Accordingly, this uneducated person or young child seemed to be the first owner, which in many cases was not credible. Looking one day at a Barker's Bible of 1599, I saw an inscription, in a child's writing, which certainly belonged to a much later date. It was "Martha Taylor, her book, given me by Granny Scott to keep for her sake." With this the usual verses, followed by 1599, the date of the book. But it so chanced that the blank page opposite the title, on which the above was written, was the verso of the last leaf of a prayer book, which had been bound before the Bible; and on the recto of this leaf was a colophon, with the date 1632. It struck me immediately that uneducated persons and children, having seen dates written under names, and not being quite up in chronology, did frequently finish off with the date of the book, which stared them in the face.

The French are able paradoxers in their spelling of foreign names. The Abbé Sabatier de Castres, in 1772, gives an account of an imaginary dialogue between Swift, Addison, Otway, and Bolingbroke. I had hoped that this was a thing of former days, like the literal roasting of heretics; but the charity which hopeth all things must hope for disappointments. Looking at a recent work on the history of the Popes, I found referred to, in the matter of Urban VIII. and Galileo, references to the works of two Englishmen, the Rev. Win Worewel and the Rev. Raden Powen.

I must not forget the "moderate computation" paradox. This is the way by which large figures are usually obtained. Anything surprisingly great is got by the "lowest computation," anything as surprisingly small by the "utmost computation"; and these are the two great subdivisions of "moderate computation." In this way we learn that 70,000 persons were executed in one reign, and 150,000 persons burned for witchcraft in one century. Sometimes this computation is very close. By a card before me it appears that all the Christians, including those dispersed in heathen countries, those of Great Britain and Ireland excepted, are 198,728,000 people, and pay their clergy 8,852,000*l.* But 6,400,000 people pay the clergy of the Anglo-Irish Establishment 8,896,000*l.*; and 14,600,000 of other denominations pay 1,024,000*l.* When I read moderate computations, I always think of Voltaire and the "*mémoires du fameux évêque de Chiapa, par lesquels il paraît qu'il avoit égorgé, ou brûlé, ou noyé, dix millions d'infidèles en Amérique pour les convertir. Je crus que cet évêque exagérât; mais quand on réduisit ces sacrifices à cinq millions de victimes, cela seroit encore admirable.*"

My budget has been arranged by authors. This is the only plan, for much of the remark is personal: the peculiarities of the paradoxer are a large part of the interest of the paradox. As to subject-matter, there are points which stand strongly out; the quadrature of the circle, for instance. But there are others which cannot be drawn out so as to be conspicuous in a review

of writers: as one instance I may take the *centrifugal force*.

When I was about nine years old I was taken to hear a course of lectures, given by an itinerant lecturer in a country town, to get as much as I could of the second half of a good, sound, philosophical omniscience. The first half (and sometimes more) comes by nature. To this end I smelt chemicals, learned that they were different kinds of *gin*, saw young wags try to kiss the girls under the excuse of what was called *laughing gas*—which I was sure was not to blame for more than five per cent. of the requisite assurance—and so forth. This was all well so far as it went; but there was also the excessive notion of creative power exhibited in the millions of miles of the solar system, of which power I wondered they did not give a still grander idea by expressing the distances in inches. But even this was nothing to the ingenious contrivance of the centrifugal force. "You have heard what I have said of the wonderful centripetal force, by which Divine Wisdom has retained the planets in their orbits round the Sun. But, ladies and gentlemen, it must be clear to you that if there were no other force in action, this centripetal force would draw our earth and the other planets into the Sun, and universal ruin would ensue. To prevent such a catastrophe, the same wisdom has implanted a centrifugal force of the same amount, and directly opposite," &c. I had never heard of Alfonso X. of Castile, but I ventured to think that if Divine Wisdom had just let the planets alone it would have come to the same thing, with equal and opposite troubles saved. The paradoxers deal largely in speculation conducted upon the above explanation. They provide external agents for what they call the centrifugal force. Some make the sun's rays keep the planets off, without a thought about what would become of our poor eyes if the *push* of the light which falls on the earth were a counterpoise to all its gravitation. The true explanation cannot be given here, for want of room.

Sometimes a person who has a point to carry will assert a singular fact or prediction for the sake of his point; and this paradox has almost obtained the sole use of the name. Persons who have reputation to care for should beware how they adopt this plan, which now and then eventuates a spanker, as the American editor said. Lord Byron, in 'English Bards, &c.' (1809) wishing to sneer at Cambridge poetry, wrote as follows:

But where fair Lais rolls her purer wave,
The partial muse delighted loves to lave;
On her green banks a greener wreath is wove,
To crown the bards that haunt her classic grove,
Where Richards wakes a genuine poet's fires,
And modern Britons justly praise their sires.*

* The 'Aboriginal Britons,' an excellent poem, by Richards.

There is some account of the Rev. Geo. Richards, Fellow of Oriel and Vicar of Bampton, (M.A. in 1791) in the 'Living Authors,' by Watkins and Shoberl (1816). In Rivers's 'Living Authors' of 1798, which is best fitted for citation, as being published before Lord Byron wrote, he is spoken of in high terms. The 'Aboriginal Britons' was an Oxford (special) prize poem, of 1791.

As I never heard of Richards as a poet, I conclude that his fame is defunct, except in what may prove to be a very ambiguous kind of immortality, conferred by Lord Byron. The awkwardness of a case which time has broken down is increased by the eulogist himself adding so powerful a name to the list of Cambridge poets, that his college has placed his statue in the library, more conspicuously than that of Newton in the chapel; and this although the greatness of poetic fame had some serious drawbacks in the moral character of some of his writings. And it will be found on inquiry that Byron, to get his instance against Cambridge, had to go back eighteen years, passing over seven intermediate productions, of which he had either never heard, or which he would not cite as waking a genuine poet's fires.

The conclusion seems to be that the 'Aboriginal Britons' is a remarkable youthful production, not equalled by subsequent efforts.

To enhance the position in which the satirist placed himself, two things should be remembered. First, the glowing and justifiable terms in which

Byron had spoken,—a hundred and odd lines before he found it convenient to say no Cambridge poet could compare with Richards,—of a Cambridge poet who died only three years before Byron wrote, and produced greatly-admired works while actually studying in the University. The fame of Kirke White still lives; and future literary critics may perhaps compare his writings and those of Richards, simply by reason of the curious relation in which they are here placed alongside of each other. And it is much to Byron's credit that, in speaking of the deceased Cambridge poet, he forgot his own argument and its exigencies, and proved himself only a paradoxer *pro re nata*.

Secondly, Byron was very unfortunate in another passage of the same poem.—

What varied wonders tempt us as they pass!
The cow-pox, tractors, galvanism, and gas,
In turns appear to make the vulgar stare,
Till the swollen bubble bursts—and all is air!

Three of the bubbles have burst to mighty ends. The metallic tractors are disused; but the force which, if anything, they put in action, is at this day, under the name of mesmerism, used, prohibited, respected, scorned, assailed, defended, asserted, denied, declared utterly obscure, and universally known. It was hard lines to select four candidates for oblivion not one of whom got in. I shall myself, I am assured, be some day cited for laughing at the great discovery of —: the blank is left for my reader to fill up in his own way; but I think I shall not be so unlucky in four different ways.

I do not speak of Byron's absurd mistake about Hallam in the Pindar story: this hardly comes under paradox.

I suspect that Fielding would, if all were known, be ranked among unlucky railers at supposed paradox. In his 'Miscellanies' (1742) he wrote a satire on the Chrysippus or Guinea, an animal which multiplies itself by division, like the polypus. This he supposes to have been drawn up by Petrus Gualterus, meaning the famous usurer, Peter Walter. He calls it a paper "proper to be read before the R-1 Society"; and next year, 1743, a reprint was made to resemble a paper in the *Philosophical Transactions*. So far as I can make out, one object is ridicule of what the zoologists said about the polypus: a reprint in the form of the *Transactions* was certainly satire on the Society, not on Peter Walter and his knack of multiplying guineas.

Old poets have recognized the quadrature of the circle as a well-known difficulty. Dante compares himself, when bewildered, to a geometer who cannot find the principle on which the circle is to be measured.—

Qual è 'l geometra che tutto s' affige
Per misurar lo cerchio, e non ritrova,
Pensando qual principio ond' egli indige.

And Quarles speaks as follows of the *summum bonum*.—

Or is 't a tart idea, to procure
An edge, and keep the practice soul in ure,
Like that dear chymic dust, or puzzling quadrature?

The poetic notion of the quadrature must not be forgotten. Aristophanes, in the *Birds*, introduces a geometer who announces his intention to make a square circle. Pope, in the *Dunciad*, delivers himself as follows, with a Greek pronunciation rather strange in a translator of Homer. Probably Pope recognized, as a general rule, the very common practice of throwing back the accent in defiance of quantity, seen in o'rator, au'ditor, se'nator, ca'tenary, &c.—

Mad Mathesis alone was unconfined,
Too mad for more material chains to bind,—
Now to pure space lifts her ecstatic stare,
Now, running round the circle, finds it square.

The author's note explains that this "regards the wild and fruitless attempts of squaring the circle." The poetic idea seems to be that the geometers try to make a square circle. Disraeli quotes it as "finds its square," but the originals do not support this reading.

A. DE MORGAN.

OUR WEEKLY GOSSIP.

Lord Houghton will deliver an "occasional address," at the inauguration meeting, to be held on Tuesday, the 30th, in the New Buildings of the Cambridge Union Society.

It is said that the new, and we presume revised and expurgated, edition of Mr. Swinburne's poems, with a prose preface, in which he will notice the judgment pronounced by the press on the edition which Messrs. Moxon & Co. withdrew from circulation, will be published by Mr. J. Camden Hotten.

The American novel-writer, Mrs. R. H. Stoddard, is engaged upon a story of New England life, to be called 'Temple House.'

Cheap literature is illustrated in Dicks's 'Shilling Shakspeare,' which includes the Poems. It is said to be printed from new type, but it looks like old stereotype impressions. There is a pound and a half of paper in the book, above one thousand pages, and it is delivered to the trade at 8d. Where profit is to be derived is a mystery. Cassell's 'Penny Readings' may also fairly come under the head of "cheap." The selections are well illustrated, and there is promise in the first number of the making of a goodly volume. But the greatest marvel in cheap literature is the Messrs. Black's 'Waverley,' for sixpence; nay, rival retail dealers are selling it by the score for 4½d. The Messrs. Black are the copyright proprietors, and they will continue this admirably printed series.

Belgravia starts well under Miss Braddon, with a new story, 'Birds of Prey,' from her pen. In her first paragraph, however, there is a slip. Children cannot play at "hop-scotch" on "door steps," in Bloomsbury or elsewhere.

The very extensive and valuable bequest by the late Mr. Henry Christie to the British Museum of all his collections of ethnographical and artistic objects will soon be available. The collections are now in a house in Victoria Street, Westminster, where they will be temporarily arranged and shown to the public. It will be remembered that Mr. Christie bequeathed his extensive collections, together with a sum of money, to trustees, by whom the bulk of the collection has been offered, on certain conditions, to the British Museum, and accepted. The collection is peculiarly rich in early remains from the Drift, antiquities discovered in the caves of the south of France, La Madeleine, Moustier, Pressigny-le-Grand, stone implements and weapons from all parts of the world, Mexican antiquities, and other remains of an ethnological character. Mr. Christie's trustees presented to the British Museum the following treasures of antiquity—A painted vase, of the kind called *Kernos*, from the island of Melos; thirty-two painted fictile vases and two terra-cotta figures from Camirus; four Greek painted vases, two terra-cotta *pyxides*; two objects in bronze; a string of amber beads, and some carvings in the same material; a number of fragments of inlaid glass; seven objects in bone and ivory; eight antique rings; seven engraved stones.

The public has now an opportunity of partaking in a new thing. The daily afternoon services of Westminster Abbey are for the present held in Henry the Seventh's Chapel, the entrance to which is attained through the south ambulatory; hence the *chevet* may be inspected without difficulty. This temporary shifting of the place of worship is due to the works for warming the Abbey. A monument to Lord Clyde, a bust, will shortly be placed over against the demi-figure of Outram, which was recently noticed by us.

The people of Palermo have expressed their desire to place a marble bust of their excellent syndic, Mr. Rudini, in one of the public squares of the Sicilian capital. An excellent, wise, and modest man Mr. Rudini must be; for he has resolutely declined an honour, to attain which, as M. David says, many men would eagerly save their country, or set it on fire, according to circumstances. Mr. Rudini, in a sensible letter, remarks that such honour is due only to heroes and divinities; that he is not a hero, or, if he be thought so now, may cease to be so considered before he dies, and then the statue would seem like an epigram. It is not in designed reference to this exemplary fact, that we notice the statue of Mr. Gladstone, which is in preparation, or that to the late Sir John Franklin, which is in Waterloo Place. The bronze medallions beneath the latter have little

figures in admirable high relief. The heads of these are already being used by the London roughs to pull themselves up by from off the ground. Such is appreciation for Art among those honest men! Older memorials, that have had the good fortune to survive, in more or less poor condition, down to our own times, seem to be perishing. A cry of *Shame!* has been raised at the condition into which Byron's tomb has fallen. Of Bunhill Fields burying-ground we hear, and can back the testimony, that the Campo Santo of the Dissenters, where lie Bunyan, Defoe, Watts, and many other men of note, is abandoned to decay and wild cats. It is a perfect desolation, within the circle of which the tombs are crumbling into ruin. The plain, erect stone marking the whereabouts of the dust of Defoe is nodding to its fall; and even the tomb of Bunyan, which was restored barely five years ago, is described as "shamefully defaced." This work of defacing begins early. A Correspondent of the *Times* states that "where bronzes or metals of any value are introduced into monuments, they invariably disappear in a short time."

The admirable drawings from ancient stained glass made by the late Mr. C. Winston, and not long since exhibited at the South Kensington Museum, were last week deposited in the British Museum Print Room. Mr. Winston did not actually bequeath these works to the Museum; but as his wish on the subject was known to his family, the latter very generously, and by the means of Mr. Petit, have carried those wishes into effect, so that the principal labours of his life are now available to the student.

Molière's *M. Josse* is a native of all countries. He has lately turned up in Wiltshire. A worthy west country incumbent has a church choir made up of quarrymen. This summer he accompanied them in an excursion to Salisbury, and in the course of that well-spent day they were all grouped in front of the glorious Cathedral. They gazed in silence, then spoke in whispers, and, at last, being asked by their friend and rector what they thought of it, the foremost man replied, for himself and fellows, with a heave of the chest: "Sir, we all think there's a mortal deal o' stone there!" It was true, honest, quarrymen's criticism.

The most animated gossip of the week, at least in "spiritual" circles, refers to Mr. Home. An octogenarian lady of spiritualistic tendencies, having been forewarned by her deceased husband of the man and the hour that were to come together for her good, recognized them both in the above demonstrator of spiritualism. The current story adds, that the old lady has transferred much of her large fortune to the gentleman in question, has promised to make over the remainder, and that Mr. Home, becoming the lady's adopted son, will speedily assume the name of Lyon. If Mr. Home had only told us a year or two ago that the spirits had this fortune in store for him, what additional respect would now have waited on the cause of spiritualism!

One of the latest additions to the Museum of the Royal College of Surgeons is a perfect skeleton of the Great Auk,—a supposed extinct bird, of which only three other examples are known to exist in Europe. This skeleton, which has been recovered from the accumulations of many years, as deposited in the cellars of the Museum, is in better condition than the others. Skeletons of the *Awantibo*, a lemuroid animal, and of the *Aye-Aye*, have been added to the collection during the past year.

A Correspondent sends us the following:—

"Oct. 17, 1866.

"The well-known advocacy of the *Athenæum* in favour of the preservation of our archaeological monuments encourages me to lay the following facts before the public through it, in the hope that some action may be taken upon them. During a recent excursion through Wiltshire, I visited what Warton, in his fine sonnet, justly calls,

The noblest monument of Albion's Isle!

A few years only have elapsed since I first saw Stonehenge; but I was greatly struck by the change that has taken place in this ancient monument. It is not time, however, that has wrought this change;

meteorological influences do, as is well known, affect even the hardest stones; but these are wholly insufficient to account for the dilapidations and abrasions on many of the upright stones. Unfortunately, the cause is but too evident. Entirely unprotected, these 'holy stones'—their original British title—are the prey of pilfering tourists, who, having no reverence whatever for this most interesting relic of long past ages, do not scruple to injure them for the sake of carrying off what they should be ashamed to exhibit; and it is additionally unfortunate that these Vandals, though probably contented with appropriating a small fragment of this venerable monument, destroy large portions of it. But Stonehenge suffers from another cause. It is the custom of the numerous drivers of carriages conveying visitors from Salisbury and other places to this monument, to bait their horses while in the shafts, close to the stones, so close, indeed, that the naves of the vehicles frequently come into contact with them, producing considerable abrasion. Bearing in mind the vast size of Stonehenge, we may be told that the injuries described are, after all, so trifling, that many generations will pass away before the dimensions of the stones will be seriously affected by the depredations of tourists or the carelessness of drivers; but, on the principle of the constant drip of water wearing the stone, we cannot remain insensible to the fact that Stonehenge is undergoing injuries which it is our bounden duty to arrest if possible. I have authority for stating, that if Sir Edmund Antrobus, on whose property Stonehenge stands, be unwilling to take the necessary steps to protect this grand monument, the executive of the fine Blackmore Museum at Salisbury will be happy to undertake this trust. No great outlay is necessary. An appropriate iron railing should be erected round the monument, and the latter should be placed under the guardianship of an efficient custodian, who should be superior to parrot-prattling Cicerones. The salary of such an officer might be defrayed by visitors, who would assuredly not object to pay a small admission-fee under these circumstances. I trust that the matter will be taken up by one of our archaeological societies, and that before the ensuing summer arrives this unique monument will be efficiently protected.

"C. R. W."

The South Kensington Museum has acquired a pack of playing cards, woven in silk, and made for the Medici in the seventeenth century by Panichi, whose name is on one. Such cards are not mentioned by any authority on the subject.

There are three public libraries in Caracas. In the first there are about 5,000 volumes, all in confusion. The head librarian has a salary of 120*l.* a year, when he can get it, which he has not done for the last two years. Former unpaid librarians are said to have indemnified themselves by selling the books! We are not surprised, therefore, to find it stated in Trübner's *American Literary Record* that "the best things in the establishment are the nice book-cases of cedar-wood." The second public library consists of 4,000 to 5,000 valuable works, principally on natural history and medical science,—uncatalogued! The third library (of old theological works chiefly) has neither catalogue nor librarian! So that, altogether, Caracas is in a hopeful way.

A report has been presented to the Canadian Government on the copper-mines on the north side of Lake Superior and Lake Huron. It has been found that the copper-bearing series extends over a surface of two thousand square miles, and that nearly an equal area of country possesses copper near Lake Superior. Iron also exists in large quantity to the north-east of Lake Superior.

Gold deposits have been discovered in the territory of Ecuador, which are described as of good quality, and showing no signs of ever having been worked. The President of the Republic proposes to appoint a scientific commission to report on the probable yield of the metalliferous district, which had already attracted immigrants from California. In the valley of the Esmeraldas, in the same territory, another discovery has been made, which some persons will regard as the more interesting of the

two, namely, relics of the antiquity of man. These occur on terraces on the slopes above the river-bed, and consist of fragments of earthen figures, pottery, and gold ornaments, traceable along a line of eighty miles; and, by partial observations, it has been ascertained that similar relics occur, under corresponding conditions, through a distance of nearly three hundred miles.

The '*Annales Muséi Botanici Lugduno-Batavi*,' in which Heer F. A. Guil. Miquel is giving a description of the contents of the Botanical Museum at Leyden, makes satisfactory progress. The third, fourth and fifth fasciculi of Volume II. have just been brought out, with letter-press and plates fully sustaining the character of the work; and the size being folio, the plants are not dwarfed in representation.

MR. MORBY'S COLLECTION OF MODERN HIGH-CLASS PICTURES IS ON VIEW at the Royal Exchange Fine Art Gallery, 54, Cornhill. This collection contains examples of Leslie, R.A.—D. Roberts, R.A.—E. M. Ward, R.A.—Holmes Hunt—J. Phillip, R.A.—T. Faed, R.A.—Eggs, R.A.—Frith, R.A.—Rosa Bonheur—Henriette Browne—Goodall, R.A.—Cooke, R.A.—Creswick, R.A.—Pickersgill, R.A.—Colderson, A.R.A.—Sant, A.R.A.—Le Jeune, A.R.A.—Andell, A.R.A.—Frost, A.R.A.—Pettie, A.R.A.—Yeames, A.R.A.—P. Nasmyth—Linnell, sen.—Dobson, A.R.A.—Cooper, A.R.A.—Gale—Marks—F. Hardy—John Faed—Frère—Ruizpérez—Liddell—George Smith—Duvetier—Peter Graham, &c.—Admission on presentation of address card.

ROYAL POLYTECHNIC.—Professor Pepper will shortly deliver a new Lecture on Professor Tyndall's Researches in Heat, and exhibit some remarkable Experiments, illustrating "Combustion by Invisible Rays," in addition to the present Entertainments. Open from 12 till 5, and 7 till 10.—Admission, 1*s.*

SCIENCE

ICE: DOES IT EXPAND OR CONTRACT BY COLD.

Royal Institution, Oct. 13, 1866.

In the experiment referred to by your distinguished Correspondent, Dr. Rae, water, *not ice*, was inclosed in a cast-iron bottle, and surrounded by a freezing mixture. The bottle was burst by the expansive force exerted by the water in passing to the solid state. Dr. Rae is right in believing that ice, once formed, contracts by cold; it has, indeed, a very high co-efficient of contraction.

To illustrate the changes of form of which ice is capable, I have sometimes squeezed it into iron moulds. These experiments may possibly have been confounded with that in which the iron bottle was risen.

Dr. Rae's observations on the effect of contraction and expansion on a large scale are exceedingly interesting. I fear, however, that those who have made the glaciers of the Alps their study will feel some difficulty in accepting his views regarding glacier motion in Greenland.

JOHN TYNDALL.

A Correspondent (W. G. M.), writing from Leith, says—"If Dr. Rae will turn to the chapter on 'Ice, its Forms and Functions,' in Mr. Page's '*Geology for General Readers*,' he will find that he has been more than anticipated in all he states respecting the contraction of ice by cold."

THE STONE AGE.

Bathaston, near Bath, Oct. 15, 1866.

In some letters which appeared in the *Athenæum* a year ago I described the discovery of certain relics, belonging apparently to the brachycephalic race, on Solsbury Hill, near Bath. Being again in the neighbourhood, I lately revisited the spot, and was rewarded with a find of some interest. It will be recollected that last year, while meeting with bones, teeth, and pottery in abundance, I found but few flints. On the present occasion, however, I examined especially the level summit of the hill—a portion of the ground which I had before left unnoticed,—and found the whole of it thickly strewn with well-shaped flints, of various sizes and utility. The number of these flint implements is remarkable when we recollect that no flint deposits occur anywhere in the vicinity of this primeval settlement. Besides the flints, I also unearthed a few instruments of bone, some pierced towards one end, and all neatly sharpened. I have met with nothing that would induce me to modify the conclusions I had formerly arrived at, with one exception. This relates to the structure of the rampart which encloses the top of the hill. On the north-east of Solsbury rises another emi-

nence, called Bannerdown. This name leads us at once to the British *banagh*, "holy," and would seem to imply that the hill was at one time connected with religious worship. Thinking that an exploration of this spot might yield some results, I have paid it several visits. The surface of the hill has, however, been so much defaced by quarrying, that my success has been but small. In only one place could I detect traces of the Stone Age. Not far from where the Roman fosse-way to Lindum ran, and just facing Solsbury Hill, I discovered the remains of an ancient barrow, the greater part of which has been destroyed by the quarrymen. The barrow was formed of loose stones piled upon the natural soil, a little below the surface of which I exhumed several flint knives, of different sizes, but all far more roughly made than those met with on Solsbury. I also lighted upon the tooth of a horse; but I cannot be sure whether the latter object had not fallen in from above, and belongs, therefore, to a very recent date. My researches in this place have convinced me that what I formerly took to be worked clay in the rampart on Solsbury is nothing more than the natural soil, though lapse of time, aided by the plough, has sunk the surface of the ground within the circumvallation much below its original level. With this exception, as I said before, the conclusions I arrived at last year remain unshaken. I must add that, in one spot on Solsbury Hill, I found, among a heap of charred wood and fragments of pottery, an iron instrument, which had apparently been once exposed to the action of fire. As this, however, was on the slope of the hill, some way below the primitive lines of fortification, where, moreover, I searched in vain for any bones or flint flakes, I have no hesitation in ascribing the metal bar in question to a far later period than that at which the flint-makers of Solsbury lived. P.

SOCIETIES.

MATHEMATICAL.—Oct. 15.—Prof. De Morgan, President, in the chair.—A letter from Sir John Lubbock was read, in which he announced his intention of presenting to this Society a very considerable portion of the mathematical books belonging to his father, the late Sir John Lubbock. It was unanimously resolved that the warmest thanks of the Society be returned to Sir John Lubbock for his very generous and valuable gift. The remainder of the time was entirely taken up with the consideration of alterations in the rules.

MEETING FOR THE ENSUING WEEK.

THURSDAY. Horticultural, 3.—General Meeting, and Lecture.

FINE ARTS

Photographs. (Reigate, F. Frith.)

THESE photographs have been, for the greater part, produced by Mr. Frith. They are thirty in number, and represent many scenes that are high in popular esteem, taken from well-chosen points of view, and, generally speaking, with admirable photographic success. The exceptions are two charmingly clear portraits of the Fall at Aberdulas, South Wales, and the "Valley of the Liedr, North Wales"; these have the name of Mr. Bedford attached to them, and do him great credit. Not less charming are the majority of Mr. Frith's productions, some of which are noteworthy for clearness and softness in excellent combination, as "Fountains Abbey," "The Norman Door, Jedburgh Abbey," "Water-slide, Langdale, Westmoreland," "Rydal Water," "The Prebend's Bridge, Durham," "The Lower Falls of the Reichenbach," "The Glacier des Bois, Mont Blanc," where the glacier itself is remarkable, "The Upper Fall, Coniston," a perfect illustration of rock forms, and "Windsor," which shows the well-known and noble group of trees standing on a spit of low land by the river brink, combining most effectively with the Castle and town on a more distant point. Other examples have some artis-

tic interest, and are commendable, such as the left-hand side of the photograph "Basle, from the Ferry," which represents a capital subject; the view of the remote town seems to have suffered considerably in that clearness and lucidity which are the chief and proper qualities of photography, not to be parted with at any inducement. The idea of really gaining by the practice of touching upon photographs shows utter ignorance of the true value and sole merit of the results of that process, which is not an art, except in the eyes of those who have yet to learn that Art is essentially a mentally achieved triumph, and so entirely independent of chemistry and machines, that even a suspicion of their intrusion is offensive to its lovers. We thus write under the impression that several of the photographs before us have suffered from "touching upon," as it is called, under the delusion that any human hand can improve the beauty and lucidity of such transcripts, or add to them a quality of Art proper. No brushes, however dextrously employed, nor pigments, however delicately wrought, can do otherwise than mar the right value of a photograph, by depriving it of that which is essentially its own.

In "Rydal Water" we have a virgin photograph. On the other hand, the thoroughly sophisticated example from the entrance to "Bonchurch, Isle of Wight," has been worked upon so entirely as to possess no more brightness than a drop-scene. It is inconceivable that the light of day alone could have left so dingy and unbroken a blot on the paper as the arm of the tree which crosses the front of this work, or rendered to the negative photograph anything so flat and dull in tone as the range of "back scene" cottages which recede by the roadside before us, and are matched by trees which have no more wealth of light and shade than diagrams possess. It is wonderful how far the blindness of the public to beauty will allow them to become possessors of "touched" photographs. It renders them unobservant of the tricks of operators who pander to vulgar notions. The lucidity of the "Upper Fall at Coniston" compares most advantageously with the opacity of the "Bonchurch"; the state of the latter is due, we believe, not so much to the ignorance of Mr. Frith of what constitutes the true value of that photography in which he excels so remarkably, as to an unfortunate want of self-reliance. "Bonchurch" is not the sole example of this practice in the photographs before us; the contrary and evil result of meddling may be observed in the dull, lifeless, lightless effect of "Varenna, Lago Como,"—in the lake, sky and distance; the "Station, Interlaken," "Bellaggio," Lago Como in the distance, and with others the "View from the Churchyard, Thun." The contrast between the sophisticated works and those which have not suffered, is as great as that produced by the juxtaposition of the grave, well-wrought, although archaic sculptures at the "Entrance to the Church at Chur," here illustrated, with the commonplace Renaissance piers that accompany them, and are as deficient in significance as they are in invention or originality.

How any one can prefer, even in the most thoughtless mood, such a lifeless thing as "Bonchurch"—which we take as an example of "touched" photography, although exhibiting a delightful view—to the pure brilliancy, minuteness, yet perfect breadth, of "The Water-slide, Langdale"—which is as fresh as day and summer can make it—we do not know. After being touched upon, a photograph is to us devoid of expression, i.e. stupid, so to say; not merely a falsehood, but unbeau-

tiful; yet lack of beauty is not, to our limited senses at least, an invariable accompaniment to lack of truth. It is the want of expression so observable in all these "touched" transcripts, that makes us wonder at their bare reception by many; still greater is this wonder at the delight some persons appear to receive from the sight of such things.

FINE-ART GOSSIP.

THE following, which refers to the forthcoming election of Associates to the Society of Painters in Water Colours, will be interesting to many of our readers. The election takes place annually, that is, on the second Monday in February of each year. It is by ballot. Every candidate must be proposed by a member of the Society. Professional artists alone are eligible as candidates; each candidate is required to submit to the Society not less than three finished drawings, as specimens of his ability; all specimens must be the work of the candidate; any deception in this respect will subject the offender to rejection or expulsion. Specimens must be framed without margins; they must be delivered carriage-free to such place as the Secretary may direct by the first Monday in February, that is, one clear week previous to the day of election; the drawings must be accompanied by a letter from the candidate; no specimens will be received after the day named. Candidates are requested to write to the Secretary a few days previous to the first Monday in February for instructions as to where their specimens are to be sent. Mr. W. Callow is now the Secretary of this Society. As these elections are only, if at all, second in importance to those of the Royal Academy, we may point out to those whom it may concern that the time for sending pictures to the General Exhibition of Water-Colour Drawings is very inconveniently appointed with regard to that for the elections to the Society of Painters in Water Colours. Nearly all the best men in this branch of Art aim at membership with the Society, and are certain to send their best works as specimens; hence, if the present appointment of the Exhibition stands, the public will lose the sight of some of the finest of this year's productions by the younger water-colour painters.

"An Englishman" suggests as an improvement on the original design for the Nelson column, that "it would be better to have Nelson before our eyes, so that we can see him. Thanks to Mr. Baily, the statue is a good likeness. Let him stand in front of his monument; put Victory on the summit—a winged Victory—gilt; and let the grandest bronze colossal lions ever executed remain as intended. We shall then have a memorial worthy of our greatest hero, and one that will do honour to England."

A Correspondent desires to draw attention to a misdescription of Fig. 101, "Tripod and Flower Vase from the Mayer Collection," in the Life of Josiah Wedgwood, by Miss Meteyard:—"The specimen," he says, "here drawn seems to be an imperfect one, the cover being wanting. The lid of this vase was a work of double ornamentation, having on one side the sconce for a candle; and when this was not required, the lid was reversed, and a flower-ornament took its place. It was, in fact, a candelabrum, and this form has, I think, been repeated in modern ware by the present firm. Of them it is surely to be regretted that they should be producing quantities of *repliche* of the original works of Wedgwood without distinguishing the new from the old by any alteration of the stamp. If this were changed to Wedgwood & Co., much loss would be saved to the public, it being patent to collectors that the market is inundated with this spurious ware. The manufacture is so good that, after a boiling in a mud bath, and probably some other slight manipulation, it is capable of passing current as the original production of the great potter. A great deal might be written on the subject of sham objects of virtue, and never was exposure of the system more earnestly demanded. Trusting that some one more equal to the task may start up, I remain, &c.,

"T. C. G."

It is gratifying to all lovers of Art and Italy, that one of the conditions of the treaty of peace between the Peninsula and Austria determines that all objects of Art, as well as the archives belonging to Venetia, shall be restored without exception. The Iron Crown of Lombardy, which had been removed from the Duomo at Monza, is given up. It will be remembered that this treasure was taken to Mantua in 1859, and has since been found at Vienna. It is not true that the circlet was regularly used for crowning the kings of Italy; no trace of such a service can with certainty be indicated before Henry of Luxembourg assumed it in 1311; even then it was used at Milan. Charles the Fifth was crowned with it. Napoleon put it on his own head with one of those insolent speeches which are supposed, on the stage, proper to monarchs when about to commence business. Other treasures have from time to time been taken from the Sacristy of the Duomo of Monza; some of these must be in Austria; for these, we trust, sharp inquiry will be made, or courteous restitution offered. France contains many treasures of Art that belong by right to Italy.

MUSIC AND THE DRAMA

NEW PUBLICATIONS.

A considerable time, it appears, must elapse before our musical aspirants are disabused of the idea that, "after all," it is no such very great feat to write an Oratorio. Undeterred by the notorious difficulty and expense attending the choice of a subject, the production and publication of a work so long and complicated, and the small number of performances which can be expected, save under circumstances of exceptional success, and flushed with the consciousness of possessing vigorous invention, here required to prove its vigour within certain determined limits, and scientific, which means also sustaining, power,—they throw themselves into the adventure with a thoughtless rashness greatly to be wondered at, and which would claim pity did it not imply a strange amount of self-confidence. We are sorry to see another mistake added to the list in *The Patriarchs: an Oratorio*,—the words selected chiefly from the Old Testament; the music composed by Henry Hiles (Novello & Co.).—The work is on the amplest scale. It is divided into three parts, consists of thirty-seven numbers, and contains ten characters. The subject is the history of Jacob and Joseph; the selector of the words having not so much chosen as altered his text from the Old Testament, and indulged in interpolations of weak quality and small value. The music, though full of ambition, has more pretence than success. Mr. Hiles has been seduced to imitate the drought-prelude in 'Elijah' by placing his overture after a "vision," for no reason in the world that we can discover, save a resolution to imitate that which can only be done once with impunity. Happy as was the stroke of genius in the case of Mendelssohn's Oratorio, and there justifiable as a piece of descriptive music, when it is taken as a pattern the result can be no better than the Chinese dinner-service, founded on a plate with an accidental crack, which flaw was diligently reproduced in every piece of earthenware sent to our barbarous land at great cost. We fail to find much point or beauty in the setting of the words. Mr. Hiles is too disdainful of accent—a fault in which, unhappily, he does not stand alone among his countrymen. It is humiliating to have to confess that no European language is so disrespectfully treated in music as ours; but such is the sad truth, and it may be one of the causes why English singers are so largely deficient in declamatory power. We wish that a better account could have been given of a work which must have cost its author much labour.

Mass in D, for Chorus, Orchestra, and Organ. Piano Score. By John K. Paine. Op. 10. (New York, Beer & Schirmer.)—We cannot but compliment the publishers of this Mass for their clear and excellent typography, which is "up to the mark" (and this is saying much) of the best Leipzig publications. How far the music merits such a distinction is another question. The number of

good and individual Masses is not small, and far too many are almost unknown to our public. We should not have again and again to ask for a hearing of Cherubini's noble services; the public should not be allowed to remain in ignorance of a work so magnificent in its genius and beauty as Schubert's Mass; we should not have to go to Manchester in search of M. Gounod's 'Messe Solennelle.' Half-a-score of other works, ancient and modern, could be named, the performance of any one of which would make a mark on any season. Mr. Paine's Mass, however, cannot be added to the list. Though he has, obviously, aspirations, he does not exhibit ideas. We cannot better describe his Mass than as a scramble after originality, which never comes within sight of the goal. There are too many misuses of rhythm, there is too perpetual a strain for effect in the "free" portions of the work. The "strict" ones are stiff rather than scientific. Mr. Paine has to make a reputation if this, his tenth published *opus*, is to be accepted as a specimen of what he can accomplish.

DRURY LANE.—On Saturday, Mr. H. Talbot, a performer new to the London boards, but whose pseudonym was well known and respected, appeared in the character of *Macbeth*. Mr. Talbot was honoured by a warm reception from a house overflowing with an expectant audience, curious to ascertain the merit of another and a well-reputed candidate for public favour. This actor's personal appearance is well fitted for the illustration of heroic character, and his general manner implied careful training in the more working points of the histrionic art. Mr. Talbot is the son of an eminent elocutionist, who was once a member of the York Theatre, but who is now, not under a stage name, pursuing his vocation in the North. In Scotland, the new actor had careful training at his father's hands, and is well remembered by his fellow collegians, among whom he distinguished himself by his industry and success. There was an echo, perhaps, of Scotland's accent on the tongue; but such echoes are not unmusical. They are not like Sydney Morgan's father's honeyed brogue in *Tamerlane*. Mr. Talbot is not only an actor, but a gentleman. In the reading of the text he is generally accurate, and free from innovating affectations. In the early scenes he reserved his physical powers; and perhaps the soliloquies, on which the first two acts so much depend, had scarcely sufficient justice done to them. But in the more emotional passages, Mr. Talbot manifested a warmth and vigour which promised well for the last three acts of the play. In the very important scene with his wife, just previous to the banquet, and in the banquet-scene itself, we noticed an animation in the style of the acting that contrasted strongly with the subdued manner adopted in the previous scenes. The last act was full of life, intention, and impulse, and contained in itself sufficient justification for Mr. Talbot's selection of the part as a medium of appeal to the public judgment. We therefore recognize in him a good and competent actor, who, when he has had some requisite practice on metropolitan boards, will take his place in the front ranks of his profession. Mr. Sinclair sustained the part of *Macduff* with judgment. Miss Sedgwick has improved in her delineation of *Lady Macbeth*; and, indeed, the entire performance inspired in the spectator a sense of completeness and finish, such as might be reasonably expected on the boards of the national theatre.

ADELPHI.—A new domestic drama, in four acts, under the title of 'Ethel; or, Only a Life,' was produced on Saturday. It has been adapted, from French sources, by Mr. B. Webster, jun., and the trail of the serpent runs through it all. There is, however, something similar to it in one of Miss Landon's poems, and the *dénouement* also resembles that of Ford's celebrated tragedy of 'The Broken Heart.' There the heroine dances while her heart is breaking, and she finally dies in the midst of the group. Here a poor girl, reduced almost to destitution, is employed as a pianist at a gay party, where she meets with two lovers who have recently married, to one of whom she is deeply attached, the

other having villanously wronged her. Under the conflict of feelings caused by this situation, Ethel attempts to perform her duty, and continues playing while the company disport themselves in the quadrille or waltz, until at length she bows her head on the keys of the instrument, and dies. The incidents of the romance—for such it is, merely divided into act and scene—are so disposed as to lead up to this pathetic catastrophe, and are subordinated to it. There is a great variety of characters in the piece. Among these is the part of *Abigail Hawcroft*, by Miss Woolgar. We spare our readers a detail of the plot; only remarking that Mr. B. Webster, with all his ability, has not wrung all the unwholesome French element out of it. Miss Terry's performance was marked by that exquisite reticence which distinguishes her style, and that true emotion which, without being obtrusive, at once compels the sympathy of the audience. But the part, we should say, is hardly worthy of her, did we not remember what Colley Cibber says, that no part is unworthy the being acted by a genius. Miss Terry seems to be of the same opinion; for what would be utterly ineffective and wearisome in the keeping of an ordinary actress, she renders effective and interesting by the natural interpretation of the character. Wherever Miss Terry is seen, grace, power, and exquisite judgment, the impulses of a true woman, the control over them of a true artist, accompany her. They are in her air, her voice, her movement,—in her silence, too, and in her repose. *Ethel* is infinitely below the height and standard of her genius; but, such as it is, the eye greets her coming, and follows her with pleasure. The ear lends itself eagerly to her utterances, no syllable of which is ever lost, so faultless is her elocution; and the heart is altogether subdued to the quality of that she represents; its pulses beat, and its sympathies are stirred as she would have them, and charmed audiences yield themselves to the irresistible power which belongs only to genius. With all due praise to her gifted comrades, it must be confessed that *Ethel* saved the piece from failing. With a part more worthy of the intellect she can expend on it, there will come a greater and abiding triumph.

PRINCE OF WALES'S.—Here we have another burlesque on 'Der Freischütz,' by Mr. H. J. Byron. Miss Lydia Thompson, Miss Louisa Moore, Mr. J. Clarke, and Mr. F. Younge contribute to the success of the piece, which is neatly written and cleverly arranged, and is illustrated by effective scenery by Mr. C. S. James.

SADLER'S WELLS.—Miss Marriott being unable through indisposition to act *Eradne* on Saturday, Miss Edith Heraud performed the character of *Pauline*, in 'The Lady of Lyons,' which was substituted for Mr. Sheil's tragedy. Lord Lytton's play was adequately sustained. Miss Heraud, in her part, was so successful that she earned four recalls during the evening. She also played *Juliana* in 'The Honeymoon,' on Tuesday.

MUSICAL AND DRAMATIC GOSSIP.

THIS week precedence shall be given to Correspondents.

It is pleasant, from time to time, to those who are apt to be accused of severity and eccentricity because they have the pernicious habit of thinking for themselves, to receive unsolicited confirmation of their judgments. Such a one has turned up in the letter of gossip on German matters in general, and those of the season at Baden-Baden, just over, in particular. Speaking of the operas given there the writer says,—"Mdlle. Lucca almost made a *fiasco* as M. Gounod's *Margaret*. Her audience found her the very personification of a *griette*; eyes magnificent voice worn out, and at times much out of tune; no conception,—nothing beyond grace of person and coarse impulse. The night after that performance Mdlle. Vitali, a neat, pleasing singer, was overwhelmed with bouquets, applause, and verses, in the presence of Mdlle. Lucca." This is tantamount in spirit to our own remarks sent home from Berlin before there was a dream of bringing the little lad to England, or of here setting her on a throne which real queens of song have occupied—remarks cor-

firmed since her arrival in London, on the occasion of every attempt made by herself or friends to justify her right to a pedestal for which her stature is too low. A decided touch of that vulgarity which, under so many imaginable masks, faces and forms, is, at the time being, so noxiously soaking away the foundations of Music and Drama, has never been more clearly discernible than in Mdle. Lucca's two *Zerlinas* ('Don Giovanni' and 'Fra Diavolo'), and (yet more emphatically) in her rollicking *Cherubino* ('Le Nozze'). The vulgarity might have—but has not—been redeemed by musical or dramatic progress. Her art on the stage (or rather call it artifice belonging to the days we live in) is not the art of the stage.

A Correspondent who has addressed to the *Athenæum* a protest against a musical review which appeared in this journal some time ago, may believe in our experience that he is best served by the non-publication of his letter. The opinion complained of was not put forth at random, still less, it may be added, as a reply to the more than usually important efforts made to place the matter in question before critical notice, as something meriting more than ordinary attention. When will it come to be understood that, with the honest, no such devices are needed—that, with the dishonest, they are of no avail?

We have the following direct from Milan:—"The autumn season at La Scala commenced on the 29th of September with Maestro Strigelli's new opera, 'I Figli di Borgia.' This being his first attempt at stage composition, it is unfortunate that he should have chosen a bad libretto. Then the artists engaged at its representation left much to be desired. Signor Fancelli sang the tenor part without success; his voice being too small for La Scala. La Signora Bianchi, the *prima donna*, has a fine voice, but sang out of tune, style, or judgment. Signor Strigelli was, nevertheless, obliged to appear on the stage seven or eight times during the evening. The opera is no success.—On the same evening was produced a new ballet, entitled 'Un Capriccio' (taken from 'Marta') [taken originally from 'Lady Henriette,' a French ballet.—*Ed.*], which made an immense *fasco*. On Saturday, the 6th of October, was produced Signor Petrella's 'L'Assedio di Leida,' sung by another troupe of artists, but without any marked success. The members of the band and chorus acquitted themselves well, the celebrated Ratanplan Chorus being encored. 'L'Africana' is to go on the stage next week; afterwards, we are promised Donizetti's 'Maria Padilla.' A new ballet, with the title 'Devatacy,' is also in rehearsal."

We read in *Il Trovatore* of a coming opera, 'Alda,' by the Triestine Maestro Ventura.—The Signor 'Harvin' speculated on last week, it occurs to us, may have been the tenor who tried his fortune here, and not over-auspiciously, as Signor Arvini. When will people cease to call themselves names!—Here is something odd, the solution of which we leave to those better versed than ourselves in the small witticisms and practical jokes of Italy: "The violinist, Fabio Favillo," says *Il Trovatore*, "famous for feigning ignorance (*per fare il gnorri*)," has composed a piece for sixteen bells in a flat, on the words 'Sto come torre ferma che non crolla,' &c. The music is most beautiful."

Let those who disbelieve in Gluck take the sad tale how they please, the fact remains, that 'Alceste' (that least interesting of his operas in point of story), which was revived at the Grand Opéra, for Madame Viardot, in 1861, was again produced there the other night, with a heroine of the most different conceivable quality possible, Mdle. Battu. How long will it be before the world will see two such revivals of the Greek opera, 'Idomeneo,' of Mozart, that musical hero who, as the cant of puny prejudice runs, extinguished his pigmy predecessor? Of course the newest *Alceste* is totally unable to touch the antique tragic grandeur so magnificently yet so simply put forth by her last French predecessor in the part. Mdle. Battu has no command over such powers, let her training in posture have been ever so sedulous; her voice, too, is small, with no sweetness to compensate for its want of volume. Neither has she the accent by which Genius gives a power to penetrate and touch, irrespective of force, such as distinguishes the art and nature of Madame

Miolan-Carvalho; but she can execute the music without transposition, and, so far as can be gathered from report, has been thoroughly prepared for her duty. M. Villaret is the *Admetus*. The opera has been produced under the superintendence of M. Berlioz, who has used discretionary power in suppressing the part of *Hercules*, because it was an interpolation made by M. Gossec, in Gluck's absence from Paris. But seeing that Gluck sanctioned such interpolation, as he did of Bertoni's *bravura*, written to close the first act of 'Orfeo,' and seeing that a man has a right to do what he pleases with "his own," it may be asked how far such discretion is in accordance with Gluck's intentions,—how far it may be a piece of prudery, mistaking itself for reverence, akin to that which so eagerly defended the notorious misprint in the odd excrement of two bars in the *scherzo* of Beethoven's c Minor Symphony.

Here is a bit of last week's news from Tenterden Street. The competition for the new Free Scholarships, recently established by the Directors of the Royal Academy of Music, took place on Saturday last. The examiners being the Principal, the Vice-Principal, and three Professors not connected with the Academy. The successful candidates were, for the female department, Miss Linda Scates and Miss Louisa E. Vokins; and for the male department, Mr. Stephen Kemp and Mr. Alfred Kelleher. These scholarships are held for three years. Four are to be filled up every year until the proposed twelve scholarships are completed, and it is hoped that this number will be increased hereafter.

The London rehearsal of the new music to be given at the Norwich Festival will be held, we believe, on Wednesday next.

The rehearsals of Mr. Martin's *National Choral Society* have commenced, at Exeter Hall.—The *Sacred Harmonic Society* should shortly be opening its session; but this may have been delayed by repairs in that least convenient of buildings. It is a pity that these have not included, as yet, the means of entrance and exit.

In addition to the promises made by Mr. A. Chappell for the *Popular Concerts*, it should be mentioned that Madame Schumann is announced to play there early in the new year.

The *Orchestra* informs us that the organ in Christ Church, Newgate Street, many years ago planned by Dr. Gauntlett to be the grandest instrument in London, is, after a long delay, at last about to be completed.

Mr. Mellon has given a Rossini night. His selection was largely based on the splendid opera 'Mosè nel Egitto.' How is it that our contemporaries advert to this work as all but unknown in England, forgetting the magnificent revival, with Signor Rossini's additions for the French 'Moïse,' a few years ago offered at our Royal Italian Opera? The remembrance of the execution of the third *finale*, with its deliriously exciting *stretto*, is a thing to stir the blood and quicken the pulse of every one who was present. No stronger, more poignant, musical impression is on our record. Mdle. Georgi sang for Mr. Mellon at his Rossini concert. He has this week given another in honour of Mendelssohn.

While talking of this greatest of modern Germans, it would be hard to talk too loudly of the execution of his Italian Symphony, this day week, at the *Crystal Palace Concert*. This lovely work (some prolixity in the opening *allegro* allowed for) can never have gone better, with every meaning and delicacy of its master wrought out to a *point-dérive* interpretation, without super-exquisite, than this day week. More heartily it could not have been relished. Herr Wilhelmj, who has a great future before him, gave a performance, splendid in point of technicality, of the first *allegro* of Paganini's first violin *Concerto*. Were all the traditions observed? or does memory deceive us in suggesting that certain mordant *pizzicati* in the passages of parade (very possibly not marked in the score by the Genoese giant) were forgotten—perhaps unknown? Herr Wilhelmj's tone is sound, true, and beautiful; his tune unimpeachable, and in such *double-stop* passages as these he has not merely to deliver, but to play with in the said *Concerto*, this

praise of itself establishes him as a *solo* executant of the first order. It remains to be seen how far he is able to vindicate, or else to acquire, a place in classical music. Meanwhile, there has been no such violin appearance since that of Herr Joachim. Some of the re-arranged *ballet* music from M. Gounod's 'Nonne Sanglante' was not so effective as we fancied it might prove. The Waltz was outdone in spontaneity and simplicity by his after waltz in 'Faust'; and 'The Bohemian Dance'—so admirable as (we happen to know) to extract a most lively expression of praise and pleasure from Meyerbeer, one not given to praising (especially in the matter of opera music)—was not performed. To-day, some of the music of M. Gounod's 'Colombe' will be given,—and an overture by the composer, who, we deliberately maintain, now stands next in his chances of European success to M. Gounod, Mr. Sullivan's prelude to 'The Sapphire Necklace.' This day week, Madame Lemmens-Sherrington was principal singer at the Sydenham concert.

Mdlle. Orgen has made her appearance at Vienna. We are interested in the career of this young lady, because we believe that nothing can intercept it, save delicacy of health.

The Opera season at Lisbon has been opened with 'Macbeth.'

Herr Abert's 'Astorga' is to be given immediately at Leipzig.

The 'Faust' Symphony, by M. Berlioz, containing some of his best and of his worst music, is on the list of the music to be performed during the winter season at the Philharmonic Concerts of Vienna.

Signor Naudin has left the Grand Opéra, after having sung there, in Meyerbeer's 'L'Africaine,' some hundred and fifty times.

Mr. R. Reece, author of 'The Lady of the Lake,' and other burlesques, which have been produced at the New Royalty Theatre, is engaged on a comedy, to be shortly brought out at the same house.

MISCELLANEA

The Electric Telegraph.—In the *Athenæum* (No. 2033) mention is made of Prof. Wheatstone's services in connexion with the Electric Telegraph; but it should not be forgotten that Mr. William Fettergill Cooke was the inventor of the Telegraph. I do not desire to detract a simple iota from the merits of the Professor; but "honour to whom honour is due." In the award of Sir M. I. Brunel and Prof. Daniel it is said, "Whilst Mr. Cooke is entitled to stand alone as the gentleman to whom this country is indebted for having practically introduced and carried out the Electric Telegraph, as a useful undertaking, promising to be a work of national importance,—and Prof. Wheatstone is acknowledged as the scientific man whose profound and successful researches had already prepared the public to receive it as a project capable of practical application,—it is to the united labours of two gentlemen so well qualified for mutual assistance that we must attribute the rapid progress which this important invention has made during the five years since they have been associated."

W. E. R.

"Uncut" Books.—In last Saturday's *Athenæum* there is a notice of the Sale Catalogue of Southey's Books. The writer infers, from some of them being described as "uncut," that they were unread. But in a Book Catalogue, written by booksellers or auctioneers who know the use of trade terms, "uncut" simply means that the top, bottom, and fore-edge have not been pruned by the binder's knife, which so often despoils a fine book of its fair and ample marginal proportions. The book may or may not have been cut open for reading; it is still "uncut" in the proper trade sense.

HENRY YOUNG.

Geikie on Kames.—I yield. I most humbly implore Mr. Geikie's pardon for having mistaken his volcanic pool. In his book, page 311, he tells us that "the ridges of sand and gravel" which contain the volcanic pool run "behind the village of

Carstairs"; and I, stupidly, could never determine which the *behind* of the village was, and cannot to this day. Then these ridges "run one after another" towards Carnworth Moor, where the Red Loch is. From his *letter* the pool appears to be in the direction opposite to Carnworth Moor; and the pool between the farm on the Ravenstruther road and the Mouse Water must be that which "at once suggests the crater of a volcano." Now, the bed of this volcanic pool is formed of the most perfectly *water-worn* pebbles, and its sides of drifted sand, boulders and pebbles. Strange materials for the construction of a volcanic crater! Besides, *I think* that I recollect that the side of the "cup" next the road was open. With regard to the junction of the Clyde and Tweed, I again humbly entreat Mr. Geikie's pardon for having written "*the head of the Tweed*." I ought to have written, "Art has cut a drain (in most parts, perhaps, six or seven feet deep) continuously over the water-parting from the *side* of the Clyde to a *head* of the Tweed"—that is, to the head of the Biggar water. This is all that Art has done there; and this would *facilitate* the junction of the two rivers. If Art has done anything to *prevent* the junction, perhaps Mr. Geikie will tell us where. With regard to the head of the Tweed, as the indigenes of the Biggar valley say,

Tweed, Annan and Clyde
Rise out of one hill-side;

and we all know where that "one hill-side" is. A great authority tells us that we must not talk of the head of a river. But, if so, we must not talk of the comparative lengths of the rivers of the earth; for what is the length of a river but the length of its stream from the head to the sea? Such questions have been agitated from the time of the earliest writers to this day. Solomon and Homer both make the sea to be the head as well as the mouth of every river. Solomon, Ecclesiastes i., says, "All the rivers run into the sea. Yet the sea is not full (in the Vulgate, *non redundat*). Unto the place from whence the rivers come, thither they return again." Homer's words are—

Βαθυρρεῖται μέγα σθένος Ωκεανός,
Εξ οὐπερ πάντες ποταμοὶ καὶ πᾶσα θάλασσα,
καὶ πᾶσαι κρήναι καὶ φρεῖατα μακρὰ ναοῦσιν.

That the wisest of men saw that the sea would be "full" if it constantly received the waters of the rivers and never gave any off, is, I think, clear from his words; and if I could, I would fain have enlisted both Solomon and Homer on my side long ago. But I cannot agree with Mr. Geikie when he quotes these lines of Homer, page 14, and actually points to their "scientific truth" as if Homer alluded to *evaporation* by *ναοῦσιν*. Herodotus certainly differs from our great modern geologist as to the Homeric doctrine. In "Euterpe," 21, (Beloe), he ridicules the idea "that the Nile has these qualities as *flowing* (*ρεῖν*) from the ocean." And again, 23, "The argument which attributes to the ocean these phenomena of the Nile seems rather to partake of fable than of truth or sense; for my own part, I know no river of the name of Oceanus, and I am inclined to believe that Homer or some other poet of former times first invented and afterwards introduced it in his compositions." The eternal circle of causes, evaporation from the sea, condensation, the run of rain and rivers formed by rain into the sea, together with atmospheric disintegration, are eternally washing the land into the sea; and in doing so they shape the surface of the land and stratify the bed of the sea. This is the cuckoo-note which I have sung since 1853: in 1865 Mr. Geikie, while he sings the same note, alters the title from rain and rivers to *rains and streams*. That I have done my best to "advertise" these doctrines in such letters as this "is most true"—true I have reiterated them in your columns. Mr. Geikie seems to think this a reproach: I think it the greatest honour to me. Were I to attempt to express my gratitude to you, you would repudiate my thanks as personalities; since I am certain that you have never published these doctrines except in the cause of science.

GEORGE GREENWOOD, Colonel.
Brookwood Park, Alford, Oct. 18, 1866.

To CORRESPONDENTS.—T. N.

MILTON HOUSE, LUDGATE-HILL, Oct. 18, 1866.
**SAMPSON LOW & CO.'S
NEW BOOKS.**

The JOURNAL of a WAITING GENTLE WOMAN. Post 8vo. price 8s. (Now ready.)

"We have never read a more tender tale of woman's love, told by a woman, than the autobiography, laid before us. The characters are all true to the life, and all well drawn, without exaggeration or affectation."—*London Review*. "This is a quiet, simple story, of which the idea is well conceived, and which is told with a great deal of sprightliness, piquancy, and tender grace. The story of true love which runs through the Journal is charmingly simple and natural. Love so fervent and yet so pure, so free and yet so modest, so jealous and yet so self-denying, let us hope, still abides amongst us."—*Illustrated London News*.

London: SAMPSON LOW, SON & MARSTON.

NEW BOOKS,

TO BE PUBLISHED IN

October, November, and December.

Choice Christmas Book.

In Imperial 4to. price 51s.

TOUCHES OF NATURE.

elegant cloth, price 21s.

E L A I N E.

By ALFRED TENNYSON.

ILLUSTRATED by GUSTAVE DORÉ,

With Nine exquisite full-page Drawings,

Engraved on Steel in the first style of art by BAKER, HOLL, JENKS, &c.

The designs of this Artist have never been engraved on steel, and consequently have never been interpreted in their
fullest sense. M. Doré has made these Drawings with special reference to this mode of Engraving, and it was at his
special request that the Publishers determined to incur the great outlay necessary to produce this book. It is also the
first time that M. Doré has illustrated the works of a contemporary author, and, to use his own words, he desires the
work "To be a monument to Mr. Tennyson and to his own powers. Mon frère a fait cette fois ci le grand succès qui
fera descendre son nom à la postérité."—ERNEST DORÉ.

London: EDWARD MOXON & Co. Dover-street, W.

TWO COLLECTORS OF GOSSIP—CAPTAIN GRONOW AND LORD WILLIAM LENNOX.
THE BELGRAVIAN, No. 1.—LOVE DREAMS.
&c. &c. &c.

ANNOUNCEMENT.

The coming Numbers of 'BELGRAVIA' will contain Illustrations by Artists of eminence, and numerous Tales and Articles by Authors of repute. The following important Papers will appear in the course of 1867:—

THE COURT OF ST. JAMES'S
IN THE
REIGN OF VICTORIA:

A Series of Anecdotal and Historical Sketches, drawn from the Family Histories of the Nobility and Gentry of Great Britain.

ILLUSTRATED

By Portraits of the Present or Former Representatives of the respective Families; Occasional Views of their Seats; Autographs; Drawings of Heirlooms; Specimens of Antique Plate and Furniture; and other Relics bearing on Domestic Life in the Higher Classes of English Society.

In these Sketches of the fortunes of our Great and Ancient Families, the point of view will be PERSONAL rather than POLITICAL—the object being to present PICTURES OF SOCIETY, particularly of COURT LIFE AND MANNERS, under successive Reigns, with the ebb and flow of Patrician Power, Wealth, and Territorial grandeur.

The course of the Narratives will embrace much curious and interesting information concerning Romantic Episodes of Family History; Marriage Alliances; and singular instances of Luck in Families.

Office: 9, St. Bride's-avenue, Fleet-street.

MR. SKEET

Will publish on the 25th instant—

GRASPING at SHADOWS: a Novel.
3 vols. By Mrs. MACKENZIE DANIEL, Author of 'My Sister Minnie,' 'Old Maid of the Family,' &c.

PROVINCIAL PAPERS. By Joseph HATTON, Author of 'Bitter Sweets,' 'Against the Stream,' &c. 1 vol.

NOW READY.

NO EASY TASK: a Novel. 2 vols.
By MARK FRANCIS. [This day.]

SCENES in FRENCH MONASTERIES. By ALGERNON TAYLOR, Author of 'Convent Life in Italy.' 1 vol. with numerous Illustrations, 10s. 6d. [This day.]

RECENTLY PUBLISHED.

PAST CELEBRITIES WHOM I HAVE KNOWN. By CYRUS REDDING, Author of 'Memoirs of William Beckford,' &c. 3 vols. 21s.

"Cyrus Redding has enjoyed the friendship of some of the most eminent men of the last generation, and not a few of the present; and to those who care to see how such men lived, the present volumes will offer much of deep interest."—*Public Opinion*.

The MYSTERY of the SOUL. A Search into Man's Origin, Nature, and Destiny. By S. W. FULLOM, Author of 'The Marvels of Science.' 1 vol. 10s. 6d.
"This book is likely to stimulate further inquiry. It takes up questions of great moment, and presents them in that interesting way which independent thinking is sure to produce."
Nonconformist.

CONVENT LIFE in ITALY. By ALGERNON TAYLOR. 1 vol. 10s. 6d.

"A visit to sixty-three conventual abodes; and affords a very interesting account of monastic life."—*Globe*.
"Any one who is interested in monastic life, and curious as to the manner in which monks and friars spend their days, will find the book before us pleasant reading."—*Critic*.

10, King William-street, Charing Cross.

THE NEW NOVELS.

ANNALS of a QUIET NEIGHBOURHOOD. By GEORGE MACDONALD, M.A., Author of 'Alice Forbes,' 'David Elginbrod,' &c. 3 vols.

"This story is one to be read. No skimming of it will do. There is scarcely a page in the book which has not an attraction of its own, either in the shape of some peculiar beauty of expression or of some thought which deserves examination. The characters stand out life-like on the canvas."—*Star*.
"A tale of a more pleasing, entertaining, and instructive nature could hardly be met with."—*Observer*.

RACHEL'S SECRET. By the Author of 'THE MASTER OF MARTON.' 3 vols.

"A deeply interesting and affecting story, artistically and powerfully wrought. Whoever takes up the first of these delightful volumes is sure to read them all."—*Morning Post*.
"A novel of very considerable merit. Its story is interesting and touching. Its style is graceful and correct."—*Star*.

KINGSFORD. By the Author of 'SON and HEIR.' 3 vols.

NORA'S TRIAL. 3 vols.

"There is much to interest and entertain in the history of 'Nora's Trial.'"—*Sun*.
"This story is touching and well written."—*Star*.

LORDS and LADIES. By the Author of 'MARGARET and HER BRIDESMAIDS,' &c. 3 vols.

"'Lords and Ladies' is one of the most charming books with which the literature of fiction has been enriched this season. The truth and the value of the moral of the story will recommend it as highly as the vivacity and humour of its style and the ingenuity of its construction."—*Morning Post*.

A NOBLE LIFE. By the Author of 'JOHN HALIFAX,' 'CHRISTIAN'S MISTAKE,' &c.
"A story of powerful and pathetic interest."—*Daily News*.

The WILD FLOWER of RAVENSWORTH. By the AUTHOR of 'JOHN and I,' &c. 3 vols.

"A beautiful tale, written with deep feeling. It charms by its elegance, and moves by its pathos."—*Illustrated News*.
"A charming story of great originality, full of pathos and grand nobility of thought and action."—*Observer*.

THE MOTHER'S FAVOURITE. By S. RUSSELL WHITNEY. 3 vols.

"This story is interesting and well sustained. The character of Margaret Wendell is an exquisite creation."—*Post*.
"Mr. Whitney has worked out an ingenious, complicated, and clever plot with much accuracy and justness of proportion."—*Star*.

HURST & BLACKETT, 13, Great Marlborough-street.

Just published, post 8vo. price 4s. 6d.

THE SONG OF REST; and Minor Poems. By ALEXANDER WINTON BUCHAN.

London: Whittaker & Co. Ave Maria-lane.

A POPULAR HISTORY OF LONDON. from the Invasion of Julius Cæsar to the present time. Part the First from A.D. 55 to A.D. 1066.
By E. MOSES & SON, corner of Minories and Aldgate, New Oxford-street, and Tottenham Court-road, London; and Bradford, Yorkshire.—Gratis and post free on application.

SALOM'S NEW OPERA and FIELD GLASS, and **THE RECONNOITERER GLASS,** price 10s. 10d., sent free.—This "Tourist's Favourite," through extraordinary division of labour, distinctly shows small windows 10 miles off, landscape at 30 miles, Jupiter's moons, &c.—The **MARKIS or CARMARTHEN:** "The Reconnoiterer is very good."—**EARL OF BREADALBANE:** "I find it all you say, and wonderfully powerful for so very small a glass."—**EARL OF CAITHNESS:** "It is a beautiful glass."—**Rev. Lord SCARSDALE** "approves of it."—**Lord GIFFORD:** "Most useful."—**Lord GARRAH:** "Remarkably good."—**Sir DIGNY CAYLEY:** "It gives me complete satisfaction, and is wonderfully good."—**Capt. SNEYD:** Royal Small Arms Factory, Enfield: "I have found it effective at the 1,000-yards range."—**F. H. HAWKES,** of Farnley, Esq.: "I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power for its size with so much clearness."—**The Field:** "We have carefully tried it at an 800-yard rifle range against all the Glasses possessed by members of the Corps, and found it fully equal to any of those present, although they had cost more than four times its price."—**Notes and Queries:** "What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated "HYTHIE" GLASS shows bullet-marks at 1,200 yards, and men at 31 miles, price 3s. 6d. All the above Glasses, respectively bearing the registered trade-marks, "Salom," "Reconnoiterer," and "Hythie" are only to be had direct from **SALOM & CO.** 94, Princes-street, EDINBURGH, and 137, Regent-street, LONDON.
No Agents of any kind anywhere.

UNIVERSAL LIFE ASSURANCE SOCIETY.

1, KING WILLIAM-STREET, LONDON, E.C.

Established 1834 by Special Act of Parliament.

BREAKFAST—EPPS'S COCOA

more commonly called Epps's Homoeopathic Cocoa, as being prepared and introduced by James Epps, the Homoeopathic Chemist first established in London. The very agreeable character of this preparation has rendered it a general favourite. For breakfast no other beverage is equally invigorating and sustaining. This Cocoa is used by thousands who never used Cocoa before. "Cocoa stands far higher than tea or coffee," Dr. Hassall says.—Sold in 1 lb., 5 lb., and 1 lb. packets.

THE SMOKER'S BONBON immediately and effectually removes the Taste and Smell of Tobacco from the Mouth and Breath, and renders Smoking agreeable and safe. It is very pleasant and wholesome. Prepared by a patent process, from the recipe of an Emigrant Physician, by SCHUDDING & Co., Wholesale and Export Confectioners, Bethnal-green, London.— One Shilling per Box; post free, 14 stamps.—Sold by Chemists, Tobacconists, &c.

A BEAUTIFUL DESCRIPTIVE CATALOGUE, with Illustrative Sketches of Cabinet Furniture and Decorative Upholstery, sent free per post, or given on application. The Stock, corresponding to the List, is marked in Plain Figures, and comprises

DRAWING-ROOM FURNITURE,
In new and elegant designs, covered in Rep. Terry Cloth, French and Silk Damasks, &c. This Department is also enriched with the latest Parisian Novelties, Cabinets, Whatnots, Davenport, &c.

Good Solid Dining room Sets, in Mahogany and Oak.
Iron and Brass Bedsteads in great variety.
The new patent Spring Mattress still stands alone for cheapness and comfort.

The Bedding is all made on the Premises, and under personal inspection.
Their famous polished Pine Bed-room Suits demand special attention.

Extract from the Builder.
"We were shown a short time since a bed-room fitted up by an Earl for his own occasional occupation at the sea-side, in which every piece of furniture, save the iron bedstead, was made of the white wood in question. Dressing-table, washstand, drawers, towel-rails, and chairs, were as spotless as the crest of the waves beating on the shore, and the very height of cleanliness seemed attained."

THE STOCK OF CARPETS
Is one of the choicest in London, embracing Turkey, Velvet, Flic, Brussels, Kidder, Felts, &c.
Floor-cloth, Kampletton, Linoleum, and Cork Carpet, cut, fitted, and laid down to any size and plan.
Furnishing Library of every description.

Damask, Rep, and Flock Cloths, French and English Chintzes &c.

THE STOCK OF HOUSEHOLD LINEN
Is well worthy the attention of Clubs, Hotels, and large Consumers, who will be treated with on most liberal terms.

ATKINSON & Co.,
198, 200, 202, 204, 206, 208 and 210,
WESTMINSTER BRIDGE ROAD, LONDON.

TO CHARITABLE DONORS, the Managers of Public Institutions, Asylums and Homes.

The peculiar circumstances of this year, the late monetary crisis, and the consequent depression of the markets, in the midst of which ATKINSON & Co. made large cash purchases, enable them now to offer unusual advantages in the supply of BEDDING, BLANKETS, COUNTERPANES, and SHEETINGS, besides every description of material for warm Winter Clothing.

ATKINSON & Co.,
198, 200, 202, 204, 206, 208 and 210,
WESTMINSTER BRIDGE ROAD, LONDON.

THE DIGITORIUM, an Instrument
to enable any person to play and become perfect on the
PIANOFORTE in an incredibly short time. Dr. Holloway,
organist to Lord Arundell, writes:—"Heavy and unequal touch
of wrist, execution marred by weakness, &c. can be perfectly cured
by a few minutes' practice on a Digitorium."—Herr Lehman, of the
Conservatoire, Vienna, says:—"The Digitorium will do great
service to the artist or learner whose time is limited for prac-
tice."—Frédéric Macabée, the celebrated Pianist and Composer,
writes:—"I find the Digitorium strengthens the fingers, and gives
certainty of touch." Price 11s. 6d. Free to any Railway Station
in the Kingdom on receipt of 13s. To be had of M. MARKS,
Inventor, 53, Richmond-road, Bayswater, London, W.

Sole Consignees:
ANSAR, HARFORD & CO. 77, Strand, London, W.O.

THE POPE'S HEALTH RESTORED by **DU BARRY'S FOOD**.
—Cure No. 63,413.—"Rome, July 21st, 1866.—The health of
the Holy Father is excellent, especially since abandoning all
other remedies he has confined himself entirely to Du Barry's
Revivants, Arabic Food, which has produced a surprisingly
beneficial effect on his health, and his Holiness cannot praise
this excellent food too highly."—From the *Gazette du Midi*,
July 25th.

DU BARRY'S delicious, health-restoring **REVA-
LENTA ARABICA FOOD** restores good appetite, perfect
digestion, strong nerves, sound lungs and liver, refreshing sleep,
functional regularity and energy to the most enfeebled or disorder-
ed, without medicine, inconvenience, or expense, as it saves fifty
times its cost in other remedies, curing dyspepsia (indigestion),
constipation, flatulency, phlegm, debility, nervousness, bilious,
bilious, liver and stomach complaints, low spirits, as proved by
60,000 cases which had been considered hopeless.—In tins, at
1s. 1d.; 1lb. 2s. 9d.; 2lb. 4s. 6d.; 12lb. 22s.—**DU BARRY & CO. 77,
REGENT-STREET, London; all Grocers and Chemists.**

OLDRIDGE'S BALM of COLUMBIA has
been acknowledged for nearly half a century to be the most
effectual remedy ever produced for preventing Baldness, pro-
moting the growth of Whiskers, and permanently beautifying the
Hair. In bottles, 3s. 6d., 6s. and 12s.

22, WELLINGTON-STREET, STRAND, W.C.

Chronic Cough, General Debility, Loss of Appetite, &c., by the
Syrups of Hypophosphite of Lime, Soda, and Iron, and by the
Pills of Hypophosphite of Quinine and Potash, prepared by
H. H. SWANN, of Paris. Price 4s. 6d. per bottle.

Wholesale and Retail Agents,
DINNEFORD & CO., Chemists, 172, New Bond-street, London.

DINNEFORD'S FLUID MAGNESIA.—The
Medical Profession for thirty years have approved of this
pure Solution of Magnesia as the best remedy for Acidity of the
Stomach, Headache, Heartburn, Gout and Indigestion; and as
a mild aperient it is especially adapted for Ladies and Children.
Prepared by

**DINNEFORD & CO., Chemists, &c.,
172, NEW BOND-STREET, LONDON, W.**

And sold throughout the World by all respectable Chemists.
Caution.—See that "Dinneford & Co." is on each Bottle and red
label over the cork.

WIND in the STOMACH, or Flatulence, for
which carbonate of soda is so often taken, is caused by
imperfect digestion. A radical cure may be effected by the occa-
sional use of **PARR'S LIFE PILLS**. May be had of any Chem-
ist.

AUTUMN COUGHS, COLDS, ASTHMA,
and INFLUENZA are speedily cured by the use of
SPENCER'S PULMONIC ELIXIR. May be had of any Chem-
ist.

PERFECT REGULARITY of the BOWELS
is an essential condition for good health. **PARR'S LIFE
PILLS** promote appetite, aid digestion, purify the blood, and
keep the bowels regular. May be had of any Chemist.

BILE and INDIGESTION, Sick Headache,
Flatulency, Heartburn, and all Bilious and Liver Affections,
are speedily removed by the use of

COCKLE'S ANTIBILIOUS PILLS,
which have been held in the highest estimation by all classes of
society for upwards of sixty-five years. May be had throughout
the United Kingdom, in Boxes at 1s. 1d., 2s. 9d., 4s. 6d. and 11s.

CHAPPELL & CO'S

THREE YEARS' SYSTEM OF HIRE AND PURCHASE OF PIANOFORTES.

CHAPPELL & CO. LET on HIRE, for Three

Years certain (by Quarterly payments in advance), the following PIANOFORTES: At 10 Guineas per annum, an elegant Pianino, by Bord, of Paris, in best Walnut or Rosewood, with ornamented Fret, 6½ Octaves, Check Action, and Three Strings throughout the Treble; cash price, 27 Guineas. At 15 Guineas per annum, an English Model Pianoforte, by Chappell & Co., in very handsome Rosewood, with truss legs, or in Walnut case, 6½ Octaves; cash price, 40 Guineas. At 20 Guineas per annum, a Foreign Model Pianoforte, by Chappell & Co., in Rosewood or Walnut case, 7 Octaves, Check Action, and Three Strings throughout; cash price, 60 Guineas. At the expiration of Three Years (provided each Quarterly Instalment shall have been paid in advance) the Instrument becomes the property of the Hirer. Other descriptions on a similar arrangement. Illustrated Lists may be had on application to CHAPPELL & Co., 50, New Bond-street.

PIANOFORTES by Broadwood, Collard, and

Erard.—CHAPPELL & CO'S THREE YEARS' SYSTEM extends to PIANOFORTES by the above and other celebrated Makers. Full particulars may be had on application to CHAPPELL & Co., 50, New Bond-street.

NEW DANCE MUSIC.

ADÈLE WALTZ, By DAN GODFREY. Played at Her Majesty's State Ball. 4s.

BARBE-BLEUE QUADRILLE. By DAN GODFREY. On Airs from Offenbach's Opera. 4s.

LES DEUX ARLEQUINS QUADRILLE. By STRAUSS. 3s.

SICILY QUADRILLE. A new and charming Quadrille, by CHARLES D'ALBERT. A companion Quadrille to his celebrated 'Como' and 'Palermo.' Most beautifully illustrated, and played with unprecedented success at Ardit's Concerts. Solo or Duet, 4s.

HILDA WALTZ. By D. GODFREY (Composer of the Guards' and Mabel Waltzes). Played every evening at Ardit's Concerts, and with immense success by the Band of the Grenadier Guards during the visit of the Prince and Princess of Wales to Knowsley, and dedicated, by permission, to the Baroness Ferdinand de Rothschild. Solo or Duet, 4s.

"The new waltzes, 'Mabel' and 'Hilda,' by Mr. Godfrey, are certainly most fascinating compositions, and we are not surprised to learn that the Prince of Wales especially complimented the composer upon the merits of 'Hilda' at Knowsley."—*Liverpool Mail*.

* Twilight Dreams. New Waltz, and one of the prettiest ever written, by that celebrated composer Charles D'Albert. Solo or Duet, 4s.

* Home, Sweet Home. New Waltz, by Charles D'Albert, on the favourite melody of 'Home, Sweet Home.' Solo or Duet, 4s.

* Mabel Waltz. By D. Godfrey. 4s.

* Guards' Waltz. By D. Godfrey. 4s.

* Africanine Waltz. By D. Godfrey. 4s.

* Mill Grove Waltz. By G. Stanley. 4s.

* May Waltz. By Alfred Mellon. 4s.

* Royal Alfred Quadrille. By D. Godfrey. 4s.

* Denmark Quadrille. By D. Godfrey. 4s.

* Orpheus Quadrille. By D. Godfrey. 3s.

* Orpheus Galop. By D. Godfrey. 4s.

* Merry Tunes Lancers. By D. Godfrey. 4s.

* Guards' Quadrille. By D. Godfrey. 4s.

* Africanine Quadrille. By C. Coote. 4s.

* Trooper's Galop. By Waterson. 3s.

* Jockey Galop. By A. F. Godfrey. 3s.

* Faust Waltz. By C. Coote. 4s.

* Faust Quadrille. By C. Coote. 4s.

* Faust Polka. By F. Wallerstein. 3s.

* Faust Galop. By C. Coote. 3s.

* The Hunt Quadrille. By A. F. Godfrey. 4s.

* Bolero Waltz. By F. Wallerstein. 4s.

* Vale of Strathmore Waltz. By W. Winterbottom. 4s.

* The Mabel Galop. By D. Godfrey. 3s.

Those marked * can be had for Full Orchestra, 3s.; Septet, 2s.

N.B.—Many of the above and other popular Waltzes, &c. are published in Chappell & Co.'s 'Brass Band Journal,' for large or small Bands, each 7s. 6d. Lists of Contents may be had on application.

ORGANIST'S PORTFOLIO, a splendid Collection of Opening and Concluding Voluntaries for Organ or Harmonium, with and without Pedal obligato, by Dr. RIMBAULT. 3 vols. each 12s.

(Vol. III. is in the press.)

GOUNOD'S WORKS for PIANOFORTE. Faust, complete, for Pianoforte, 7s. 6d. Grand Mass, complete, for Pianoforte, 5s. (As performed at St. Andrews, Wells-street.) Mock Doctor, complete, for Pianoforte, 5s.

CHAPPELL & CO'S

THREE YEARS' SYSTEM OF HIRE AND PURCHASE OF HARMONIUMS.

CHAPPELL & CO. LET on HIRE all the

best ALEXANDRE HARMONIUMS for Three Years certain (by Quarterly payments in advance), after which the Instrument becomes the property of the Hirer. A Three Stop, price 16 Guineas, or 31s. 6d. per Quarter for Three Years. A Six Stop, price 22 Guineas, or 42s. a Quarter. A Ten Stop, price 28 Guineas, or 2l. 12s. 6d. a Quarter. And all other Instruments by this celebrated Maker in a like proportion. Lists on application to CHAPPELL & Co., 50, New Bond-street.

ALEXANDRE HARMONIUMS, on the

THREE YEARS' SYSTEM OF HIRE AND PURCHASE.—Alexandre's celebrated Drawing-room Model Instrument, with Sixteen Stops, Percussion Action, and all the latest improvements, price 60 Guineas; or if hired for Three Years certain, paying 5 Guineas per Quarter in advance, the Instrument becomes the property of the Hirer, without any further payment whatever. The Large Drawing-room Model is the most perfect Harmonium for private use.

IMPORTANT TO THE CLERGY.

ALEXANDRE'S EXHIBITION MODEL, for

the CHURCH, with Thirteen Stops, Venetian Swell, &c., in Oak case, price 22 Guineas; or if hired for Three Years certain, paying 3 Guineas per Quarter in advance, the Instrument becomes the property of the Hirer. An excellent Harmonium for Church or Chapel.

CHAPPELL & CO'S EDITION OF POPULAR OPERAS, arranged for the PIANOFORTE.

Great care has been taken in this Edition to render the Works complete in every respect. Each Opera is bound in cloth, and preceded by an analysis of the plot, together with a full description of the Music, by G. A. MACFARREN.

THE NEW ASTRONOMICAL TELE-
SCOPES, with Silvered Glass Specula.—A Complete DESCRIPTION of these Instruments, with Instructions for adjusting and using them; also, Appendices on Working and Silvering the Specula, with many Illustrations. By JOHN BROWNING, F.R.A.S. Price One Shilling; post free for Thirteen stamps.
JOHN BROWNING, 111, Moities, E.

THE CHADBURN LANTERN, for projecting
enlarged images upon a Screen (similar to the Magic Lantern) from a series of objects. This instrument supplies a great want in scientific and amusing illustrations: by it Coins, Medals, Moving Mechanisms (interior of watches), Minerals, Fossils, Drawings, Book Illustrations, Photographs, &c. are shown in all their colour and detail,—thus rendering paintings on glass needless.—To be had direct from C. H. CHADBURN & SON, Opticians and Instrument-Makers to H.R.H. the late Prince Consort, Liverpool.

DEBENTURES at 5, 5½, and 6 per Cent.—

Directors.

Chairman.—LAWFORD ACLAID, Esq.
Major-Gen. H. Pelham Burn.
Harry George Gordon, Esq.
George Ireland, Esq.
Duncan James Kay, Esq.

Stephen P. Kennard, Esq.

Patrick F. Robertson, M.P.

Esq.

Robert Smith, Esq.

Manager.—O. J. BRAINE, Esq.

The Directors are prepared to ISSUE DEBENTURES on the following terms, viz.: for One Year, at 5 per cent., for Three Years, at 5½ per cent., and for Five Years and upwards, at 6 per cent., per annum.

Applications for particulars to be made at the Office of the Company, No. 7, East India Avenue, Leadenhall-street, London, E.C.

By order, B. A. CAMERON, Secretary.

BOOKBINDING—in the MONASTIC, GROlier, MAJOLI and ILLUMINATED styles—in the most superior manner, by English and Foreign workmen.

JOSEPH ZAHNENDORF,

BOOKBINDER TO THE KING OF HANOVER.

English and Foreign Bookbinder,

30, BRIDGES-STREET, COVENT-GARDEN, W.C.

Sales by Auction

MESSRS. SOUTHGATE & CO., Auctioneers
of Libraries and Works connected with the Fine Arts, 143, STRAND, eight doors west of Somerset House (late of 23, Fleet-street), beg to call the attention of Noblemen, Gentlemen, Executors, the Trade, and others connected with Literature and the Fine Arts (either as Purchasers or Sellers) to the fact of their having REMOVED their old-established Business from their late Rooms, 23, Fleet-street, to far more eligible Premises, situate in one of the leading thoroughfares (143, STRAND) of this vast and intellectually increasing City, thus offering to their numerous and influential connexion greater facilities than they previously could have done in their old premises. With these obvious advantages, Messrs. SOUTHGATE & CO. respectfully solicit a continuance of the patronage of their friends, the Trade, and the public.

Large and small Collections of Books, Pictures, Water-Colour Drawings, Coins, Old China, &c., most carefully catalogued, valued, and arranged for purposes of Sale by Auction or private disposal.

Gentlemen favouring Messrs. Southgate & Co. with large or small consignments can have them advantageously introduced into any of the forthcoming Sales announced below.

Valuations made for Probate and other purposes.

AUCTION ROOMS, 143, STRAND (late 23, Fleet-street), eight doors west of Somerset House.
